1 PHIL 320GW satisfies the Graduation Writing Assessment Requirement (GWAR). Students who have satisfied GWAR in a discipline other than philosophy will still be required to complete PHIL 320GW as a requirement of the major.

**Complementary Studies for the Philosophy Major**

Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degrees in Philosophy. These units must come from courses bearing a prefix other than PHIL, and not cross-listed with PHIL.

Philosophy majors are given a multitude of pathways toward completing this requirement, each of which is designed to facilitate graduation in a timely manner and deepen the student’s knowledge and appreciation of a philosophical topic in a multi-disciplinary way. Philosophy majors may, with the approval of a department advisor, elect to apply 12 units in a single foreign language of their choosing or courses taken in an approved study abroad program (e.g., CSU Study Abroad). Otherwise, with the approval of a department advisor, the student may take 12 units of courses that complement an area of philosophical specialization. Philosophy is rich in such specializations. Here are some illustrative philosophical specializations in which studying philosophy and studying...
other disciplines is complementary: Philosophy of the Arts, Ancient Philosophy, Asian Philosophy, Bioethics/Medical Ethics, Business Ethics, Philosophy of Cinema, Philosophy of Dance, Philosophy of Economics, Environmental Philosophy, Global Justice, Islamic Philosophy, Philosophy of Language, Philosophy of Law, Philosophy of Literature, Logic and Philosophy of Mathematics, Philosophy of Music, Philosophy of Mind, Modern European Philosophy, Philosophy of Music, Philosophy of Perception, Philosophy of Photography, Philosophy of Psychology/ Cognitve Science, Political Philosophy and Social Justice, Philosophy of Religion, Philosophy of Sexuality, Philosophy of Science and Technology, Philosophy and Society, Philosophy of Social Science, Philosophy of Sport, Philosophy of Under-represented Groups, Philosophy of Women and Gender. To accommodate emerging areas of philosophical study, students are encouraged to design 12 unit modules for the review and approve of the department advisor.

</table>

Note: LD = Lower Division; UD = Upper Division.

**Transfer Student Roadmap (2 Year)**

For students with an AA-T in Philosophy. This roadmap opens in a new tab. (p. 978)

This degree program is an approved pathway ("similar" major) for students earning the ADT in Philosophy

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.
General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements.

Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission.

For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

**Total Units:** 15

1. To avoid taking additional units, it is recommended that you meet **LLD and SF State Studies** requirements (AERM, GP, ES, SJ) within your GE or major.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.

### Complementary Studies for the Philosophy Major

Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degrees in Philosophy. These units must come from courses bearing a prefix other than PHIL, and not cross-listed with PHIL. Philosophy majors are given a multitude of pathways toward completing this requirement, each of which is designed to facilitate graduation in a timely manner and deepen the student’s knowledge and appreciation of a philosophical topic in a multi-disciplinary way. Philosophy majors may, with the approval of a department advisor, elect to apply 12 units in a single foreign language of their choosing or courses taken in an approved study abroad program (e.g., CSU Study Abroad). Otherwise, with the approval of a department advisor, the student may take 12 units of courses that complement an area of philosophical specialization. Philosophy is rich in such specializations. Here are some illustrative philosophical specializations in which studying philosophy and studying other disciplines is complementary: Philosophy of the Arts, Ancient Philosophy, Asian Philosophy, Bioethics/Medical Ethics, Business Ethics, Philosophy of Cinema, Philosophy of Dance, Philosophy of Economics, Environmental Philosophy, Global Justice, Islamic Philosophy, Philosophy of Language, Philosophy of Law, Philosophy of Literature, Logic and Philosophy of Mathematics, Philosophy of Music, Philosophy of Mind, Modern European Philosophy, Philosophy of Music, Philosophy of Perception, Philosophy of Photography, Philosophy of Psychology/Cognitive Science, Political Philosophy and Social Justice, Philosophy of Religion, Philosophy of Sexuality, Philosophy of Science and Technology, Philosophy and Society, Philosophy of Social Science, Philosophy of Sport, Philosophy of Under-represented Groups, Philosophy of Women and Gender. To accommodate emerging areas of philosophical study, students are encouraged to design 12 unit modules for the review and approve of the department advisor.

# Bachelor of Arts in Philosophy – PHIL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AA-T in Philosophy. Up to three units in the major and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

<tr>
<td>Total Units</td>
</tr>
</tbody>
</table>

1. Students who have taken Symbolic Logic before transfer should take a Major History course (PHIL 301 or PHIL 302 or PHIL 516). Students who haven’t taken Symbolic Logic should take PHIL 205. Contact a Philosophy Department advisor for questions about the symbolic logic requirement.

2. If ENG 214 or equivalent is not completed prior to transfer, it will take a minimum of five semesters to complete degree requirements because it is a prerequisite for PHIL 320GW and many other upper division PHIL courses, including those satisfying UD GE.

3. PHIL 301, PHIL 302, PHIL 303, PHIL 450 and PHIL 516 fulfill GE UD-C.

4. PHIL 335 fulfills GE UD-D.

5. PHIL 350, PHIL 351, PHIL 621 fulfill GE UD-B.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 9–18 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE (9 units) – See grid above for courses that fulfill both Major requirements and UD GE.
- Students entering this major with the AA-T in Philosophy are not required to fulfill SF State Studies requirements.
- Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

**Philosophy Major: 37–40 Units**

Students are advised to work with a department advisor on the selection of courses.

- Foundation/GWAR (3–6 units): See note 2 above regarding PHIL 205.
- History (6 units)
- Normative Issues (9 units)
- Core Issues of the Discipline (9 units)
- Electives (9 units)
- Culmination (1 unit)

**University Electives: 11 or More Units**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major.
Bachelor of Arts in Philosophy and Religion

The Philosophy and Religion degree program has some general aims similar to those of the Philosophy program; in addition, this course of study assists students in the exploration of the origin, nature, and structure of the quest for human meaning. The philosophy and religion degree includes the study of the spiritual thought and practice of diverse groups, communities, and individuals throughout the ages. Courses emphasize the central importance of integrating diverse areas of knowledge and experience into wider visions of human community, reading and analyzing texts, and developing skills for the disciplines of profound self-reflection and contemplation. Students will gain basic knowledge about diverse religious traditions and develop a deeper understanding of their special areas of interest. The goal of this program is to provide students with techniques and insights needed for rigorous examination of the issues, experiences, and concerns arising from religious quests for certainty, community, and social justice.

The department welcomes students from other majors or programs who wish to examine their personal philosophy and religious beliefs and practices, investigate the philosophies and religions of others, or sharpen their skills as independent thinkers.

Many of the courses offered are not only appropriate as part of a philosophy and religion major but are of special interest to students in other fields. These courses are designed to help students understand the theoretical frameworks, religious implications, and more abstract dimensions of the paramount areas of knowledge. Students interested in either the philosophical and religious understanding of a field of knowledge, or in philosophy and religion for self-understanding, should feel free to consult the department chairperson or an advisor on appropriate courses.

The philosophy and religion major program includes six units from related fields. This gives students an opportunity to integrate courses offered by other departments into the major, so long as those courses are substantially concerned with philosophy or religion and approved by an advisor. Undergraduate advisors are also authorized by the department to designate units obtained in other departments as satisfying unit requirements. Neither students nor advisors should view this as an escape clause which enables a student who has not quite satisfied the major requirements in philosophy and religion to do so. Units outside the department are to be designated for use in the major on the basis of their contribution to the student's major program. In order to avoid confusion on this point, students should obtain written approval from an advisor before obtaining non-department units to be utilized in the major.

Students who have not taken PHIL 110 may begin the program but should complete this course or its equivalent at the earliest opportunity. Equivalencies must be approved by a departmental advisor.

The Bachelor of Arts in Philosophy and Religion requires a minimum of 40 units, with at least 31 of these units being upper division. The program culminates in a one-unit personalized learning outcomes course in which students reflect philosophically on their development of skills and knowledge. This learning outcomes course, PHIL 696, can be taken in either the first or second semester of the student’s senior year.

The program offers a great deal of flexibility, permitting individualized emphases in specific areas. Students majoring in philosophy and religion are urged to lay out a tentative program of courses with their advisors early in their tenure at the university. Depending upon the student’s area of specialization, up to six units of courses outside the philosophy department may be approved by a department advisor as elective units for the B.A.

Career Outlook

A principal reason for the study of philosophy and religion is the enrichment of one's own life and understanding. Fortunately, the study of philosophy and religion also is an excellent preparation for a variety of post-baccalaureate professional studies and careers in law, medicine, public policy and strategic planning, the helping professions, computer-assisted enterprises, and innovative business and non-profit organizations.

The broader outlook and the ability to think critically about larger issues that are fostered by the systematic study of philosophy and religion are often highly valued by commercial firms in their management level personnel. Some students continue to graduate work in philosophy or religious studies. SF State graduates now are teaching in colleges across the country. And opportunities to teach philosophy in K–12 have increased as educators realize the importance of enhancing children’s critical thinking skills. The philosophy and religion program is a strong foundation for the helping professions, the ministry, and advanced studies in theology.

The B.A. in Philosophy and Religion requires a minimum of 40 units of which at least 31 must be upper division units.

PHIL 696 Directed Reading: Learning Outcomes 1

PHIL 320GW satisfies the Graduation Writing Assessment Requirement (GWAR). Students who have satisfied GWAR in a discipline other than philosophy will still be required to complete PHIL 320GW as a requirement of the major.

Complementary Studies for the Philosophy and Religion Major
Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degrees in Philosophy and Religion. These units must come from courses bearing a prefix other than PHIL, and not cross-listed with PHIL. Philosophy and Religion majors are given a multitude of pathways toward completing this requirement, each of which is designed to facilitate graduation in a timely manner and deepen the student's knowledge and appreciation of a set of relevant issues in a multi-disciplinary way. Philosophy and Religion majors may, with the approval of a department advisor, elect to apply 12 units in a single foreign language of their choosing or; courses taken in an approved study abroad program (e.g., CSU Study Abroad). Otherwise, with the approval of a department advisor, the student may take 12 units of courses that complement the study of philosophy and religion. The study of philosophy and religion is enhanced by learning drawn from complementary areas, such as history and culture of Africa, American Indian studies, the arts, alternative medicine, history and culture of ancient religions, history and culture of Asian religions, bioethics/medical ethics and healing professions, business ethics, cinema studies, counseling, environmental studies, global history and culture, history and culture of Islam, Jewish studies, holistic medicine, the human sciences, oral and written communication, legal studies, literary studies, European studies, history and culture of Latin/Latino peoples, music, justice studies, LGBTQ studies, religious studies, sexuality studies, social justice, the social sciences, under-represented groups, women and gender studies. To accommodate emerging areas of philosophical study, students are encouraged to design 12-unit modules for the review and approval of the department advisor.

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

Note: LD = Lower Division; UD = Upper Division.

Transfer Student Roadmap (2 Year)
For students with an AA-T in Philosophy. This roadmap opens in a new tab. (p. 986)

This degree program is an approved pathway ("similar" major) for students earning the ADT in Philosophy

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major.
Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

• The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

Total Units 120-122

1 PHIL 110 or equivalent.
2 To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.
3 ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
4 Complementary Studies for the Philosophy Major

Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degrees in Philosophy and Religion. These units must come from courses bearing a prefix other than PHIL, and not cross-listed with PHIL. Philosophy and Religion majors are given a multitude of pathways toward completing this requirement, each of which is designed to facilitate graduation in a timely manner and deepen the student’s knowledge and appreciation of a set of relevant issues in a multi-disciplinary way. Philosophy and Religion majors may, with the approval of a department advisor, elect to apply 12 units in a single foreign language of their choosing or; courses taken in an approved study abroad program (e.g., CSU Study Abroad). Otherwise, with the approval of a department advisor, the student may take 12 units of courses that complement the study of philosophy and religion. The study of philosophy and religion is enhanced by learning drawn from complementary areas, such as history and culture of Africa, American Indian studies, the arts, alternative medicine, history and culture of ancient religions, history and culture of Asian religions, bioethics/medical ethics and healing professions, business ethics, cinema studies, counseling, environmental studies, global history and culture, history and culture of Islam, Jewish studies, holistic medicine, the human sciences, oral and written communication, legal studies, literary studies, European studies, history and culture of Latina/Latino peoples, music, justice studies, LGBTQ studies, religious studies, sexuality studies, social justice, the social sciences, under-represented groups, women and gender studies. To accommodate emerging areas of philosophical study, students are encouraged to design 12-unit modules for the review and approval of the department advisor.

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

5 PHIL 320GW satisfies the Graduation Writing Assessment Requirement (GWAR). Students who have satisfied GWAR in a discipline other than philosophy will still be required to complete PHIL 320GW as a requirement of the major.

6 PHIL 436 Islamic Political Philosophy (3 units)
PHIL 494 Philosophy and Personal Development (3 units)
or up to two 500 level Philosophy courses
# Bachelor of Arts in Philosophy and Religion – PHIL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AA-T in Philosophy. All lower division GE requirements have been satisfied. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

1 PHIL 303, PHIL 436, PHIL 450, PHIL 500, PHIL 502, PHIL 516 and PHIL 525 satisfy Upper Division GE: UD-C.

2 ENG 214 or equivalent is a prerequisite for many upper division PHIL courses. If ENG 214 or equivalent is not completed prior to transfer, PHIL 320GW and PHIL 303 must be taken in the second semester; progress in the major and length of time for degree completion may be affected.

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

University-Wide Requirements: 9–18 Units

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE (9 units): See grid above for courses that fulfill both Major requirements and UD GE.
- Students entering this major with the AA-T in Philosophy are not required to fulfill SF State Studies requirements.
- Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

Philosophy and Religion Major: 40 Units

Students in this major are strongly advised to work with a department advisor to form a tentative program of courses.

- Foundation (9 units)
- Comparative Thought (9 units)
- History (9 units)
- Philosophical Concepts (6 units)
- Electives from Related Fields (6 units) – consult with major advisor
- Culmination (1 unit)

University Electives: Two or More Units

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major
Bachelor of Arts in Philosophy: Emphasis in Philosophy and Law

Philosophy and Law Emphasis

The Philosophy and Law emphasis enables students to earn a philosophy degree while focusing on our department’s rich array of undergraduate courses that consider such topics as the foundation of law, legal reasoning, U.S. and global human rights, social justice, law and society, health care law, sex and the law, philosophical foundations of the U.S. Constitution, philosophy of criminal justice, wrongs as crimes and torts, and theories of ethics and political philosophy that influence jurisprudence. Philosophy majors consistently receive the highest scores on the law school admissions test (LSAT). This program positions them to excel in law and public policy.

The enterprise of philosophy requires sharpening the skills necessary for clarifying premises, uncovering presuppositions (one’s own and those of others), weighing the pros and cons of conflicting values, and analyzing concepts and issues, all of which are crucial for graduate programs in law and public policy. Courses in philosophy serve to develop and enhance these skills. Some courses concentrate on specific philosophical issues. Others provide an overview of an entire area of human inquiry or endeavor (such as the sciences, the arts, political theory and law, medicine, social justice, and how our minds, senses, and emotions work) or of the philosophical foundations that characterize a historical period.

The department welcomes students from other majors or programs who wish to acquire excellent training for law schools, public policy programs, and the competitive admissions processes to these programs.

The emphasis in philosophy and law includes three units from related fields. This gives students an opportunity to integrate courses offered by other departments into the major, so long as those courses are substantially concerned with law and approved by an advisor. Undergraduate advisors are also authorized by the department to designate units obtained in other departments as satisfying unit requirements. Neither students nor advisors should view this as an escape clause which enables a student who has not quite satisfied the requirements of the philosophy and law emphasis to do so. Units outside the department are to be designated for use in the major on the basis of their contribution to the student’s major program. In order to avoid confusion on this point, students should obtain written approval from an advisor before obtaining non-departmental units to be utilized in the major.

Students who have not taken PHIL 110 may begin the program but should complete this course or its equivalent at the earliest opportunity. Equivalencies must be approved by a departmental advisor.

The Bachelor of Arts in Philosophy with Emphasis in Philosophy and Law requires a minimum of 43 units, with at least 31 of these units being upper division. The program culminates in a one unit personalized learning outcomes course in which students reflect philosophically on their own development of skills and knowledge. This learning outcomes course, PHIL 696, can be taken in either the first or second semester of the student’s senior year.

To best take advantage of the program’s tremendous resources in preparing students for law school, students pursuing the emphasis in philosophy and law are urged to lay out a tentative program of courses with their advisors early in their tenure at the university. Depending upon the student’s area of specialization, up to six units of courses outside the philosophy department may be approved by a department advisor as elective units for the B.A.

WGS 534 Gender and the Law 3

Culmination (1 Unit)

PHIL 696 Directed Reading: Learning Outcomes 1

1 PHIL 320GW satisfies the Graduation Writing Assessment Requirement (GWAR). Students who have satisfied GWAR in a discipline other than philosophy will still be required to complete PHIL 320GW as a requirement of the major.

Complementary Studies for the Philosophy Major

Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degrees in Philosophy. These units must come from courses bearing a prefix other than PHIL, and not cross-listed with PHIL. Philosophy majors are given a multitude of pathways toward completing this requirement, each of which is designed to facilitate graduation in a timely manner and deepen the student’s knowledge and appreciation of a philosophical topic in a multi-disciplinary way. Philosophy majors may, with the approval of a department advisor, elect to apply 12 units in a single foreign language of their choosing or courses taken in an approved study abroad program (e.g., CSU Study Abroad). Otherwise, with the approval of a department advisor, the student may take 12 units of courses that complement an area of philosophical specialization. Philosophy is rich in such specializations. Here are some illustrative philosophical specializations in which studying philosophy and studying other disciplines is complementary: Philosophy of the Arts, Ancient Philosophy, Asian Philosophy, Bioethics/Medical Ethics, Business Ethics, Philosophy of Cinema, Philosophy of Dance, Philosophy of Economics, Environmental Philosophy, Global Justice, Islamic Philosophy, Philosophy of Language, Philosophy of Law, Philosophy of Literature, Logic and Philosophy of Mathematics, Philosophy of Music, Philosophy of Mind, Modern European Philosophy, Philosophy of Music, Philosophy of Perception, Philosophy of Photography, Philosophy of Psychology/Cognitive Science, Political Philosophy and Social Justice, Philosophy of Religion, Philosophy of Sexuality, Philosophy of Science and Technology, Philosophy and Society, Philosophy of Social Science, Philosophy of Sport, Philosophy of Under-represented Groups, Philosophy of Women and Gender. To accommodate emerging areas of philosophical study, students are encouraged to design 12 unit modules for the review and approve of the department advisor.

SF State Studies

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM)  LD or UD  3
Environmental Sustainability (ES)  LD or UD  3
Global Perspectives (GP)  LD or UD  3
Social Justice (SJ)  LD or UD  3

Note: LD = Lower Division; UD = Upper Division.

First Time Student Roadmap (4 Year)

This roadmap (p. 992) opens in a new tab

Transfer Student Roadmap (2 Year)

For students with an AA-T in Philosophy. This roadmap (p. 995) opens in a new tab.

This degree program is an approved pathway (“similar” major) for students earning the ADT in Social Justice Studies

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.

2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.
All students must meet the transfer eligibility requirements outlined below for admission.
For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

Core Philosophy Areas (6 units) 8
Complementary Studies or SF State Studies or University Elective – Take Three 5

Units 15

Total Units 120-123

1 PHIL 110 or equivalent.

2 To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

3 ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

4 Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.

5 Complementary Studies for the Philosophy Major

Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degrees in Philosophy. These units must come from courses bearing a prefix other than PHIL, and not cross-listed with PHIL. Philosophy majors are given a multitude of pathways toward completing this requirement, each of which is designed to facilitate graduation in a timely manner and deepen the student’s knowledge and appreciation of a philosophical topic in a multi-disciplinary way. Philosophy majors may, with the approval of a department advisor, elect to apply 12 units in a single foreign language of their choosing or courses taken in an approved study abroad program (e.g., CSU Study Abroad). Otherwise, with the approval of a department advisor, the student may take 12 units of courses that complement an area of philosophical specialization. Philosophy is rich in such specializations. Here are some illustrative philosophical specializations in which studying philosophy and studying other disciplines is complementary: Philosophy of the Arts, Ancient Philosophy, Asian Philosophy, Bioethics/Medical Ethics, Business Ethics, Philosophy of Cinema, Philosophy of Dance, Philosophy of Economics, Environmental Philosophy, Global Justice, Islamic Philosophy, Philosophy of Language, Philosophy of Law, Philosophy of Literature, Logic and Philosophy of Mathematics, Philosophy of Music, Philosophy of Mind, Modern European Philosophy, Philosophy of Music, Philosophy of Perception, Philosophy of Photography, Philosophy of Psychology/Cognitive Science, Political Philosophy and Social Justice, Philosophy of Religion, Philosophy of Sexuality, Philosophy of Science and Technology, Philosophy and Society, Philosophy of Social Science, Philosophy of Sport, Philosophy of Under-represented Groups, Philosophy of Women and Gender. To accommodate emerging areas of philosophical study, students are encouraged to design 12 unit modules for the review and approval of the department advisor.

Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AA-T in Philosophy. Up to three units in the major and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

Total Units 60

---

1. Students who have taken Symbolic Logic may take a University Elective. Students who haven’t taken Symbolic Logic should take PHIL 205.
2. PHIL 303, PHIL 330, PHIL 380 and PHIL 450 satisfy Upper Division GE: UD-C.
3. If ENG 214 or equivalent is not completed prior to transfer, it will take a minimum of five semesters to complete degree requirements because it is a prerequisite for PHIL 320GW and many other upper division PHIL courses, including those satisfying UD GE.
4. PHIL 621 fulfills Upper Division GE: UD-B.
5. PHIL 335 fulfills Upper Division GE: UD-D.
To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

University-Wide Requirements: 9–18 Units

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE (9 units): See grid above for courses that fulfill both Major and UD GE requirements.
- Students entering this major with the AA-T in Philosophy are not required to fulfill SF State Studies requirements.
- Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

Philosophy (Emphasis in Philosophy and Law) Major: 40–44 Units

Students are advised to work with a department advisor on the selection of courses.

- Required/GWAR (12–15 units): See note 2 above regarding PHIL 205.
- Disjunctive History (3 units)
- Core Philosophy Areas (6 units)
- Normative Issues (15 units)
- Elective (3–4 units)
- Culmination (1 unit)

University Electives: Seven or More Units

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major.
### Bachelor of Art in Philosophy: Emphasis in Philosophy and Law – SJS

#### Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AA-T in Social Justice Studies. Up to three units in the major and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

¹ PHIL 301, PHIL 302, PHIL 303, PHIL 330, PHIL 380, PHIL 450 PHIL 516 satisfy Upper Division GE: UD-C.

² If ENG 214 or equivalent is not completed prior to transfer, it will take a minimum of five semesters to complete degree requirements because it is a prerequisite for PHIL 320GW and many other upper division PHIL courses, including those satisfying UD GE.

³ PHIL 205 is highly recommended but not required of SJS AA-T students. Contact a Philosophy Department advisor for questions about this recommendation.

⁴ PHIL 335 fulfills Upper Division GE: UD-D.

⁵ PHIL 395 satisfies UD-B.
To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

University-Wide Requirements: 9–18 Units

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE (9 units): See grid above for courses that fulfill both Major and UD GE requirements.
- Students entering this major with the AA-T in Social Justice Studies are not required to fulfill SF State Studies requirements.
- Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

Philosophy (Emphasis in Philosophy and Law) Major: 40–44 Units

Students are advised to work with a department advisor on the selection of courses.

- Required/GWAR (15 units): See note 3 above regarding PHIL 205.
- Disjunctive History (3 units)
- Core Philosophy Areas (6 units)
- Normative Issues (15 units)
- Elective (3–4 units)
- Culmination (1 unit)

University Electives: Seven or More Units

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major.
Minor in Philosophy

The department welcomes students from other majors or programs who wish to examine their personal philosophy, investigate the philosophies of others, or sharpen their skills as independent thinkers. The enterprise of philosophy develops a wide array of skills necessary for clarifying premises, uncovering presuppositions (one’s own and those of others), weighing the pros and cons of conflicting values, and analyzing concepts and issues. Courses in philosophy serve to develop and enhance these skills. Some courses concentrate on specific philosophical issues. Others provide an overview of an entire area of human inquiry or endeavor (such as the sciences, the arts, political theory and law, medicine, social justice, and how our minds, senses, and emotions work) or of the philosophical foundations that characterize a historical period.

A great number of the courses offered are not only appropriate as part of a philosophy major but are of special interest to students in other fields. These courses are designed to help students understand the theoretical frameworks, methodological presuppositions, and more abstract dimensions of the paramount areas of knowledge.

Each student minoring in philosophy must take at least 21 units in philosophy, at least 15 of these being upper division units.

The flexibility of the philosophy minor and the wide array of philosophy courses allows students to choose a course of study that best suits their interests and complements their major program. Students interested in either the philosophical understanding of a field of knowledge or in philosophy for self-understanding should feel free to consult the department chairperson or an advisor on appropriate courses.

Minor in Philosophy and Religion

Philosophy and Religion Minor — 21 units

<table>

</tbody>
</table>

The department welcomes students from other majors or programs who wish to examine their personal philosophy or religious beliefs, investigate the philosophies or religious views of others, or sharpen their skills as independent thinkers.

Many of the courses offered are not only appropriate as part of a philosophy and religion minor but are of special interest to students in other fields. These courses are designed to help students understand the theoretical frameworks, religious implications, and more abstract dimensions of the paramount areas of knowledge.

The flexibility of the philosophy and religion minor and the wide array of philosophy courses allows students to choose a course of study that best suits their interests and complements their major program. Students interested in either the philosophical and religious understanding of a field of knowledge, or in philosophy and religion for self-understanding, should feel free to consult the department chairperson or an advisor on appropriate courses.

Master of Arts in Philosophy

Admission to Program

To enter this program with classified graduate status, students should have completed the following five SF State undergraduate courses (or equivalents philosophy courses at another university) with a grade of B or better. Students who have not completed these prerequisites may begin the program as conditionally classified with the approval of the Graduate Coordinator in philosophy, but they will be required to make up any deficiencies by receiving a grade of 3.0 or better in each prerequisite class.

</tbody>
</table>

A GPA of at least 3.0 is expected for (1) the last 60 undergraduate units, and (2) all philosophy courses.

Applicants must submit a Philosophy Department Application, obtained online and returned to the department office, as well as the general university application form.

Written English Proficiency Requirement

The University has a requirement for written English proficiency that is to be assessed at two different points in a student’s program.

Level One

Pre-admission writing sample.

Level Two

Satisfactory completion of the examination in PHIL 898 (and Oral Exam).

Advancement to Candidacy

To be advanced to candidacy so as to commence work formally on their M.A. thesis, students must be in the process of completing or else have completed 18 units with grades of B or better, which must include PHIL 715 and at least two other graduate seminars in philosophy. An “Advancement To Candidacy” form must be filed with Graduate Studies; students should file during the semester in which they expect to have reached 18 units or in the immediately following semester.
All upper division courses offered by Philosophy may be considered for the master’s degree, upon approval of the Graduate Coordinator. The graduate coordinator will not approve any course numbered 300–599 in which a student receives below an A–. Courses numbered 600 or higher must have received a grade of B– or higher, except that with permission of the Graduate Coordinator some courses in this range may be counted with a grade of CR.

Students become subject to declassification from the Philosophy MA program and/or disqualification from the university if they are on administrative/academic probation for more than one consecutive semester during their time as a graduate student.

**Philosophy (M.A.) – Minimum 33 Units**

**Course Requirements:**

Students must take three required courses: PHIL 715 Seminar in Philosophical Writing; PHIL 896 Directed Reading in Fundamental Philosophical Texts (the M.A. qualifying exam); PHIL 898 Master’s Thesis (and Oral Exam). PHIL 715 should be taken during the first year (preferably during the first semester of graduate coursework); PHIL 896 should be taken during the second or third semester of graduate coursework (and in consultation with the Graduate Coordinator); PHIL 898 should be taken during the final semester of coursework. Also required are four elective philosophy graduate seminars (12 units), as well as another 12 graduate or upper division elective units. Students may select from a wide array of graduate and upper division courses, including various kinds of supervised research and applied, practicum, or publication projects to complete the last group of 12 elective units, but at least three of the units in this group must be at the graduate level.

<table>

<td></td>
</tr>
<tr>
<td>PHIL 898</td>
<td>Master’s Thesis (and Oral Examination in Defense of Thesis)</td>
<td>3</td>
</tr>
</tbody>
</table>

1. PHIL 715 should be taken during the first year (preferably during the first semester of graduate coursework)

2. PHIL 896 is a mandatory CR/NC course. Students who fail the exam may attempt it only once more, after enrolling again. Before enrolling again, students should consult with the Graduate Coordinator to determine when they are ready. It must be completed with a CR before the student may enroll in PHIL 898, the master’s thesis course.

3. PHIL 898 should be taken during the final semester of coursework.
POLITICAL SCIENCE

College of Liberal & Creative Arts
Dean: Andrew Harris

Department of Political Science
Humanities Building, (http://www.sfsu.edu/%7Esfsuman/swest.html) Room 304
Phone: (415) 338-2247
Chair: Nicole Watts
Graduate Coordinator: Katherine Gordy

Mission Statement
The Department of Political Science seeks to guide students towards becoming active and informed members of the community, locally and globally. We train students in five subfields—American Politics, Comparative Politics, Political Theory, Public Law, and Public Administration—with the aim of increasing their knowledge of the historical and geographical specificity of political power, institutions, values and practices, as well the ways in which these can be transformed. Our faculty supports students as they learn to think and act as conscious and fully engaged political agents, committed to social justice and political transparency and participation. Students leave the classroom with the knowledge and skills to open doors to diverse career opportunities.

Program Scope
Undergraduate study in political science is designed to develop knowledge, analytical skills, and critical insight into the nature of politics and political problems. The aim is to prepare students for active engagement in political life, whether as informed citizens or in a range of possible careers. The department endeavors to acquaint students with the issues of political life that have absorbed political thinkers and actors through the ages, as well as to equip students with the most contemporary skills for research analysis and policy making.

The Master of Arts in Political Science is designed for students who wish to proceed to further post-graduate study at the doctoral level as well as those who seek to terminate their study with the M.A. degree. Areas of specialization may include American politics, political theory, comparative politics, public law, research methods, as well as joint programs with International Relations and Public Administration. Community college credential programs and student teaching opportunities are also available in the last semester of work. Evening seminars are readily available. Limited financial aid is available in the form of teaching assistantships and research assistantships. The program is professional in its standards, substantive offerings, and levels of expectation.

Pre-Law Program
No specific major is required for admission to a school of law. Since law schools generally expect their students to have a broad foundation in the social sciences and humanities, selection of a major in such areas is recommended. For more information, the student should consult the catalog of the school of law to which s/he expects to apply for admission.

For pre-law students who choose a major in political science, special concentration courses appropriate as preparation for legal training are provided on advisement within the framework of the major program in political science. The Department of Political Science and the student-operated Pre-Law Advising Center also provide advising and other services (e.g., mock LSAT) for pre-law students in any major who wish to improve their preparation for law school.

Other Programs
Upon advisement, majors and minors in political science may select options enabling them to concentrate in a variety of career-related fields: education and teaching, public service, community action, professional (for students anticipating graduate study in political science), political journalism, research and policy analysis, comparative studies, and various area studies concentration and minors (with opportunity to focus on Asia, Europe, or the Mideast).

Professors
Belkin, Carcieri, Graham, Guo, Kassiola, Martel, Shastri, Smith, Tsygankov, Watts

Associate Professors
Hayduk, Gordy, McDaniel, Neely

Assistant Professors
Conway, Garcia-Castañón, Peck

Visiting Professor
Lewis

Lecturers
Caserta, Croshal, Emery, Green, Isaacs, Kashani, Lee, Loeb, Lozano, Otruba, Ovetz, Respini, Ryer, Schendan, Silverman, Welch

Majors
• Bachelor of Arts in Political Science (p. 1001)

Minors
• Minor in Political Science (p. 1009)

Masters
• Master of Arts in Political Science (p. 1009)

Bachelor of Arts in Political Science
Requirements
• At least 28 units for the major must be from upper division courses (300–699).
• Courses that fulfill the core and breadth requirements must be taken for a letter grade. CR/NC grading is not accepted for core and breadth courses.
• Students must earn a grade of C or better in the GWAR designated course, and a C– or better in all other core and breadth courses.
• Students in the major or minor may take up to four units CR/NC only for courses that satisfy part of the elective requirement.
• At least one political science (PWS) GWAR course must be chosen to count toward the Breadth Requirement or electives in political science.
Note: Students must take the Graduation Writing Assessment Requirement (GWAR) (composition) course in the major even if the student has taken a GWAR course in another department. The GWAR is satisfied by earning a C in any upper division course with the suffix GW. The department offers most of its courses with a GWAR and non-GWAR option. To satisfy the GWAR requirement you must successfully complete a course that contains the GW suffix; e.g., PLSI 477GW “Congress and the Presidency - GWAR” will satisfy the requirement - PLSI 477 “Congress and the Presidency” will NOT satisfy GWAR

Political Science (B.A.) – Minimum 40 Units

Core Requirements (13 Units)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLSI 200</td>
<td>American Politics</td>
<td>3</td>

</tr>
<tr>
<td>PLSI 300</td>
<td>Scientific Inquiry in Political Science</td>
<td>4</td>
</tr>
</tbody>
</table>

Note: A PLSI GWAR course must be taken toward partial fulfillment of either the Breadth or Elective requirements.

Breadth Requirement (12 Units)

Upper division Political Science courses chosen to include at least one course in at least three of these five sub-fields:

- American politics,
- comparative politics,
- political theory,
- public administration and policy, and
- public law.

Electives (12 Units)

It is recommended that elective units be taken in political science. However, in some cases, up to eight upper division units may be selected from related departments with consent of a major advisor.

Culminating Experience (3-4 Units)

<table>
<thead>
<tr>

</tbody>
</table>

1 Either a course that is taught by SF State political science faculty abroad or an equivalent study abroad course designated by an advisor.

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case additional upper division courses will be needed to reach the required total.

Complementary Studies

Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degree in Political Science. These units must come from courses bearing a prefix other than PLSI and not cross-listed with PLSI (see department website for a list of examples of majors that offer such courses). Eight of the twelve Complementary Studies units may count toward the major by completing units in related disciplines. These courses should either have a direct bearing to the study of politics, or they should be shown to deepen and enrich the study of politics in particular and articulable ways. The student will consult with an advisor in the department (or the undergraduate advisor) to ensure that their choices fulfill the department’s requirements for Complementary Studies. Students can also satisfy their complementary studies by completing a related minor or secondary major, or through an approved Study Abroad program (see department website for more details)

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

SF State Studies

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.
American Ethnic and Racial Minorities (AERM)  
Environmental Sustainability (ES)  
Global Perspectives (GP)  
Social Justice (SJ)  

Note: LD = Lower Division; UD = Upper Division.

**Transfer Student Roadmap (2 Year)**

For students with an AA-T in Political Science. This roadmap opens in a new tab. (p. 1007)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Political Science

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.
Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical "freshman comp" course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

**For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

</table>

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.
4. **Complementary Studies**
   - Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degree in Political Science. These units must come from courses bearing a prefix other that PLSI and not cross-listed with PLSI (see department website for a list of examples of majors that offer such courses). Eight of the twelve Complementary Studies units may count toward the major by completing units in related disciplines. These courses should either have a direct bearing to the study of politics, or they should be shown to deepen and enrich the study of politics in particular and articulate ways. The student will consult with an advisor in the department (or the undergraduate advisor) to ensure that their choices fulfill the department’s requirements for Complementary Studies. Students can also satisfy their complementary studies by completing a related minor or secondary major, or through an approved Study Abroad program (see department website for more details).
   - Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.
5. **Breadth Requirement (12 Units)**
   - Upper division Political Science courses chosen to include at least one course in at least three of these five sub-fields:
     - American politics,
     - Comparative politics,
     - Political theory,
     - Public administration and policy, and
     - Public law.
6. A PLSI GWAR course must be taken toward partial fulfillment of either the Breadth or Elective requirements.
7. **Electives (12 Units)**
   - It is recommended that elective units be taken in political science. However, in some cases, up to eight upper division units may be selected from related departments with consent of a major advisor.
   - A PLSI GWAR course must be taken toward partial fulfillment of either the Breadth or Elective requirements.
8. **Culminating Experience (3-4 units)**
   - PLSI 605 Senior Seminar in Applied Research Methods (4 units)
   - PLSI 606 Senior Seminar in American Politics (3 units)
   - PLSI 607 Seminar in Comparative Politics (3 units)
   - PLSI 608 Seminar in Political Theory (3 units)
   - PLSI 609 Seminar in Public Law: Legal Issues (3 units)
   - PLSI 612 Senior Seminar Study Abroad: At Beijing University (3 units)
8. Either a course that is taught by SF State political science faculty abroad or an equivalent study abroad course designated by an advisor.
Bachelor of Arts in Political Science – POLS Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017-2018 with an AA-T in Political Science. At least three units in the major (PLSI 200) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

¹ One course taken to fulfill the Breadth or Elective categories must have the GW-suffix in order to satisfy the University GWAR requirement.

² It is possible that courses taken for the AA-T might be accepted as an Elective. Consult with your major advisor. However, community college courses are lower division so you must be sure to take at least 40 upper division units at SF State, with at least 28 of these units in the major.

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University–Wide Requirements: 9–15 units**

- ENG 214 or equivalent A4 course (0-3 units) if not taken before transfer
- American Institutions (0-3 units): US History requirement if not completed prior to transfer. Please note: the US Government and California State and Local Government requirements were most likely completed as part of the AA-T. Check DPR to see whether this requirement is satisfied. If not, complete the requirement in place of a University Elective.
- Upper division GE, areas B, C, D (9 units) – Check for PLSI courses that will satisfy both a major requirement and GE UD-D.
- Students entering this major with the AA-T in Political Science are not required to fulfill SF State Studies requirements.
Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

Political Science Major: 31–38 Units
PLSI 200 met in transfer.

- Core (4–10 units): PLSI 300, and PLSI 250 and PLSI 275 if not met in transfer
- Breadth requirement (12 units): One upper division course from three of five sub-fields: American politics; comparative politics; political theory; public administration and policy; public law. Note: PLSI courses are three or four units.
- Electives (12 units): Courses from areas outside of PLSI may be used with department advisor’s approval.
- Culminating Experience (3–4 units): See list below.

University Electives: Ten or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State - some courses may meet more than one requirement, e.g. in both UD GE and the major.

Select upper division electives in political science in consultation with a political science advisor to serve the student’s interests and goals 15

Master of Arts in Political Science

Admission to Program

Most political science graduate students have an undergraduate degree in political science. While this is recommended, the department accepts applications from students with other majors.

The minimum cumulative GPA is 3.25. Applicants with lower GPAs may be considered if they have received scores of 550 or above on both the math and verbal portions of the GRE exam.

All applicants are required to submit two letters of recommendation evaluating their ability, promise, and past performance.

All foreign students whose native language is not English are required to meet all SF State requirements, including a score that meets University requirements on the Test of English as a Foreign Language (TOEFL). See the University requirements for specific scores.

Applications are to be received by April 1st for the fall semester, and November 1st for the spring semester.

Written English Proficiency Requirement

The University has a requirement for written English proficiency that is to be assessed at two different levels.

Level One (preamission/admission)

A GRE score that demonstrates proficiency in writing (i.e., a score of 4.0 or better). Students who do not meet this requirement must take an appropriate graduate level writing course in their first year at SF State.

Level Two

Satisfactory completion of Culminating Experience requirements - either a Comprehensive Exam in two fields or M.A. thesis. Students who elect to take the Comprehensive Exam must enroll in PLSI 896EXM.

Advancement to Candidacy

Candidates for the M.A. degree must have classified status; have successfully completed PLSI 700, PLSI 740, PLSI 760 and PLSI 780; maintained an overall grade point average of 3.0; and have the approval of the graduate coordinator.

Political Science (M.A.) – Minimum 30 units.

Core Requirements (12 units)

</tr>
</tbody>
</table>

Elective Requirements (6–9 units)

Students choosing to do a thesis should take at least two courses; those opting for comprehensive examinations should select three courses from the following:

- Topics in American Politics – Any political science course with a number in the range of 741 to 799
- Topics in Comparative Politics – Any political science course with a number in the range of 761 to 779
- Topics in Political Theory – Any political science course with a number in the range of 781 to 797
- or graduate seminar (3–4 units) in a related field upon advisement and approval

Related Courses (9 units)

Graduate seminars and/or upper division undergraduate courses in political science or related fields upon advisement and approval of the graduate coordinator.

Culminating Requirement (0–3 units)

PLSI 896EXM Culminating Experience Examination 0 or PLSI 898 Master’s Thesis

Students who want to enroll in a course of independent study (PLSI 899) must have a GPA of at least 3.25.
RELGIOUS STUDIES

College of Liberal & Creative Arts
Dean: Andrew Harris

Religious Studies Program
HUM 388
Phone: (415) 338–1596
Coordinator: Michael Sudduth
Undergraduate Advisors: Mohammad Azadpur, Pamela Hood, Fred Astren

Program Scope
The Minor in Religious Studies offers students the opportunity to study the full spectrum of humankind's religious heritage from an interdisciplinary perspective. Religion is an individual as well as a social phenomenon and the curriculum takes the students through both realms. Basic value questions are investigated from the viewpoint of religion, of disciplines looking at religion and of the individual in a pluralistic, unsettled world. More than half the minor is individually selected in consultation with an advisor, though the courses must represent the different dimensions of the religious experience as listed on the "Courses" page. Students may choose to focus their course combination in the minor on a specific religious tradition such as Judaism, Islam, Christianity, Buddhism; on a particular issue common to different religions; or on a particular culture or historical period.

As an interdisciplinary minor, religious studies can be taken in conjunction with any major.

Career Outlook
The religious studies minor provides an excellent background for those considering the ministry, social work, counseling, politics, law, or teaching at any level. As a help in shaping a person’s view of the meaning and purpose of life, it can be of lasting value whatever one’s career.

Religious Studies Minor — 21 units

Introduction to Religious Traditions (3 units)
PHIL 502 World Religions
or comparable course completed at another institution

The Nature of Religious Experience (3 units)
PHIL 525/ RELS 300 The Nature of Religious Experience
or PHIL 500 Philosophy of Religion

The Dimensions of Religious Experience (12 units)
Select one course from each of the following categories; no more than two courses from a single discipline.

The Expressive Dimensions of Religious Experience
ART 202 Western Art History II
ART/HUM 205 Asian Art History

SOUTH ASIAN STUDIES

College of Liberal & Creative Arts
Dean: Andrew Harris

South Asian Studies Program
Ethnic Studies and Psychology Building, Room 411
Phone: (415) 405–0389
Co-Coordinator: Falu Bakrani, Ethnic Studies

Humanities Building, Room 437
Phone: (415) 338–3128
Co-Coordinator: Kasturi Ray, Women and Gender Studies

Program Scope
South Asian Studies is the focus of this minor. South Asia refers to Pakistan, Afghanistan, India, Nepal, Bhutan, Maldives, Bangladesh, and Sri Lanka. These countries are members of the South Asian Association for Regional Cooperation (SAARC). The South Asian Studies minor is multidisciplinary and is designed to provide students with a broad understanding of the culture, history, economics, and politics of South Asia and its diaspora. The region of South Asia is a crucial area of study given its linguistic, ethnic, and religious diversity (its traditions draw from Hinduism, Islam, Buddhism, Jainism, and Christianity), its experience of British colonial rule and independence, its recent economic expansion and technological influence globally, and the widespread migration of South Asians over the last century. The study of South Asia thus offers students opportunities to explore pressing questions concerning colonialism and nationalism, political conflict and government, economic liberalization, cultural diversity and its expression in literature, art, and popular culture, and globalization.

The region of South Asia is a crucial area of study given its linguistic, ethnic, and religious diversity (its traditions draw from Hinduism, Islam, Buddhism, Jainism, and Christianity), its experience of British colonial rule and independence, its recent economic expansion and technological influence globally, and the widespread migration of South Asians over the last century. The study of South Asia thus offers students opportunities to explore pressing questions concerning colonialism and nationalism, political conflict and government, economic liberalization, cultural diversity and its expression in literature, art, and popular culture, and globalization.

The South Asian Studies minor is useful for students planning careers in education, social service, law, politics, government, business, media, and art, both nationally and internationally. It also prepares students for graduate study in a number of academic fields.

South Asian Studies Minor
The minor consists of 18 units; three courses are taken from the core curriculum, which give students a basic framework for South Asian studies. These courses fully concentrate on South Asia and/or the diaspora and provide students with a broad introduction to the history, culture, and politics of South Asia (one course each need to be taken from the clusters of “Culture of South Asia,” “History and Politics of South Asia,” and “South Asian Diaspora”).

The remaining units can be taken from the core curriculum or from a long list of electives. Elective courses provide the opportunity for more in-depth or topical and comparative study as well as the study of South Asia in relation to other regions of the world.

The minor is designed to give flexibility to students who can select from courses across disciplines, including Art, Asian American Studies, Economics, English, Ethnic Studies, History, Holistic Health, Humanities, International Business, International Relations, Philosophy, Political Science, and Women and Gender Studies.

For more information, contact the program directors: Falu Bakrani (bakrani@sfsu.edu) or Kasturi Ray (kasturi@sfsu.edu).

Core
Select at least three courses (9–17 units) from the core according to the requirements indicated below. The core consists of three core areas identified as Culture of South Asia, History and Politics of South Asia, and South Asian Diaspora.

South Asian Studies Minor — Minimum 18 units

Core (9–17 units)
Core Area 1: Culture of South Asia (3–6 units)
ART 502  Asian Art: Special Areas (prerequisite of ART 205) 3
HUM 535  Classical South Asian Cultural Forms 3
HUM 536  Modern South Asian Cultural Forms 3

Core Area 2: History and Politics of South Asia (3–8 units)
HIST 584  India and the British Empire 3
IR 326  South and Southeast Asia Foreign Relations 4
PLSI/I R 412  South Asian Politics 4
PLSI 415  Politics of India 4

Core Area 3: South Asian Diaspora (3 units)
AA S 540  South Asians in the United States 3
RRS 657/ AA S 541  South Asian Diaspora 3

Electives (1–9 units)
Select any courses not completed in fulfillment of the core above
AA S 210  History of Asians in the United States 3
or AA S 510  Asian Americans in California 3
ART 417  The Art and Architecture of Islam 3
ART/HUM 205  Asian Art History 3
HIST 585  India since Gandhi 3
HIST 606  History of Iran and Afghanistan 1500 - Present 3
HUM 366  India’s Gandhi 3
HUM 375  Biography of a City (Delhi) 3
MUS 530  Musics of the Middle East and India 3
PHIL 509  The Buddhist Tradition 3
PLSI/I R 416  Ethnicity and Nationalism 4
SNSK 699  Independent Study 1–3
THEATRE ARTS

College of Liberal & Creative Arts
Dean: Andrew Harris

School of Theatre and Dance
Creative Arts Building, Room 103
(415) 338-1341
Website: http://theatredance.sfsu.edu
E-mail: thtrdcn@sfsu.edu (tha@sfsu.edu)

Director: Todd Roehrman
Graduate Coordinator: Bruce Avery
MFA Graduate Coordinator: John Wilson

Program Scope
The School of Theatre and Dance offers a comprehensive program of both practical and theoretical courses for undergraduate and graduate students whose interests center on various aspects of educational and professional theatre.

The curriculum provides the student with a foundation for advanced study in the dramatic arts, for teaching, or for a career in professional theatre. As a center for the training of future theatre artists, the School is committed to introducing a diversity of theatrical traditions and cultures to students. To this end, the School employs its two dedicated theatre spaces and its one shared theatre space as learning laboratories in which students collaborate with faculty and guest professionals. Studio workshops and advanced stage productions in those theatres are the culmination of the educational experience.

The School actively seeks and facilitates interdisciplinary programs of study and production with other members of the College of Liberal & Creative Arts as well as with departments and programs from across the campus. The School also encourages and facilitates collaboration with off-campus area theatres. In these ways, we enlarge students' experiences, and open new connections between students, the college, the campus as a whole, and the community, offering students an education grounded in practical professional stage practices as well as diverse on-campus academic and production experiences.

The diverse backgrounds of both faculty and students in the program provide our campus and community with a wealth of theatrical experiences and attractions. Graduates of the program are prominent in professional theatre throughout the nation, with positions of leadership in theatre, television, film, and theatre education.

Fundamental to the major program is a core of required courses designed to develop a foundation upon which to elect, upon advisement, one of the following areas of emphasis: performance, play development and dramaturgy, technical theatre and design, or popular theatre.

The minor program is not a requirement for any credential or degree but is intended to give the student an opportunity to pursue an interest in theatre arts.

The Master of Fine Arts in Theatre Arts offers a Concentration in Design/Technical Production. The three-year M.F.A. is designed to provide rigorous, professional training to prepare students for careers as professional theatre artists or artist teachers. The concentration focuses on specialized skills in the areas of scene design, costume design, lighting design, and/or technical production.

The M.F.A. program combines the elements of professional practice and scholarly work to project a production concept through a specific discipline. The philosophy of the curriculum is based on two necessities of theatrical art: collaboration and discipline. Students progress through a full-time sequence of courses which trains them to work with other specialized theatre artists in realizing a total work of theatre, as well as to excel in their own chosen arts. The program is designed to develop the candidate's practical skills and personal strengths towards motivating communication, commitment, and support among the production group.

The Master of Arts in Theatre Arts provides training for students wishing to expand their knowledge and increase their competence in the fields of history and literature of the theatre, acting, directing, theatre design, and production; seeking teaching credentials where the master's degree is required; and preparing for further graduate work elsewhere.

Facilities
The School produces its plays in four performance spaces: McKenna Theatre, a proscenium stage with orchestra pit, fly system, and film/video projection systems is the largest theatre in the College of Liberal & Creative Arts with a seating capacity of 701. The Little Theatre is a smaller proscenium stage with fly system and a seating capacity of 218. The lab is a black box theatre with a seating capacity of 55. The Studio is a new 2,500 square foot, sprung floor facility supporting dance, movement classes and rehearsals, and serves as a flexible performance space for dance and theatre pieces alike. The performance spaces are supported by outstanding technical facilities. Theatre Arts classes and production work are conducted, with professional supervision, in the Scene/Paint Shop, Costume Shop, Properties Shop, Lighting Laboratory, and Sound Design Laboratory.

Career Outlook
Career opportunities in theatre arts include performance and technical positions in professional, regional, and community theatres, as well as the areas of film and television, for actor, director, stage manager, designer (lighting, costume, scenery, and props), and craftsperson (stitcher, carpenter, props artisan). Teaching positions range from elementary and high school theatre classes through community college and university curricula in all aspects of the dramatic arts. Other career possibilities include such diverse fields as advertising, design (interior, fashion, display), drama therapy, and recreation.

Professors
Arhelger, Avery, Conboy, Daw, Eilenberg, Goto, Kowsar, Peters, Roehrman, Schechter, Tomalin, Washington, Wilson

Associate Professors
Damashek, Schwartz, Wayth

Assistant Professor
Davis

Majors
- Bachelor of Arts in Drama (p. 1013)
- Bachelor of Arts in Dance (p. 750)
- Subject Matter Program in Physical Education-Concentration in Dance (p. 536)
(coordinated with Department of Kinesiology)

Minors

- Minor in Drama (p. 1020)
- Minor in Dance (p. 756)

Masters

- Master of Fine Arts in Theatre Arts: Concentration in Design/Technical Production (p. 1022)
- Master of Arts in Theatre Arts (p. 1021)

Bachelor of Arts in Drama

The core consists of the 27 units listed below while the area of emphasis consists of 18 units of required and elective courses. No fewer than 12 units, planned with and approved by an assigned advisor, must be taken in residence study.

Drama (B.A.) — 45 units

Area of Emphasis (18 units)

Selected on advisement.

Area of Emphasis

The B.A. in Drama offers four areas of emphasis: Performance, Play Development and Dramaturgy, Design and Technical Theatre, and Popular Theatre. Information about the specific requirements of each Area of Emphasis may be obtained at the Theatre Arts office or by visiting the School’s website (http://theatre.sfsu.edu); theatredance.sfsu.edu/. (http://theatredance.sfsu.edu)

Teaching Credential: The Single Subject Approved Program (English Subject Matter: Drama Emphasis) requires completion of courses in English as well as Theatre Arts. For details on this program, please consult credential advisors in the English Teacher Resource and Advising Center.

Complementary Studies

Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degree in Drama. These units must come from courses bearing a prefix other than TH A, and not cross-listed with TH A. Theatre Arts majors are offered several paths toward completing this requirement, each of which is designed to facilitate graduation in a timely manner:

- 12 units in a single foreign language;
- 12 units in an approved study abroad program;
- 12 units from a partially completed second major or minor;
- 12 units in a related discipline or coherent group of classes from related disciplines as approved by a School of Theatre and Dance Advisor.

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement to ensure degree completion within 60 units.

Note: LD = Lower Division; UD = Upper Division.

**Transfer Student Roadmap (2 Year)**

For students with an AA-T in Theatre Arts. This roadmap opens in a new tab. (p. 1018)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Theatre Arts

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.
Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical "freshman comp" course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission. For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

Total Units: 15

Total Units: 120-122

---

1. To avoid taking additional units, it is recommended that you meet **LLD and SF State Studies** requirements (AERM, GP ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.

4. **Complementary Studies**
   
   Twelve units of complementary studies are required of all candidates for the Bachelor of Arts degree in Drama. These units must come from courses bearing a prefix other than TH A, and not cross-listed with TH A. Theatre Arts majors are offered several paths toward completing this requirement, each of which is designed to facilitate graduation in a timely manner:
   
   - 12 units in a single foreign language;
   - 12 units in an approved study abroad program;
   - 12 units from a partially completed second major or minor;
   - 12 units in a related discipline or coherent group of classes from related disciplines as approved by a School of Theatre and Dance Advisor.

   Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement to ensure degree completion within 60 units.

5. **Area of Emphasis (18 units)**

   The B.A. in Drama offers four areas of emphasis: Performance, Play Development and Dramaturgy, Design and Technical Theatre, and Popular Theatre. Information about the specific requirements of each Area of Emphasis may be obtained at the Theatre Arts office or by visiting the School’s website [http://theatre.sfsu.edu/](http://theatre.sfsu.edu/) or [http://theatredance.sfsu.edu/](http://theatredance.sfsu.edu/).

   Teaching Credential: The Single Subject Approved Program (English Subject Matter: Drama Emphasis) requires completion of courses in English as well as Theatre Arts. For details on this program, please consult credential advisors in the English Teacher Resource and Advising Center.
Bachelor of Arts in Drama – THA Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with the AA-T in Theatre Arts. Three lower division units in the major (TH A 130) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

To Do at SF State:
Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

University-Wide Requirements: 9–18 Units
- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE areas B, C, D (9 units): See Note 2 above. Check for courses that satisfy both UD GE and major requirements.
- Students entering the major with the AA-T in Theatre Arts are not required to fulfill SF State Studies requirements.
- Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

Drama (Theatre Arts) Major: 42 Units
TH A 130 met in transfer.
- Core (24 units)
- Area of Emphasis (18 units) – consult with a major advisor. Four areas of emphasis are offered: Technical Theatre and Design; Play Development and Dramaturgy; Popular Theatre; Performance.

University Electives: Zero or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major.

Electives (11 units)

Electives chosen in consultation with an advisor. Eight units must be at the upper division level.
Master of Arts in Theatre Arts

Graduate Advisors: Eilenberg, Kowas, Schechter

Admission

Applications for classified status in the M.F.A. program are accepted beginning October 1 of the preceding year, for admission the following fall. Applications for classified status in the M.A. program are accepted beginning October 1 of the preceding year, for admission the following fall.

For both programs, contact the School office and the SF State Division of Graduate Studies for specific application deadlines in March for fall and October for spring.

Applicants are required to file the CSU Graduate Admission Application with the SF State Division of Graduate Studies and submit requested materials to the School of Theatre and Dance. Admission to classified status requires acceptance by both the University and the School of Theatre and Dance.

Students must meet University and School requirements and must normally have completed an undergraduate major in theatre arts.

Consideration is given to students with a strong undergraduate minor or other relevant work. Admission to the program is based on evaluation of a student's previous work and supporting materials.

Written English Proficiency Requirement

The University has a requirement for written English proficiency that is to be assessed at two different levels.

Level One

Evaluation of applicant’s statement of purpose, which is a written requirement for admission to classified status in the theatre arts program. On the basis of this material, the M.F.A. or M.A. graduate coordinator may properly advise a student of the need to obtain additional skills in writing. If remedial work is required, it is so indicated as a condition to classified status.

Level Two

Evaluation of the student’s written work while enrolled in TH A 700, TH A 701, or TH A 705.

Advancement to Candidacy

Besides meeting all general requirements, a diagnostic examination on the entire field of drama may be given at the time of registration in order to assist the M.F.A. or M.A. advisor in developing each student’s program. Weaknesses in any area may necessitate enrollment in specified courses selected in order to build strength in the area. Such courses are usually taken in addition to the minimum number of units required for completion of the graduate major.

Completion of the Degree

To complete either the M.F.A. or the M.A., students must satisfy all University and program requirements. University requirements are described in the front of the Graduate Education section of this Bulletin (p. 115). School requirements are provided in detail by the M.F.A./M.A. graduate coordinators and M.F.A./M.A. advisors. In addition to satisfactory completion of the course requirements, the School requires satisfactory performance on yearly School reviews, participation in the School’s production program, and the successful completion of a final creative project or thesis. The School accepts a limited number of transfer units on a course-by-course basis.

Admission to the Program

Applicants must submit the following directly to the graduate coordinator:

1. Statement of purpose (include proposed area and/or areas of emphasis).
2. Copy of transcript.
3. Three letters of reference from people who know the applicant’s theatre work.
4. Information considered important but which does not appear on the transcript.

Theatre Arts (M.A.) – Minimum 30 units

Master of Fine Arts in Theatre Arts: Concentration in Design/Technical Production

Graduate Advisors: Arhelger, Roehman, Wilson, Schwartz

Admission
Applications for classified status in the M.F.A. program are accepted beginning October 1st of the preceding year, for admission the following fall.

Contact the department office and the SF State Division of Graduate Studies for specific application deadlines in March for fall and October for spring.

Applicants are required to file the CSU Graduate Admission Application with the SF State Division of Graduate Studies and submit requested materials to the School of Theatre and Dance. Admission to classified status requires acceptance by both the University and the School of Theatre and Dance.

Students must meet university and departmental requirements and must normally have completed an undergraduate major in theatre arts. Consideration is given to students with a strong undergraduate minor or other relevant work. Admission to the program is based on the evaluation of a student's previous work and supporting materials.

Written English Proficiency Requirement
The University has a requirement for written English proficiency that is to be assessed at two different levels.

Level One
Evaluation of applicant's statement of purpose, which is a written requirement for admission to classified status in the theatre arts program. On the basis of this material, the M.F.A. or M.A. graduate coordinator may properly advise a student of the need to obtain additional skills in writing. If remedial work is required, it is so indicated as a condition to classified status.

Level Two
Evaluation of the student's written work while enrolled in TH A 700, TH A 701, or TH A 705.

Advancement to Candidacy
Besides meeting all general requirements, a diagnostic examination on the entire field of drama may be given at the time of registration to assist the M.F.A. or M.A. advisor in developing each student's program. Weaknesses in any area may necessitate enrollment in specified courses selected to build strength in the area. Such courses are usually taken in addition to the minimum number of units required for completion of the graduate major.

Completion of the Degree
To complete the M.F.A., students must satisfy all University and program requirements. University requirements are described in the front of the Graduate Education section of this Bulletin (p. 115). School requirements are provided in detail by the M.F.A. graduate coordinators and advisors. In addition to satisfactory completion of the course requirements, the School requires satisfactory performance on yearly School reviews, participation in the School's production program, and the successful completion of a final creative project or thesis. The School accepts a limited number of transfer units on a course-by-course basis.

Admission to the Program
Applicants seeking admission to the M.F.A. in Theatre Arts must submit the following materials directly to the School of Theatre and Dance, M.F.A. Graduate Coordinator, San Francisco State University, 1600 Holloway Avenue, San Francisco, CA 94132-4157:

1. Statement of purpose (include proposed area and/or areas of emphasis).
2. Copy of transcripts from all colleges or universities attended.
3. Three letters of reference from people who know the applicant's theatre work.
4. A current resume.
5. Other information considered appropriate, but which does not appear on transcripts.
6. A portfolio of slides and designs to be submitted upon request to the M.F.A. coordinator.

First Year Evaluation
The School's M.F.A. committee evaluates each student's performance at the end of the first year and recommends for or against continuance in the program.

Theatre Arts (M.F.A.): Concentration in Design/Technical Production — 60 units
Core Requirements (33 units)

| TH A 701 | Seminar: Theatrical History and Historiography | 3 |
| or TH A 702 | Shakespeare: Text and Performance Seminar |
| TH A 705 | Playcrafting and Dramaturgy | 3 |
| TH A 711 | Collaborative Processes in Theatre | 3 |
| TH A 740 | Play Production Concepts | 3 |
| TH A 750 | Design Studio (3 unit course to be taken three times) | 9 |
| TH A 757 | Internship in Theatre | 3 |
| TH A 810 | Advanced Practicum in Theatre (3 unit course to be taken three times) | 9 |

Electives on Advisement (24 units)
Creative Work Project (3 units)

A candidate must demonstrate professional competency in two or more areas of design in a large-scale studio design project that also includes a written component.

| TH A 894 | Creative Work Project | 3 |
The **Master of Arts in Women and Gender Studies** is interdisciplinary, enabling students to combine core and elective courses in Women and Gender Studies with electives in other departments and programs across the campus. The program focuses on women, gender, and feminism in transnational and multicultural contexts, preparing students to engage critically with analytical categories such as gender, race, sexuality, nation, class, labor, and able-bodiedness. Students complete their master’s degree with a culminating project of their own design working closely with an advisor. The degree enables students to pursue advanced study of the history, status, and contributions of women in different contexts, and of the relationships among feminist theories, social/global structures, and the production of gender.

**Career Outlook**

The Bachelor of Arts in Women and Gender Studies is an interdisciplinary liberal arts degree that focuses on women and gender issues in literature, history, sociology, anthropology, cultural, and ethnic studies. The major provides the incentive, knowledge, and skills that prepare students for a variety of graduate programs; and for careers in traditional and alternative social and educational institutions including non-governmental organizations that require expertise in women and gender issues. Some students have used the degree as a foundation for further work in areas such as teaching, counseling, journalism, law, social work, health, administration, advocacy, labor organizing, and community activism.

The Master of Arts in Women and Gender Studies prepares students interested in non-profit and for-profit administration, teaching positions, and the pursuit of doctoral degrees in related fields. It enhances students’ ability to participate in a range of organizations in the public and private sectors, particularly those addressing women and gender issues.

**Professors**

Alamilla Boyd, Hua, Sandell

**Associate Professors**

Cohler, Ray

**Assistant Professors**

Kenney, Savci

**Majors**

- Bachelor of Arts in Women and Gender Studies (p. 1023)

**Minors**

- Minor in Women and Gender Studies (bulletin.sfsu.edu/colleges/liberal-creative-arts/women-gender-study/Minor-Women-Gender-Studies)

**Masters**

- Master of Arts in Women and Gender Studies (p. 1031)

**Bachelor of Arts in Women and Gender Studies**

The major requires at least 39 units, of which 30 must be at the upper division level. Twelve units must be completed in the Women and Gender Studies core courses. Of the 27 elective units, 21 units of electives must
be Women and Gender Studies courses and six units of electives may be
taken in other departments upon advisement.

Women and Gender Studies majors who have successfully completed
WGS 300GW in spring 2010 or thereafter will have satisfied the University
Graduation Writing Assessment Requirement (GWAR).

**Women and Gender Studies (B.A.) — 39 units**

**Core Courses (12 units)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

<td>3</td>
</tr>
</tbody>
</table>

**Elective Courses (27 units)**

Electives in Women and Gender Studies courses (a maximum of
six elective units may be lower–division and six units can be taken
outside the WGS department (in other SF State departments or at other
colleges/universities on issues, topics, or skills based upon academic
interests and goals. Approval by a women and gender studies advisor is
mandatory.)

**Note:** A minimum of 40 upper division units must be completed for
the degree (including upper division units required for the major, general
education, electives, etc.). A student can complete this major yet
not attain the necessary number of upper division units required for
graduation. In this case, additional upper division courses will be needed
to reach the required total.

**Complementary Studies**

Students completing a Bachelor of Arts in Women and Gender Studies
are required to complete twelve units in complementary studies.
Complementary Studies provides students with the opportunity to make
connections across disparate forms of knowledge and inquiry. These
units must come from courses bearing a prefix other than WGS and not
cross-listed with WGS, and may be lower or upper division units, as well
as resident or transfer units. Students who complete two majors or a
major and minor automatically complete the complementary studies
requirement. Otherwise, WGS majors can fulfill this requirement through
one of six pathways:

1. 12 units through the study of a single language and/or literature other
   than English;
2. any 12 units taken in the College of Ethnic Studies;
3. 12 units from partial completion of a minor or certificate;
4. 12 units taken in an approved study abroad program (e.g., CSU Study
   Abroad); or,
5. 12 units from a coherent group of courses approved by a major
   advisor as complementary to the major.

Upon approval of the student’s major advisor, up to six units of
Complementary Studies may be used towards the WGS major (under the
existing “outside coursework” allotment).

**General Education Requirements**

Note: LD = Lower Division; UD = Upper Division.

**Transfer Student Roadmap (2 Years)**

For students with an AA-T in Social Justice Studies. This roadmap opens
in a new tab. (p. 1029)
This degree program is an approved pathway ("similar" major) for students earning the ADT in Social Justice Studies

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.

2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.
All students must meet the transfer eligibility requirements outlined below for admission.
For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.
4. Complementary Studies
   Students completing a Bachelor of Arts in Women and Gender Studies are required to complete twelve units in complementary studies. Complementary Studies provides students with the opportunity to make connections across disparate forms of knowledge and inquiry. These units must come from courses bearing a prefix other than WGS and not cross-listed with WGS, and may be lower or upper division units, as well as resident or transfer units. Students who complete two majors or a major and minor automatically complete the complementary studies requirement. Otherwise, WGS majors can fulfill this requirement through one of six pathways:
   1. 12 units through the study of a single language and/or literature other than English;
   2. any 12 units taken in the College of Ethnic Studies;
   3. 12 units from partial completion of a minor or certificate;
   4. 12 units taken in an approved study abroad program (e.g., CSU Study Abroad); or,
   5. 12 units from a coherent group of courses approved by a major advisor as complementary to the major.
   Upon approval of the student’s major advisor, up to six units of Complementary Studies may be used towards the WGS major (under the existing “outside coursework” allotment).
5. Elective Courses (27 units)
   Electives in Women and Gender Studies courses (a maximum of six elective units may be lower–division and six units can be taken outside the WGS department (in other SF State departments or at other colleges/universities on issues, topics, or skills based upon academic interests and goals. Approval by a women and gender studies advisor is mandatory.)
   Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.
Bachelor of Arts in Women and Gender Studies – SJS Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AA-T in Social Justice Studies. Up to six units in the major (Electives) and all lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

</table>

1. WGS 301 or higher.
2. Check Class Schedule for WGS courses that fulfill both major requirements and GE areas UD-C or UD-D.

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University–Wide Requirements: 9–18 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE (9 units): Some WGS courses may satisfy both major and UD GE requirements. Check University Bulletin or Class Schedule.
- Students entering the major with the AA-T in Social Justice Studies are not required to fulfill SF State Studies requirements.
- Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.
Women and Gender Studies Major: 33–39 Units
Up to six units from the SJS ADT may be applied to the Elective Courses area.

- Core courses (12 units) – includes GWAR-designated course.
- Elective courses (21–24 units) – consult with a department advisor about how to apply units from the ADT. A maximum of 6 lower division units can be applied to the major.
- A minimum of 33 units with WGS prefix are required (12 for Core, 21 for Electives).

University Electives: 12 or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major.
Minor in Women and Gender Studies

Women and Gender Studies Minor — 18 units

Required Courses (6 units)

- WGS 200 Introduction to Women and Gender Studies 3
- WGS 300GW Gender, Race, and Nation - GWAR 3

Electives (12 units)

A maximum of three elective units may be lower division for the minor

- Any WGS 500-level 3 unit course 3
- Electives in Women and Gender Studies 6
- Electives outside the department upon advisement 3

Master of Arts in Women and Gender Studies

Admission to Program

In order to be admitted to the program, students must meet all general university requirements. The most competitive candidates will have a minimum of nine to 12 undergraduate WGS or equivalent units with previous work in the feminist study of some or all of the following areas: race, gender, sexuality, colonialism, labor, disability. Students are expected to possess a grade point average of at least 3.0 in the last 60 semester units attempted for the bachelor's degree.

Applicants must provide the department graduate admissions committee with the following items:

1. transcripts of all previous course work;
2. a written statement of background, intentions, and goals, including experience in Women and Gender Studies and with women's issues, rationale for pursuing the M.A., and relation of the M.A. in Women and Gender Studies to prior academic work and to career objectives;
3. two letters of reference from individuals with direct knowledge of the applicant's scholarly ability.

For admission, applications are due February 1.

Written English Proficiency Requirement

The University has a requirement for written English proficiency that is to be assessed at two different levels.

**Level One**
Evaluated on pre-admittance writing sample.

**Level Two**
Evaluated through written portions of the culminating experience of WGS 894, WGS 895, or WGS 898.

Advancement to Candidacy

The Advancement to Candidacy (ATC) is filed after the student has completed a minimum of 12 units, with a cumulative grade point average of 3.0 or better, and not later than the semester before graduating. Once the ATC is approved, the student is advanced to candidacy.

Women and Gender Studies (M.A.) — 30 Units

Core Courses (18 Units)

- WGS 700 Introduction to Graduate Study 3
- WGS 710 Feminist Social Movements 3
- WGS 712 Queer Theories 3
- WGS 713 Intellectual Genealogies 3
- WGS 720 Feminist Pedagogies 3
  or WGS 798 Feminist Internship: Gender and the Nonprofit Industrial Complex 3
- WGS 820 Feminist Research Methods 3

Culminating Experience (3 Units)

Select one of the following on advisement:

- WGS 894 Creative Work Project 3
- WGS 895 Field Study Project 3
- WGS 898 Master's Thesis 3

Related Field Units (9 Units)

(upon approval of graduate advisor)
WORLD MUSIC AND DANCE

College of Liberal & Creative Arts
Dean: Andrew Harris

School of Music
Creative Arts Building, Room 140
(415) 338–1431
Website: music.sfsu.edu (http://music.sfsu.edu)
Director: Cyrus Ginwala
Advisors: Hafez Modirzadeh, Music; Yutian Wong, Dance

Program Scope
The Minor in World Music and Dance provides educational resources for those students interested in global perspectives of music and dance for varying careers as well as for personal enrichment. The subject is interdisciplinary and, in addition to music and dance, includes artistic, historical, geographical, political, humanistic, cultural, and social aspects organized under an overarching core with allowance for focused, in-depth study. Students are introduced to a variety of relevant disciplines, including ethnomusicology and dance ethnology.

Skills in understanding culturally diverse expressions of music and dance increase the graduate's career opportunities in a variety of ways. This minor offers an educational base for many culture-based areas of study, including teaching, multimedia, theater and other arts, business and travel industries, health professions, bilingual and ethnic studies, social and cultural programming, and graduate study. Creative expression is a central focus of the minor.

This minor carries the following general objectives:

• Provide a foundation for knowledge and inquiry into many cultural aspects of music and dance practiced by the world’s peoples.
• Develop critical awareness, appreciation of and participation in the processes of aural tradition, and cultural concepts in relation to the individual and society.
• Encourage creative thinking in the design of cross-cultural as well as cross-disciplinary projects.

Minor in World Music and Dance
The program consists of 18 units. Each student’s course of study is individualized according to his/her particular goals within the minor. Every interested student should see a designated faculty advisor for information, selection, sequencing of courses, as well as for written approval of transfer equivalents and course substitutions. Contact the appropriate faculty member or the Department of Music and Dance office for the faculty’s office hours.

World Music and Dance Minor — 18 units

</table>

Electives (12 units)
A minimum of 3 units in Music and 3 units in Dance must be chosen, with the additional 6 units from other related colleges/departments selected in consultation with a World Music and Dance advisor.
BIOLOGY

College of Science and Engineering
Dean: Keith Bowman

Department of Biology
Hensill Hall 534
Phone: (415) 338–1548
Website: biology.sfsu.edu (http://biology.sfsu.edu)

Chair: Michael A. Goldman
Graduate Coordinator: Diana Chu
Graduate advisors:
Cell and Molecular Biology/Microbiology: D. Chu
Ecology, Evolution, and Conservation Biology: A. Zink
Marine Biology: Jonathon Stillman
Physiology and Behavioral Biology: M. Fuse
Biomedical Science: L. Chen

Program Scope
The Department of Biology provides undergraduate and graduate programs covering the breadth of biology. Course work ranges from introductory biology to specialized courses in broad disciplines of biology. The department has grouped courses into concentrations to help advise students of appropriate programs of study in various biology disciplines. Each concentration provides a breadth of background in basic biological concepts as well as depth in the specific discipline. Students should consult with an advisor early in their program of study to design an individualized program within the concentration of interest.

Lists of advisors are available from the department office and website, biology.sfsu.edu (http://biology.sfsu.edu).

Students are responsible for information posted on the department website (biology.sfsu.edu (http://biology.sfsu.edu)) and in a weekly e-mail bulletin, which declared majors receive, as well as for complying with University, college, and department requirements.

Graduate degree programs provide advanced course work, seminar experiences, and require a written thesis or research project. The master's degrees provide substantial educational depth and training, giving the student a sound foundation for employment or study in doctoral programs.

Research Facilities
- State-of-the-Art Greenhouse
- Harry D. Thiers Herbarium
- Genomics and Transcriptions Analysis Center (GTAC)
- Molecular Genetics Laboratory (MGLab), Electron Microscope Facility
- Cell and Molecular Imaging Center (CMIC)
- Romberg Tiburon Center for Environmental Studies
- Sierra Nevada Field Campus
- Moss Landing Marine Laboratories

Collaborative Programs:
Romberg Tiburon Center for Environmental Studies
Opportunities for graduate and undergraduate study in marine biology are enhanced by the Romberg Tiburon Center for Environmental Studies (RTC), SF State's marine and estuarine research and teaching laboratory situated on San Francisco Bay in Marin County. RTC faculty and research scientists offer courses in marine and estuarine sciences, a Masters of Science in Marine Science, and supervise graduate student research and undergraduate independent study projects.

California Academy of Sciences
The Department of Biology and the California Academy of Sciences (CAS) have instituted a program that builds on the complementary strengths of each institution to address the national and international imperative of training biologists in systematics, ecology, and conservation biology. Curators from CAS who have joined the department as research professors contribute to the teaching program, offer seminars and other courses at CAS and supervise graduate student research. The facilities and collections of the Academy are available for selected students pursuing research in the biological sciences.

Career Outlook
This is an exciting time for graduates with degrees in biology. New breakthroughs in understanding living systems are leading to the development of new career opportunities at a rapid rate. In this regard, the undergraduate degrees can open the door to excellent career opportunities in industry, health care, public agencies, secondary school teaching, academia, and many other areas. Many graduates enter careers in the biotechnology industry, in the health professions, and environmental and conservation biology. High-level positions in industry and academia commonly require advanced graduate work. The bachelor of science degrees are designed to give students the training they need to enter doctoral or master's programs in biology and related disciplines. Each year many SF State biology graduates are accepted into doctoral programs across the country. SF State's biology programs also have a strong record of placing students in medical and dental schools.

The San Francisco Bay Area is one of the world's largest centers for the biotechnology industry. The majors in cell and molecular biology and microbiology emphasize the latest cutting edge technologies to provide students with relevant practical skills. Many companies actively recruit SF State students for positions or internships, and SF State graduates are well represented in many prominent biotechnology companies. Employment opportunities vary from manufacturing to technical research support to biotechnology and pharmaceuticals research management.

Graduates of the M.S. in Biomedical Science program, with advanced interdisciplinary science education, internship experience, and workplace skills training tend to be employed in biomedical institutes, biotechnology industries, business corporations, government and non-profit organizations or continue to other advanced degrees. The long term career outlook for professional science master's graduates is excellent.

Professors
Bayliss, Boyer, Brecskler, Burrey, Carpenter, L. Chen, Chu, Cohen, Connor, Desjardins, Domingo, Goldman, Haefinik, He, LeBuhn, Marquez-Magana, Parker, Patterson, Ramirez, Romeo, Rothman, Routman, Spencer, Stillman, Tanner

Associate Professors
J. Chen, Crow-Sanchez, de la Torre, Denetclaw, Fuse, Moffatt, Pasion, Sehgal, Vredenburg, Weinstein

Assistant Professors
Chan, Pennings, Riggs, Roy, Swei, Zink, Simonin

San Francisco State University Bulletin 2017-2018
Research Associate Professor
Cipriano

California Academy of Sciences Research Professors
Alemseged, Almeda, Bennett, Blackburn, Burke, Daniel, Drewes, Dumbacher, Fisher, Fritsch, Gosliner, Griswold, Kavanaugh, McCosker, Mooi, Rocha, Roopnarine, Simison, Steiner, Van Syoc, G. Williams

Romberg Tiburon Center Research Professors
Cochlan, Dugdale, Kimmerer, Wilkerson

Majors
- Bachelor of Arts in Biology, General (p. 1034)
- Bachelor of Science in Biology: Concentration in Botany (p. 1043)
- Bachelor of Science in Biology: Concentration in Cell and Molecular Biology (p. 1050)
- Bachelor of Science in Biology: Concentration in Ecology (p. 1058)
- Bachelor of Science in Biology: Concentration in Marine Biology and Limnology (p. 1066)
- Bachelor of Science in Biology: Concentration in Microbiology (p. 1074)

- Master of Science in Biomedical Science: Concentration in Biotechnology (p. 1104)
- Master of Science in Biomedical Science: Concentration in Stem Cell Science (p. 1104)

Certificate
- Certificate in Genetic Engineering (p. 1099)

Bachelor of Arts in General Biology

Impaction
All Biology concentrations are currently impacted which means there are more applications than capacity. Transfer student applications for admission to this major are accepted by the University’s Office of Undergraduate Admissions only during the application filing period of October 1 to November 30 (for admission the following fall). No late applications or applications for spring will be considered. Both new transfer and on-campus students wishing to change majors are required to submit an additional departmental application. See departmental website biology.sfsu.edu (http://biology.sfsu.edu) for supplemental program application and deadlines.

General Information and Requirements
- Candidates entering the bachelor’s programs in biology should have completed three years of high school mathematics and one year of high school chemistry to allow completion of the curriculum in a timely fashion (see Undergraduate Admission Requirements (p. 54)).
- All major course work must be completed with letter grades (CR/NC is not acceptable).
- A minimum grade point average of 2.0 in all course work is required to receive a degree in these programs.
- To remain enrolled in a biology course, students must be prepared to provide copies of transcripts demonstrating completion of prerequisite courses with a grade of C- or better.
- At least 12 units in biology must be completed at SF State.
- Early in the first semester, and at regular intervals thereafter, students must consult with a biology advisor to plan a program of study. For the most current advising information, go to biology.sfsu.edu (http://biology.sfsu.edu).

Graduation Writing Assessment Requirement (GWAR)
(Note: Prior to fall 2012, GWAR would have been satisfied by passing ENG 414 (or ENG 410 or ENG 411 for CMS students) or a GWAR designated course from another discipline.)

Students must earn a C or better in a GWAR course to satisfy the requirement.

Biology majors have flexibility for which GWAR course they can take to meet their requirement, as long as the prerequisites for the course have been completed.

In general,
- Cell & Molecular Biology majors should take BIOL 351GW;
- Microbiology majors should take BIOL 402GW;
- Botany, Ecology, and Zoology majors may choose between BIOL 475GW, BIOL 478GW or BIOL 529GW;
- Marine Biology majors may choose between BIOL 570GW or BIOL 631GW; and
- Physiology majors may choose between BIOL 613GW or BIOL 631GW.
- General Biology majors may take any BIOL GWAR class.
See also the Department of Biology home page for GWAR in Biology: biology.sfsu.edu/content/gwar (http://biology.sfsu.edu/content/gwar) or contact a departmental advisor for further information.

The department does not permit multiple concentrations within the biology degree program. All of the curricula require preliminary work in physics and chemistry because many important biological concepts are based squarely upon principles in the physical sciences. Also, each curriculum includes upper division work in the biological sciences so that students will receive reasonable breadth and depth in their degree program. Because of the sequential arrangement of courses students are urged to consult the descriptions for the prerequisites of all their courses.

Although course electives are listed for most of the majors, new electives are always being added to various programs. Therefore, we highly recommend that students seek advisement prior to enrolling in elective courses in their major.

**Bachelor of Arts in Biology, General**

The curriculum in general biology provides students with exposure to a broad spectrum of biological sciences including genetics, cell biology, physiology, ecology, organismal and evolutionary biology. Since basic principles of physical science are central to many biological concepts, course work in physics and chemistry is included in the lower division requirements. The B.A. program is suited for students preparing for professional schools, including teacher credentialing programs, or careers that require students to be versed in diverse areas of biology.

Students preparing to become teachers should note that additional science preparation beyond the major is required (geosciences breadth: meteorology, astronomy, geology, and oceanography). It is important to consult early and often with a credential advisor in the biology department to plan the major and keep abreast of any state mandated changes in requirements.

**General Education Met in the Major**

General Education requirements met in the Biology major (all concentrations) or Undeclared with Interest in Biology:
The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area B1 (Physical Science) is satisfied upon completion of CHEM 130 or CHEM 233.
- Areas B2 (Life Science) and B3 (Laboratory Science) are satisfied upon completion of BIOL 240.
- Upper Division General Education, Physical, and Life Sciences (UD-B) is satisfied upon completion of BIOL 355.

**General Biology (B.A.) – 57 units**

**Lower Division Requirements (32–33 units)**

Upper Division Electives
Select four to eight units in consultation with an advisor from among all upper division Biology courses. Only one of the following courses can be included among those selected: BIOL 313, BIOL 317, BIOL 318, BIOL 327, BIOL 330, and BIOL 349. Up to three units of BIOL 699 can also be used towards the total of four to eight units.

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

Complementary Studies
Students in the B.A. biology program will satisfy the Complementary Studies Requirement with the completion of courses in chemistry, physics, and mathematics that are required for the major.

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

First-Time Student Roadmap (4 Year)
This roadmap opens in a new tab. (p. 1038)

Transfer Student Roadmap (2 Year)
For students with an AS-T in Biology. This roadmap opens in a new tab. (p. 1041)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Biology

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.
Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.

2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken.

Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

**For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

1 To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE.
2 ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3 **Ecology Courses**
   - BIOL 482 Ecology (4 units)
   - BIOL 490 Ecology of Infectious Diseases (4 units)
   - BIOL 529GW Plant Ecology - GWAR (4 units)
   - BIOL 532 Restoration Ecology (3 units)
   - BIOL 534 Wetland Ecology (4 units)
   - BIOL 580 Limnology (3 units)
   - BIOL 582 Biological Oceanography (4 units)
   - BIOL 585 Marine Ecology (3 units)
   - BIOL 586 Marine Ecology Laboratory (2 units)
4 **Cell Biology Courses**
   - BIOL 350 Cell Biology (3 units)
   - BIOL 358 Forensic Genetics: Math Matters (4 units)
   - BIOL 401 General Microbiology (3 units)
   - BIOL 435 Immunology (3 units)
   - BIOL 453 General Parasitology (3 units)
   - CHEM 349 General Biochemistry (3 units)
5 **Physiology Courses**
   - BIOL 442 Microbial Physiology (3 units)
   - BIOL 525 Plant Physiology (3 units)
   - BIOL 612 Human Physiology (3 units)
   - BIOL 630 Animal Physiology (3 units)
Evolutionary or Organismal Biology Courses
- BIOL 328 Human Anatomy (4 units)
- BIOL 337 Evolution (3 units)
- BIOL 380 Evolutionary Developmental Biology (3 units)
- BIOL 425 Emerging Diseases (3 units)
- BIOL 453 General Parasitology (3 units)
- BIOL 454 Parasitology Laboratory (1 unit)
- BIOL 460 General Entomology (4 units)
- BIOL 461 Insect Taxonomy (4 units)
- BIOL 475GW Herpetology - GWAR (3 units)
- BIOL 478GW Ornithology - GWAR (4 units)
- BIOL 500 Evolution and Diversity of Plants (4 units)
- BIOL 502 Biology of the Algae (3 units)
- BIOL 504 Biology of the Fungi (4 units)
- BIOL 505 Comparative Anatomy of Vascular Plants (4 units)
- BIOL 514 Plant Taxonomy (5 units)
- BIOL 555 Marine Invertebrate Zoology (4 units)
- BIOL 570GW Biology of Fishes - GWAR (4 units)
- BIOL 638 Bioinformatics & Genome Annotation (4 units)
- BIOL 652 Science Education Partners in Biology (4 units)

Substitutions allowed upon signed advisor consent.
# Bachelor of Arts in Biology – BIOL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Biology. Thirty-two units in the major (BIOL 230/BIOL 240, CHEM 115/CHEM 215/CHEM 216, MATH 226; required PHYS sequence) and 33 units of lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

1. If ENG 214 equivalent not taken before transfer, take GWAR course in a subsequent semester. Biology B.A. students may take any BIOL GWAR course; view all BIOL GWAR course options at http://biology.sfsu.edu/content/gwar
2. Some UD-C courses also satisfy US History - check Class Schedule
3. BIOL 355 satisfies UD GE (B)
4. Take either a physiology lab or a cell biology lab concurrently with its associated lecture course (2-4 units)
5. Select course in consultation with an advisor

## To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 12–21 Units**
- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): See bullet.
- Lower division GE (6 units) – Area C (3 units in any subarea) and Area D (3 units; D2 satisfies US History if needed; D3 satisfies US/CA Government requirement if needed)
- Upper division GE (6 units to do): 1) Major course satisfies UD-B. 2) Take UD-C and UD-D courses. See notes.
- B.A. Biology students satisfy Complementary Studies by taking courses in chemistry, physics and mathematics that are required for the major.

**General Biology Major: 24–33 Units**

BIOL 230/BIOL 240, MATH 226, all PHYS, CHEM 115/CHEM 215/CHEM 216 met in transfer.

- Lower Division requirements (3 units): CHEM 130
- Major Upper Division Requirements/GWAR (17–22 units)
- Major Upper Division Electives (4–8 units)

**University Electives: Four or More Units**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. both in UD GE and the major. Upper division electives recommended in order to meet the minimum 40-unit requirement.

Bachelor of Science in Biology: Concentration in Botany

Impaction
All Biology concentrations are currently impacted which means there are more applications than capacity. Transfer student applications for admission to this major are accepted by the University’s Office of Undergraduate Admissions only during the application filing period of October 1 to November 30 (for admission the following fall). No late applications or applications for spring will be considered. Both new transfer and on-campus students wishing to change majors are required to submit an additional departmental application. See departmental website biology.sfsu.edu (http://biology.sfsu.edu) for supplemental program application and deadlines.

General Information and Requirements
- Candidates entering the bachelor’s programs in biology should have completed three years of high school mathematics and one year of high school chemistry to allow completion of the curriculum in a timely fashion (see Undergraduate Admission Requirements (p. 54)).
- All major course work must be completed with letter grades (CR/NC is not acceptable).
- A minimum grade point average of 2.0 in all course work is required to receive a degree in these programs.
- To remain enrolled in a biology course, students must be prepared to provide copies of transcripts demonstrating completion of prerequisite courses with a grade of C− or better.
- At least 12 units in biology must be completed at SF State.
- Early in the first semester, and at regular intervals thereafter, students must consult with a biology advisor to plan a program of study. For the most current advising information, go to biology.sfsu.edu (http://biology.sfsu.edu).

Graduation Writing Assessment Requirement (GWAR)
(Note: Prior to fall 2012, GWAR would have been satisfied by passing ENG 414 (or ENG 410 or ENG 411 for CMS students) or a GWAR designated course from another discipline.)

Students must earn a C or better in a GWAR course to satisfy the requirement.

Biology majors have flexibility for which GWAR course they can take to meet their requirement, as long as the prerequisites for the course have been completed.

In general,
- Cell & Molecular Biology majors should take BIOL 351GW;
- Microbiology majors should take BIOL 402GW;
- Botany, Ecology, and Zoology majors may choose between BIOL 475GW, BIOL 478GW or BIOL 529GW;
- Marine Biology majors may choose between BIOL 570GW or BIOL 631GW; and
- Physiology majors may choose between BIOL 613GW or BIOL 631GW.
- General Biology majors may take any BIOL GWAR class.

See also the Department of Biology home page for GWAR in Biology: biology.sfsu.edu/content/gwar (http://biology.sfsu.edu/content/gwar) or contact a departmental advisor for further information.

The department does not permit multiple concentrations within the biology degree program. All of the curricula require preliminary work in physics and chemistry because many important biological concepts are based squarely upon principles in the physical sciences. Also, each curriculum includes upper division work in the biological sciences so that students will receive reasonable breadth and depth in their degree program. Because of the sequential arrangement of courses students are urged to consult the descriptions for the prerequisites of all their courses.

Although course electives are listed for most of the majors, new electives are always being added to various programs. Therefore, we highly recommend that students seek advisement prior to enrolling in elective courses in their major.

Concentration in Botany
The program provides opportunities for study in ecological, systematic and taxonomic, physiological, morphological, anatomical, molecular, and genetic aspects of botany. Course work in an array of groups is offered, including vascular plants, algae, fungi, mosses, and lichens. Where applicable, fieldwork in courses is emphasized, including instruction at the Sierra Nevada Field Campus and the Romberg Tiburon Center.

Biology (B.S.): Concentration in Botany – 67 units

General Education Met in the Major
General Education requirements met in the Biology major (all concentrations) or Undeclared with interest in Biology:
The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area B1 (Physical Science) is satisfied upon completion of CHEM 130 or CHEM 233.
- Areas B2 (Life Science) and B3 (Laboratory Science) are satisfied upon completion of BIOL 240.
- Upper Division General Education, Physical, and Life Sciences (UD−B) is satisfied upon completion of BIOL 355.

Lower Division Requirements (34−35 units)

</tbody>
</table>

**Electives**

Choose 4–7 units upon advisement from the alternates not used in fulfilling the requirements listed above or any other upper division biology courses not specifically excluded for major credit, or any graduate course in biology.

**Note:** A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

- LD or UD 3 E

**LD or UD**
- Government

**Physical and/or Life Science**
- UD 3 UD-B
- Arts and/or Humanities
- UD 3 UD-C
- Social Sciences
- UD 3 UD-D

**SF State Studies**
- Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

- American Ethnic and Racial Minorities (AERM)
- Environmental Sustainability (ES)
- Global Perspectives (GP)
- Social Justice (SJ)

**Note:** LD = Lower Division; UD = Upper Division.

**First-Time Student Roadmap (4 year)**

This roadmap opens in a new tab. (p. 1046)

**Transfer Student Roadmap (2 year)**

For students with an AS-T in Biology. This roadmap opens in a new tab. (p. 1048)

**This degree program is an approved pathway (“similar” major) for students earning the ADT in Biology**

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units
if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on a specific ADT;
- Which lower-division requirements are considered complete upon entry based on a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.

2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission.

For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

</tr>
</tbody>
</table>

**Units**: 14-15

**Total Units**: 120-125

---

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. **Major Lower Division Requirement**
   - CHEM 215 General Chemistry II: Quantitative Applications of Chemistry Concepts (3 units)
   - CHEM 216 General Chemistry II Laboratory: Quantitative Applications of Chemistry Concepts (2 units)
   - MATH 226 Calculus I (4 units)
   - MATH 227 Calculus II (4 units)
   - PHYS 111 General Physics I (3 units)
   - PHYS 112 General Physics I Laboratory (1 units)
   - PHYS 121 General Physics II (3 units)
   - PHYS 122 General Physics II Laboratory (1 units)
4. Area B1: Physical Science is satisfied upon completion of CHEM 130 or CHEM 233.
5. Areas B2: Life Science and B3: Laboratory Science are satisfied upon completion of BIOL 240.
6. GE Area UD–B: Upper Division Physical and/or Life Sciences is satisfied upon completion of BIOL 355.
Bachelor of Science in Biology: Concentration in Botany – BIOL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Biology. Thirty-two units in the major (BIOL 230/BIOL 240, CHEM 115/CHEM 215/CHEM 216, MATH 226, required PHYS sequence) and 33 units of lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

1 If ENG 214 equivalent not taken before transfer, GWAR course must be taken in a subsequent semester; this may impact timely progress to degree.
2 Some GE Area UD-C: Upper Division Arts and/or Humanities courses also satisfy US History. Check the Class Schedule.
3 BIOL 355 satisfies GE Area UD-B: Upper Division Physical and/or Life Sciences.
4 Select upper division electives in consultation with an advisor.

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

University-Wide Requirements: 12–21 Units

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
• American Institutions (0–6 units): See next bullet.
• Lower division GE (6 units) – Area C (3 units in any subarea) and Area D (3 units; D2 satisfies US History if needed; D3 satisfies US/CA Government requirement if needed)
• Upper division GE (6 units to do): 1) Major course satisfies UD-B. 2) Take UD-C and UD-D courses. See notes.
• Students entering this major with the AS-T in Biology are not required to fulfill SF State Studies or Complementary Studies requirements.

**Biology – Botany Major: 37 Units**

Completed: BIOL 230/BIOL 240, MATH 226, all PHYS, and CHEM 115/CHEM 215/CHEM 216.

• Lower Division requirements (3 units): CHEM 130
• Major Upper Division Requirements/GWAR (27 units)
• Major Upper Division Electives (7 units) – see note 4.

**University Electives: Two or More Units**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major.
Bachelor of Science in Biology: Concentration in Cell and Molecular Biology

Impaction

All Biology concentrations are impacted which means there are more applications than capacity. Transfer student applications for admission to this major are accepted by the University's Office of Undergraduate Admissions only during the application filing period of October 1 to November 30 (for admission the following fall). No late applications or applications for spring will be considered. Both new transfer and on-campus students wishing to change majors are required to submit an additional departmental application. See departmental website biology.sfsu.edu (http://biology.sfsu.edu) for supplemental program application and deadlines.

General Information and Requirements

• Candidates entering the bachelor’s programs in biology should have completed three years of high school mathematics and one year of high school chemistry to allow completion of the curriculum in a timely fashion (see Undergraduate Admission Requirements (p. 54)).
• All major course work must be completed with letter grades (CR/NC is not acceptable).
• A minimum grade point average of 2.0 in all course work is required to receive a degree in these programs.
• To remain enrolled in a biology course, students must be prepared to provide copies of transcripts demonstrating completion of prerequisite courses with a grade of C- or better.
• At least 12 units in biology must be completed at SF State.
• Early in the first semester, and at regular intervals thereafter, students must consult with a biology advisor to plan a program of study. For the most current advising information, go to biology.sfsu.edu (http://biology.sfsu.edu).

Graduation Writing Assessment Requirement (GWAR)

(Note: Prior to fall 2012, GWAR would have been satisfied by passing ENG 414 (or ENG 410 or ENG 411 for CMS students) or a GWAR designated course from another discipline.)

Students must earn a C or better in a GWAR course to satisfy the requirement.

Biology majors have flexibility for which GWAR course they can take to meet their requirement, as long as the prerequisites for the course have been completed.

In general,
• Cell & Molecular Biology majors should take BIOL 351GW;
• Microbiology majors should take BIOL 402GW;
• Botany, Ecology, and Zoology majors may choose between BIOL 475GW, BIOL 478GW or BIOL 529GW;
• Marine Biology majors may choose between BIOL 570GW or BIOL 631GW; and
• Physiology majors may choose between BIOL 613GW or BIOL 631GW.

• General Biology majors may take any BIOL GWAR class.

See also the Department of Biology home page for GWAR in Biology biology.sfsu.edu/content/gwar (http://biology.sfsu.edu/content/gwar) or contact a departmental advisor for further information.

The department does not permit multiple concentrations within the biology degree program. All of the curricula require preliminary work in physics and chemistry because many important biological concepts are based squarely upon principles in the physical sciences. Also, each curriculum includes upper division work in the biological sciences so that students will receive reasonable breadth and depth in their degree program. Because of the sequential arrangement of courses students are urged to consult the descriptions for the prerequisites of all their courses.

Although course electives are listed for most of the majors, new electives are always being added to various programs. Therefore, we highly recommend that students seek advisement prior to enrolling in elective courses in their major.

Concentration in Cell and Molecular Biology

Fundamental coursework in allied sciences and mathematics prepares the student for advanced studies in cell and molecular biology. The program is also recommended for pre-medical students because it includes many of the courses required for admission to medical school. (For more information, see Pre-health Professions. (p. 400))

Biology (B.S.): Concentration in Cell and Molecular Biology – Minimum 68 units

General Education Met in the Major

General Education requirements met in the Biology major (all concentrations) or Undeclared with Interest in Biology:
The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

• Area B1 (Physical Science) is satisfied upon completion of CHEM 130 or CHEM 233.
• Areas B2 (Life Science) and B3 (Laboratory Science) are satisfied upon completion of BIOL 240.
• Upper Division General Education, Physical, and Life Sciences (UD–B) is satisfied upon completion of BIOL 355.

Lower Division Requirements (38–39 units)

Select one of the following: 3-4
- MATH 227 Calculus II 1
- CSC 210 Introduction to Computer Programming
- BIOL 358 Forensic Genetics: Math Matters
- BIOL 458 Biometry

Upper Division Requirements (30 units)
- BIOL 350 Cell Biology 3
- BIOL 351GW Experiments in Cell and Molecular Biology - GWAR 4
- BIOL 355 Genetics 3
- BIOL 357 Molecular Genetics 3
- CHEM 335 Organic Chemistry II 3
- CHEM 349 General Biochemistry 2 3

Electives
Choose 11 units upon advisement. At least one elective course must have an upper division laboratory component. Graduate level courses may be used upon advisement.
- BIOL 337 Evolution 3
- BIOL 356 Honors Genetics 2
- BIOL 380 Evolutionary Developmental Biology 3
- BIOL 382 Developmental Biology 3
- BIOL 401 General Microbiology 3
- BIOL 420 General Virology 3
- BIOL 425 Emerging Diseases 3
- BIOL 435 Immunology 3
- BIOL 446 Microbial Genomics 4
- BIOL 525 Plant Physiology 3
- BIOL 630 Animal Physiology 3
- BIOL 638 Bioinformatics & Genome Annotation 4
- BIOL 640 Cellular Neurosciences 3
- BIOL 699 Independent Study in Biology 3
- CHEM 343 Biochemistry I Laboratory 3

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

1 Students who plan to study for a Ph.D. should complete at least two semesters of calculus and one semester of physical chemistry.
2 Students may take CHEM 340 and CHEM 341 in lieu of CHEM 349 upon advisement

SF State Studies
Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.
- American Ethnic and Racial Minorities (AERM) LD or UD  3
- Environmental Sustainability (ES) LD or UD  3
- Global Perspectives (GP) LD or UD  3
- Social Justice (SJ) LD or UD  3

Note: LD = Lower Division; UD = Upper Division.

First-Time Student Roadmap (4 Year)
This roadmap opens in a new tab. (p. 1054)

Transfer Student Roadmap (2 Year)
For students with an AS-T in Biology. This roadmap opens in a new tab. (p. 1056)
This degree program is an approved pathway ("similar" major) for students earning the ADT in Biology

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.

2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.
All students must meet the transfer eligibility requirements outlined below for admission. For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

Total Units 120-124

---

1 To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE.

2 ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3 Major Electives

Chose 11 units upon advisement. At least one elective course must have an upper division laboratory component. Graduate level courses may be used upon advisement.

- BIOL 337 Evolution (3 units)
- BIOL 356 Honors Genetics (2 units)
- BIOL 380 Evolutionary Developmental Biology (3 units)
- BIOL 382 Developmental Biology (3 units)
- BIOL 401 General Microbiology (3 units)
- BIOL 420 General Virology (3 units)
- BIOL 425 Emerging Diseases (3 units)
- BIOL 435 Immunology (3 units)
- BIOL 446 Microbial Genomics (4 units)
- BIOL 525 Plant Physiology (3 units)
- BIOL 630 Animal Physiology (3 units)
- BIOL 638 Bioinformatics & Genome Annotation (4 units)
- BIOL 640 Cellular Neurosciences (3 units)
- BIOL 699 Independent Study in Biology (1-3 units)
- CHEM 343 Biochemistry I Laboratory (3 units)
Bachelor of Science in Biology: Concentration in Cell and Molecular Biology – BIOL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Biology. Thirty-two units in the major (BIOL 230/BIOL 240, CHEM 115/CHEM 215/CHEM 216, MATH 226, required PHYS sequence) and 33 units of lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

1 Some GE Area UD–C: Upper Division Arts and/or Humanities courses also satisfy US History. Check the Class Schedule
2 BIOL 355 satisfies GE Area UD–B: Upper Division Physical and/or Life Sciences.
3 Select upper division electives in consultation with an advisor. At least one elective course must have an upper division lab component.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 12–21 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History requirement if not completed prior to transfer
Biology – Cell and Molecular Biology Major: 37 Units

Completed: BIOL 230/BIOL 240, MATH 226, all PHYS, and CHEM 115/CHEM 215/CHEM 216.

- Lower Division requirements (7 units): CHEM 233; CSC 210 or MATH 227.
- Major Upper Division Requirements/GWAR (19 units)
- Major Upper Division Electives (11 units) – upon advisement; includes lab component. See note 4 above.

University Electives: Two or More Units

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. UD GE and the major.
Bachelor of Science in Biology: Concentration in Ecology

Impaction

All Biology concentrations are currently impacted which means there are more applications than capacity. Transfer student applications for admission to this major are accepted by the University’s Office of Undergraduate Admissions only during the application filing period of October 1 to November 30 (for admission the following fall). No late applications or applications for spring will be considered. Both new transfer and on-campus students wishing to change majors are required to submit an additional departmental application. See departmental website biology.sfsu.edu (http://biology.sfsu.edu) for supplemental program application and deadlines.

General Information and Requirements

- Candidates entering the bachelor’s programs in biology should have completed three years of high school mathematics and one year of high school chemistry to allow completion of the curriculum in a timely fashion (see Undergraduate Admission Requirements (p. 54)).
- All major course work must be completed with letter grades (CR/NC is not acceptable).
- A minimum grade point average of 2.0 in all course work is required to receive a degree in these programs.
- To remain enrolled in a biology course, students must be prepared to provide copies of transcripts demonstrating completion of prerequisite courses with a grade of C− or better.
- At least 12 units in biology must be completed at SF State.
- Early in the first semester, and at regular intervals thereafter, students must consult with a biology advisor to plan a program of study. For the most current advising information, go to biology.sfsu.edu (http://biology.sfsu.edu).

Graduation Writing Assessment Requirement (GWAR)

(Note: Prior to fall 2012, GWAR would have been satisfied by passing ENG 414 (or ENG 410 or ENG 411 for CMS students) or a GWAR designated course from another discipline.)

Students must earn a C or better in a GWAR course to satisfy the requirement.

Biology majors have flexibility for which GWAR course they can take to meet their requirement, as long as the prerequisites for the course have been completed.

In general,

- Cell & Molecular Biology majors should take BIOL 351GW;
- Microbiology majors should take BIOL 402GW;
- Botany, Ecology, and Zoology majors may choose between BIOL 475GW, BIOL 478GW or BIOL 529GW;
- Marine Biology majors may choose between BIOL 570GW or BIOL 631GW; and
- Physiology majors may choose between BIOL 613GW or BIOL 631GW.
- General Biology majors may take any BIOL GWAR class.

See also the Department of Biology home page for GWAR in Biology: biology.sfsu.edu/content/gwar (http://biology.sfsu.edu/content/gwar) or contact a departmental advisor for further information.

The department does not permit multiple concentrations within the biology degree program. All of the curricula require preliminary work in physics and chemistry because many important biological concepts are based squarely upon principles in the physical sciences. Also, each curriculum includes upper division work in the biological sciences so that students will receive reasonable breadth and depth in their degree program. Because of the sequential arrangement of courses students are urged to consult the descriptions for the prerequisites of all their courses.

Although course electives are listed for most of the majors, new electives are always being added to various programs. Therefore, we highly recommend that students seek advisement prior to enrolling in elective courses in their major.

Concentration in Ecology

This program offers a flexible but rigorous plan of study in the plant and animal sciences for students interested in ecology, natural history, conservation, and population biology; students interested in entomology, botany, or zoology may also find this concentration appropriate. The program stresses firm foundations in ecological theory, ecological technique, and natural history.

Biology (B.S.): Concentration in Ecology — 67 units

General Education Met in the Major

General Education requirements met in the Biology major (all concentrations) or Undeclared with Interest in Biology:

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area B1 (Physical Science) is satisfied upon completion of CHEM 130 or CHEM 233.
- Areas B2 (Life Science) and B3 (Laboratory Science) are satisfied upon completion of BIOL 240.
- Upper Division General Education, Physical, and Life Sciences (UD−B) is satisfied upon completion of BIOL 355.

Lower Division Requirements (34–35 units)

Electives

Select 11–14 units upon advisement from the alternates not used in fulfilling the requirements listed above, or any other upper division biology courses not specifically excluded for major credit, or any graduate course in biology.

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

SF State Studies

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM)

Environmental Sustainability (ES)

Global Perspectives (GP)

Social Justice (SJ)

Note: LD = Lower Division; UD = Upper Division.

First-Time Student Roadmap (4 year)

This roadmap opens in a new tab. (p. 1062)

Transfer Student Roadmap (2 year)

For students with an AS-T in Biology. This roadmap opens in a new tab. (p. 1064)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Biology

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.
Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit [http://www.assist.org](http://www.assist.org). Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit [http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL](http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL).

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units.
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring
semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

</tbody>
</table>

1. **Major Lower Division Requirement**
   - CHEM 215 General Chemistry II: Quantitative Applications of Chemistry Concepts (3 units)
   - & CHEM 216 General Chemistry II Laboratory: Quantitative Applications of Chemistry Concepts (2 units)
   - MATH 226 Calculus I (4 units)
   - MATH 227 Calculus II (4 units)
   - PHYS 111 General Physics I (3 units)
   - & PHYS 112 General Physics I Laboratory (1 unit)
   - PHYS 121 General Physics II (3 units)
   - & PHYS 122 General Physics II Laboratory (1 unit)

2. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE.

3. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

4. Areas B2 (Life Science) and B3 (Laboratory Science) are satisfied upon completion of BIOL 240.

5. Area B1 (Physical Science) is satisfied upon completion of CHEM 130 or CHEM 233.

6. Upper Division General Education, Physical, and Life Sciences (UD-B) is satisfied upon completion of BIOL 355.

7. **Major Upper Division Electives**
   - Select 11-14 units upon advisement from the alternates not used in fulfilling the requirements listed above, or any other upper division biology courses not specifically excluded for major credit, or any graduate course in biology.

8. **Major Upper Division Requirement**
   - Select 6-8 units on advisement from the following:
     - BIOL 482 Ecology (4 units)
     - BIOL 490 Ecology of Infectious Diseases (4 units)
     - BIOL 529GW Plant Ecology - GWAR (4 units)
     - BIOL 530 Conservation Biology (3 units)
     - BIOL 532 Restoration Ecology (3 units)
     - BIOL 534 Wetland Ecology (4 units)
     - BIOL 577 Ecological and Environmental Modeling (4 units)
     - BIOL 580 Limnology (3 units)
     - BIOL 582 Biological Oceanography (4 units)
     - BIOL 585 Marine Ecology (3 units)
     - BIOL 586 Marine Ecology Laboratory (2 units)
Bachelor of Science in Biology: Concentration in Ecology – BIOL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Biology. Thirty-two units in the major (BIOL 230/BIOL 240, CHEM 115/CHEM 215/CHEM 216, MATH 226, required PHYS sequence) and 33 units of lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

1 If ENG 214 equivalent not taken before transfer, GWAR course must be taken in a subsequent semester. Timely progress to degree will be affected.
2 BIOL 355 also satisfies GE Area UD–B: Upper Division Physical and/or Life Sciences.
3 Select course in consultation with an advisor.

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

University-Wide Requirements: 12–21 Units

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): See next bullet.
- Lower division GE (6 units) – Area C (3 units in any subarea) and Area D (3 units; D2 satisfies US History if needed; D3 satisfies US/CA Government requirement if needed)
• Upper division GE (6 units to do): 1) Major course satisfies UD-B. 2) Take UD-C and UD-D courses. See notes.
• Students entering this major with the AS-T in Biology are not required to fulfill SF State Studies or Complementary Studies requirements.

**Biology – Ecology Major: 38 Units**
Completed: BIOL 230/BIOL 240, MATH 226, all PHYS, and CHEM 115/CHEM 215/CHEM 216.

• Lower Division requirements (3 units): CHEM 130
• Major Upper Division Requirements/GWAR (21 units)
• Major Upper Division Electives (14 units) – upon advisement. See note 2.

**University Electives: Three or More Units**
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g., in both UD GE and the major.
Bachelor of Science in Biology: Concentration in Marine Biology and Limnology

Impaction
All Biology concentrations are currently impacted which means there are more applications than capacity. Transfer student applications for admission to this major are accepted by the University’s Office of Undergraduate Admissions only during the application filing period of October 1 to November 30 (for admission the following fall). No late applications or applications for spring will be considered. Both new transfer and on-campus students wishing to change majors are required to submit an additional departmental application. See departmental website biology.sfsu.edu (http://biology.sfsu.edu) for supplemental program application and deadlines.

General Information and Requirements

- Candidates entering the bachelor’s programs in biology should have completed three years of high school mathematics and one year of high school chemistry to allow completion of the curriculum in a timely fashion (see Undergraduate Admission Requirements (p. 54)).
- All major course work must be completed with letter grades (CR/NC is not acceptable).
- A minimum grade point average of 2.0 in all course work is required to receive a degree in these programs.
- To remain enrolled in a biology course, students must be prepared to provide copies of transcripts demonstrating completion of prerequisite courses with a grade of C– or better.
- At least 12 units in biology must be completed at SF State.
- Early in the first semester, and at regular intervals thereafter, students must consult with a biology advisor to plan a program of study. For the most current advising information, go to biology.sfsu.edu (http://biology.sfsu.edu).

Graduation Writing Assessment Requirement (GWAR)

(Note: Prior to fall 2012, GWAR would have been satisfied by passing ENG 414 (or ENG 410 or ENG 411 for CMS students) or a GWAR designated course from another discipline.)

Students must earn a C or better in a GWAR course to satisfy the requirement.

Biology majors have flexibility for which GWAR course they can take to meet their requirement, as long as the prerequisites for the course have been completed.

In general,

- Cell & Molecular Biology majors should take BIOL 351GW;
- Microbiology majors should take BIOL 402GW;
- Botany, Ecology, and Zoology majors may choose between BIOL 475GW, BIOL 478GW or BIOL 529GW;
- Marine Biology majors may choose between BIOL 570GW or BIOL 631GW; and
- Physiology majors may choose between BIOL 613GW or BIOL 631GW.

- General Biology majors may take any BIOL GWAR class.

See also the Department of Biology home page for GWAR in Biology: biology.sfsu.edu/content/gwar (http://biology.sfsu.edu/content/gwar) or contact a departmental advisor for further information.

The department does not permit multiple concentrations within the biology degree program. All of the curricula require preliminary work in physics and chemistry because many important biological concepts are based squarely upon principles in the physical sciences. Also, each curriculum includes upper division work in the biological sciences so that students will receive reasonable breadth and depth in their degree program. Because of the sequential arrangement of courses students are urged to consult the descriptions for the prerequisites of all their courses.

Although course electives are listed for most of the majors, new electives are always being added to various programs. Therefore, we highly recommend that students seek advisement prior to enrolling in elective courses in their major.

Concentration in Marine Biology and Limnology

Undergraduates may elect a general emphasis in marine invertebrate zoology, marine vertebrate zoology, marine botany, marine microbiology, or limnology. Graduate work may also be general or follow specific strengths such as ecology, evolution and systematics, functional morphology, physiology, behavior, estuarine or freshwater biology.

Biology (B.S.): Concentration in Marine Biology and Limnology — 66–68 units

General Education Met in the Major

General Education requirements met in the Biology major (all concentrations) or Undeclared with Interest in Biology:

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area B1 (Physical Science) is satisfied upon completion of CHEM 130 or CHEM 233.
- Areas B2 (Life Science) and B3 (Laboratory Science) are satisfied upon completion of BIOL 240.
- Upper Division General Education, Physical, and Life Sciences (UD–B) is satisfied upon completion of BIOL 355.

Any Marine Science Course between MSCI 312 and MSCI 344 without duplicating courses taken at SF State

**Note:** A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

**First-Time Student Roadmap (4 year)**

This roadmap opens in a new tab. (p. 1070)

**Transfer Student Roadmap (2 year)**

For students with an AS-T in Biology. This roadmap opens in a new tab. (p. 1072)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Biology

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California
Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission. For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

### Eighth Semester

| Upper Division Electives (14-17 units) – Take Two ⁴                  | 6     |
| SF State Studies or University Elective – Take Two                  | 6     |

**Total Units** 120-122

---

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP; ES, SJ) within your GE or major.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. **Units on Advisement (3-5 units)**
   - BIOL 534 Wetland Ecology (4 units)
   - BIOL 580 Limnology (3 units)
   - BIOL 582 Biological Oceanography (4 units)
   - BIOL 585 Marine Ecology (3 units)
   - and BIOL 586 Marine Ecology Laboratory (2 units)
4. **Upper Division Electives (14-17 units)**
   - BIOL 502 Biology of the Algae (3 units)
   - BIOL 526 Plant Molecular Physiology Laboratory (2 units)
   - BIOL 532 Restoration Ecology (3 units)
   - BIOL 555 Marine Invertebrate Zoology (4 units)
   - BIOL 556 Natural History of Marine Invertebrates (4 units)
   - BIOL 570DW Biology of Fishes - GWAR (4 units)
   - BIOL 575 Fisheries Biology (3 units)
   - BIOL 584 Marine Microbial Ecology Laboratory (1 units)
   - BIOL 586 Marine Ecology Laboratory (2 units)
   - BIOL 631GW Animal Physiology Laboratory - GWAR (4 units)
   - CHEM 680 Chemical Oceanography (3 units)
   - ERTH 434 Coastal Processes (3 units)
   - ERTH 642 Watershed Assessment and Restoration (4 units)
**Bachelor of Science in Biology: Concentration in Marine Biology and Limnology – BIOL Associate Degree for Transfer Roadmap**

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Biology. Thirty-two units in the major (BIOL 230/BIOL 240, CHEM 115/CHEM 215/CHEM 216, MATH 226, required PHYS sequence) and 33 units of lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

¹ If ENG 214 equivalent not taken before transfer, take this course or BIOL 631GW course in a subsequent semester (note that BIOL 630 must be taken before or concurrently with BIOL 631GW). While completion in 60 units is still possible, progress to degree will be extended.

² Some GE Area UD–C: Upper Division Arts and/or Humanities courses also satisfy US History. Check the Class Schedule.

³ BIOL 355 satisfies GE Area UD–B: Upper Division Physical and/or Life Sciences.

⁴ Select upper division electives in consultation with an advisor.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 15–21 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer. See note 1.
- American Institutions (0–6 units): See next bullet.
• Lower division GE (6 units) – Area C (3 units in any subarea) and Area D (3 units; D2 satisfies US History if needed; D3 satisfies US/CA Government requirement if needed)
• Upper division GE (6 units to do): 1) Major course satisfies UD-B. 2) Take UD-C and UD-D courses. See notes.
• Students entering this major with the AS-T in Biology are not required to fulfill SF State Studies or Complementary Studies requirements.

**Biology – Marine Biology and Limnology Major: 36–37 Units**
BIOL 230/BIOL 240, MATH 226, all PHYS, CHEM 115/CHEM 215/CHEM 216 met in transfer.

• Lower Division requirements (3 units): CHEM 130
• Major Upper Division Requirements (16–17 units)
• Major Upper Division Electives – includes GWAR (17 units) – upon advisement. See note 2.

**University Electives: One Unit or More**
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. both in UD GE and the major.
Bachelor of Science in Biology: Concentration in Microbiology

Impaction
All Biology concentrations are currently impacted which means there are more applications than capacity. Transfer student applications for admission to this major are accepted by the University’s Office of Undergraduate Admissions only during the application filing period of October 1 to November 30 (for admission the following fall). No late applications or applications for spring will be considered. Both new transfer and on-campus students wishing to change majors are required to submit an additional departmental application. See departmental website biology.sfsu.edu (http://biology.sfsu.edu) for supplemental program application and deadlines.

General Information and Requirements

- Candidates entering the bachelor’s programs in biology should have completed three years of high school mathematics and one year of high school chemistry to allow completion of the curriculum in a timely fashion (see Undergraduate Admission Requirements (p. 54)).
- All major course work must be completed with letter grades (CR/NC is not acceptable).
- A minimum grade point average of 2.0 in all course work is required to receive a degree in these programs.
- To remain enrolled in a biology course, students must be prepared to provide copies of transcripts demonstrating completion of prerequisite courses with a grade of C— or better.
- At least 12 units in biology must be completed at SF State.
- Early in the first semester, and at regular intervals thereafter, students must consult with a biology advisor to plan a program of study. For the most current advising information, go to biology.sfsu.edu (http://biology.sfsu.edu).

Graduation Writing Assessment Requirement (GWAR)
(Note: Prior to fall 2012, GWAR would have been satisfied by passing ENG 414 (or ENG 410 or ENG 411 for CMS students) or a GWAR designated course from another discipline.)

Students must earn a C or better in a GWAR course to satisfy the requirement.

Biology majors have flexibility for which GWAR course they can take to meet their requirement, as long as the prerequisites for the course have been completed.

In general,
- Cell & Molecular Biology majors should take BIOL 351GW;
- Microbiology majors should take BIOL 402GW;
- Botany, Ecology, and Zoology majors may choose between BIOL 475GW, BIOL 478GW or BIOL 529GW;
- Marine Biology majors may choose between BIOL 570GW or BIOL 631GW; and
- Physiology majors may choose between BIOL 613GW or BIOL 631GW.
- General Biology majors may take any BIOL GWAR class.

See also the Department of Biology home page for GWAR in Biology: biology.sfsu.edu/content/gwar (http://biology.sfsu.edu/content/gwar) or contact a departmental advisor for further information.

The department does not permit multiple concentrations within the biology degree program. All of the curricula require preliminary work in physics and chemistry because many important biological concepts are based squarely upon principles in the physical sciences. Also, each curriculum includes upper division work in the biological sciences so that students will receive reasonable breadth and depth in their degree program. Because of the sequential arrangement of courses students are urged to consult the descriptions for the prerequisites of all their courses.

Although course electives are listed for most of the majors, new electives are always being added to various programs. Therefore, we highly recommend that students seek advisement prior to enrolling in elective courses in their major.

Concentration in Microbiology
The student may select courses emphasizing general microbiology or medical microbiology. The selection of an appropriate program not only prepares the student for careers in research, industry, public health, clinical laboratory, or state or federal service but also provides the basis for post-graduate study which may lead to the Master of Arts in Biology: Concentration in Microbiology.

For students interested in applying to Clinical Laboratory Science programs, it is recommended that they complete the B.S. in Biology Concentration in Microbiology which has been modified to meet most of the requirements for the discontinued Clinical Science degree (Clinical Science Track). Students should meet with their Microbiology Major Advisor to discuss the specifics of this modified degree.

Biology (B.S.): Concentration in Microbiology — 68–69 units

General Education Met in the Major
General Education requirements met in the Biology major (all concentrations) or Undeclared with Interest in Biology:

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area B1 (Physical Science) is satisfied upon completion of CHEM 130 or CHEM 233.
- Areas B2 (Life Science) and B3 (Laboratory Science) are satisfied upon completion of BIOL 240.
- Upper Division General Education, Physical, and Life Sciences (UD–B) is satisfied upon completion of BIOL 355.

Lower Division Requirements (38–39 units)

CHEM 336 Organic Chemistry II Laboratory 2
or CHEM 343 Biochemistry I Laboratory

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

SF State Studies

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM) | LD or UD | 3 |
Environmental Sustainability (ES) | LD or UD | 3 |
Global Perspectives (GP) | LD or UD | 3 |
Social Justice (SJ) | LD or UD | 3 |

Note: LD = Lower Division; UD = Upper Division.
First Time Student Roadmap (4 Year)
This roadmap opens in a new tab. (p. 1078)

Transfer Student Roadmap (2 Year)
For students with an AS-T in Biology. This roadmap opens in a new tab. (p. 1080)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Biology
California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students
1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government

- a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs
Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AIEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.
Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

*For more information, visit the Undergraduate Admissions section.*

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - a. One course in oral communication (same as CSU GE area A1)
  - b. One course in written composition (same as CSU GE area A2)
  - c. One course in critical thinking (same as CSU GE area A3)
  - d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

</tbody>
</table>

| Total Units | 120-121 |

---

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP ES, SJ) within your GE.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy GE Area A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. **Lower Division Requirement**
   - BIOL 358 Forensic Genetics: Math Matters (4 units)
   - BIOL 458 Biometry (4 units)
   - CSC 210 Introduction to Computer Programming (3 units)
   - MATH 124 Elementary Statistics (3 units)
   - MATH 227 Calculus II (4 units)
   - MATH 228 Calculus III (4 units)
4. **Electives in Microbiology**
   - Select 12 units from the following courses, including at least three laboratory courses with approval of an advisor. Any course taken as an elective that does not appear on this list will not be counted towards completion of the Microbiology degree requirements unless the course is approved by an advisor prior to enrolling in it. Any course taken as an elective that does not appear on this list will not be counted towards the completion of the Microbiology degree requirements unless it is approved by an advisor prior to enrolling in the course.
   - BIOL 351GW Experiments in Cell and Molecular Biology - GWAR (4 units)
   - BIOL 420 General Virology (3 units)
   - BIOL 425 Emerging Diseases (3 units)
   - BIOL 430 Medical Microbiology (3 units)
   - BIOL 431 Medical Microbiology Laboratory (2 units)
   - BIOL 435 Immunology (3 units)
   - BIOL 436 Immunology Laboratory (2 units)
   - BIOL 443 Microbial Physiology Laboratory (2 units)
   - BIOL 446 Microbial Genomics (4 units)
   - BIOL 453 General Parasitology (3 units)
   - BIOL 454 Parasitology Laboratory (1 units)
   - BIOL 490 Ecology of Infectious Diseases (4 units)
   - BIOL 625 Hematology (3 units)
   - BIOL 638 Bioinformatics & Genome Annotation (4 units)
   - BIOL 699 Independent Study in Biology (1-3 units)
   - BIOL 741/CHEM 741/ERTH 741 Electron Microscopy (4 units)
   - CHEM 336 Organic Chemistry II Laboratory (2 units)
   - or CHEM 343 Biochemistry I Laboratory (3 units)
**Bachelor of Science in Biology: Concentration in Microbiology – BIOL Associate Degree for Transfer Roadmap**

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Biology. Thirty-two units in the major (BIOL 230/Biol 240, CHEM 115/Chem 215/CHEM 216, MATH 226, required PHYS sequence) and 33 units of lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. [Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information](http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

</tbody>
</table>

1. Some GE Area UD-C: Upper Division Arts and/or Humanities courses also satisfy US History. Check the Class Schedule.

2. BIOL 355 satisfies GE Area UD-B: Upper Division Physical and/or Life Sciences.

3. Select upper division electives in consultation with an advisor. Must include at least three lab courses.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 15–21 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): See bullet.
• Lower division GE (6 units) – Area C (3 units in any subarea) and Area D (3 units; D2 satisfies US History if needed; D3 satisfies US/CA Government requirement if needed)
• Upper division GE (6 units to do): 1) Major course satisfies UD-B. 2) Take UD-C and UD-D courses. See notes.
• Students entering this major with the AS-T in Biology are not required to fulfill SF State Studies or Complementary Studies requirements.

**Biology – Microbiology Major: 37 Units**

BIOL 230/BIOL 240, MATH 226, all PHYS, CHEM 115/CHEM 215/CHEM 216 met in transfer.

• Lower Division requirements (7 units): CHEM 233; MATH 124, MATH 227, MATH 228 OR CSC 210 if not met in transfer
• Major Upper Division Requirements/GWAR (18 units)
• Major Upper Division Electives (12 units) – upon advisement. See note 1.

**University Electives: Two or More Units**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major.

**Major Lower Division Requirement**

Bachelor of Science in Biology: Concentration in Physiology

Impaction
All Biology concentrations are currently impacted which means there are more applications than capacity. Transfer student applications for admission to this major are accepted by the University’s Office of Undergraduate Admissions only during the application filing period of October 1 to November 30 (for admission the following fall). No late applications or applications for spring will be considered. Both new transfer and on-campus students wishing to change majors are required to submit an additional departmental application. See departmental website biology.sfsu.edu (http://biology.sfsu.edu) for supplemental program application and deadlines.

General Information and Requirements

- Candidates entering the bachelor’s programs in biology should have completed three years of high school mathematics and one year of high school chemistry to allow completion of the curriculum in a timely fashion (see Undergraduate Admission Requirements (p. 54)).
- All major course work must be completed with letter grades (CR/NC is not acceptable).
- A minimum grade point average of 2.0 in all course work is required to receive a degree in these programs.
- To remain enrolled in a biology course, students must be prepared to provide copies of transcripts demonstrating completion of prerequisite courses with a grade of C– or better.
- At least 12 units in biology must be completed at SF State.
- Early in the first semester, and at regular intervals thereafter, students must consult with a biology advisor to plan a program of study. For the most current advising information, go to biology.sfsu.edu (http://biology.sfsu.edu).

Graduation Writing Assessment Requirement (GWAR)
(Note: Prior to fall 2012, GWAR would have been satisfied by passing ENG 414 (or ENG 410 or ENG 411 for CMS students) or a GWAR designated course from another discipline.)

Students must earn a C or better in a GWAR course to satisfy the requirement.

Biology majors have flexibility for which GWAR course they can take to meet their requirement, as long as the prerequisites for the course have been completed.

In general,

- Cell & Molecular Biology majors should take BIOL 351GW;
- Microbiology majors should take BIOL 402GW;
- Botany, Ecology, and Zoology majors may choose between BIOL 475GW, BIOL 478GW or BIOL 529GW;
- Marine Biology majors may choose between BIOL 570GW or BIOL 631GW; and
- Physiology majors may choose between BIOL 613GW or BIOL 631GW.
- General Biology majors may take any BIOL GWAR class.

See also the Department of Biology home page for GWAR in Biology: biology.sfsu.edu/content/gwar (http://biology.sfsu.edu/content/gwar) or contact a departmental advisor for further information.

The department does not permit multiple concentrations within the biology degree program. All of the curricula require preliminary work in physics and chemistry because many important biological concepts are based squarely upon principles in the physical sciences. Each curriculum includes upper division work in the biological sciences so that students will receive reasonable breadth and depth in their degree program. Because of the sequential arrangement of courses students are urged to consult the descriptions for the prerequisites of all their courses.

Although course electives are listed for most of the majors, new electives are always being added to various programs. Therefore, we highly recommend that students seek advisement prior to enrolling in elective courses in their major.

Concentration in Physiology
This program is designed to provide a firm foundation in physiology. Students interested in vertebrate, invertebrate, and plant physiology will find this concentration appropriate. The program is especially suited for preparation for advanced study at the postgraduate level or to prepare for careers in the health professions. In addition to major curricula in physiology, service courses are provided for nursing, clinical science, exercise physiology, kinesiology, and physical therapy majors.

Biology (B.S.): Concentration in Physiology – 67 units

General Education Met in the Major
General Education requirements met in the Biology major (all concentrations) or Undeclared with Interest in Biology:

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area B1 (Physical Science) is satisfied upon completion of CHEM 130 or CHEM 233.
- Areas B2 (Life Science) and B3 (Laboratory Science) are satisfied upon completion of BIOL 240.
- Upper Division General Education, Physical, and Life Sciences (UD–B) is satisfied upon completion of BIOL 355.

The GWAR in the B.S. biology, physiology concentration, can be satisfied with the physiology lab courses BIOL 613GW or BIOL 631GW.

BIOL 640 Cellular Neurosciences
BIOL 642 Neural Systems Physiology

Physiology Lab
Select one course (2–4 units) from the following:
BIOL 526 Plant Molecular Physiology Laboratory
BIOL 613GW Human Physiology Laboratory - GWAR
BIOL 631GW Animal Physiology Laboratory - GWAR

Electives
Select 10–11 units in consultation with an advisor from the following:
Criteria for elective units: one elective must contain a laboratory component; one elective must be chosen from each of the emphases listed below; and additional electives may be selected from the list of physiology core courses and/or either of the emphases listed below.

Cellular and Molecular Emphasis
BIOL 351GW Experiments in Cell and Molecular Biology - GWAR 4
BIOL 357 Molecular Genetics 3
BIOL 382 Developmental Biology 3
BIOL 435 Immunology 3
BIOL 615 Molecular Pathophysiology 3
BIOL 652 Science Education Partners in Biology 4
BIOL 699 Independent Study in Biology 1-3
BIOL 623 Pharmacology (undergraduate students only) 3

BIOL 723 Pharmacology (graduate students only) 3
BIOL 865 Advances in Physiology and Behavioral Biology 2
CHEM 343 Biochemistry I Laboratory 3

Ecological, Anatomical, and Evolutionary Emphasis
BIOL 328 Human Anatomy 4
BIOL 337 Evolution 3
BIOL 482 Ecology 4
BIOL 504 Biology of the Fungi 4
BIOL 505 Comparative Anatomy of Vascular Plants 4
BIOL 529GW Plant Ecology - GWAR 4
BIOL 555 Marine Invertebrate Zoology 4
BIOL 585 Marine Ecology 3
BIOL 586 Marine Ecology Laboratory 2
BIOL 600 Animal Behavior 3
BIOL 614 Vertebrate Histology 4
BIOL 652 Science Education Partners in Biology 4
BIOL 699 Independent Study in Biology 1-3
BIOL 865 Advances in Physiology and Behavioral Biology 2

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

Note: Courses may be used only once within the major. No more than one BIOL 699 may be used as an elective.

1 Students interested in pursuing graduate study in physiology should take the one-year organic chemistry sequence (CHEM 233/CHEM 335) and the one-year biochemistry sequence (CHEM 340/CHEM 341) in place of CHEM 130 and CHEM 349.

2 BIOL 358 may be used as an upper division elective in the Cell and Molecular Emphasis if it has not been used to satisfy any lower division requirements.

Physical and/or Life Science: UD 3 UD-B
Arts and/or Humanities: UD 3 UD-C
Social Sciences: UD 3 UD-D

**SF State Studies**
Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM): LD or UD 3
Environmental Sustainability (ES): LD or UD 3
Global Perspectives (GP): LD or UD 3
Social Justice (SJ): LD or UD 3

Note: LD = Lower Division; UD = Upper Division.

**First-Time Student Roadmap**
This roadmap opens in a new tab. (p. 1086)

**Transfer Student Roadmap**
For students with an AS-T in Biology. This roadmap opens in a new tab. (p. 1089)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Biology
California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:
- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**
1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:
- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this
 Bachelor of Science in Biology: Concentration in Physiology

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission.

For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

- BIOL 699 Independent Study in Biology (1-3 units)
- BIOL 865 Advances in Physiology and Behavioral Biology (2 units)
### Bachelor of Science in Biology: Concentration in Physiology – BIOL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Biology. Thirty-two units in the major (BIOL 230/BIOL 240, CHEM 115/CHEM 215/CHEM 216, MATH 226, required PHYS sequence) and 33 units of lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

¹ BIOL 458 may be substituted for MATH 124/MATH 227.
² Some GE Area UD–C: Upper Division Arts and/or Humanities courses also satisfy US History. Check the Class Schedule.
³ BIOL 355 satisfies GE Area UD–B: Upper Division Physical and/or Life Sciences.
⁴ Select Physiology electives in consultation with an advisor; electives must meet specific criteria.

### To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:
University-Wide Requirements: 12–21 Units

- ENG 214 or equivalent A4 course (0-3 units) if not taken before transfer
- American Institutions (0-6 units): See next bullet.
- Lower division GE (6 units) – Area C (3 units in any subarea) and Area D (3 units; D2 satisfies US History if needed; D3 satisfies US/CA Government requirement if needed)
- Upper division GE (6 units to do): 1) Major course satisfies UD-B. 2) Take UD-C and UD-D courses. See notes.
- Students entering this major with the AS-T in Biology are not required to fulfill SF State Studies or Complementary Studies requirements.

Biology – Physiology Major: 34–40 Units

BIOL 230/BIOL 240, MATH 226, all PHYS, CHEM 115/215 met in transfer.

- Lower Division requirements (3–7 units): CHEM 130; MATH 124 or MATH 227 if not met in transfer (BIOL 458 may substitute for MATH 124 or MATH 227)
- Upper Division requirements (31–33 units); includes
  - Upper division requirements (9 units): BIOL 350, BIOL 355; CHEM 340 or CHEM 349
  - Physiology Core and Lab Requirements/GWAR (12–13 units)
  - Physiology Electives (10–11 units) – upon advisement. See note 1.

University Electives: Zero Units or More

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State - some courses may meet more than one requirement, e.g. both in UD GE and the major.

Bachelor of Science in Biology: Concentration in Zoology

Impaction
All Biology concentrations are currently impacted which means there are more applications than capacity. Transfer student applications for admission to this major are accepted by the University’s Office of Undergraduate Admissions only during the application filing period of October 1 to November 30 (for admission the following fall). No later applications or applications for spring will be considered. Both new transfer and on-campus students wishing to change majors are required to submit an additional departmental application. See departmental website biology.sfsu.edu (http://biology.sfsu.edu) for supplemental program application and deadlines.

General Information and Requirements

- Candidates entering the bachelor’s programs in biology should have completed three years of high school mathematics and one year of high school chemistry to allow completion of the curriculum in a timely fashion (see Undergraduate Admission Requirements (p. 54)).
- All major course work must be completed with letter grades (CR/NC is not acceptable).
- A minimum grade point average of 2.0 in all course work is required to receive a degree in these programs.
- To remain enrolled in a biology course, students must be prepared to provide copies of transcripts demonstrating completion of prerequisite courses with a grade of C- or better.
- At least 12 units in biology must be completed at SF State.
- Early in the first semester, and at regular intervals thereafter, students must consult with a biology advisor to plan a program of study. For the most current advising information, go to biology.sfsu.edu (http://biology.sfsu.edu).

Graduation Writing Assessment Requirement (GWAR)
(Note: Prior to fall 2012, GWAR would have been satisfied by passing ENG 414 (or ENG 410 or ENG 411 for CMS students) or a GWAR designated course from another discipline.)

Students must earn a C or better in a GWAR course to satisfy the requirement.

Biology majors have flexibility for which GWAR course they can take to meet their requirement, as long as the prerequisites for the course have been completed.

In general,
- Cell & Molecular Biology majors should take BIOL 351GW;
- Microbiology majors should take BIOL 402GW;
- Botany, Ecology, and Zoology majors may choose between BIOL 475GW, BIOL 478GW or BIOL 529GW;
- Marine Biology majors may choose between BIOL 570GW or BIOL 631GW; and
- Physiology majors may choose between BIOL 613GW or BIOL 631GW.
- General Biology majors may take any BIOL GWAR class.

See also the Department of Biology home page for GWAR in Biology: biology.sfsu.edu/content/gwar (http://biology.sfsu.edu/content/gwar) or contact a departmental advisor for further information.

The department does not permit multiple concentrations within the biology degree program. All of the curricula require preliminary work in physics and chemistry because many important biological concepts are based squarely upon principles in the physical sciences. Also, each curriculum includes upper division work in the biological sciences so that students will receive reasonable breadth and depth in their degree program. Because of the sequential arrangement of courses students are urged to consult the descriptions for the prerequisites of all their courses.

Although course electives are listed for most of the majors, new electives are always being added to various programs. Therefore, we highly recommend that students seek advisement prior to enrolling in elective courses in their major.

Concentration in Zoology
This program provides students with a broad background in animal biology through coursework in evolutionary biology, ecology, behavior, anatomy, and physiology of both vertebrate and invertebrate animals. It is recommended that a background in both vertebrate and invertebrate biology be obtained through selection of appropriate elective courses.

Biology (B.S.): Concentration in Zoology — 67 units

General Education Met in the Major
General Education requirements met in the Biology major (all concentrations) or Undeclared with Interest in Biology:
The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area B1 (Physical Science) is satisfied upon completion of CHEM 130 or CHEM 233.
- Areas B2 (Life Science) and B3 (Laboratory Science) are satisfied upon completion of BIOL 240.
- Upper Division General Education, Physical, and Life Sciences (UD–B) is satisfied upon completion of BIOL 355.

16-17
Upper Division Requirements (19–21 units)

BIOL 337 Evolution 3
BIOL 355 Genetics 3
BIOL 458 Biometry 4
Select one on advisement of the following: 3
  BIOL 350 Cell Biology
  BIOL 357 Molecular Genetics
  BIOL 380 Evolutionary Developmental Biology
  BIOL 382 Developmental Biology
  BIOL 453 General Parasitology
  BIOL 600 Animal Behavior
  BIOL 621 Human Physiology
  BIOL 620 Endocrinology
  BIOL 621 Reproductive Physiology
  BIOL 630 Animal Physiology
Select 3–4 units on advisement from the following: 3-4
  BIOL 482 Ecology
  BIOL 529GW Plant Ecology - GWAR
  BIOL 530 Conservation Biology
  BIOL 532 Restoration Ecology
  BIOL 534 Wetland Ecology
  BIOL 577 Ecological and Environmental Modeling
  BIOL 580 Limnology
  BIOL 582 Biological Oceanography
  BIOL 585 Marine Ecology
  BIOL 586 Marine Ecology Laboratory

Taxonomy or Whole Organism Biology of an Invertebrate or Vertebrate

Select one course upon advisement.
  BIOL 460 General Entomology
  BIOL 461 Insect Taxonomy
  BIOL 464 Medical Entomology
  BIOL 475GW Herpetology - GWAR
  BIOL 478GW Ornithology - GWAR
  BIOL 555 Marine Invertebrate Zoology
  BIOL 570GW Biology of Fishes - GWAR

Electives (7–11 units)

Upon advisement choose from the alternates not used in fulfilling the requirements listed above or any other upper division biology courses not specifically excluded for major credit, or any graduate biology course.

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

SF State Studies

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM) | LD or UD | 3

Environmental Sustainability (ES) | LD or UD | 3

Global Perspectives (GP) | LD or UD | 3

Social Justice (SJ) | LD or UD | 3

Note: LD = Lower Division; UD = Upper Division.

First-Time Student Roadmap (4 Year)

This roadmap opens in a new tab. (p. 1095)
Transfer Student Roadmap (2 Year)
For students with an AS-T in Biology. This roadmap opens in a new tab. (p. 1097)

This degree program is an approved pathway ("similar" major) for students earning the ADT in Biology
California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

• How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
• Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
• How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students
1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   • a course in U.S. History
   • a course in U.S. & California Government
   • a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

• Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt; or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs
Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.
All students must meet the transfer eligibility requirements outlined below for admission. For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

</tr>
</tbody>
</table>

**Total Units**: 120-126

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. Upon advisement choose from the alternates not used in fulfilling the requirements listed above or any other upper division biology courses not specifically excluded for major credit, or any graduate biology course.
4. **Major Lower Division Requirements**
   - CHEM 215 General Chemistry II: Quantitative Applications of Chemistry Concepts (3 units)
   - CHEM 216 General Chemistry II Laboratory: Quantitative Applications of Chemistry Concepts (2 units)
   - MATH 226 Calculus I (4 units)
   - MATH 227 Calculus II (4 units)
   - PHYS 111 General Physics I (3 units)
   - PHYS 112 General Physics I Laboratory (1 unit)
   - PHYS 121 General Physics II (3 units)
   - PHYS 122 General Physics II Laboratory (1 unit)
5. **Major Upper Division Selection One**
   - BIOL 350 Cell Biology (3 units)
   - BIOL 357 Molecular Genetics (3 units)
   - BIOL 380 Evolutionary Developmental Biology (3 units)
   - BIOL 382 Developmental Biology (3 units)
   - BIOL 453 General Parasitology (3 units)
   - BIOL 600 Animal Behavior (3 units)
   - BIOL 612 Human Physiology (3 units)
   - BIOL 620 Endocrinology (3 units)
   - BIOL 621 Reproductive Physiology (3 units)
   - BIOL 630 Animal Physiology (3 units)
6. **Major Upper Division Selection Two**
   - BIOL 482 Ecology (4 units)
   - BIOL 529GW Plant Ecology - GWAR (4 units)
   - BIOL 530 Conservation Biology (3 units)
   - BIOL 532 Restoration Ecology (3 units)
   - BIOL 534 Wetland Ecology (4 units)
   - BIOL 577 Ecological and Environmental Modeling (4 units)
   - BIOL 580 Limnology (3 units)
   - BIOL 582 Biological Oceanography (4 units)
   - BIOL 585 Marine Ecology (3 units)
   - BIOL 586 Marine Ecology Laboratory (2 units)
7. **Major Upper Division Taxonomy or Whole Organism Biology of an Invertebrate or Vertebrate**
   - BIOL 460 General Entomology (4 units)
   - BIOL 461 Insect Taxonomy (4 units)
   - BIOL 464 Medical Entomology (3 units)
   - BIOL 476GW Herpetology - GWAR (3 units)
   - BIOL 478GW Ornithology - GWAR (4 units)
   - BIOL 555 Marine Invertebrate Zoology (4 units)
   - BIOL 570GW Biology of Fishes - GWAR (4 units)
# Bachelor of Science in Biology: Concentration in Zoology – BIOL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Biology. Thirty-two units in the major (BIOL 230/BIOL 240, CHEM 115/CHEM 215/CHEM 216, MATH 226, required PHYS sequence) and 33 units of lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

¹  If ENG 214 equivalent not taken before transfer, GWAR course must be taken in a subsequent semester. Timely progress to degree will be affected.
²  Some GE Area UD–C: Upper Division Arts and/or Humanities courses also satisfy US History. Check the Class Schedule
³  BIOL 355 satisfies GE Area UD–B: Upper Division Physical and/or Life Sciences.
⁴  Select course in consultation with an advisor.
⁵  If BIOL 529GW taken in the first semester, take University elective instead.
⁶  If BIOL 475GW, BIOL 478GW or BIOL 570GW taken in the first semester, take a University elective instead.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 12–21 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): See next bullet.
• Lower division GE (6 units) – Area C (3 units in any subarea) and Area D (3 units; D2 satisfies US History if needed; D3 satisfies US/CA Government requirement if needed)
• Upper division GE (6 units to do): 1) Major course satisfies UD-B. 2) Take UD-C and UD-D courses. See notes.
• Students entering this major with the AS-T in Biology are not required to fulfill SF State Studies or Complementary Studies requirements.

Biology – Zoology Major: 35 Units
BIOL 230/BIOL 240, MATH 226, all PHYS, CHEM 115/CHEM 215/CHEM 216 met in transfer.

• Lower Division requirements (3 units): CHEM 130 if not met in transfer
• Major Upper Division Requirements/GWAR (21 units)
• Major Upper Division Electives (11 units) – upon advisement. See note 4.

University Electives: Three or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. both in UD GE and the major.

Major Upper Division Requirement – Also Satisfies University GWAR

Minor in General Biology

The Minor in Biology has been suspended for the 2017–2018 academic year because of impaction. No requests to declare the minor will be approved at this time. Students who have already declared a minor will be allowed to complete their course of study.

The minor requires a minimum of 23 units in biology, of which at least one-half must be upper division units.

All courses in the minor must be completed with letter grades (CR/NC is not acceptable).

General Biology Minor – 23 units

Lower Division Requirements (10 units)

Additional Upper Division Electives

Select 2–4 units approved by an advisor.

Certificate in Biotechnology

The Certificate in Biotechnology is designed to allow students who are pursuing an undergraduate major in biology or biochemistry to learn the theoretical basis, principles, and current applications of biotechnology. An integral part of the program is a supervised internship to be served in a Bay Area biotechnology company laboratory. Laboratory-oriented students will find an expanding demand for their skills upon completion of the program both in the Bay Area and nationwide.

Students must earn a grade of C or better in all prerequisite courses, and be prepared to provide copies of transcripts demonstrating completion of prerequisites.

Certificate in Genetic Engineering

The Certificate in Genetic Engineering program is designed to allow students who have completed an undergraduate degree in basic science with a molecular biological emphasis to learn the techniques and principles of genetic engineering by both lecture and laboratory/project experience, balanced with an integrated presentation of both ethical concerns and safety considerations. This program will further prepare students to make transitions into careers in the area of biotechnology or to enter advanced degree programs. Graduate students intending to secure both a master’s degree and the certificate may pursue these objectives concurrently with consultation and approval of the graduate degree faculty advisor. All course work used to satisfy the requirements must be taken on an A–F graded basis and must be completed with a minimum grade point average of 3.0. Due to laboratory space limitations, total enrollment in the program will be restricted.

Before being considered for acceptance to the program, the student must first be eligible in accordance with all University requirements as outlined in the section Certificate Programs (p. 25). This same section also includes university program guidelines and procedures to be followed in filing for the award of the certificate when it is completed.
Admission to the Program
To be admitted to the program an applicant must have completed a baccalaureate degree and must be admitted to classified graduate standing in accordance with University standard admissions requirements and procedures. In addition applicants must:

1. Submit to the certificate coordinator a copy of transcripts used for the baccalaureate degree, transcripts of other relevant study, and evidence of graduate standing in the university. The following courses from San Francisco State University, or their equivalents, are prerequisites and must be completed before the program is initiated.

2. Submit to the coordinator a letter of application for admission to the certificate program. This letter should include a description of any relevant experience not evident in the transcripts.

3. Make arrangements to have a minimum of two letters of recommendation sent to the coordinator.

4. Submit a letter of admission to classified status in the graduate program.

5. Applications should be addressed to:
   Genetic Engineering Coordinator
   Department of Biology
   San Francisco State University
   San Francisco, CA 94132.

The specific course requirements shall be determined by the student’s committee and are based upon consideration of goals, interests, and undergraduate preparation. For additional details, contact the Graduate Program Coordinator.

Written English Proficiency Requirement
Demonstration of an appropriate level of writing competency shall be accomplished with the satisfactory preparation of written laboratory reports that demonstrate competency in scientific report writing and analysis of data. The instructor of this course shall determine whether reports have met those criteria and so specify on the Certificate Approved Program form. If the student’s work is unsatisfactory, additional course work directed to achieving English competency may be specified after consultation with the coordinator.

Master of Science in Biology: Concentration in Cell and Molecular Biology
A student interested in pursuing an advanced degree in any of these programs must meet the general requirements as outlined as well as any additional requirements specified by the major field of study.

For current advising information, including research and funding opportunities, consult the SF State Biology Department home page at biology.sfsu.edu. (http://biology.sfsu.edu)

General Admission Requirements
An applicant must have a baccalaureate degree from an accredited institution and the equivalent major course work for the program area to which application is made. To evaluate an applicant, the biology department requires the following:

1. Transcripts of all undergraduate work;
2. Graduate Record Examination scores for the general test;
3. A statement of purpose;
4. Two or more letters of recommendation, preferably from science faculty.

When the department receives this information, the completed file is forwarded to the faculty coordinator of the program area chosen by the applicant. The faculty in the program area evaluate the applicant’s file and recommend admission or denial based on the following criteria:

- Grade point average in the undergraduate major—minimum required GPA in science courses is 3.0
- Statement of purpose
- GRE scores
- Letters of recommendation

Denial of admission may be based on inadequacy in any of the above criteria, if an applicant’s interests are not represented by current faculty, or if faculty in the applicant’s area of interest are unable to support additional students.

Written English Proficiency Requirement
The University has a requirement for written English proficiency that is to be assessed at two levels.

Level One
The student must pass a proctored essay test administered by the department at the beginning of the first semester.

Level Two
Prior to filing the Advancement to Candidacy (ATC), the student must prepare a thesis prospectus for approval by the student’s thesis committee.

Course Requirements
The general requirements of all students are as follows:

- All courses listed on the Advancement to Candidacy (ATC) (or to satisfy conditional requirements) must be completed with a letter grade. The culminating experience courses, BIOL 895 and BIOL 898 are the exception and will be graded on a CR/NC basis.
- A minimum of 30 units of upper division and/or graduate credit (may include up to six units of experimental courses in biology).
- A minimum of 21 units of which six units may be from a graduate level paired course.
- A minimum of two department seminars requiring student presentations.
- After initiating a research program, a graduate student must enroll each semester in BIOL 897 – until the research is completed.
• Four units of BIOL 898 or three units of BIOL 895.
• An oral defense of the thesis or research project.

On-line course descriptions (bulletin.sfsu.edu/courses) are available. Most upper division courses in biology are acceptable for the master’s in biology upon approval of the graduate advisor. Students are reminded to check the individual concentrations for additional requirements.

Concentration in Cell and Molecular Biology
This concentration is designed for students preparing for future graduate work as well as for those wishing to increase their competency in the fields of cell and molecular biology. It emphasizes the study of cells, cell organelles, macromolecules, and the regulation of their production and interaction. As such, it represents an expanding frontier of research that integrates biochemistry, biophysics, genetics, developmental biology, and cell ultrastructure. Each faculty member serves as advisor and major professor for students working on research programs in the faculty member’s area of specialization.

The specific course requirements shall be determined by the student’s committee and are based upon consideration such as goals, interests, and undergraduate preparation. A strong background in chemistry is highly recommended.

Master of Science in Biology: Concentration in Ecology, Evolution and Conservation Biology (EECB)
A student interested in pursuing an advanced degree in any of these programs must meet the general requirements as outlined as well as any additional requirements specified by the major field of study.

For current advising information, including research and funding opportunities, consult the SF State Biology Department home page at biology.sfsu.edu. (http://biology.sfsu.edu)

On-line course descriptions (bulletin.sfsu.edu/courses) are available. Most upper division courses in biology are acceptable for the master’s in biology upon approval of the graduate advisor. Students are reminded to check the individual concentrations for additional requirements.

Concentration in Ecology, Evolution, and Conservation Biology
This concentration is designed for students aiming to go on to Ph.D. programs or enter the workplace in fields such as systematics, evolution, conservation, population genetics, behavior of organisms; community, population, reproductive, behavioral, physiological, and evolutionary ecology; taxonomy, biodiversity, and biogeography. Each faculty member serves as advisor and major professor for students working on research programs in the faculty member’s area of specialization. With an advisor, students plan a program of courses that will meet their individual goals and academic or professional interests. For additional details, contact the faculty member whose specialization is of interest to you.
Master of Science in Biology: Concentration in Marine Biology

A student interested in pursuing an advanced degree in any of these programs must meet the general requirements as outlined as well as any additional requirements specified by the major field of study.

For current advising information, including research and funding opportunities, consult the SF State Biology Department home page at biology.sfsu.edu. (http://biology.sfsu.edu)

On-line course descriptions (bulletin.sfsu.edu/courses) are available. Most upper division courses in biology are acceptable for the master’s in biology upon approval of the graduate advisor. Students are reminded to check the individual concentrations for additional requirements.

Concentration in Marine Biology
Programs in this area reflect the fact that marine biology is a meeting place for all the biological sciences and some of the physical sciences. Graduate work may be broad or follow specific program areas as ecology, systematics, functional morphology, molecular biology, physiology, evolution, and behavior.

The marine program and facilities of San Francisco State University are strongly supported by the Romberg Tiburon Center for Environmental Studies (RTC), the marine and estuarine field station of SF State situated on San Francisco Bay in Marin County. RTC’s marine/estuarine scientists and oceanographers offer a broad range of courses at both RTC and the main campus. Courses offered by RTC faculty are listed in this Bulletin under Biology, Chemistry, Geography, and Geology. In addition, marine science courses are offered at Moss Landing Marine Laboratories, a laboratory on Monterey Bay operated by a consortium of California State University campuses. Courses offered at Moss Landing can be found in this Bulletin under Marine Science (p. 1663).

Students in the Master of Science in Biology: Concentration in Marine Biology program follow the requirements of the M.S. in Biology with specific coursework selected upon advisement.

For further information contact the program’s graduate coordinator. Applicants must have the equivalent of the Bachelor of Science in Biology at San Francisco State University.

Master of Science in Biology: Concentration in Microbiology

A student interested in pursuing an advanced degree in any of these programs must meet the general requirements as outlined as well as any additional requirements specified by the major field of study.

For current advising information, including research and funding opportunities, consult the SF State Biology Department home page at biology.sfsu.edu. (http://biology.sfsu.edu)

General Admission Requirements
An applicant must have a baccalaureate degree from an accredited institution and the equivalent major course work for the program area to which application is made. To evaluate an applicant, the biology department requires the following:

1. transcripts of all undergraduate work;
2. Graduate Record Examination scores for the general test;
3. a statement of purpose;
4. two or more letters of recommendation, preferably from science faculty.

When the department receives this information, the completed file is forwarded to the faculty coordinator of the program area chosen by the applicant. The faculty in the program area evaluate the applicant’s file and recommend admission or denial based on the following criteria:

- Grade point average in the undergraduate major—minimum required GPA in science courses is 3.0
- Statement of purpose
- GRE scores
- Letters of recommendation

Denial of admission may be based on inadequacy in any of the above criteria, if an applicant’s interests are not represented by current faculty, or if faculty in the applicant’s area of interest are unable to support additional students.

Written English Proficiency Requirement
The University has a requirement for written English proficiency that is to be assessed at two levels.

Level One
The student must pass a proctored essay test administered by the department at the beginning of the first semester.

Level Two
Prior to filing the Advancement to Candidacy (ATC), the student must prepare a thesis prospectus for approval by the student's thesis committee.

Admission to Program
Applicants must possess a baccalaureate degree in biological or physical sciences, with at least two laboratory courses in microbiology, one year of general physics, one year of general chemistry, and one year of organic chemistry. Acceptance to fully classified status will be determined by departmental evaluation.

The specific course requirements shall be determined by the student’s committee and are based upon consideration such as; goals, interests, and undergraduate preparation. For additional details, contact the Graduate Program Coordinator.

Course Requirements
The general requirements of all students are as follows:

- All courses listed on the Advancement to Candidacy (ATC) (or to satisfy conditional requirements) must be completed with a letter grade. The culminating experience courses, BIOL 895 and BIOL 898 are the exception and will be graded on a CR/NC basis.
- A minimum of 30 units of upper division and/or graduate credit (may include up to six units of experimental courses in biology).
- A minimum of 21 units of which six units may be from a graduate level paired course.
- A minimum of two department seminars requiring student presentations.

- After initiating a research program, a graduate student must enroll each semester in BIOL 897 - until the research is completed.
- Four units of BIOL 898 or three units of BIOL 895.
- An oral defense of the thesis or research project.

On-line course descriptions (bulletin.sfsu.edu/courses) are available. Most upper division courses in biology are acceptable for the master's in biology upon approval of the graduate advisor. Students are reminded to check the individual concentrations for additional requirements.

Concentration in Microbiology
The study of microbes and viruses is central to the fields of microbiology, pathogenesis, immunity, and biomedicine. Microbiology is also important in the study of the biochemical and genetic properties of cells and organisms. The M.S. in Microbiology is flexible. With a program advisor, students may plan a program of courses that will meet their individual goals and academic or professional interests, such as preparation for professional or doctoral programs or employment. Prior undergraduate preparation will also be considered.

Master of Science in Biology: Concentration in Physiology and Behavioral Biology
A student interested in pursuing an advanced degree in any of these programs must meet the general requirements as outlined as well as any additional requirements specified by the major field of study.

For current advising information, including research and funding opportunities, consult the SF State Biology Department home page at biology.sfsu.edu. (http://biology.sfsu.edu)

General Admission Requirements
An applicant must have a baccalaureate degree from an accredited institution and the equivalent major course work for the program area to which application is made. To evaluate an applicant, the biology department requires the following:

1. transcripts of all undergraduate work;
2. Graduate Record Examination scores for the general test;
3. a statement of purpose;
4. two or more letters of recommendation, preferably from science faculty.

When the department receives this information, the completed file is forwarded to the faculty coordinator of the program area chosen by the applicant. The faculty in the program area evaluate the applicant’s file and recommend admission or denial based on the following criteria:

- Grade point average in the undergraduate major—minimum required GPA in science courses is 3.0
- Statement of purpose
- GRE scores
- Letters of recommendation

Denial of admission may be based on inadequacy in any of the above criteria, if an applicant’s interests are not represented by current faculty, or if faculty in the applicant’s area of interest are unable to support additional students.
Written English Proficiency Requirement
The University has a requirement for written English proficiency that is to be assessed at two levels.

Level One
The student must pass a proctored essay test administered by the department at the beginning of the first semester.

Level Two
Prior to filing the Advancement to Candidacy (ATC), the student must prepare a thesis prospectus for approval by the student's thesis committee.

Admission to Program
In addition to the baccalaureate degree, or the equivalent, in biological sciences, the program requires that the applicant have the equivalent of one semester of upper division physiology with laboratory, two semesters of college physics, two semesters of general college chemistry, and one semester of organic chemistry.

Course Requirements
The general requirements of all students are as follows:

- All courses listed on the Advancement to Candidacy (ATC) (or to satisfy conditional requirements) must be completed with a letter grade. The culminating experience courses, BIOL 895 and BIOL 898 are the exception and will be graded on a CR/NC basis.
- A minimum of 30 units of upper division and/or graduate credit (may include up to six units of experimental courses in biology).
- A minimum of 21 units of which six units may be from a graduate level paired course.
- A minimum of two department seminars requiring student presentations.
- After initiating a research program, a graduate student must enroll each semester in BIOL 897 – until the research is completed.
- Four units of BIOL 898 or three units of BIOL 895.
- An oral defense of the thesis or research project.

On-line course descriptions (bulletin.sfsu.edu/courses) are available. Most upper division courses in biology are acceptable for the master's in biology upon approval of the graduate advisor. Students are reminded to check the individual concentrations for additional requirements.

Concentration in Physiology and Behavioral Biology
The Master of Science in Biology with a Concentration in Physiology and Behavioral Biology is a flexible program. With an advisor, the student may plan a program of study to fit his/her particular interests, such as preparation for employment or a Ph.D. program when the Master of Science is required.

Master of Science in Biomedical Science: Concentration in Biotechnology
This program prepares students to pursue advanced academic training in life sciences while developing professional workplace skills.

CHEMISTRY AND BIOCHEMISTRY

College of Science and Engineering
Dean: Keith Bowman

Department of Chemistry and Biochemistry
TH 806
Phone: (415) 338–1288
Interim Chair: Teaster Baird, Jr.
Graduate Coordinators: Andrew Ichimura, Bruce Manning

Program Scope and Career Outlook
The Department of Chemistry and Biochemistry offers an outstanding educational environment for undergraduate and graduate students. Our mission is to educate, train, and produce versatile chemists and biochemists who understand both the theoretical basis and practical applications of their discipline. Department faculty provide quality instruction across a wide range of sub-disciplines. Our degree programs are designed to prepare students for various professional positions (e.g., biotechnology and pharmaceutical companies, chemical manufacturing, and other laboratory-based industries), health professions (e.g., medical, pharmacy, and dental school), graduate study, and teaching positions.

Students receive significant hands-on experience with modern instrumentation in our relatively small-sized lab classes, and the opportunity to participate in research projects under the direct supervision of our faculty. The department houses a variety of state-of-the-art research instrumentation, laboratory facilities, and computational labs. These include a Nuclear Magnetic Resonance (NMR) facility, a Mass Spectrometry (MS) facility, a Scanning Electron Microscopy (SEM) facility and the Computational Chemistry and Visualization (CCV) laboratory.

The Bachelor of Arts in Chemistry program is particularly well-suited for those students whose career goals involve the integration of chemistry with other fields. This program can be combined with another degree or minor to develop the unique synthesis of experience needed for careers in health professions, forensic science, environmental science, regulatory affairs, chemical engineering, patent law, management, sales, marketing, technical writing, scientific journalism, library science, and art restoration. This program also provides excellent preparation for high school science teachers. Students planning to become K–12 chemistry or science teachers should note that additional preparation beyond the major is required to meet the breadth requirements and should consult with the credential advisor in the Department of Chemistry and Biochemistry to review the state-mandated requirements.

The Bachelor of Science in Chemistry, which is approved by the American Chemical Society (ACS), prepares students to pursue a career in chemically-oriented industry or to begin graduate study in chemistry and other molecular sciences. The degree provides a solid foundation in mathematics and physics, breadth in chemical sub-disciplines (analytical, biochemical, inorganic, organic, and physical chemistry), and excellent hands-on training in laboratory and instrumental techniques.

The Bachelor of Science in Biochemistry is designed for students who wish to be particularly well qualified at the rapidly expanding interface between biology and chemistry. The degree includes extensive laboratory training, provides exceptional preparation for careers in biotechnology, and enjoys a favorable reputation among biotechnology companies in the Bay Area. This degree also provides a strong foundation for a graduate degree in biochemistry.

The Master of Science degree in Chemistry and the Master of Science degree in Chemistry with a concentration in Biochemistry are programs of study with research at the core. As the student focuses in depth on an independent scientific investigation, solid research and communication skills are developed. The goal of both M.S. degree programs is to provide students with a thorough grounding in laboratory and research skills, and in-depth training in their areas of specialization. Our M.S. program provides excellent training for:

1. careers in all aspects of the chemical industry (biotechnology, environment, process and analytical, basic research);
2. science educators seeking to increase their skill and knowledge base; and
3. students whose goal is advanced study at the Ph.D. level.

The M.S. in Chemistry program is approved by the ACS.

Significant features of our department include high-quality teaching, one-on-one advising for all of our majors, and opportunities for students to participate in research under the direct supervision of active faculty members who are recognized authorities in their field. Students interested in becoming involved in research should consult with an advisor and review faculty research interests on our department website (www.chembiochem.sfsu.edu (http://www.chembiochem.sfsu.edu)). Examples of research projects currently under investigation by our faculty members and their research students include:

Analytical Chemistry
Identification and quantitation of organic pollutants via Gas Chromatography/Mass Spectrometry (GC/MS) and Direct Sampling Mass Spectrometry (DSMS). Application of X-Ray Fluorescence spectrometry (XRF) to the determination of toxic elements in foods, supplements, and other products. Development of novel analytical techniques for separation and detection of redox-sensitive trace species.

Biochemistry
Biophysical Chemistry
Biophysical spectroscopic methods, including nanosecond time-resolved polarized absorption spectroscopy, to characterize biological function and examine the molecular basis of disease. Chromatin folding, dynamics, and stability.

Chemical Education
Identify student experiences and instructional practices that promote student success in chemistry courses and persistence in STEM majors. Design experiences to engage students in applying course-based chemistry knowledge to address community questions and societal needs.

Environmental Chemistry
Detection of trace levels of volatile organic compounds and heavy metals in urban air, water, and soil samples. Determination of structures and speciation of metals and trace elements adsorbed on environmental surfaces by X-ray absorption spectroscopy. Modeling speciation, precipitation, and adsorption reactions of trace elements in environmental systems. Development and characterization of reactive metallic and mineral-based remediation materials for soil and water contaminants. Investigation of the composition and degradation of organic matter in marine systems through quantification and modeling of natural carbon isotopes.

Organic/Bioorganic Chemistry

Materials and Inorganic Chemistry
Synthesis and characterization of semiconducting thin films with applications to solar cells, water splitting, water remediation and CO2 reduction. Growth and nucleation of crystalline TiO2 by atomic force microscopy (AFM) and in situ grazing incidence X-ray diffraction (GIXRD). Computational approaches to speed the development of solid-state batteries, photocatalysts, and quantum computers using Density Functional Theory and Molecular dynamics.

Natural Products Chemistry
Isolation and characterization of novel compounds from marine microorganisms from sediments, algae, and sponges with anti-cancer, or anti-malarial properties.

Physical Chemistry
Synthesis and characterization of heteroatom substituted zeolites by XRD, solid state MAS–NMR, and optical spectroscopy, with applications to photocatalysis of carbon dioxide to fuels. Photophysics and electron spin resonance (ESR) investigation of thin films for applications in photocatalysts and photocatalysis.

Professors
Baird, DeWitt, Erden, Esquerra, Gassner, Gerber, Komada, Manning, Palmer, Simonis, Wu

Associate Professors
Amagata, Anderson, Guliae, Ichimura,

Assistant Professors
Adelstein, Billingsley, Eroy-Reveles, Kuhn, Vikse

Research Associate Professor
Yen

Adjunct Professor
Runquist

Majors
• Bachelor of Arts in Chemistry (p. 1107)
• Bachelor of Science in Chemistry (p. 1115)
• Bachelor of Science in Biochemistry (p. 1120)

Minors
• Minor in Chemistry (p. 1127)

Masters
• Master of Science in Chemistry (p. 1127)
• Master of Science in Chemistry: Concentration in Biochemistry (p. 1127)

Bachelor of Arts in Chemistry
High school preparation for the chemistry and biochemistry degree programs should include two years of algebra, one year of geometry, one-half year of trigonometry, one year of chemistry, and one year of physics. Calculus is highly recommended.

Mandatory Advising
All undergraduate chemistry and biochemistry majors are required to meet with a major advisor several times over their academic career. First-time freshmen and new transfer students are required to meet with an advisor or attend a group advising session during the first semester of attendance. Continuing students enrolled in the following courses will be required to meet with an advisor that semester to avoid having a hold placed on their registration for the next semester.

• All courses used in the major program must be completed with letter grades (CR/NC not allowed) and a minimum GPA of 2.0 (SF State Major GPA).
• Grades of C or better are required in chemistry prerequisite courses.
• Other courses for the major must be completed with grades of C– or better with one exception.

Advanced Laboratory Electives

Students must complete at least three units of advanced laboratory electives selected from the list below. Courses from community colleges cannot be substituted for the courses on the list below. Consult with an advisor regarding select elective courses and check course co- and prerequisites before enrolling.

<table>

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case additional upper division courses will be needed to reach the required total.

1 CHEM 351 may be substituted for CHEM 300 and CHEM 353 may be substituted for CHEM 301 if prerequisites for CHEM 351 and CHEM 353 are met.
2 CHEM 338 may be substituted for CHEM 336.
3 By petition only. CHEM 699 and CHEM 470 may not both be used to fulfill the elective requirements.

Complementary Studies

Students in the B.A. chemistry program will satisfy the Complementary Studies Requirement with the completion of courses in physics and mathematics that are required for the major.

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

General Education Requirements Met in the Chemistry Major or Undeclared with Interest in Chemistry

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

Area B1 (Physical Science) is satisfied upon completion of CHEM 233. Area B3 (Laboratory Science) is satisfied upon completion of CHEM 234.

SF State Studies
Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM) LD or UD 3
Environmental Sustainability (ES) LD or UD 3
Global Perspectives (GP) LD or UD 3
Social Justice (SJ) LD or UD 3

Note: LD = Lower Division; UD = Upper Division.

First-Time Student Roadmap (4 Year)
This roadmap opens in a new tab. (p. 1111)

Transfer Student Roadmap (2 Year)
For students with an AS-T in Chemistry. This roadmap opens in a new tab. (p. 1113)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Chemistry
California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.
An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.
Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.
Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.
A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:
• How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
• Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
• How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students
1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   • a course in U.S. History
   • a course in U.S. & California Government
   • a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:
• Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State.
Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

**For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

**Units**: 12-13

**Total Units**: 120-121

---

1. To avoid taking additional units, it is recommended that you meet LLDD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. CHEM 338 may be substituted for CHEM 336.

4. **Complementary Studies**

   Students in the BA chemistry program will satisfy the Complementary Studies Requirement with the completion of courses in physics and mathematics that are required in the major.

   Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

   CHEM 351 may be substituted for CHEM 300 and CHEM 353 may be substituted for CHEM 301 if prerequisites for CHEM 351 and CHEM 353 are met.

   CHEM 699 and CHEM 470 may not both be used to fulfill the elective requirements. Enrollment by petition only.

5. **Advanced Laboratory Electives**

   CHEM 327 Practical GC and HPLC (4 units)
   CHEM 343 Biochemistry I Laboratory (3 units)
   CHEM 370 Computer Applications in Chemistry and Biochemistry (3 units)
   CHEM 420 Environmental Analysis (3 units)
   CHEM 422 Instrumental Analysis (4 units)
   CHEM 426 Advanced Inorganic Chemistry Laboratory (2 units)
   CHEM 451 Experimental Physical Chemistry Laboratory (2 units)
   CHEM 470 Research (3 units)
   CHEM 699 Independent Study (1-6 units)
Bachelor of Arts in Chemistry – CHEM Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Chemistry. Thirty-four units in the major (CHEM 115/CHEM 215/CHEM 216, CHEM 233/CHEM 234, CHEM 335/CHEM 336, MATH 226/MATH 227, required PHYS sequence) and 33 units of lower division GE have been satisfied. Check with a major advisor about the most appropriate course sequence for you. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 15–24 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Lower division GE (6 units) – Area C (3 units in any subarea) and Area D (3 units in any subarea)
• Upper division GE, areas B, C and D (9 units)
• Students entering this major with the AS-T in Chemistry are not required to fulfill SF State Studies requirements.
• Complementary Studies is met in major with required PHYS and MATH courses.

Chemistry B.A.: 20–23 Units
Completed: CHEM 115/CHEM 215/CHEM 216, CHEM 233/CHEM 234, CHEM 335/CHEM 336, MATH 226/MATH 227, required PHYS sequence.

• Major Upper Division Requirements/GWAR (17-20 units)
• Major Advanced Laboratory Electives (3 units) – Consult with an advisor regarding selection of elective courses and check course co- and prerequisites before enrolling.

University Electives: 13 or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. UD GE and the major. Upper division electives recommended in order to meet the minimum 40-unit requirement.
Bachelor of Science in Chemistry

High school preparation for the chemistry and biochemistry degree programs should include two years of algebra, one year of geometry, one-half year of trigonometry, one year of chemistry, and one year of physics. Calculus is highly recommended.

Mandatory Advising

All undergraduate chemistry and biochemistry majors are required to meet with a major advisor several times over their academic career. First-time freshmen and new transfer students are required to meet with an advisor or attend a group advising session during the first semester of attendance. Continuing students enrolled in the following courses will be required to meet with an advisor that semester to avoid having a hold placed on their registration for the next semester.

- All courses used in the major program must be completed with letter grades (CR/NC not allowed) and a minimum GPA of 2.0 (SFSU Major GPA).
- Grades of C or better are required in chemistry prerequisite courses.
- Other courses for the major must be completed with grades of C- or better with one exception.

Chemistry (B.S.) – 72 units

<td>3</td>
</tr>
<tr>
<td>CHEM 699</td>
<td>Independent Study</td>
<td>1-3</td>
</tr>
</tbody>
</table>

1. CHEM 339 may be substituted for CHEM 336.
2. Students may substitute CHEM 343 for CHEM 426 or CHEM 451 upon prior approval of advisor. If CHEM 343 is used as a substitute, it can not also be used as an elective.
3. By petition only. CHEM 699 and CHEM 470 may not both be used to fulfill the elective requirements.

General Education Requirements Met in the Chemistry Major or Undeclared with Interest in Chemistry

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

Area B1 (Physical Science) is satisfied upon completion of CHEM 233.
Area B3 (Laboratory Science) is satisfied upon completion of CHEM 234.

**SF State Studies**

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

- American Ethnic and Racial Minorities (AERM)
- Environmental Sustainability (ES)
- Global Perspectives (GP)
- Social Justice (SJ)

Note: LD = Lower Division; UD = Upper Division.

**First-Time Student Roadmap (4 Year)**

This roadmap opens in a new tab. (p. 1118)

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.

- a course in U.S. History
- a course in U.S. & California Government
- a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

### Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#A3EL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical
analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

Units: 15-17

Total Units: 120-122

---

1. To avoid taking additional units, it is recommended that you meet LL and SF State Studies requirements (AERM, GP, ES, SJ) within your GE.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. CHEM 338 may be substituted for CHEM 336.
4. PHYS 240 and MATH 228 may be substituted for CHEM 251.
5. CHEM 343 may be substituted for either CHEM 426 or CHEM 451 with prior approval of an advisor; CHEM 699 (three units of research in one or more of these three disciplinary areas) may also be substituted with advisor approval.
6. **Major Electives**
   - CHEM 327 Practical GC and HPLC (4 units)
   - CHEM 341 Biochemistry II (3 units)
   - CHEM 343 Biochemistry I Laboratory (3 units)
   - CHEM 370 Computer Applications in Chemistry and Biochemistry (3 units)
   - CHEM 420 Environmental Analysis (3 units)
   - CHEM 422 Instrumental Analysis (4 units)
   - CHEM 433 Advanced Organic Chemistry (3 units)
   - CHEM 443 Biophysical Chemistry Laboratory (4 units)
   - CHEM 470 Research (3 units)
   - CHEM 640 Advanced Topics in Biochemistry (3 units)
   - CHEM 645 Research Trends in Chemistry and Biochemistry (3 units)
   - CHEM 680 Chemical Oceanography (3 units)
   - CHEM 699 Independent Study (1-6 units)
Bachelor of Science in Biochemistry

High school preparation for the chemistry and biochemistry degree programs should include two years of algebra, one year of geometry, one-half year of trigonometry, one year of chemistry, and one year of physics. Calculus is highly recommended.

Mandatory Advising

All undergraduate chemistry and biochemistry majors are required to meet with a major advisor several times over their academic career. First-time freshmen and new transfer students are required to meet with an advisor or attend a group advising session during the first semester of attendance. Continuing students enrolled in the following courses will be required to meet with an advisor that semester to avoid having a hold placed on their registration for the next semester.

- All courses used in the major program must be completed with letter grades (CR/NC not allowed) and a minimum GPA of 2.0 (SFSU Major GPA).
- Grades of C or better are required in chemistry prerequisite courses.
- Grades of C- or better are required in CHEM 341 and CHEM 343.
- Other courses for the major must be completed with grades of C- or better with one exception.

Students must complete at least 12 units of upper division chemistry and biology electives selected from the lists below. Courses from community colleges cannot be substituted for the courses on the list below. Electives must include at least one course with a CHEM prefix and at least three laboratory courses. Note that many biology electives have a BIOL 240 prerequisite. Students wishing to enroll in BIOL 350, BIOL 355, and BIOL 612 without completing the BIOL 240 prerequisite should contact an advisor prior to registration. Students should consult an advisor regarding selection of elective courses and check course co- and pre-requisites before enrolling. Graduate level courses in chemistry or appropriate courses in biology, physics, geosciences, and computer science may be substituted upon prior approval of advisor.

CHEM 351 may be substituted for CHEM 300 and CHEM 353 may be substituted for CHEM 301 if prerequisites for CHEM 351 and CHEM 353 are met.

CHEM 338 may be substituted for CHEM 336.

By petition only, CHEM 699 and CHEM 470 may not both be used to fulfill the elective requirements.

General Education Requirements Met in the Biochemistry Major or Undeclared with Interest in Biochemistry

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area B1 (Physical Science) is satisfied upon completion of CHEM 233.
- Area B2 (Life Science) is satisfied upon completion of either BIOL 240 or CHEM 341.
- Area B3 (Laboratory Science) is satisfied upon completion of CHEM 234.

First Time Student Roadmap (4 year)

This link opens the current roadmap in a new tab. (p. 1123)

Transfer Student Roadmap (2 year)

For students with an AS-T in Chemistry. This Roadmap opens in a new tab. (p. 1125)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Chemistry

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:
• How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
• Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
• How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.

2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit [http://www.assist.org](http://www.assist.org). Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

• Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit [http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL](http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL).

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

For more information, visit the Undergraduate Admissions section.

• Complete 60 or more transferable semester units or 90 or more quarter units
• Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
• Be in good standing at the last college or university attended
• Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

• The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

1 To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.
2 ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3 Students may substitute CHEM 343 for CHEM 426 or CHEM 451 upon prior approval of advisor. If CHEM 343 is used as a substitute, it cannot also be used as an elective.
4 CHEM 351 may be substituted for CHEM 300 and CHEM 353 may be substituted for CHEM 301 if prerequisites for CHEM 351 and CHEM 353 are met.
5 **Upper Division Electives in Chemistry**  
CHEM 322 Quantitative Chemical Analysis Laboratory (2 units)  
CHEM 325 Inorganic Chemistry (3 units)  
CHEM 327 Practical GC and HPLC (4 units)  
CHEM 336 Organic Chemistry II Laboratory (2 units)  
CHEM 370 Computer Applications in Chemistry and Biochemistry (3 units)  
CHEM 420 Environmental Analysis (3 units)  
CHEM 422 Instrumental Analysis (4 units)  
CHEM 426 Advanced Inorganic Chemistry Laboratory (2 units)  
CHEM 433 Advanced Organic Chemistry (3 units)  
CHEM 443 Biophysical Chemistry Laboratory (4 units)  
CHEM 451 Experimental Physical Chemistry Laboratory (2 units)  
CHEM 470 Research (3 units)  
CHEM 640 Advanced Topics in Biochemistry (3 units)  
CHEM 645 Research Trends in Chemistry and Biochemistry (3 units)  
CHEM 680 Chemical Oceanography (3 units)  
CHEM 699 Independent Study (1-6 units)

**Upper Division Electives in Biology**  
BIOL 350 Cell Biology (3 units)  
BIOL 351GW Experiments in Cell and Molecular Biology - GWAR (4 units)  
BIOL 355 Genetics (3 units)  
BIOL 357 Molecular Genetics (3 units)  
BIOL 401 General Microbiology (3 units)

BIOL 436 Immunology Laboratory (2 units)  
BIOL 612 Human Physiology (3 units)  
BIOL 613GW Human Physiology Laboratory - GWAR (3 units)  
BIOL 638 Bioinformatics & Genome Annotation (4 units)  
BIOL 640 Cellular Neurosciences (3 units)
Bachelor of Science in Biochemistry – CHEM Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Chemistry. Thirty-four units in the major (CHEM 115/CHEM 215/CHEM 216, CHEM 233/CHEM 234, CHEM 335/CHEM 336, MATH 226/MATH 227, required PHYS sequence) and 33 units of lower division GE have been satisfied. Check with a major advisor about the most appropriate course sequence for you. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

</table>

1. Choose area D3 if US/CA Government not met before transfer.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 15–21 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer. See next two bullets.
- Lower division GE (6 units) – Area C (3 units in any subarea) and Area D3 (3 units; choose this area if US/CA Government requirement not completed before transfer).
- Upper division GE, areas B, C and D (9 units) – check for courses in UD GE C or D that also fulfill U.S. History if not completed before transfer.
• Students entering the major with the AS-T in Chemistry are not required to fulfill SF State Studies or Complementary Studies requirements.

Biochemistry B.S.: 38 Units
Completed: CHEM 115/CHEM 215/CHEM 216, CHEM 233/CHEM 234, CHEM 335/CHEM 336, MATH 226/MATH 227, required PHYS sequence.

• Major Lower Division Requirements (5 units) – BIOL 230
• Major Upper Division Requirements/GWAR (33 units) - includes 12 elective units. Elective units must include at least one course with a CHEM prefix and at least three laboratory courses. Note that many BIOL electives require BIOL 240 as a prerequisite; enrollment without this prereq in BIOL 350, BIOL 355 and BIOL 612 may be permitted, but students must consult with a department advisor prior to registering for these courses.

University Electives: One Unit or More
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. UD GE and the major.
Minor Program in Chemistry

A minimum of 23 units of chemistry, including CHEM 115 and CHEM 215/CHEM 216, are required to qualify for a minor in chemistry. Ten of the 23 units must be upper division, with at least 6 of those units taken at SF State. Courses from community colleges cannot be used to meet the upper division unit requirement for the minor.

All courses must be completed with grades of C- or better (CR/NC grading is not accepted). Only one course from each of the following pairs can be counted towards the minor:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 130</td>
<td>General Organic Chemistry</td>
<td>3</td>
</tr>
<tr>

Master of Science in Chemistry: Concentration in Biochemistry

Admission to Program

Students must meet these criteria:

- Satisfy the University’s admission requirements.
- Have completed an undergraduate major in chemistry or biochemistry. If this criterion is not met, the student may be admitted, but additional course work will be required.
- Have a GPA of at least 3.0 in chemistry and related courses.
- Report GRE scores of the general (not subject) exams.
- Applicants are required to fill out the department application form. Department application procedures are described at www.chembiochem.sfsu.edu/graduate_app_proc (http://www.chembiochem.sfsu.edu/graduate_app_proc).
- Submit three letters of recommendation from individuals familiar with previous academic work and/or potential for graduate work in chemistry. These letters should be sent to the graduate advisor, Department of Chemistry and Biochemistry.

Written English Proficiency Requirement

Level One

Applicants are required to satisfy the entry-level written English proficiency requirement by a score of 4 or above on the GRE Analytical Writing section. Applicants who do not meet the GRE AWA score, but meet all other requirements, may be admitted on a conditional basis. The conditional status will be removed upon successful completion of a writing-based entrance exam. Admitted students who do not pass the writing-based entrance exam will take SCI 614 or an equivalent writing course by the end of the second semester.

Level Two

Students will demonstrate an advanced level of proficiency in written and spoken English by successfully completing CHEM 880, a thesis (CHEM 898) or written manuscript (CHEM 895), and an oral defense of the research project.

Advancement to Candidacy

In order to advance to candidacy, students must:

- Pass any three of the American Chemical Society (ACS) graduate entrance examinations: analytical, biochemistry, inorganic, organic, or physical chemistry. These examinations cover mainly undergraduate level material.
- Satisfy Level One of the written English proficiency requirement.
- Satisfy all course deficiencies stipulated upon entrance into the program.
- File an Advancement to Candidacy (ATC) form.

Note: After initiating a research project, a graduate student must enroll each semester in CHEM 897 while actively engaged in research for the M.S. degree. A maximum of 9 units of CHEM 897 may be included on the Advancement to Candidacy.

Chemistry (M.S.): Concentration Biochemistry – minimum 30 units

Related Study (9 – 12 units)

Graduate courses in biochemistry, chemistry, physics, mathematics or biology on advisement of graduate major advisor. Upper division courses may be used with permission of graduate major advisor.

Master of Science in Chemistry

Admission to Program

Students must meet these criteria:

- Satisfy the University’s admission requirements.
- Have completed an undergraduate major in chemistry or biochemistry. If this criterion is not met, the student may be admitted, but additional course work will be required.
- Have a GPA of at least 3.0 in chemistry and related courses.
• Report GRE scores of the general (not subject) exams.
• Applicants are required to fill out the department application form. Department application procedures are described at www.chembiochem.sfsu.edu/graduate_app_proc (http://www.chembiochem.sfsu.edu/graduate_app_proc).
• Submit three letters of recommendation from individuals familiar with previous academic work and/or potential for graduate work in chemistry. These letters should be sent to the graduate advisor, Department of Chemistry and Biochemistry.

Written English Proficiency Requirement

Level One
Applicants are required to satisfy the entry-level written English proficiency requirement by a score of 4 or above on the GRE Analytical Writing section. Applicants who do not meet the GRE AWA score, but meet all other requirements, may be admitted on a conditional basis. The conditional status will be removed upon successful completion of a writing-based entrance exam. Admitted students who do not pass the writing-based entrance exam will take SCI 614 or an equivalent writing course by the end of the second semester.

Level Two
Students will demonstrate an advanced level of proficiency in written and spoken English by successfully completing CHEM 880, a thesis (CHEM 898) or written manuscript (CHEM 895), and an oral defense of the research project.

Advancement to Candidacy

In order to advance to candidacy, students must:

• Pass any three of the American Chemical Society (ACS) graduate entrance examinations: analytical, biochemistry, inorganic, organic, or physical chemistry. These examinations cover mainly undergraduate level material.
• Satisfy Level One of the written English proficiency requirement.
• Satisfy all course deficiencies stipulated upon entrance into the program.
• File an Advancement to Candidacy (ATC) form.

Note: After initiating a research project, a graduate student must enroll each semester in CHEM 897 while actively engaged in research for the M.S. degree. A maximum of 9 units of CHEM 897 may be included on the Advancement to Candidacy.

Chemistry (M.S.) – minimum 30 units

Program (9 units)

Related Study (9 – 12 units)

Graduate courses in biochemistry, chemistry, physics, mathematics or biology on advisement of graduate major advisor. Upper division courses may be used with permission of graduate major advisor.
COMPUTER SCIENCE

College of Science and Engineering
Dean: Keith Bowman

Department of Computer Science
TH 906
Phone: (415) 338-1008
E-mail: csgrad@sfedu.edu
Website: http://cs.sfsu.edu

Chair: William Tsunyuk Hsu
Undergraduate Advisors: Dujmovic, Kulkami, Puder, Wong, Yang, Yue
Graduate Coordinators: Yang
Graduate Advisors: Okada, Yoon

Program Scope
The primary mission of the Department of Computer Science is to prepare students for careers as software professionals, and for graduate studies in Computer Science and related fields. The department offers a broad curriculum covering the major areas of the computing discipline, integrated with soft skills such as teamwork and written/oral communication; students also gain experience working on group projects. Students are exposed to the fundamentals of computing architecture and computing theory, and focus their studies on the areas of software and systems development. Faculty work directly with students to help them develop the skills and knowledge of computing professionals.

Department faculty are committed to teaching excellence. They remain current in the rapidly changing field of computing technology through continuing research and publications, direct consultation with local industries, and seminar programs that bring top researchers and industry leaders to campus to speak on current developments in the field. The Supervised Industrial Research Program, Practicum option, and other mechanisms provide opportunities for graduate students to complement their academic learning with real world experience.

The department has an additional commitment to sharing its knowledge and skills with the rest of the University community, with local schools, and with community-based organizations in the Bay Area.

The Bachelor of Science program stresses a basic foundation in mathematics and physics, and a thorough study of the fundamentals of the discipline: software development, computer architecture, operating systems, programming languages, algorithms, and the theoretical foundations of computer science. A wide variety of elective courses such as mobile development, web/internet applications, bioinformatics, database systems, artificial intelligence, computer graphics, game development, and software engineering allow students to specialize in selected areas. Ethical and social issues of computing are discussed throughout the curriculum. Senior courses include group projects to better prepare students for future job markets. Courses are updated or added regularly to provide necessary training in the latest software technologies.

The Master of Science in Computer Science prepares students for a wide variety of careers in computing or related industries as well as for advanced study toward Ph.D. degrees. Our program combines a solid and practical curriculum with high-quality research and project-based activities. In addition to a general core covering the breadth of

the computing discipline, students may focus on software engineering in globally distributed environments, computing applications for biotechnology and the life sciences, data mining/big data, and business applications.

Our faculty maintain active publication records, with significant funding from government agencies (NSF, NIH, Department of Labor, etc.) and industry (Genentech, Microsoft, IBM, Arista Networks, Mozilla, etc.). Students are actively involved in research projects, write papers, attend conferences, and participate in funding proposals. SF State’s Center for Computing for Life Sciences (http://cs.sfsu.edu/cclsl/index.html) and several specialized laboratories provide research and project focus, as well as opportunities to collaborate with faculty and students from other SF State departments and industry. A new Entrepreneurship Program and Developers Prize supports the development of student projects into business or non-profit ventures.

Computing Facilities

Central Facilities
- A network of Mac, Linux, and PC servers supported by SF State Information Technology Services
- A Linux server (unixlab) supported by SF State Information Technology Services, used for Computer Science classes
- Workstation labs in the SF State J. Paul Leonard Library and around campus

General Undergraduate Computing Facilities
- Intel servers (Windows and Linux)
- Workstation laboratories with Mac, Windows, and Linux desktops

Specialized Centers, Laboratories, and Computing Resources
- Center for Computing for Life Sciences (including Amazon cloud servers and 40-node DELL cluster)
- Multimedia and Visualization Laboratory
- Biocomputing and Media Research Group
- Biomedical Image and Data Analysis Lab
- Virtual Computing: VMware GSX Server, Microsoft VirtualPC Server
- High-Performance Computing server with NVIDIA Tesla and Titan GPUs

Career Alternatives
- Mobile application developer
- Web and internet application developer
- Game developer
- Bioinformatics Developer
- Data science/data mining developer
- Software Engineer
- Quality assurance engineer
- Manager of software development teams
- Systems programmer/administrator
- Computer network specialist
- System security and/or performance manager
- Application software designer
- Database designer/programmer/administrator
- Programmer in scientific or business applications
Professors
Dujmovic, Hsu, Levine, Petkovic, Puder, Singh, Wong, Yoon

Associate Professors
Okada, Yang

Assistant Professors
Kulkarni, Yue

Adjunct Professors
Buturovic, Lank

Lecturers
Baldwin, Hasan, Kriese, Pico, Rhodes, Roberts, Shaikh, Sladek, Souza, Tomasevich, Wall, Westerman

Major
• Bachelor of Science in Computer Science (p. 1130)

Minor
• Minor in Computer Science (p. 1138)

Masters
• Master of Science in Computer Science (p. 1138)

Bachelor of Science in Computer Science

Students intending to enter this program at the freshman level should have completed two years of algebra and one semester of trigonometry in high school. One year each of high school geometry and physics, as well as basic knowledge of computer organization and programming, are very desirable.

All lower division courses (course numbers below 300) included among the degree requirements are available at many community colleges in California; students intending to enter the program upon transferring to San Francisco State University from a community college should take as many of those courses there as possible.

Students should plan their program of study in the major with the help of a departmental advisor as soon as possible so that the correct sequence of courses is taken and a proper set of electives is chosen. It is also suggested that students consult with an advisor before selecting courses to meet the General Education requirements. (See program below for acceptable science electives.)

Students are encouraged to participate in the Computer Science Cooperative Education Program at SF State. Under this program, they may obtain industrial employment related to their academic studies. This combination of on-the-job training and academic experience can greatly enhance the value of an undergraduate degree in Computer Science.

An Endowed Scholarship Fund, established in the memory of Jules H. Strauss, offers an annual award to a computer science major who shows scholarly accomplishment and demonstrates financial need.

An Entrepreneurship Program and Developers Prize, funded by our alumni, encourage and support innovation and entrepreneurship among students.

Students are advised that CR/NC grades are not acceptable in courses to be counted for the Computer Science major or minor programs.

Senior Presentations

Each major is required to make an oral presentation during his/her senior year. Guidelines for the presentations are available on the Computer Science website: cs.sfsu.edu (http://cs.sfsu.edu).

Electives

Select four 3-unit courses (12 units) See requirements below.

Elective Requirements

Electives are selected from the nine subareas of Computer Science listed below. Electives must meet the following requirements.

1. One of the electives must be CSC 520 or CSC 666. (CSC 520 and CSC 656 can be used to partially meet the depth and breadth requirements.)
2. **Depth Requirement:** two of the electives must be chosen from the same subarea of the discipline.
3. **Breadth Requirement:** electives must be chosen from three different subareas.

**Note:** It is recommended that students planning to continue their study of Computer Science in graduate school take both CSC 656 and CSC 520.

The same courses can be used to meet depth and breadth requirements. However, a course cannot be counted towards more than one area of emphasis. For example, the following four electives can be used to meet the requirements in different ways to highlight a different area of emphasis (areas of emphasis are shown in parentheses):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSC 520</td>
<td>Theory of Computing (Algorithms and Theory of Computing, Programming Languages)</td>
<td>3</td>
</tr>
<tr>
<td>CSC 656</td>
<td>Computer Organization (Architecture)</td>
<td>3</td>
</tr>
<tr>
<td>CSC 675</td>
<td>Introduction to Database Systems (Algorithms and Theory of Computing, Database)</td>
<td>3</td>
</tr>
<tr>
<td>CSC 668</td>
<td>Advanced Object Oriented Software Design and Development (Programming Languages, Software Engineering)</td>
<td>3</td>
</tr>
</tbody>
</table>

The different ways in which these courses can meet the elective requirements are:

**Emphasis**

**Algorithms and Theory of Computing**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSC 520</td>
<td>Theory of Computing (meets requirement 1)</td>
<td>3</td>
</tr>
<tr>
<td>CSC 520 &amp; CSC 675</td>
<td>Theory of Computing and Introduction to Database Systems (meet requirement 2) (depth in Algorithms)</td>
<td>6</td>
</tr>
<tr>
<td>CSC 520</td>
<td>Theory of Computing (Algorithms) (meet requirement 3)</td>
<td>3</td>
</tr>
<tr>
<td>or CSC 675</td>
<td>Introduction to Database Systems</td>
<td></td>
</tr>
<tr>
<td>CSC 656</td>
<td>Computer Organization (Architecture) (meet requirement 3)</td>
<td>3</td>
</tr>
<tr>
<td>CSC 668</td>
<td>Advanced Object Oriented Software Design and Development (Programming Languages or Software Engineering) (meet requirement 3)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Emphasis**

**Programming Languages**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSC 520</td>
<td>Theory of Computing (meets requirement 1)</td>
<td>3</td>
</tr>
<tr>
<td>CSC 520 &amp; CSC 675</td>
<td>Theory of Computing and Introduction to Database Systems (meet requirement 2) (depth in Algorithms)</td>
<td>6</td>
</tr>
<tr>
<td>CSC 520</td>
<td>Theory of Computing (Algorithms) (meet requirement 3)</td>
<td>3</td>
</tr>
<tr>
<td>or CSC 675</td>
<td>Introduction to Database Systems</td>
<td></td>
</tr>
<tr>
<td>CSC 656</td>
<td>Computer Organization (Architecture) (meet requirement 3)</td>
<td>3</td>
</tr>
<tr>
<td>CSC 668</td>
<td>Advanced Object Oriented Software Design and Development (Programming Languages or Software Engineering) (meet requirement 3)</td>
<td>3</td>
</tr>
</tbody>
</table>

In contrast, for example, the following courses do not meet the elective requirements because CSC 520 cannot be double counted as Algorithms and Programming Languages:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSC 520</td>
<td>Theory of Computing (Algorithms and Theory of Computing, Programming Languages)</td>
<td></td>
</tr>
<tr>
<td>CSC 645</td>
<td>Computer Networks (Operating Systems and Distributed Processing)</td>
<td>3</td>
</tr>
<tr>
<td>CSC 650</td>
<td>Secure Networked Systems (Operating Systems and Distributed Processing)</td>
<td>3</td>
</tr>
<tr>
<td>CSC 651</td>
<td>System Administration (Operating Systems and Distributed Processing)</td>
<td>3</td>
</tr>
</tbody>
</table>

The courses listed below constitute a partial list of suitable courses for meeting the elective requirements. The department frequently offers, under the title of CSC 698, new courses that meet elective requirements. Many students also find that, by their senior year, they are prepared to undertake certain graduate courses in Computer Science. Occasionally, students in good academic standing may take CSC 699, instead of a regularly scheduled course. Students are advised to check university and college regulations regarding academic standing requirements. Finally, it is occasionally possible to use a course taken in a different department or at another university (but only if the course is not offered at San Francisco State University) to satisfy elective requirements. Any course substitutions must be approved in advance by a senior advisor.

**Areas of Special Emphasis**

**Algorithms and Theory of Computing**

<table>

**SD State Studies**
Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM)

Environmental Sustainability (ES)

Global Perspectives (GP)

Social Justice (SJ)

Note: LD = Lower Division; UD = Upper Division.

**First-Time Student Roadmap (4 Year)**
This roadmap opens in a new tab. (p. 1134)

**Transfer Student Roadmap (2 Year)**
For students with an AS-T in Computer Science. This roadmap opens in a new tab. (p. 1136)

This degree program is an approved pathway ("similar" major) for students earning the ADT in Computer Science

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.
A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#A3EL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.
## Bachelor of Science in Computer Science Roadmap

120 Total Units Required
Minimum Number of Units in the Major: 71

</table>

**Total Units: 120**

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GR ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. CSC 648 serves as the major capstone course.
# Bachelor of Science in Computer Science – COMP Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Computer Science. 28 units in the major (MATH 226, MATH 227, PHYS 220/PHYS 222, PHYS 230/PHYS 232, CSC 210, CSC 220, CSC 230, CSC 256) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

1. AS-T students should try to meet this requirement before transfer within GE (CSU Breadth: B2 or IGETC: 5B). Doing so will provide more enrollment flexibility after transfer.

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

University-Wide Requirements: 9–12 Units

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- Upper Division GE, areas B, C, D (9 units): Recommended courses for UD-C also satisfy the US History, US Government, and California State and Local Government requirements if not taken before transfer. See notes.
- Students entering the major with the AS-T in Computer Science are not required to fulfill SF State Studies and Complementary Studies requirements.

Computer Science Major: 40–43 Units

- Science elective: 0–3 units (BIOL 100 or BIOL 176) if not completed before transfer
- Mathematics: 6 units
- Core/GWAR: 10 units
- Advanced CSC requirements: 24 units, including electives. Electives must include CSC 520 or CSC 656; are selected from nine subareas of Computer Science; and must meet specific Depth and Breadth requirements.
- Senior Presentation: required oral presentation during senior year (0 units)

University Electives: Five or More Units

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and in the major.
Minor in Computer Science

Many university students want to acquire sufficient computer science background to enable them to use computers effectively in their major areas, or to provide an alternative source of income after graduation, but do not want to study computer science in the depth required for the B.S. degree. For such students, a minor consisting of the most central courses in the B.S. program, plus some electives, is ideal. Students are advised that CR/NC grades are not acceptable in courses to be counted for the Computer Science Minor.

The Minor in Computer Science has 15 units of prerequisites that are not included in the 21 units as indicated for the minor below. Please review course descriptions for prerequisite courses and consult with a computer science department advisor for further information.

Electives (6 units)

Upper division computer related electives by approval of the minor advisor.

Master of Science in Computer Science

Program Description

All students share breadth requirements in the areas of computing foundations, computer systems, and software development. Students focusing on different areas then differ in the choice of courses that provide depth in the chosen area and in the work done for the culminating experience. Students are expected to decide on a focus area prior to enrollment in the second semester. Integrated into the curriculum are significant team and project experiences. There are two options for the mandatory culminating experience, the master’s thesis or the applied research project.

The grading method CR/NC is allowed only for CSC 895 or CSC 898. All other courses listed on the Advancement to Candidacy (ATC) form must be a letter grade.

Elective Requirements

All students are required to include elective credits in their program. Electives include:

- All upper division or graduate courses offered by the Computer Science Department, including breadth requirement courses and CSC 897 and CSC 899. CSC 893 may not count as an elective course.
- Courses from other programs such as biology, engineering, business, or mathematics may be accepted with the approval of the graduate advisor and culminating experience supervisor.

Note: A maximum of 6 units of upper division courses (numbered below 700) may be applied to the degree with the consent of the course instructor and graduate advisor.

Graduate Seminar Requirement

In addition to curricular requirements, prior to enrolling in CSC 895/CSC 898, all graduate students are required to attend the Department Graduate Seminar series during one semester of their studies. These weekly seminars explore current topics in computer science research and assist students with choosing a topic for the culminating experience. Details for meeting this requirement may be found in the Graduate Studies Policy section (p. 120).

Practicum

This 1-3 unit option is chosen by students who wish to enhance their master’s degree by completing an industrial practicum. After finding the job in the local industry, the student will submit a research proposal to the department’s supervisor (normally the department chair) that describes the expected work and learning outcome. The department’s supervisor must approve the proposal before the student begins the research. Once approved, the student will enroll in 1 unit of CSC 893. At the conclusion of the work experience, the student must file a written report outlining the research and work experience. The report is submitted to the department’s supervisor. Students may repeat CSC 893 for a maximum of 3 units. The total number of units for the degree for students who complete the CSC 893 practicum option will be 33 units. It is recommended that this option be pursued only during the summer.

Note: CSC 893 allows international students to obtain permission to work off campus for the duration of the course.

Admission to Program

Admission to the graduate program in computer science is a two-step process that should be completed simultaneously.

1. Apply to San Francisco State University: Complete the on-line CSU Mentor application. Follow all other requirements for admission to the University by accessing www.sfsu.edu/~gradstdy/ (http://www.sfsu.edu/~gradstdy).

2. Apply to the Department of Computer Science graduate program: Full details can be found at http://cs.sfsu.edu/grad/GradApply.html.

We encourage students with four-year degrees other than Computer Science to apply to our program as conditional applicants. Please check the link in Step 2 above for details.

Financial Assistance

Graduate assistantships are occasionally available for qualified master’s students. These opportunities include participating in funded research projects, assisting with management of departmental and university computer laboratories as well as lecturer positions for beginning undergraduate computer science courses. Frequently, there are internship opportunities available for work at local companies. International students should address all questions related to their visa status and eligibility for practical training (off-campus work) to the Office of International Programs (p. 183).
Written English Proficiency Requirement

Level One
Computer science students admitted to the M.S. program are required to satisfy English Level One prior to the end of their first year of study at SF State. Level One is satisfied by obtaining either a score of 4 or better on the GRE Analytical Writing Exam or a passing grade in SCI 614. SCI 614 is strongly recommended for all students who wish to develop their skills in professional writing.

Level Two
The second level of proficiency in written English must be demonstrated before graduation. At this time, the student must demonstrate writing skills which exemplify scholarly style in computer science. This is demonstrated by the master’s thesis or the research project report.

Policy on Enrollment While Conducting Directed Research
Pursuant to Policy F89-165 adopted by the Academic Senate in 1989, the Computer Science Department has adopted the policy that all graduate students who are working with a research advisor (above and beyond general advising during office hours) and/or having his/her thesis or project reviewed, must enroll in at least one unit of CSC 895, CSC 897, CSC 898, or CSC 899. Registered students will have priority for departmental computing resources.

Computer Science (M.S.) – 30 – 33 units

COOPERATIVE EDUCATION

College of Science and Engineering
Dean: Keith Bowman

Cooperative Education Program
SCI 248
(415) 338–1050
Director: Lannie Nguyen-Tang

The Cooperative Education Program enables students of all majors within the University to integrate academe with real world problems through alternating academically relevant work experiences with class studies. Cooperative positions are arranged with the help of the program director and supervised by both the immediate work supervisor and a faculty coordinator from the students, area of academic interest. Participation in the Cooperative Education Program expands and enhances career opportunities through experience gained with employers and often helps focus academic objectives. Students receive competitive wages and earn academic credit while involved in their field assignments. Employment periods may be either full- or part-time. Participants begin the program by completing the preparatory Cooperative Education Colloquium course. Additional information may be obtained from the Cooperative Education Office.

Program Scope
This supplemental 25-unit certificate program is designed to give students the opportunity to develop educational objectives and career opportunities. Enrollment in the cooperative education colloquium course is a requirement for all students and is used as the basis for evaluation of student potential and interest. The certificate indicates to the employer that the University validates the student's work experience in cooperative education and substantiates the experience as professional development and job training. Students receive academic credit and salaried compensation.

All placements are academically relevant. Since the certificate program is tailored to the student's needs and specific major, information about various degrees and programs offered may be found under the appropriate department or center.

Career Outlook
Students who complete the certificate program typically have greater employment options and benefits. Additional benefits include better starting salaries and greater responsibilities for starting level positions. Cooperative education placements usually lead to permanent job placements with private and public sector employers.

Cooperative Education Certificate – 25 Units

Admission Requirements
To be admitted to the program students must comply with all criteria as outlined in the description of certificate programs of this University Bulletin. Additionally, students must:

• Be a resident student at the University
• Maintain at least a 2.5 GPA in all course work within the student's major course of study.
• Complete the prerequisite course, Cooperative Education Colloquium.

• Be of upper division standing (completed 56 semester units of undergraduate work)

Course credits are to be assigned through SCI 693. Accumulated units do not count toward general education or major curricular requirements. Full-time summer placements are available and may earn six units of credit. Two major academic year placement options exist and are illustrated below.

Prerequisite (1 unit)
SCI 693 Cooperative Education Program 1

Required Course (24 units)

Plan A: Parallel Pattern
Part-Time (to be taken over four semesters, 6 units per semester)
SCI 693 Cooperative Education Program 24

Plan B: Alternating Pattern
Full-Time (to be taken over two semesters, 12 units per semester)
SCI 693 Cooperative Education Program 24

1140
EARTH & CLIMATE SCIENCES

College of Science and Engineering
Dean: Keith Bowman

Department of Earth & Climate Sciences
509 Thornton Hall
Phone: (415) 338–2061
Fax: (415) 338–7705
Chair: Dave Dempsey
Graduate Coordinator: Petra Dekens
Teaching Credential Advisor: Dave Dempsey

Affiliations
The Department of Earth & Climate Sciences is a University Corporation for Atmospheric Research (UCAR) affiliate.

Program Scope
The Department of Earth & Climate Sciences offers two undergraduate degree programs and a minor program spanning the Earth sciences, including geology, hydrology, oceanography, meteorology, and climate science, and a graduate program leading to a Master of Science in Geosciences. All programs aim to help students understand how planet Earth functions and to help them develop skills that enable them to critically evaluate and solve scientific problems related to Earth and environmental issues.

The Bachelor of Science in Earth Sciences provides students with a foundation in mathematics, physics, and chemistry; a broad background in the Earth Sciences; an understanding of how Earth’s systems are linked; depth of knowledge in one of three areas of Earth sciences; and strong quantitative, communication, and field skills. The B.S. degree is excellent preparation for professional employment and/or graduate study in one of the Earth sciences. Students in the B.S. take a common core of classes and choose one of three areas of emphasis, where they get in-depth training in an area of specialization: Geology; Hydrology; or Ocean, Weather, and Climate. The Geology emphasis provides fundamental skills and knowledge applied to understand processes in the solid Earth, and extensive experience conducting investigations in the field (that is, outdoors). The Hydrology emphasis draws from a broader range of Earth sciences to understand and solve environmental problems of water in Earth’s systems and provides extensive hands-on lab and field work. In the Ocean, Weather, and Climate emphasis, students learn to describe the structure and behavior of the oceans and atmosphere and to apply concepts of mathematics, physics, and chemistry to understand and solve problems about how physical processes in the ocean and atmosphere create weather and climate and how climate can change.

The Bachelor of Arts in Earth Sciences program provides a flexible, integrated framework within which students can prepare to teach Earth Sciences in K–12 schools or for careers in museums, parks, governmental or private non-profit environmental or planning agencies, and other organizations where a broad knowledge of Earth sciences would be valued. The Minor in Earth Sciences provides a flexible opportunity to complement a wide variety of other majors.

The Master of Science in Geosciences provides advanced coursework in the geosciences, including an in-depth research investigation. Students choose an area of specialization and a thesis topic that they work on in close collaboration with a faculty advisor.

Career Outlook
Earth science investigations lead to better understanding of fundamental Earth processes and help solve problems arising from environmental contamination or mismanagement; natural hazards such as earthquakes, volcanic eruptions, severe storms, and global change; demand for new sources of useful Earth materials; and many others. Earth scientists use sophisticated instrumentation to collect and analyze data, and recent advances have provided new views of Earth, from the internal layers of the solid earth, from the ocean floor, and from both the lower and upper atmosphere, which are leading to improved understanding of our planet. Increasingly scarce energy, mineral, and water resources, and increasing environmental impacts of human activities (both global and local), present challenges that create demand for Earth science expertise. Because of increased demand and projected retirements, a shortage of geoscientists is projected in the near future.

Graduates in Earth Sciences may pursue a wide range of careers in the Earth sciences and related fields. For the next decade, geologists will find the greatest opportunities in the broad areas of environmental and engineering geology; for example, surface and groundwater hydrology studies aimed at characterizing water resources and remediating toxic sites, assessing earthquake and landslide hazards, developing restoration plans for river and coastal environments, and evaluating sites for urban planning or construction. There are also many positions available in the petroleum and mineral exploration industries. A shortage of certified high school and middle school science teachers has placed qualified teachers in high demand. Ocean, weather & climate students will find opportunities in air pollution assessment, global climate change research, and climate change risk assessment, adaptation, and mitigation, with government agencies that work on climate change and coastal management, or consulting firms specializing in coastal dynamics, ocean observations, and alternative energy, for example. Recent job trends suggest that the strongest candidates, regardless of the area of specialization, will have a master’s degree, several years of experience, and an interdisciplinary background with strong chemistry, physics, mathematics, computer, and communication and collaboration skills. Earth scientists in the San Francisco Bay Area are employed by a relatively high concentration of government agencies, academic institutions, and private firms. In addition to preparing students for advanced work as professionals, the M.S. in Geosciences is an excellent preparation for a community college or high school teaching career or for entry into a doctoral program leading to a career in university teaching and/or research.

The increased emphasis on science in high schools and the new California mandate for earth science education in the elementary science curriculum provide many opportunities for teachers trained in the Earth Sciences.

Advising
The department requires that declared majors consult with an advisor every semester, and prospective majors should consult with an advisor as early as possible, particularly about selecting courses in the General Education program that best fit the major program. Students will also be advised about completing basic science requirements before taking upper division courses in Earth Sciences, and about the order in which required courses should best be taken. Students interested in preparing to teach high school or middle school earth sciences and integrated science should consult the department’s teaching credential advisor.
Every course counted toward major requirements must be completed with a letter grade (CR/NC is not acceptable). No more than one course counted toward major requirements may be completed with a grade less than a C-. Course work used to satisfy major requirements must be completed with an overall point average of 2.0 or higher.

**Professors**
Dempsey, Garcia, Monteverdi, Mustart, Sklar

**Associate Professors**
Caskey, Dekens, Gurdak, Leech

**Assistant Professors**
Ibarra, Mazzi, Stine

**Adjunct Professor**
Siegel

**Majors**
- Bachelor of Arts in Earth Sciences (p. 1142)
- Bachelor of Science in Earth Sciences (p. 1149)

**Minor**
- Minor in Earth Sciences (p. 1164)

**Certificate**
- Certificate in Weather Study (p. 1164)

**Masters**
- Master of Science in Geosciences (p. 1164)

**Bachelor of Arts in Earth Sciences**
The Bachelor of Arts in Earth Sciences program builds a solid conceptual foundation of basic physical sciences, mathematics, and Earth sciences. Students integrate knowledge of these separate disciplines in ways needed to understand and help solve important interdisciplinary problems, such as slowing and adapting to climate change and managing conflicting demands that humans make on the natural environment. It also prepares students to advise and educate others about issues requiring knowledge of how the Earth works.

Beyond the basic foundation, students have great flexibility to adapt the program to satisfy many possible interests in the Earth Sciences and prepare for a variety of careers.

Some career possibilities include:
- High school and middle school science teaching.
- Technical support for firms engaged in environmental engineering, environmental monitoring and protection, natural resource analysis and management, hazardous materials and ecological remediation, computer mapping, etc.
- Technical support to city, county, state, and other governmental agencies charged with land use and other planning.
- Preparation for graduate education in such fields as resource management, environmental public policy, and environmental law.
- Science writing, editing, and librarianship.

- Interpretation for park systems, nature centers, museums, and other areas requiring natural science field skills and natural history communication skills.

Prospective majors are encouraged to consult with a departmental advisor to learn about graduation requirements and to plan a program adapted to their particular interests. Students interested in preparing to teach high school or middle school earth sciences and integrated science should consult with the geosciences single-subject subject-matter advisor.

**Earth Sciences (B.A.) — 49–50 Units**

**Basic Science and Math Foundation (15–16 Units)**

</tbody>
</table>

**Earth Sciences Electives (19 Units)**

- Select at least 19 units of Earth & Climate Sciences (ERTH) or closely related course work with a coherent theme approved by a Department of Earth & Climate Sciences advisor.
- At least 15 elective units must come from upper-division course work. At least 11 elective units must come from ERTH courses.
- No more than four of the 19 elective units can come from courses designed primarily to satisfy General Education requirements (such as 100 and 300 level ERTH courses).

**Culminating Experience (4 Units)**

</tbody>
</table>
MATH 226 Calculus I (or a chemistry, physics, or math elective (3 units))

Students in all Bachelor of Arts programs at SF State must complete at least twelve units of complementary studies, comprising coursework with a prefix outside of the primary prefix for the major. (For the B.A. program in Earth Sciences, that prefix is ERTH.) Students who complete the Earth Sciences B.A. program will have met the Complementary Studies requirement automatically by completing the mathematics, physics, and chemistry coursework required for the degree.

Transfer students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill Complementary Studies requirements for their major only if these courses are included in the minimum units required for the major.

**SF State Studies**
Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM) LD or UD 3
Environmental Sustainability (ES) LD or UD 3
Global Perspectives (GP) LD or UD 3
Social Justice (SJ) LD or UD 3

Note: LD = Lower Division; UD = Upper Division.

**First-Time Student Roadmap (4 Year)**
This roadmap opens in a new tab. (p. 1145)

**Transfer Student Roadmap (2 Year)**
For students with an AS-T in Geology. This roadmap opens in a new tab. (p. 1147)

**This degree program is an approved pathway (“similar” major) for students earning the ADT in Geology**

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

1143
Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission. For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

<td>120-122</td>
</tr>
</tbody>
</table>

---

1. To avoid taking additional units, it is recommended that you meet **LLD and SF State Studies** requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. **Complementary Studies**
   Students in all Bachelor of Arts programs at SF State must complete at least twelve units of complementary studies, comprising coursework with a prefix outside of the primary prefix for the major. (For the B.A. program in Earth Sciences, that prefix is ERTH.) Students who complete the Earth Sciences BA program will have met the Complementary Studies requirement automatically by completing the mathematics, physics, and chemistry coursework required for the degree.
   Transfer students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill Complementary Studies requirements for their major only if these courses are included in the minimum units required for the major.

4. **Major Elective**
   Select at least 19 units of Earth & Climate Sciences (ERTH) or closely related coursework, with a coherent theme approved by a Department of Earth & Climate Sciences advisor. At least 15 elective units must come from upper-division courses. At least 11 elective units must come from ERTH courses. No more than 4 of the 19 elective units can come from courses designed primarily to satisfy General Education requirements (such as 100 and 300 level ERTH courses).
Bachelor of Arts in Earth Sciences – GEOL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Geology. Sixteen units in the major (CHEM 115, MATH 226, ERTH 210, and three additional lower division units in chemistry or calculus) and all lower division GE requirements have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

¹ Earth Sciences Elective — these ERTH courses also satisfy UD-B. If other ERTH course selected, replace University elective with UD-B course.

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 9–18 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
• American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
• Upper division GE, areas B, C and D (9 units): One ERTH elective course may double-count for UD-B. See notes.
• Students entering this major with the AS-T in Geology are not required to fulfill SF State Studies requirements.
• B.A. Earth Sciences students satisfy the Complementary Studies requirement by completion of the Basic Science and Math Foundation.

**Earth Sciences Major: 34 Units**

• Basic Science and Math Foundation (4 units): PHYS 111/PHYS 112 or PHYS 220/PHYS 222. If PHYS completed before transfer, consult with major advisor about appropriate course choices. (Units from the ADT applied for CHEM 115 and MATH 226, plus three additional units in CHEM or CALC.)

• Earth Sciences Foundation (11 units)

• Earth Sciences Electives (15 units): Must be upper division courses organized around a coherent theme approved by an advisor. (Four units for ERTH 210 from ADT applied here.)

• Culminating experience (4 units): Students may choose from BIOL 652 OR ERTH 690 and ERTH 695

**University Electives: Eight or More Units**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. both in UD GE and the major.

**Earth Sciences Elective**

Bachelor of Science in Earth Sciences

The Bachelor of Science in Earth Sciences is designed for students intending to prepare for direct entry into a career as a professional in industry or government, or for graduate school in any of the Earth sciences, such as geology, oceanography, and meteorology. Courses in the BS degree's Earth Sciences Core, supported by courses in the Basic Science and Math Foundation, give students a strong understanding of the structure and behavior of Earth's systems (geosphere, hydrosphere, atmosphere, and biosphere) and the physical process through which they interact. The Earth Sciences Core courses teach not only interdisciplinary science concepts but also skills in quantitative problem solving, field work, and writing and oral communication, which are directly applicable to both graduate school and a career.

Students will develop disciplinary depth by selecting one of the three emphases: Geology, Hydrology, or Oceans, Weather & Climate.

Earth Science (B.S.) – 69–70 units

Emphasis (34 units)

Students must select one of the following emphases

Geology Emphasis

The Geology emphasis provides students with an in-depth understanding of the solid Earth and process that shape it and skills to conduct field investigations of geologic problems. Students who complete these emphasis requirements will be prepared for graduate school in geology or to enter the workforce directly as a professional geologist. The coursework prepares students to pass the Association of State Board Geology (ASBOG) exam to be a licensed professional geologist.

</table>

Electives (11–12 units)

Select (upon advisement) additional Geology emphasis electives needed to reach 34 units.

Hydrology Emphasis

The Hydrology emphasis provides students with in-depth understanding of the behavior of water on and beneath Earth's surface, how water shapes the solid earth, and environmental problems associated with water. Students who complete these emphasis requirements will be prepared for graduate school in hydrology or to enter the workforce directly as a professional hydrologist.

**Requirements (21–22 units)**

Select one of the following: 3-4

Electives (12–13 units)

Select (upon advisement) additional Hydrology emphasis electives needed to reach 34 units. (May include courses from the list above not selected to meet emphasis requirements.)

Ocean, Weather & Climate Emphasis (34 units)

The Ocean, Weather & Climate emphasis provides students with an understanding of the structure and behavior of oceans, the atmosphere, and climate, and the physical processes that shape and change them. Students who complete these emphasis requirements will be prepared for graduate school work in Earth sciences disciplines such as oceanography, meteorology, or climate science, or to enter the workforce directly.

This degree program is an approved pathway (“similar” major) for students earning the ADT in Geology

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
Transferring from institutions other than CCCs or CSUs

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission. For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

1. To avoid taking additional units, it is recommended that you meet **LLD and SF State Studies** requirements (AERM, GP, ES, SJ) within your GE or major.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

Total Units: 120-125

---

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. **Major Emphasis Courses**
   Select five of the following:
   - ERTH 335 Global Warming (3 units)
   - or ERTH 360 California Weather Events (3 units)
   - or ERTH 365 Extreme Weather in a Warming World (3 units)
   - ERTH 430 Fluid Dynamics in Earth Systems (3 units)
   - ERTH 434 Coastal Processes (3 units)
   - ERTH 465 Weather Analysis and Forecasting I (4 units)
   - ERTH 470 Physical Oceanography (4 units)
   - ERTH 535 Planetary Climate Change (4 units)
   - MATH 227 Calculus II (4 units)

4. **Major Emphasis Elective**
   Additional Ocean, Weather, and Climate emphasis electives, selected upon advisement, needed to reach 34 units. (May include courses from the list above not selected to meet emphasis requirements)
## Bachelor of Science in Earth Sciences: Geology Emphasis – GEOL Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017-2018 with an AS-T in Geology. 26 units in the major (CHEM 115/CHEM 215/CHEM 216, ERTH 210, ERTH 500, ERTH 505, MATH 226, two elective units) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

</tbody>
</table>
1. Take ERTH 697 Senior Honors Thesis or University Elective (1 unit) if opting for Senior Project or take zero units if opting for Field Geology.
2. Only if opting for Senior Project to satisfy Culminating Experience.
3. Consult with department advisor about selection of ERTH course.
4. Four unit Field Geology option typically takes place in summer following 4th semester.

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-wide requirements: 9–18 units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE, areas B, C and D (9 units): check for courses that also satisfy Major and/or American Institutions.
- Students transferring with the AS-T in Geology are not required to fulfill SF State Studies or Complementary Studies requirements.

**Earth Sciences Major (Emphasis in Geology): 39–44 units**

CHEM 115/115/121/121, MATH 226, ERTH 210, ERTH 500, ERTH 505, and two units of Geology emphasis electives, one unit of four unit Historical Geology, and one unit of four unit Calculus II in the Geology AS-T met in transfer.

- Basic Science & Math Foundation (8 units) in PHYS If some or all PHYS completed before transfer, consult with a major advisor about appropriate course choices.
- Earth Sciences Core/GWAR (8 units) Three of the four units of Historical Geology in the AS-T substitue for ERTH 500, and three of the four units of Calculus II in the Geology AS-T substitute for ERTH 505.
- Geology Emphasis (14 units)
- Electives (5–9 units) one unit of four unit Historical Geology and one unit of Calculus II in the Geology AS-T satisfy two units of the 11 unit elective requirement; if taken before transfer, Mineralogy satisfies 4 units of the elective requirement. If Mineralogy completed before transfer, consult with major advisor about appropriate course choices)
- Culminating Experience (4–5 units): Take ERTH 690 (1 unit) along with one of the following three options: Senior Honors Thesis (ERTH 697/ERTH 698 (2 units each); Senior Project (ERTH 695, 3 units); or Field Geology course (4 units) offered as a summer field camp, typically the summer following the 4th semester.

**University electives: One Unit or More**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, Culminating Experience option selected, and course choices at SF State - some courses may meet more than one requirement, e.g. both in UD GE and in the major.

**Upper Division GE: UD-C or UD-D (courses listed also satisfy US History)**

</table>

Total Units 60

1. Any four of the five course options described as an “Emphasis Requirement” (and ERTH 260) satisfy the Ocean, Weather, and Climate (OWC) emphasis requirement, while the fifth course can either count as an Emphasis elective or can be replaced by another OWC emphasis elective upon advisement.

2. ERTH 335, ERTH 360, ERTH 365 also satisfy GE Area UD-B: Upper Division Physical and/or Life Sciences.

3. Take ERTH 697 Senior Honors Thesis or take University Elective (2 units) if opting for Senior Project.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 9–15 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE, areas B, C and D (6 units): UD-B met in major. Check for courses that also satisfy Major and/or American Institutions.
- Students transferring with the AS-T in Geology are not required to fulfill SF State Studies or Complementary Studies requirements.

**Earth Sciences Major (Emphasis in Ocean, Weather, and Climate): 41–44 Units**

CHEM 115, MATH 226, MATH 227, ERTH 500, and ten units of Ocean, Weather, and Climate emphasis electives (five units of CHEM 215/CHEM 216, one unit of four-unit Historical Geology, and four units of Physical Geology in the Geology AS-T) meet in transfer.

- Basic Science & Math Foundation (8 units in PHYS) If some or all PHYS completed before transfer, consult with major advisor about appropriate course choices.
- Earth Sciences Core/GWAR (11 units) Three of the four units of Historical Geology in the AS-T substitute for ERTH 500.
- Ocean, Weather, and Climate Emphasis (17-18 units) four units of Calculus II in the Geology AS-T count toward the Emphasis requirements.
- Electives (1-2 units) 5 units of CHEM 215/CHEM 216, one unit of four unit Historical Geology, and four units of Physical Geology in the Geology AS-T satisfy ten units of the 11-12-unit elective requirement.
- Culminating Experience (4-5 units): Take ERTH 690 (1 unit) along with one of the following two options: Senior Honors Thesis (ERTH 697/ERTH 698 (2 units each), or Senior Project (ERTH 695, 3 units).

**University Electives: Three or More Units**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, Culminating Experience option selected, and course choices at SF State. Some courses may meet more than one requirement, e.g. UD GE and the major.

**Upper Division GE: UD-C or UD-D – Courses Listed Also Satisfy US History**

Certificate in Weather Study

General Information
The Certificate in Weather Study program is offered for those interested in learning about meteorology and companion disciplines in some depth, but not at the major level. Students who complete the certificate will be able to read and interpret basic weather maps and make basic weather forecasts for themselves and will be conversant on many weather and climate related topics of ongoing interest and importance, such as global climate change.

For advice about completing the certificate, consult with the certificate advisor, Dr. John Monteverdi. For information about applying to receive the certificate once the program requirements are met, see http://tornado.sfsu.edu/Programs/Weather_Study_Cert.html.

1 Course fulfills a General Education requirement.

Minor in Earth Sciences
The Minor in Earth Sciences program consists of 15 units, including ERTH 400, ERTH 500 and 9 units of Earth Sciences electives selected with the advice and approval of a Department of Earth & Climate Sciences faculty advisor. (See program requirements below.)

Earth Sciences Minor — 15 units

Required Courses (6 units)

<td>Earth Systems II</td>
<td>3</td>
</tr>
</tbody>
</table>

Electives (9 units)

1. Complete at least 9 units of selected Earth & Climate Sciences (ERTH) (or closely related) coursework in consultation with a Department of Earth & Climate Sciences faculty advisor.
2. At least 6 of the 9 units must come from courses with the ERTH prefix.
3. At least 6 of the 9 units must be upper division coursework.

4. No more than 3 of the 9 units can come from a course designed primarily for General Education (such as 300-level ERTH courses).

Master of Science in Geosciences
The Master of Science in Geosciences is an advanced, postgraduate degree that trains students to conduct research in Earth sciences and prepares students for careers in private industry, government agencies, non-governmental organizations (NGOs), teaching in high schools or community colleges, or for continuing postgraduate studies leading to a doctoral degree at another university. Although there are no formal concentrations within the program, students choose an area of research from within the geoscience disciplines and then select a faculty advisor and a course of study.

The Department of Earth & Climate Sciences faculty includes people with expertise in geology, hydrology, meteorology, and oceanography—fields that are critical to understanding fundamental Earth processes and many environmental problems, such as air and water contamination, coastal erosion, and climate change. In addition to standard courses in the three subdisciplines, recent advanced-level courses have included Tectonic Geomorphology, Global Tectonics, Rock Mechanics in Geomorphology, Paleoceanography, Vadose Zone Hydrogeology, Oceanographic Processes in the California Current System, and Electron Microscopy.

All students take courses in their respective areas of emphasis plus a common core of three courses: ERTH 700, a multidisciplinary seminar that exposes students to current geoscientific research and literature, and ERTH 701 and ERTH 702, which prepare students for thesis research, quantitative analyses and scientific writing. Thesis projects are expected to have a rigorous base in a geoscience discipline. Depending on the particular field and focus of study, these projects can involve laboratory research, field work, theory development, numerical simulations or model development.

Recent graduate research projects have focused on topics such as active faults in Death Valley, effects of climate change on regional aquifers, geomorphic controls on Bay Area streams, deformation associated with the San Andreas fault system, Pliocene–Pleistocene climate change, large-scale tectonic processes in the Himalayan Mountains, carbon cycling in the ocean, wave erosion at Ocean Beach, and characteristics of severe storms in California. We encourage students to work on interdisciplinary projects and develop interactions and collaborations with other departments in the University, other institutions and agencies, and private industry.

We strongly recommend that students plan a course of study before beginning the M.S. program, in consultation with a faculty advisor and the graduate coordinator.

Admission to the Program
To be considered for admission to the master’s program as a classified graduate student, applicants must:

• Satisfy the University admission requirements.
• Have a bachelor’s degree in one of the geosciences (geology, meteorology, or oceanography) or a related discipline.
• Have a 3.0 GPA in their earned undergraduate degree or last 60 semester (90 quarter) units completed.
• Satisfactorily complete the Graduate Record Examination general test.
• Provide letters of recommendation from at least two people familiar with the applicant’s previous academic work and/or professional accomplishments.
• Submit a statement of purpose.

Letters of recommendation and statement of purpose should be submitted directly to the department’s graduate coordinator (Dr. Petra Dekens, dekens@sfsu.edu). Other materials should be submitted to the Graduate Studies Division of the University. Materials should be submitted by February 15 for admission the following fall semester and by November 1 for the following spring semester.

Applicants lacking the appropriate background may be admitted as conditionally classified graduate students. These students must complete additional course work that will not be counted toward the graduate requirements. Conditionally admitted students may take courses but cannot file an Advancement to Candidacy (ATC) form until all deficiencies have been satisfied.

Written English Proficiency Requirement
Each graduate student is required to demonstrate an acceptable level of written English proficiency on two levels:

Level One
Satisfied by obtaining a score of 4.0 or better on the analytical writing component of the GRE. If the score is 3.5 or less students will be required to take SCI 614 during their first semester of graduate studies.

Level Two
Satisfied by completion of a written thesis (ERTH 898).

Advancement to Candidacy
To be advanced to candidacy, each student must:

• Satisfy level one of the written English proficiency requirement.
• Satisfy all course deficiencies stipulated upon entrance into the master’s program.
• Choose a faculty advisor and complete a research proposal that has been approved by the student’s thesis committee.
• File an Advancement to Candidacy (ATC) form.

Geosciences (M.S.) — Minimum 30 units

Elective Courses (13 units)

Upper division or graduate elective courses on advisement.

All students must present an oral thesis defense to the Earth & Climate Sciences faculty and students.

Elective units are chosen from courses offered by the Department or other University departments, and must be selected by students in consultation with their faculty advisors. At least 6 units must be courses numbered 700 or higher, and 6 units must be courses offered in the Earth & Climate Sciences Department.

To help prepare for their careers, graduate students are strongly encouraged to serve as a Graduate Teaching Assistant (GTA) for at least one semester. GTAs typically teach lab sections attached to lectures in introductory, general education courses in geology (ERTH 112, ERTH 210, ERTH 230), meteorology (ERTH 162), and oceanography (ERTH 172). To support their professional development in teaching, GTAs are strongly encouraged to enroll in a professional development course such as SCI 750 (2 units) before or during their service as a GTA, to learn about research-based best practices in teaching and learning. (These courses count toward the 13-unit graduate elective unit requirement.)

Students can receive their graduate degree when they complete all course requirements and their thesis committee approves the written thesis and oral thesis defense.
ENGLISH

College of Science and Engineering
Dean: Keith Bowman

School of Engineering
Science Building, Room 163
Phone: (415) 338–1228
Email: engrasst@sfsu.edu

Director: Wenshen Pong
Graduate Coordinator: Hamid Shahnaser (Embedded Systems and Energy Systems)
Graduate Coordinator: Cheng Chen (Structural/Earthquake Engineering)

Mission and Goal
The mission of the School of Engineering is to educate students from a diverse and multicultural population to become productive members of the engineering profession and society at large. Educational objectives in support of this mission depend upon the major program, and are stated below in the description of each program.

Program Scope
The School of Engineering offers Bachelor of Science programs in Civil, Computer, Electrical, and Mechanical Engineering, as well as a minor program in each discipline. Descriptions of the four major and minor programs follow this general introduction.

Civil engineering is concerned with the building of civil and environmental facilities, which are essential for the commerce of our society. Civil engineers design and construct bridges, buildings, wastewater treatment plants, water supply facilities, hazardous waste facilities, and transportation systems. The program at San Francisco State University provides a broad and practical education which prepares students for civil engineering employment and (for those who qualify) for graduate studies.

Computer engineering combines electrical engineering and computer science and deals with the design and application of computer systems. These computer systems can range from super computers to tiny microprocessors that are embedded in all kinds of apparatus such as automobiles, appliances, cellular phones, medical devices, office equipment, etc. The computer engineering program teaches students about computer hardware, software, integration, interfacing and applications with a strong emphasis on analysis and design. Hence, students pursuing a computer engineering degree must have a solid foundation in mathematics and physical sciences. Students develop problem-solving and decision-making skills as well as an appreciation for the impact of technology in society. Graduates of the program can seek employment immediately, or can continue studies for an advanced degree in computer engineering, computer science, electrical engineering, or other areas such as business, law, or medicine.

Electrical engineering is the profession that deals with the design and analysis of electrical and electronic devices and systems. This branch of engineering covers many diverse areas, including electrical power generation and distribution, the design and fabrication of electronic semiconductor devices, and the creation of components and systems for consumer, medical, telecommunications and many other applications. Graduates with a B.S. in Electrical Engineering have a number of options available to them. They may engage in the analysis, modeling, simulation, design, testing, manufacturing, or field services of electrical, electronic, or magnetic equipment. Persons interested in research, development, or college-level teaching may return to universities for advanced degrees in a specified area of electrical engineering.

Mechanical engineering is the field responsible for the design of machines and devices used throughout society. Industries involved in the generation of electricity; in petroleum production; and in the design and manufacture of electronics, aircraft, automobiles, consumer and industrial products typically employ large numbers of mechanical engineers. Mechanical engineers are also employed by companies involved in automated manufacturing as well as robotics and control. The program at San Francisco State University prepares the student to enter into professional employment directly after graduation in addition to providing the needed foundation for graduate study.

Recognizing the value to certain students majoring in science broadening their education to include applications of their background in science to real-world physical systems, four minors in engineering are offered.

The master's program includes primary curricular areas of specialization in civil/structural, electrical/computer, and mechanical/energy engineering from which the student may choose his/her program of study upon advisement. The objectives of the program are to provide students with the advanced engineering education necessary for solving complex problems in engineering practice and to provide opportunities for updating and upgrading the skills of practicing engineers. These objectives are accomplished by a flexible program to meet individual student needs.

Career Outlook
Graduates with a B.S. in Civil Engineering may engage in the design and construction of buildings, bridges, roads, dams, water supply facilities, and environmental facilities for treating wastewater and hazardous wastes. Civil engineers find employment with industrial firms, government agencies, utilities, and public works departments, as well as engineering firms which consult for these enterprises. After gaining practical experience, some civil engineers form their own consulting firms.

Graduates with a B.S. in Computing Engineering may engage in the design, integration, interfacing, and application of computer hardware and software. Computer engineering is the fastest growing engineering profession, and it impacts all aspects of our lives. Since computers are everywhere, from super computers to embedded microprocessors, computer engineers are needed in design, development, testing, marketing, and technical support of a wide variety of industries.

Examples of major industries that employ computer engineers include computers, semiconductors, instrumentation, communications, networks, medical equipment and manufacturing.

Graduates with a B.S. in Electrical Engineering may engage in the analysis, modeling, simulation, design, testing, manufacturing, or field services of electrical, electronic, or magnetic equipment. They may also engage in the operation and maintenance of facilities for electrical power generation or telecommunication. High technology companies employ electrical engineers in the fields of electronic and computer manufacturing, as well as in power generation and communications.

Graduates with a B.S. in Mechanical Engineering may immediately engage in the design, analysis, testing, production, and maintenance of machines and mechanical systems. Most industries, including aerospace, electronics, manufacturing, automotive, chemical, power generation,
agriculture, food processing, textile, and mining, employ mechanical engineers.

Engineers interested in research, development, or college-level teaching return to college for an M.S. or Ph.D. in their specified field. Engineers interested in management and business aspects may return to college for a Master of Business Administration.

**Professors**

**Associate Professor**
C. Chen, A. Cheng, E. Enssani, H. Jiang, K. Teh

**Assistant Professors**
M. Azadi, Z. Jiang, J. Wong, J. Ye, X. Zhang

**Majors**
- Bachelor of Science in Civil Engineering (p. 1167)
- Bachelor of Science in Computer Engineering (p. 1174)
- Bachelor of Science in Electrical Engineering (p. 1180)
- Bachelor of Science in Mechanical Engineering (p. 1187)

**Minors**
- Minor in Civil Engineering (p. 1193)
- Minor in Computer Engineering (p. 1193)
- Minor in Electrical Engineering (p. 1193)
- Minor in Mechanical Engineering (p. 1194)

**Masters**
- Master of Science in Engineering: Concentration in Structural/Earthquakes (p. 1196)
- Master of Science in Engineering: Concentration in Embedded Electrical and Computer Systems (p. 1194)
- Master of Science in Engineering: Concentration in Energy Systems (p. 1195)

**Bachelor of Science in Civil Engineering**

**Undergraduate Programs in Engineering**
Freshman applicants have completed four years of high school mathematics, one year of high school chemistry, and one year of high school physics. Students are also encouraged to include courses in mechanical drawing and computer programming.

Community college transfers should complete the sequence of mathematics, chemistry, physics, and engineering courses listed in freshman and sophomore years under the “sample sequence of courses,” if available at the community college.

The Bachelors of Science in Civil, Computer, Electrical, and Mechanical Engineering require – 127, 128, 129, and 129 semester units, respectively. A minimum of 30 units must be earned in residence at SF State. Of these units, 24 must be upper division courses, and 12 of these upper division units must be in the major. Major requirements, including mathematics, chemistry, and physics prerequisites, comprise - 93 units for civil engineering, 94 for computer engineering, 95 for electrical engineering and 95 units for mechanical engineering. For civil engineering, 50 of the required units are lower division and 43 units are upper division. For mechanical engineering, 51 of the required units are lower division and 44 units are upper division. For electrical engineering, 50 of the required units are lower division and 45 units are upper division. For computer engineering, 49 of the required units are lower division and 45 units are upper division. The remaining 33 units satisfy the balance of the university requirements including communication skills and general education in humanities and social sciences. Students are advised that, except for some general education (GE) courses, all courses which are to be counted toward completion of an engineering degree must be taken for a letter grade; the CR/NC option may not be used in this context.

**Civil Engineering**
The curriculum provides a broad-based common core of engineering science and the essential civil engineering subjects. The students conclude with 15 units of upper division electives where the primary emphasis is design, practical applications, and computer solutions in selected areas of civil engineering. Graduates of the civil engineering program are expected to have, within a few years of graduation:
- Established themselves as practicing professionals or engaged in graduate study in civil engineering or a related field.
- Become licensed civil engineers or made appropriate progress toward professional registration.

Students must complete 21 units of upper division engineering units before registering for ENGR 696.

Courses are scheduled during the day as well as in the late afternoon and evening. Other information and assistance in selecting courses can be obtained from a major advisor in the School of Engineering, or by calling (415) 338-1174, by email to engrasst@sfasu.edu, or by writing to:
School of Engineering
San Francisco State University
Science Building
1600 Holloway Avenue
San Francisco, CA 94132

**General Education Requirements Met in the Engineering Major (All Concentrations)**
The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.
- Area A3 (Critical Thinking) is satisfied upon completion of ENGR 205 and one of ENGR 201 or ENGR 213.
- Upper Division General Education, Physical and Life Sciences (UD-B) is satisfied upon completion of ENGR 300 and one of ENGR 301 or ENGR 302.

**Civil Engineering (B.S.) – 91 units minimum**

**Required Courses (79-81 units)**

Upper Division Engineering Electives (12 units)
Choice of upper division electives must present a clearly identifiable educational objective and ensure that the program requirements in engineering science and design are met by all students. Distribution of credit units among engineering science and design is given in the Advising Guide. A study plan of intended upper division electives must be approved by the student's advisor and the program coordinator prior to the seventh semester of the engineering program.

A total of 12 units from the following list of courses is required, subject to the minimum number of units specified for each group. Students with a GPA of at least 3.0 and the required prerequisites may take graduate courses (numbered 800 and above) with the approval of their advisor or the program coordinator.

ENGR 303 Engineering Thermodynamics 3
ENGR 421 Structural Engineering Laboratory 1
ENGR 425 Reinforced Concrete Structures 3
ENGR 426 Steel Structures 3
ENGR 427 Wood Structures 3
ENGR 431 Foundation Engineering 3
ENGR 432 Finite Element Methods in Structural and Continuum Mechanics 3

ENGR 435 Environmental Engineering Design 3
ENGR 439 Construction Engineering 3
ENGR 441 Fundamentals of Composite Materials 3
ENGR 461 Mechanical and Structural Vibrations 3
ENGR 468 Applied Fluid Mechanics and Hydraulics 3
ENGR 469 Alternative and Renewable Energy Systems 3
ENGR 610 Engineering Cost Analysis 3
ENGR 699 Independent Study 1-3
ENGR 825 Bridge Engineering and Prestress Reinforced Concrete Structures 3
ENGR 826 Seismic Hazard Analysis 3
ENGR 827 Structural Design for Fire Safety 3
ENGR 829 Advanced Topics in Structural Engineering 3
ENGR 830 Finite Element Methods in Structural Continuum Mechanics 3
ENGR 831 Advanced Concrete Structures 3
ENGR 832 Advanced Topics in Seismic Design 3
ENGR 833 Principles of Earthquake Engineering 3
ENGR 835 Advanced Steel Structures 3
ENGR 836 Structural Design for Earthquakes 3
ENGR 837 Geotechnical Earthquake Engineering 3

SF State Studies
Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM)  LD or UD  3
Environmental Sustainability (ES)  LD or UD  3
Global Perspectives (GP)  LD or UD  3
Social Justice (SJ)  LD or UD  3

Note: LD = Lower Division; UD = Upper Division.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit [http://www.assist.org](http://www.assist.org). Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State’s lower division General Education requirements.

Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit [http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/AAEL](http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/AAEL).

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission. For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring
semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

Bachelor of Science in Computer Engineering

Undergraduate Programs in Engineering

Freshman applicants have completed four years of high school mathematics, one year of high school chemistry, and one year of high school physics. Students are also encouraged to include courses in mechanical drawing and computer programming.

Community college transfers should complete the sequence of mathematics, chemistry, physics, and engineering courses listed in freshman and sophomore years under the “sample sequence of courses”, if available at the community college.

The Bachelors of Science in Civil, Computer, Electrical, and Mechanical Engineering require – 127, 128, 129, and 129 semester units, respectively. A minimum of 30 units must be earned in residence at SF State. Of these units, 24 must be upper division courses and 12 of these upper division units must be in the major. Major requirements, including mathematics, chemistry, and physics prerequisites, comprise – 93 units for civil engineering, 94 for computer engineering, 95 for electrical engineering and 95 units for mechanical engineering. For civil engineering, 50 of the required units are lower division and 43 units are upper division. For mechanical engineering, 51 of the required units are lower division and 44 units are upper division. For electrical engineering, 50 of the required units are lower division and 45 units are upper division. For computer engineering, 49 of the required units are lower division and 45 units are upper division. The remaining 33 units satisfy the balance of the university requirements including communication skills and general education in humanities and social sciences. Students are advised that, except for some general education (GE) courses, all courses which are to be counted toward completion of an engineering degree must be taken for a letter grade; the CR/NC option may not be used in this context.

Computer Engineer

Computer engineering is a multidisciplinary field with roots in electrical engineering and computer science that has grown to become a separate discipline in itself. Graduates of the computer engineering program are expected to have, within a few years of graduation:

- Established themselves as practicing professionals or engaged in graduate study in computer engineering or a related field.
- Demonstrated an ability to be productive and responsible professionals

The first two years of the program are designed to build a strong background in mathematics and science to provide a basis for understanding the underlying analysis and modeling tools and physical principles that are common to all engineering. The last two years cover a rich set of hardware and software subjects to give students a broad background in computer engineering. This broad foundation enables students to adapt and extend their knowledge and skills more easily in the future. The curriculum also stresses problem-solving skills and teamwork. Through electives, students can choose to develop further breadth or in-depth knowledge in one of three areas: embedded systems, network systems, or multimedia systems.

The number of units required for graduation (p. 66) and the GE requirements (p. 82) are described in the Undergraduate Education section of this Bulletin. For information for all engineering students, see Undergraduate Programs in Engineering above.

A number of required and elective lecture courses in the computer engineering program have corresponding laboratory courses that students are either required or strongly encouraged to take concurrently. These course pairs are:

- ENGR 205 & ENGR 206 Electric Circuits and Circuits and Instrumentation Laboratory
- ENGR 353 Microelectronics
- ENGR 356 Digital Design
- ENGR 447 Control Systems
- ENGR 357 Digital Design Laboratory
- ENGR 446 and Control Systems Laboratory

Students who drop or withdraw from any of these lecture courses must also drop or withdraw from the corresponding laboratory course, or they will be administratively dropped or withdrawn.

Students must complete 21 units of upper-division engineering units before registering for ENGR 696.

Courses are scheduled during the day as well as in the late afternoon and evening. Other information and assistance in selecting courses can be obtained from a major advisor in the School of Engineering, or by calling (415) 338-1174, by email to engrasst@sfsu.edu, or by writing to:

School of Engineering
San Francisco State University
Science Building
1600 Holloway Avenue
San Francisco, CA 94132

General Education Requirements Met in the Engineering Major (All Concentrations)

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area A3 (Critical Thinking) is satisfied upon completion of ENGR 205 and one of ENGR 201 or ENGR 213.
- Upper Division General Education, Physical and Life Sciences (UD-B) is satisfied upon completion of ENGR 300 and one of ENGR 301 or ENGR 302.

Computer Engineering (B.S.) – 92 units minimum

**Upper Division Electives (6 units)**

Choice of upper division electives must demonstrate a clearly identifiable educational objective and have an advisor's approval. A study plan of intended upper division electives must be approved by the student's advisor and the program coordinator prior to registering for ENGR 696.

A total of 6 units from the following list of courses is required. Students with a GPA of at least 3.0 and the required prerequisites may take graduate courses (numbered 800 and above) with the approval of their advisor or the program coordinator.

- **CSC 413** Software Development 3
- **ENGR 100** Introduction to Engineering 1
- **ENGR 121** Gateway to Computer Engineering 1
- **ENGR 205** Electric Circuits 3
- **ENGR 206** Circuits and Instrumentation Laboratory 1
- **ENGR 212** Introduction to Unix and Linux for Engineers 2
- **ENGR 213** Introduction to C Programming for Engineers 3
- **ENGR 300** Engineering Experimentation 3
- **ENGR 301** Microelectronics Laboratory 1
- **ENGR 305** Linear Systems Analysis 3
- **ENGR 353** Microelectronics 3
- **ENGR 356** Digital Design 3
- **ENGR 357** Digital Design Laboratory 1
- **ENGR 451** Digital Signal Processing 4
- **ENGR 476** Computer Communications Networks 3
- **ENGR 478** Design with Microprocessors 4
- **ENGR 479** Digital Systems Design 3
- **ENGR 456** Computer Systems 3
- **ENGR 696** Engineering Design Project I 1
- **ENGR 697GW** Engineering Design Project II-GWAR 2
- **MATH 227** Calculus II 4

3

Global Perspectives (GP)  
LD or UD  
3

Social Justice (SJ)  
LD or UD  
3

Note: LD = Lower Division; UD = Upper Division.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission.
For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

Bachelor of Science in Electrical Engineering

Undergraduate Programs in Engineering

Freshman applicants have completed four years of high school mathematics, one year of high school chemistry, and one year of high school physics. Students are also encouraged to include courses in mechanical drawing and computer programming.

Community college transfers should complete the sequence of mathematics, chemistry, physics, and engineering courses listed in freshman and sophomore years under the “sample sequence of courses,” if available at the community college.

The Bachelors of Science in Civil, Computer, Electrical, and Mechanical Engineering require – 127, 128, 129, and 129 semester units, respectively. A minimum of 30 units must be earned in residence at SF State. Of these units, 24 must be upper division courses and 12 of these upper division units must be in the major. Major requirements, including mathematics, chemistry, and physics prerequisites, comprise – 93 units for civil engineering, 94 for computer engineering, 95 for electrical engineering and 95 units for mechanical engineering. For civil engineering, 50 of the required units are lower division and 43 units are upper division. For mechanical engineering, 51 of the required units are lower division and 44 units are upper division. For electrical engineering, 50 of the required units are lower division and 45 units are upper division. For computer engineering, 49 of the required units are lower division and 45 units are upper division. The remaining 33 units satisfy the balance of the university requirements including communication skills and general education in humanities and social sciences. Students are advised that, except for some general education (GE) courses, all courses which are to be counted toward completion of an engineering degree must be taken for a letter grade; the CR/NC option may not be used in this context.

Electrical Engineer

The required upper division courses provide a broad and basic understanding of the main fields in electrical engineering. Upon advisement, each student may choose an area of specialization in the senior year in communications, computers, electronics, control/robotics, or power engineering. Graduates of the electrical engineering program are expected to have, within a few years of graduation:

- Established themselves as practicing professionals or engaged in graduate study in electrical engineering or a related field.
- Demonstrated an ability to be productive and responsible professionals.

The number of units required for graduation (p. 66) and the General Education (p. 82) requirements are described in the Undergraduate Education section of this Bulletin. For information for all engineering students, see Undergraduate Programs in Engineering above.

A number of required and elective lecture courses in the electrical engineering program have corresponding laboratory courses that students are either required or strongly encouraged to take concurrently. These course pairs are:

Students who drop or withdraw from any of these lecture courses must also drop or withdraw from the corresponding laboratory course, or they will be administratively dropped or withdrawn.

Students must complete 21 units of upper-division engineering units before registering for ENGR 696.

General Education Requirements Met in the Engineering Major (All Concentrations)

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area A3 (Critical Thinking) is satisfied upon completion of ENGR 205 and one of ENGR 201 or ENGR 213.
- Upper Division General Education, Physical and Life Sciences (UD–B) is satisfied upon completion of ENGR 300 and one of ENGR 301 or ENGR 302.

Courses are scheduled during the day as well as in the late afternoon and evening. Other information and assistance in selecting courses can be obtained from a major advisor in the School of Engineering, or by calling (415) 338-1174, by email to engrasss@sfsu.edu, or by writing to:

ENGR 201 Dynamics 3
ENGR 203 Materials of Electrical and Electronic Engineering 3
ENGR 204 Engineering Mechanics 3
ENGR 303 Engineering Thermodynamics 3

Upper Division Engineering Electives (9 units)
Choice of upper division electives must present a clearly identifiable educational objective and ensure that the program requirements in engineering science and design are met by all students. Distribution of credit units among engineering science and design is given in the Advising Guide. A study plan of intended upper division electives must be approved by the student’s advisor and the program coordinator prior to the seventh semester of the engineering program.

A total of nine units of upper divisions engineering electives from the following list of courses is required. Students with a GPA of at least 3.0 and the required prerequisites may take graduate courses (numbered 800 and above) with the approval of their advisor or the program coordinator.

ENGR 378 Digital Systems Design 3
ENGR 410 Process Instrumentation and Control 3
ENGR 411 Instrumentation and Process Control Laboratory 1
ENGR 415 Mechatronics 3

SF State Studies
Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

| American Ethnic and Racial Minorities (AERM) | LD or UD | 3 |
| Environmentai Sustainability (ES) | LD or UD | 3 |
| Global Perspectives (GP) | LD or UD | 3 |
| Social Justice (SJ) | LD or UD | 3 |

Note: LD = Lower Division; UD = Upper Division.

B.S. in Electrical Engineering Roadmap

This link opens the 2017–2018 roadmap in a new tab. (p. 1184)

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission.
For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring
semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

**Units**

| Total Units     | 129-134 |

---

1. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

2. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

3. GE Area A: Critical Thinking (A3) is satisfied upon completion of ENGR 205 and ENGR 201 or ENGR 213.

4. Students must complete 21 units of upper-division engineering units before registering for ENGR 696.
**Major Upper Division Electives**
- ENGR 378 Digital Systems Design (3 units)
- ENGR 410 Process Instrumentation and Control (3 units)
- ENGR 411 Instrumentation and Process Control Laboratory (1 unit)
- ENGR 415 Mechatronics (3 units)
- ENGR 416 Mechatronics Lab (1 unit)
- ENGR 445 Analog Integrated Circuit Design (4 units)
- ENGR 448 Electrical Power Systems (3 units)
- ENGR 453 Digital Integrated Circuit Design (4 units)
- ENGR 455 Power Electronics (4 units)
- ENGR 456 Computer Systems (3 units)
- ENGR 458 Renewable Electrical Power Systems and Smart Grid (3 units)
- ENGR 476 Computer Communications Networks (3 units)
- ENGR 610 Engineering Cost Analysis (3 units)
- ENGR 699 Independent Study (1-3 units)
- ENGR 844 Embedded Systems (3 units)
- ENGR 848 Digital VLSI Design (3 units)
- ENGR 849 Advanced Analog IC Design (3 units)
- ENGR 851 Advanced Microprocessor Architectures (3 units)
- ENGR 852 Advanced Digital Design (3 units)
- ENGR 853 Advanced Topics in Computer Communication and Networks (3 units)

- ENGR 869 Robotics (3 units)
Bachelor of Science in Mechanical Engineering

Undergraduate Programs in Engineering

Freshman applicants have completed four years of high school mathematics, one year of high school chemistry, and one year of high school physics. Students are also encouraged to include courses in mechanical drawing and computer programming.

Community college transfers should complete the sequence of mathematics, chemistry, physics, and engineering courses listed in freshman and sophomore years under the “sample sequence of courses,” if available at the community college.

The Bachelor of Science in Civil, Computer, Electrical, and Mechanical Engineering require 127, 128, 129, and 129 semester units, respectively. A minimum of 30 units must be earned in residence at SF State. Of these units, 24 must be upper division courses, and 12 of these upper division units must be in the major. Major requirements, including mathematics, chemistry, and physics prerequisites, comprise ~ 93 units for civil engineering, 94 for computer engineering, 95 for electrical engineering, and 95 units for mechanical engineering. For civil engineering, 50 of the required units are lower division and 43 units are upper division. For mechanical engineering, 51 of the required units are lower division and 44 units are upper division. For electrical engineering, 50 of the required units are lower division and 45 units are upper division. For computer engineering, 49 of the required units are lower division and 45 units are upper division. The remaining 33 units satisfy the balance of the university requirements including communication skills and general education in humanities and social sciences. Students are advised that, except for some general education (G.E.) courses, all courses which are to be counted toward completion of an engineering degree must be taken for a letter grade; the CR/NC option may not be used in this context.

Mechanical Engineering

The required courses provide a thorough grounding in the essentials of mechanical engineering. Elective courses taken as part of one of the areas of emphasis allow for specialization. The areas of emphasis currently offered are mechanical design, thermal-fluid systems, and robotics and controls. Graduates of the mechanical engineering program are expected to have, within a few years of graduation:

- Established themselves as practicing professionals or engaged in graduate study in mechanical engineering or a related area.
- Demonstrated an ability to be productive and responsible professionals.
- Acted as representatives of their profession in their communities.

The number of units required for graduation (p. 66) and the G.E. requirements (p. 82) are described in the Undergraduate Education section of this Bulletin. For information common to all engineering students, see Undergraduate Programs in Engineering above.

Courses are scheduled during the day as well as in the late afternoon and evening. Other information and assistance in selecting courses can be obtained from a major advisor in the School of Engineering, or by calling (415) 338-1174, by email to engrasst@sfsu.edu, or by writing to:

School of Engineering
San Francisco State University
Science Building

1600 Holloway Avenue
San Francisco, CA 94132.

General Education Requirements Met in the Engineering Major (All Concentrations)

The requirements below are deemed “met in the major” upon completion of the courses listed (even though the courses and their prerequisites are not approved for GE). This is true whether or not the student completes the major.

- Area A3 (Critical Thinking) is satisfied upon completion of ENGR 205 and one of ENGR 201 or ENGR 213.
- Upper Division General Education, Physical and Life Sciences (UD-B) is satisfied upon completion of ENGR 300 and one of ENGR 301 or ENGR 302.

Mechanical Engineering (B.S.) — 93 units minimum

Required Courses (80-82 Units)

- CHEM 115 General Chemistry I: Essential Concepts of Chemistry or CHEM 180 Chemistry for the Energy and the Environment 3-5
- ENGR 100 Introduction to Engineering 1
- ENGR 101 Engineering Graphics 1
- ENGR 102 Statics 3
- ENGR 103 Introduction to Computers 1
- ENGR 200 Materials of Engineering 3
- ENGR 201 Dynamics 3
- ENGR 205 Electric Circuits 3
- ENGR 206 Circuits and Instrumentation Laboratory 1
- ENGR 290 Modular Elective (one unit course taken three times) 3
- ENGR 300 Engineering Experimentation 3
- ENGR 302 Experimental Analysis 1
- ENGR 303 Engineering Thermodynamics 3
- ENGR 304 Mechanics of Fluids 3
- ENGR 305 Linear Systems Analysis 3

### General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer, doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government

### SF State Studies

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

Note: LD = Lower Division; UD = Upper Division.
• a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

• Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission.

For more information, visit the Undergraduate Admissions section.

• Complete 60 or more transferable semester units or 90 or more quarter units
• Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
• Be in good standing at the last college or university attended
• Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
• The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

1. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

2. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

3. GE Area A: Critical Thinking (A3) is satisfied upon completion of ENGR 205 and ENGR 201 or ENGR 213.

4. Students must complete 21 units of upper-division engineering units before registering for ENGR 696.
Upper Division Major Electives (9 units)
ENGR 306 Electromechanical Systems (3 units)
ENGR 410 Process Instrumentation and Control (3 units)

ENGR 871 Advanced Electrical Power Systems (3 units)
Minor in Civil Engineering

The purpose of the Minor in Civil Engineering is to give students with sufficient background in mathematics, physics, and chemistry, a fundamental understanding of the field of civil engineering. The minor should be of special interest to students in Geosciences (foundations and earthquake), Environmental Studies, Physics, Mathematics, Computer Science, and other engineering fields. Students interested in the Civil Engineering minor must meet with the program coordinator and complete the Civil Engineering Minor Program Approval Form. Revision of the form requires the approval of the program coordinator.

Civil Engineering Minor – 21 units

Prerequisite Requirements (21 units)
The minor is intended for students who have satisfied the following prerequisite requirements.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 226</td>
<td>Calculus I</td>
<td>4</td>

</tbody>
</table>

Electives (6 units)

Approved upper division civil engineering courses, all within one of the civil engineering focus areas. No upper division course from the major can be double-counted toward meeting the elective requirements of the minor or second major. There must be prior approval from the program head.

To earn the Minor in Civil Engineering, a student must complete at least 12 of the required 21 core and elective units at SF State. Each of the courses in the minor must be taken for a letter grade (CR/NC is not acceptable).

Minor in Electrical Engineering

The purpose of the Minor in Electrical Engineering is to give students in other fields of study a good basic background in electrical engineering. The 16-unit core provides an introduction to four basic areas of modern electrical engineering – basic electrical circuit theory, electronics, linear signals and systems, and digital logic and computer architecture. Elective courses provide opportunities for additional breadth or depth in a particular area. Students interested in the electrical engineering minor must meet with the program coordinator and complete the Electrical Engineering Minor Program Approval Form. Revision of the form requires the approval of the program coordinator.

Electrical Engineering Minor – 22 units

Prerequisite Requirements (23 units)
The minor is intended for students who have satisfied the following prerequisite requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>

</tr>
</tbody>
</table>

**Electives (6 units)**

Approved upper division electrical engineering courses. No upper division course from the major can be double-counted toward meeting the elective requirements of the minor or second major. There must be prior approval from the program head.

To earn the Minor in Electrical Engineering, a student must complete at least 12 of the required 22 core and elective units at SF State. Each of the courses in the minor must be taken for a letter grade (CR/NC is not acceptable).

**Minor in Mechanical Engineering**

The purpose of the Minor in Mechanical Engineering is to give students from science and other branches of engineering the opportunity to learn the fundamentals of mechanical engineering, to broaden their understanding of science and engineering, and to prepare them for new technological developments such as material science and nanotechnology. Additional knowledge in control and robotics, mechanical design, or thermal-fluids may be acquired through electives. Students interested in the Minor in Mechanical Engineering must meet with the program coordinator and complete the Mechanical Engineering Minor Program Approval Form. Revision of the form requires the approval of the program coordinator.

**Mechanical Engineering, Minor – 21 units**

**Prerequisite Requirements (32 units)**

The minor is intended for students who have satisfied the following prerequisite requirements:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 226</td>
<td>Calculus I</td>
<td>4</td>

<td>4</td>
</tr>
</tbody>
</table>

**Electives (6 units)**

Approved upper division Mechanical Engineering courses, all within one of the Mechanical Engineering Focus areas. No upper division course from the major can be double-counted towards meeting the elective requirements of the minor or second major. There must be prior approval from the program head.

To earn the Minor in Mechanical Engineering, a student must complete at least 12 of the required 21 core and elective units at SF State. Each of the courses in the minor must be taken for a letter grade (CR/NC is not acceptable).

**Master of Science in Engineering: Concentration in Embedded Electrical and Computer Systems**

**Admission to the Program**

Applicants must hold a bachelor’s degree in engineering, or a closely related discipline, with a minimum GPA of 3.0 in upper division major classes in addition to meeting general university requirements for graduate standing. The School of Engineering also requires two letters of recommendation from persons familiar with the student’s previous academic work or professional accomplishments. Graduate Record Exam (GRE) scores within the last three years are also required. A minimum score of 550 on the paper exam or 213 on the computer-based TOEFL is required for graduate applicants whose preparatory education was principally in a language other than English.

**Advancement to Candidacy**

The applicant is advanced to candidacy when the Advancement to Candidacy (ATC) has been signed and approved by the Dean of the Graduate Division.

**Written English Proficiency Requirements**

**Level One**

As a preadmission requirement, applicants must have satisfied one of the following:

1. a score of at least 4.0/6.0 on the GRE or GMAT Analytic Writing Assessment;
2. a score of at least 4.5/6.0 on the essay test of the paper-based [PBT]
   TOEFL (a minimum score of 24/30 on the Writing section of the
   Internet-based test [IBT] TOEFL);
3. a score of at least 6.5/9.0 on the IELTS writing test, or a concordant
   score on the Pearson Test of English.

An applicant that does not meet the above requirement may be
conditionally accepted to the program but must complete SCI 614 within
the first year of attendance at SF State in order to meet the Level One
requirement. SCI 614 does not count toward the 30 unit MS course work
requirement.

Level Two

is satisfied by the completion of a written thesis (ENGR 898) or research
project (ENGR 895).

Curriculum

The Master of Science in Engineering is based on 30 semester units of
which at least 21 units must be earned from graduate level courses. We
expect that the graduate coordinator will work closely with individual
students to develop a curriculum plan that ensures academic rigor while
at the same time meeting the needs of the student. The curriculum
includes 12 units of required engineering courses and a minimum of 6
units of elective engineering courses. A maximum of 6 units of elective
non-engineering courses may be applied to the degree requirements with
the consent of the graduate coordinator if they are consistent with the
student’s overall career objectives as provided in the program of study.
There are two options for the culminating experience. One option is to
first take a 3-unit research course (ENGR 897), and then a 3-unit thesis
course (ENGR 898). The other option is to take a 3-unit applied research
project course (ENGR 895).

Engineering (M.S.): Concentration in
Embedded Electrical and Computer
Systems – Minimum 30 units

Required Courses (12 units)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tbody>
</table>

A program cannot contain more than 9 units of courses with a course
number below 700. Some upper division engineering courses may also
be used as electives if not used in the undergraduate degree program and
approved by the graduate coordinator.

Non-Engineering Electives (0 - 6 units)

Courses, either graduate or upper-division, selected primarily from
science, mathematics, social science, or business, upon approval of the
graduate coordinator.

Culminating Experience (3 - 6 units)

Units selected from one of the options below

Master of Science in Engineering:
Concentration in Energy Systems

Admission to the Program

Applicants must hold a bachelor’s degree in engineering, or a closely
related discipline, with a minimum GPA of 3.0 in upper division major
classes, in addition to meeting general university requirements for
graduate standing. The School of Engineering also requires two letters
of recommendation from persons familiar with the student’s previous
academic work or professional accomplishments. Graduate Record Exam
(GRE) scores within the last three years are also required. A minimum
score of 550 on the paper exam or 213 on the computer-based TOEFL
is required for graduate applicants whose preparatory education was
principally in a language other than English.

Advancement to Candidacy

The applicant is advanced to candidacy when the Advancement to
Candidacy (ATC) has been signed and approved by the Dean of the
Graduate Division.
Written English Proficiency Requirements

Level One
As a preadmission requirement, applicants must have satisfied one of the following:
1. a score of at least 4.0/6.0 on the GRE or GMAT Analytic Writing Assessment;
2. a score of at least 4.5/6.0 on the essay test of the paper-based [PBT] TOEFL (a minimum score of 24/30 on the Writing section of the Internet-based test [iBT] TOEFL);
3. a score of at least 6.5/9.0 on the IELTS writing test, or a concordant score on the Pearson Test of English.

An applicant that does not meet the above requirement may be conditionally accepted to the program but must complete SCI 614 within the first year of attendance at SF State in order to meet the Level One requirement. SCI 614 does not count toward the 30 unit MS course work requirement.

Level Two
The Level Two English Proficiency Requirement is satisfied by the completion of a written thesis (ENGR 898) or research project (ENGR 895).

Curriculum
The Master of Science in Engineering is based on 30 semester units of which at least 21 units must be earned from graduate level courses. We expect that the graduate coordinator will work closely with individual students to develop a curriculum plan that ensures academic rigor while at the same time meeting the needs of the student. The curriculum includes 12 units of required engineering courses and a minimum of 6 units of elective engineering courses. A maximum of 6 units of elective non-engineering courses may be applied to the degree requirements with the consent of the graduate coordinator, if they are consistent with the student’s overall career objectives as provided in the program of study. There are two options for the culminating experience. One option is to first take a 3-unit research course (ENGR 897), and then a 3-unit thesis course (ENGR 898). The other option is to take a 3-unit applied research project course (ENGR 895).

Engineering (M.S.): Concentration in Energy Systems — Minimum 30 units

Required Courses (12 units)
- ENGR 800 Engineering Communications 3
- ENGR 801 Engineering Management 3
- ENGR 820 Energy Resources and Sustainability 3
- ENGR 863 Advanced Thermal-Fluids 3

The aggregate of courses that comprise the core of this concentration is designed to give students a broad foundation in general areas of engineering project management and engineering communications, and in Energy Systems. These courses are aimed to provide our students opportunities for career advancement in their profession.

Elective Engineering Courses (6–15 units)
- ENGR 448 Electrical Power Systems 3
- ENGR 458 Renewable Electrical Power Systems and Smart Grid 3
- ENGR 463 Thermal Power Systems 3

A program cannot contain more than 9 units of courses with a course number below 700. Some upper division engineering courses may be used as electives if not used in the undergraduate degree program and if approved by the graduate coordinator.

Non-Engineering Electives (0–6 units)
Courses, either graduate or upper-division, selected primarily from science, mathematics, social science, or business, upon approval of the graduate coordinator.

Culminating Experience (3–6 units)
Units selected from one of the options below

Option A
- ENGR 897 & ENGR 898 Research and Master’s Thesis (thesis may not be started until completion of 12 units of graduate course work and ENGR 897) 6

Option B
- ENGR 895 Applied Research Project (project may not be started until completion of 12 units of graduate course work) 3

Master of Science in Engineering: Concentration in Structural/Earthquakes

Admission to the Program
Applicants must hold a bachelor’s degree in engineering, or a closely related discipline, with a minimum GPA of 3.0 in upper division major classes, in addition to meeting general university requirements for graduate standing. The School of Engineering also requires two letters of recommendation from persons familiar with the student’s previous academic work or professional accomplishments. Graduate Record Exam (GRE) scores within the last three years are also required. A minimum score of 550 on the paper exam or 213 on the computer-based TOEFL is required for graduate applicants whose preparatory education was principally in a language other than English.

Advancement to Candidacy
The applicant is advanced to candidacy when the Advancement to Candidacy (ATC) has been signed and approved by the Dean of the Graduate Division.

Written English Proficiency Requirements

Level One
As a preadmission requirement, applicants must have satisfied one of the following:
Master of Science in Engineering: Concentration in Structural/Earthquakes

1. a score of at least 4.0/6.0 on the GRE or GMAT Analytic Writing Assessment;
2. a score of at least 4.5/6.0 on the essay test of the paper-based [PBT] TOEFL (a minimum score of 24/30 on the Writing section of the Internet-based test [IBT] TOEFL);
3. a score of at least 6.5/9.0 on the IELTS writing test, or a concordant score on the Pearson Test of English.

An applicant that does not meet the above requirement may be conditionally accepted to the program but must complete SCI 614 within the first year of attendance at SF State in order to meet the Level One requirement. SCI 614 does not count toward the 30 unit MS course work requirement.

**Level Two**
is satisfied by the completion of a written thesis (ENGR 898) or research project (ENGR 895).

**Curriculum**
The Master of Science in Engineering is based on 30 semester units of which at least 21 units must be earned from graduate level courses. We expect that the graduate coordinator will work closely with individual students to develop a curriculum plan that ensures academic rigor while at the same time meeting the needs of the student. The curriculum includes 12 units of required engineering courses and a minimum of 6 units of elective engineering courses. A maximum of 6 units of elective non-engineering courses may be applied to the degree requirements with the consent of the graduate coordinator if they are consistent with the student’s overall career objectives as provided in the program of study. There are two options for the culminating experience. One option is to first take a 3-unit research course (ENGR 897), and then a 3-unit thesis course (ENGR 898). The other option is to take a 3-unit applied research project course (ENGR 895).

**Option B**
ENGR 895 Applied Research Project (project may not be started until completion of 12 units of graduate course work) 3
The Master of Arts in Geography (http://geog.sfsu.edu/ma) is designed for individuals pursuing careers in environmental planning, monitoring and advocacy; in resource management; in geographic techniques; in community college teaching; or for individuals preparing for doctoral work in geography. The graduate curriculum ensures all students have grounding in both physical and human geography and offers opportunities for specialization in physical geography, natural resource management, environmental studies, regional geography and techniques. The Concentration in Resource Management and Environmental Planning (http://geog.sfsu.edu/marmep) provides the knowledge and skills necessary to carry out impact analysis, plan formulation and implementation.

The Master of Science in Geographical Information Science (http://geog.sfsu.edu/msgis) (GISc) program prepares graduate students for advanced careers in a wide range of geospatial information research and applications. Geographic information science encompasses the development, use, and applications of geographic information systems (GIS), cartography, remote sensing, global positioning systems (GPS), and spatial statistics. A student completing this program will be prepared to take on advanced technical and leadership roles in environmental and resource agencies and firms employing GIS, remote sensing and other geospatial technologies.

The M.A. and M.S. programs culminate in either a master’s thesis or a research project and comprehensive oral examination.

Facilities
Research facilities (http://geog.sfsu.edu/content/research) available to students include a geographic analysis teaching lab (HSS 290), an environmental science teaching lab (HSS 383), a physical geography lab, a map library, campus computer laboratories, and the main library. The Institute for Geographic Information Science (http://gis.sfsu.edu) provides further resources and research opportunities. The department maintains licenses for industry-standard software such as ArcGIS, QGIS, R, ERDAS Imagine, ENVI, E-cognition, QT Modeler, PhotoScan, Trimble, and other geospatial software. The department cannot guarantee funding to incoming graduate students. The department occasionally offers technical positions and graduate assistant opportunities to graduate students in residence, and funding may be available from external grants and campus financial aid resources.

The undergraduate and graduate degrees offered by the Department of Geography & Environment provide excellent preparation for a variety of positions in the public or private sector. Graduates find challenging and interesting careers in environmental and planning agencies at the state and local level, environmental consulting and cartographic firms, and nonprofit organizations, as well as in community college teaching. A growing demand for students trained in GIS and environmental science make geography and environmental science students with appropriate skills highly marketable.

• Either Geographical Techniques – 601–639 numbered courses in Geography or Applied Geography – 640–668 numbered courses in Geography

Focus of Interest (12 units)

Units of upper division geography electives consisting of a minimum of three courses chosen on advisement. These courses will be organized around coherent themes such as those listed below. In addition, alternative concentrations tailored to individual student interest may be developed in consultation with the Geography undergraduate advisor. On advisement, appropriate upper division courses from other departments and programs may be included.

• Human Geography
• Environmental Studies
• Physical Environment
• Resource Management
• Techniques of Geographic Analysis
• Urban Environment, Transportation, and Land Use
• Focused individual interest pursued in consultation with the undergraduate advisor

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

Foci of Interest

Focus on Human Geography

In addition to serving traditional liberal arts education, this option permits systematic study within cultural geography:

Supplementary courses in Earth & Climate Sciences and Biology are recommended on advisement

**Focus on Techniques of Geographic Analysis**
This option concentrates on technical skills:

- **Data Acquisition in the field**
  - GEOG 601 Field Methods in Human Geography 3
  - GEOG 602 Field Methods in Physical Geography 4

- **Data Analysis in the lab**
  - (such as remote sensing)
  - GEOG 610 Remote Sensing of the Environment I 4
  - GEOG 611 Remote Sensing of the Environment II 4

- **Geographic Information Systems**
  - GEOG 603 Introduction to Geographic Information Systems 3
  - GEOG 620 Geographical Information Systems 4
  - GEOG 621 Geographic Information Systems for Environmental Analysis 4
  - GEOG 625 Programming for Geographic Information Science 4
  - GEOG 629 Coastal and Marine Applications of GIS 3

- **Data Display in Cartography**
  - GEOG 606 Cartography 4

- **Internship**
  - (strongly recommended)
  - GEOG 688 Geographic Internship 2-6

**Focus on Urban Environment, Transportation, and Land Use**
This specialization offers an opportunity to acquire foundation knowledge to prepare for entry level careers and graduate work. Key courses include:

- GEOG 422 Environmental Perception 3
- GEOG/WGS 423 Geographic Perspectives on Gender, Environment, and Development 3
- GEOG 425 Economic Geography 3
- GEOG 427 Agriculture and Food Supply 4
- GEOG 432/432 Urban Geography 4
- GEOG/USP 433 Urban Transportation 4
- GEOG/H ED 434 Geographies of Health and Health Care 3
- GEOG 435 Geography of Global Transportation 4
- GEOG 455 Geography of Ethnic Communities 3
- GEOG 601 Field Methods in Human Geography 3
- GEOG 603 Introduction to Geographic Information Systems 3
- GEOG/USP 651 San Francisco Bay Area Environmental Issues 4
- GEOG/USP 652 Environmental Impact Analysis 4
- GEOG/USP 658 Land-Use Planning 4
- GEOG 666 Geography of Garbage: Recycling and Waste Reduction 3
- GEOG 667/ USP 515 Environmental Justice: Race, Poverty, and the Environment 4

Upper division courses in Urban Studies are particularly appropriate as well.

**Focus based on individual interests**
This focus may be pursued in consultation with a geography major advisor.
highly recommended courses
GEOG 603 Introduction to Geographic Information Systems 3
GEOG 688 Geographic Internship 2-6

Complementary Studies
All Bachelor of Arts students must complete 12 units of complementary studies in courses outside the primary prefix for the major, and not cross-listed with the primary prefix for the major. Students who complete two majors or a major and a minor automatically complete the complementary studies requirement.

An additional way to satisfy the complementary studies requirement for students in the geography major is to meet with an advisor to identify courses other than GEOG, and not cross-listed with GEOG, that would serve to complement each student’s area of interest. Four units from complementary studies will also double-count toward units in the major.

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can be best be applied to this requirement in order to ensure degree completion within 60 units.

Students are advised that the CR grade is acceptable in any two courses to be counted for the geography major. No more than one course counted toward major requirements may be completed with a grade less than a C-

SF State Studies
Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM)
Environmental Sustainability (ES)
Global Perspectives (GP)
Social Justice (SJ)

Note: LD = Lower Division; UD = Upper Division.

Transfer Student Roadmap (2 Year)
For students with an AA-T in Geography. This roadmap opens in a new tab. (p. 1207)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Geography

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student.

However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:
• How many lower-division units required for the major have been
completed upon entry based on award of a specific ADT;
• Which lower-division requirements are considered complete upon
entry based on award of a specific ADT;
• How to complete the remaining 60 units for the degree in four
semesters.

Students who have earned an ADT should seek advising in the major
department during the first semester of attendance.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or
electives for this major as possible.

2. The following courses are not required for admission, but are required
for graduation. Students are strongly encouraged to complete these
units before transfer; doing so will provide more flexibility in course
selection after transfer.
• a course in U.S. History
• a course in U.S. & California Government
• a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and
(2) above at a California Community College (CCC), please visit http://
www.assist.org. Check any geographically accessible CCCs; sometimes
options include more than one college. Use ASSIST to determine:
• Which courses at a CCC satisfy any lower division major requirements
for this major, including 2nd-semester composition;
• Which courses at a CCC satisfy CSU GE, US History, and US & CA
Government.

Remedial courses are not transferable and do not apply to the minimum
60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the
minimum 60 units required for upper division transfer (for example, if
course was not passed on the first attempt, or was taken to earn a better
grade).

Before leaving the last California community college of attendance,
obtain a summary of completion of lower division General Education
units (IGETC or CSU GE Breadth). This is often referred to as a GE
certification worksheet. SF State does not require delivery of this
certification to Admissions, but students should retain this document for
verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or
College-Level Examination Program courses: AP/IB/CLEP credit is
not automatically transferred from the previous institution. Units are
transferred only when an official score report is delivered to SF State.
Credit is based on the academic year during which exams were taken.
Refer to the University Bulletin in effect during the year of AP/IB/CLEP
examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and
mathematics (STEM) disciplines often defer 6-9 units of lower division
general education in areas C and D until after transfer in order to focus
on preparation courses for the major. (This advice does not apply to
students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs
or CSUs

Review SF State’s lower division General Education requirements.
Note that, as described below, the four basic skills courses required for
admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses
that fulfill the remaining areas of SF State’s lower division GE pattern are
available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking
(GE A3) may not be widely offered outside the CCC and CSU systems.
Students should attempt to identify and take an appropriate course no
later than the term of application to the CSU. To review more information
about the A3 requirement, please visit http://bulletin.sfsu.edu/
undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition
course before transfer. This is usually the next course after the typical
“freshman comp” course, with a focus on writing, reading and critical
analytical skills for academic purposes, and developing skills in
composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets
both US and CA/local government requirements may be an appropriate
option, particularly if transferring from outside of California.

All students must meet the transfer eligibility
requirements outlined below for admission.
For more information, visit the Undergraduate Admissions section.

• Complete 60 or more transferable semester units or 90 or more
quarter units
• Earn a college grade point average of 2.00 or better in all transferable
courses. Non-local area residents may be held to a higher GPA
standard.
• Be in good standing at the last college or university attended
• Complete 30 semester units (45 quarter units) of general education,
including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with
intermediate algebra as a prerequisite (same as CSU GE area B4)

• The four basic skills courses and a minimum of 60 transferable
semester units (90 quarter units) must be completed by the spring
semester prior to fall admission, or by the fall semester prior to spring
admission. Earn a “C” or better grade in each basic skills course.

</table>

| Eighth Semester | Units |
| GEOG 690 | Senior Seminar in Geography and Environmental Science | 3 |
| Distribution Requirement (15 units) – Take Two | 6 |
| Focus of Interest (12 units) | 3 |
| Complementary Studies or SF State Studies or University Elective | 3 |

| Units | 15 |
| Total Units | 120-121 |

1. To avoid taking additional units, it is recommended that you meet **LLD and SF State Studies** requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. **Complementary Studies**
   All Bachelor of Arts students must complete 12 units of complementary studies in courses outside the primary prefix for the major, and not cross-listed with the primary prefix for the major. Students who complete two majors or a major and a minor automatically complete the complementary studies requirement. An additional way to satisfy the complementary studies requirement for students in the geography major is to meet with an advisor to identify courses other than GEOG, and not cross-listed with GEOG, that would serve to complement each student’s area of interest. Four units from complementary studies will also double-count toward units in the major.
   Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units. Students are advised that the CR grade is acceptable in any two courses to be counted for the geography major. No more than one course counted toward major requirements may be completed with a grade less than a C-.

4. Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.

5. **Distribution Requirement (12-15 units)**
   (Cross-listed courses originating in other departments are not accepted in these categories.)
   One course from each of the following four areas:
   - Physical Environment – 310–399 numbered courses in Geography
   - Human Geography – 400 level courses in Geography
   - Human-Environment Interaction in a Regional Context:
     - GEOG 550 Geography of the United States and Canada (3 units)
     - GEOG 552 Geography of California (3 units)
     - GEOG 575 Emerging China (3 units)
   - GEOG 646 The Geography of Marine Resources (4 units)
   - GEOG 647 Geography of Water Resources (4 units)
   - GEOG 648 Management of National Parks and Protected Areas (4 units)
   - GEOG 651 San Francisco Bay Area Environmental Issues (4 units)

   - Either Geographic Techniques – 601–639 numbered courses in Geography or Applied Geography – 640–668 numbered courses in Geography
Focus of Interest (12 units)
Units of upper division geography electives consisting of a minimum of three courses chosen on advisement. These courses will be organized around coherent themes such as those listed below. In addition, alternative concentrations tailored to individual student interest may be developed in consultation with the Geography undergraduate advisor. On advisement, appropriate upper division courses from other departments and programs may be included.

- Human Geography
- Environmental Studies
- Physical Environment
- Resource Management
- Techniques of Geographic Analysis
- Urban Environment, Transportation, and Land Use
- Focused individual interest pursued in consultation with the undergraduate advisor

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

Foci of Interest
Focus on Human Geography
GEOG 422 Environmental Perception (3 units)
GEOG 423 Geographic Perspectives on Gender, Environment, and Development (3 units)
GEOG 425 Economic Geography (3 units)
GEOG 427 Agriculture and Food Supply (4 units)
GEOG 430 Transforming Food and Agriculture Systems: Local to Global (4 units)
GEOG 432 Urban Geography (4 units)
GEOG 434 Geographies of Health and Health Care (3 units)
GEOG 445 Geopolitics and Globalization (3 units)
GEOG 454 San Francisco on Foot (4 units)
GEOG 455 Geography of Ethnic Communities (3 units)
Select a 500 level course

Focus on Environmental Studies
Required
GEOG 600 Environmental Problems and Solutions (3 units)
Recommended
GEOG 316 Biogeography (4 units)
GEOG 317 Geography of Soils (4 units)
GEOG 422 Environmental Perception (3 units)
GEOG 427 Agriculture and Food Supply (4 units)
GEOG 642 Watershed Assessment and Restoration (4 units)
GEOG 644 Water Quality (3 units)
GEOG 646 The Geography of Marine Resources (4 units)
GEOG 647 Geography of Water Resources (4 units)
GEOG 651 San Francisco Bay Area Environmental Issues (4 units)
GEOG 652 Environmental Impact Analysis (4 units)
GEOG 657 Natural Resource Management: Biotic Resources (4 units)
GEOG 666 Geography of Garbage: Recycling and Waste Reduction (3 units)
GEOG 667 Environmental Justice: Race, Poverty, and the Environment (4 units)
GEOG 668 Politics, Law, and the Urban Environment (4 units)

Focus on the Physical Environment
Courses central to the specialization include:
GEOG 312 Geography of Landforms (4 units)
GEOG 313 Earth’s Climate System (4 units)
GEOG 314 Bioclimatology (4 units)
GEOG 316 Biogeography (4 units)
GEOG 317 Geography of Soils (4 units)
GEOG 342 Surface Water Hydrology (4 units)
Supporting courses include:
GEOG 602 Field Methods in Physical Geography (4 units)
GEOG 642 Watershed Assessment and Restoration (4 units)
GEOG 647 Geography of Water Resources (4 units)
GEOG 657 Natural Resource Management: Biotic Resources (4 units)

Focus on Techniques of Geographic Analysis
Data Acquisition in the field
GEOG 667 Field Methods in Human Geography (3 units)
Bachelor of Arts in Geography – GEOG Associate Degree for Transfer
Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AA-T in Geography. Six units in the major (GEOG 101, GEOG 102) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 9–18 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE, areas B, C and D (9 units): Look for GEOG courses that also satisfy Major requirements.
- Students entering the major with the AA-T in Geography are not required to fulfill SF State Studies requirements.
- Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

**Geography Major: 30–33 Units**

GEOG 101- GEOG 102 met in transfer.
• Major Core (6–9 units): GEOG 205 (if not met in transfer), GEOG 500GW, and GEOG 690
• Distribution Requirement (12 upper division units): Choose one course from four different areas: Physical Environment (310–399 level); Human Geography (400 level); Human-Environment Interaction in a Regional Context; Geographic Techniques (601–639) OR Applied Geography (640–668).
• Focus of Interest (12 units): Choose upper division courses organized around a coherent theme in consultation with an advisor.

University Electives: Nine or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major.
Bachelor of Science in Environmental Science

The Bachelor of Science in Environmental Science is designed for students intending to prepare for graduate school or direct entry into a career as an environmental scientist or environmental manager in industry or government. Entry to the major presupposes prior course work comprising the high school equivalents of two years of algebra, one year of plane geometry, one-half year of trigonometry, one year of biology, and one year of physics and/or chemistry.

The Environmental Science curriculum comprises a core providing a foundation of science and methods courses—introductory earth systems and environmental science, biology, chemistry, physics, and mathematics—as well as distributed electives in environmental science, environmental management, and analytical methods, and a capstone seminar. GEOG 205 provides introductory research design, statistical and geospatial methods. Geospatial methods are then further developed in GEOG 603, which is a prerequisite for all advanced GIS classes. The GWAR course (GEOG 500GW) focuses on the physical and human dimensions of climate change, providing a rich source of topics for composition at the upper division level.

Student progress toward the degree is aided in that some of these core classes also meet lower-division general education requirements. Students will complete their entire Area B, Scientific Inquiry and Quantitative Reasoning in GEOG 101 (Area B1 Physical Science), GEOG 160 (Area B2 Life Science), GEOG 160 lab (Area B3 Laboratory Science), and MATH 226 (Area B4 Quantitative Reasoning). They will also complete three units toward their Area D Social Sciences requirement in GEOG 102.

Electives are distributed into three areas:

1. Environmental Science, including investigations of the atmosphere, hydrosphere, lithosphere, pedosphere (soils), environmental chemistry, and the biosphere;
2. Environmental Management of managed lands and waters, natural resources, threatened species and livable environment; and
3. Analytical Methods, including geographic information science, statistical analysis, and field-based environmental analysis methods.

Through choices in each area, students can tailor their program in a variety of ways, to focus on water, soils and agriculture, biotic systems, restoration science, coastal systems, bioclimatology, pollution management, protected land management, water resources management, or others. The capstone course, GEOG 690, prepares students for careers and graduate study.

Students are advised that the CR grade is acceptable in any two courses to be counted for the major. No more than one course counted toward major requirements may be completed with a grade less than a C−.

Note: LD = Lower Division; UD = Upper Division.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.

2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer:
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)
Transferring from institutions other than CCCs or CSUs
Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission.
For more information, visit the Undergraduate Admissions section.

• Complete 60 or more transferable semester units or 90 or more quarter units
• Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
• Be in good standing at the last college or university attended
• Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

• The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.
**Bachelor of Science in Environmental Science Roadmap**

   - GEOG 629 Coastal and Marine Applications of GIS (3 units)
Minor in Geography

Minor Advisor: Jennifer Blecha, Tendai Chitewere, XiaoHang Liu

The geography minor consists of a core curriculum of three lower division courses plus 12 units of upper division geography electives on advisement. These courses may be organized around coherent themes such as those described for the major. However, groupings of courses specifically appropriate to majors in other departments or programs such as Biology, Environmental Studies, International Relations, Earth & Climate Sciences, or Urban Studies and Planning are particularly recommended.

Students are advised the CR grade is acceptable in one course to be counted for the geography minor.

Upper Division Courses (12 units) on advisement

Master of Arts in Geography

Graduate Advisors: Jason Henderson, Andrew Oliphant, Nancy Wilkinson

Admission to the Program

For admission to the graduate program, a student must meet the general University requirements as stated in the Bulletin. For unconditional admission to the M.A. program in geography, a student must have completed an undergraduate major in geography with a minimum GPA of 3.25 in the major. An applicant with a GPA of 3.25 or better in a major other than geography may qualify for admission as a conditionally classified graduate student. The conditional status is removed upon completion of core degree courses in physical and cultural geography, introductory statistics, introductory GIS, and an upper division geography course on advisement, with a grade of B or better in each course. Units earned for remedial or prerequisite course work are not applied toward the graduate degree.

In addition to the general application and grade transcripts that are sent to the graduate studies office, the department requires a detailed Statement of Purpose, GRE scores and two letters of recommendation. Check the department website for details on how to apply to the program; materials must be submitted in one packet. Personal interviews with the graduate advisors and appropriate department faculty are recommended.

Written English Proficiency Requirements

The University has a requirement for written English proficiency that is to be assessed at two different levels.

Level One

A score of 4.0 or better on the Analytical Writing portion of the GRE is taken as an indication of Level One writing proficiency. Any student whose GRE AW is 3.5 or lower is required to undertake remedial course work which does not appear on the Advancement to Candidacy (ATC).

Level Two

Satisfactory completion of GEOG 895 or GEOG 898.

Advancement to Candidacy

In addition to fulfilling all University requirements, students must complete the required curriculum outlined below. All graduate seminars and all courses used on the Advancement to Candidacy (ATC) with the exception of GEOG 895 and GEOG 898 must be taken on a letter grade basis and have earned a B- or better. Not more than three units of independent study (GEOG 899) and 1 unit of independent study (GEOG 699) may be included on the ATC. Internship (GEOG 688) units do not appear on the ATC. Each student must consult with the appropriate graduate advisor regularly and design an individual program leading towards the culminating experience requirement (thesis or research paper). For advancement to candidacy, the student must select a culminating experience committee comprised of two or three members, at least two of whom must be from the department, and present a research proposal to department faculty. Note that culminating experience committee members may have specific requirements for methodological background courses (e.g. the choice of GEOG 701, GEOG 702 or GEOG 705), so this should be considered when planning your course schedules.

Upper division courses offered by the department may be included with the approval of the graduate advisor. Depending upon a student’s background and/or objective, additional courses in geography or related fields may be required on advisement.

Geography (M.A.) — Minimum 30 Units

<td>3</td>
</tr>
</tbody>
</table>
Master's Oral Examination
A two-hour oral examination is required of all students. One hour is devoted to the research topic (GEOG 895) and a second hour focuses on a discussion of six foundation works in the discipline selected on individual advisement. The examination or either of its parts may be repeated only once. Students must have completed all course work prior to taking the oral examination which can be scheduled only during the fall and spring semesters. Examination guidelines are available from the graduate advisor.

Research Proposal
The department requires all M.A. students to present a proposal of their research for culminating experience to faculty and peers within a semester of filing the Proposal for Culminating Experience. The object is to provide students with useful feedback in the critical developmental stage of the research experience. Students present a twenty minute synopsis of their research ideas to faculty and fellow graduate students focusing particularly on linking the research to a broader theoretical framework and presenting a methodology design to achieve the specifically stated objectives. This is followed by ten minutes (maximum) for questions and comments. Proposal presentations are scheduled as needed.

Master of Arts in Geography: Concentration in Resource Management and Environmental Planning
Graduate Advisor: Nancy Wilkinson

Admission to the Program
For admission to the graduate program, a student must meet the general University requirements as stated in the Bulletin. For unconditional admission to the M.A. program in geography, a student must have completed an undergraduate major in geography with a minimum GPA of 3.25 in the major. An applicant with a GPA of 3.25 or better in a major other than geography may qualify for admission as a conditionally classified graduate student. The conditional status is removed upon completion of core degree courses in physical and cultural geography, introductory statistics, introductory GIS, and an upper division geography course on advisement, with a grade of B or better in each course. Units earned for remedial or prerequisite course work are not applied toward the graduate degree.

Written English Proficiency Requirements
The University has a requirement for written English proficiency that is to be assessed at two different levels.

Level One
A score of 4.0 or better on the Analytical Writing portion of the GRE is taken as an indication of Level One writing proficiency. Any student whose GRE AW is 3.5 or lower is required to undertake remedial course work, which does not appear on the Advancement to Candidacy (ATC).

Level Two
Satisfactory completion of GEOG 895 or GEOG 898.

Advancement to Candidacy
In addition to fulfilling all University requirements, students must complete the required curriculum outlined below. All graduate seminars and all courses used on the Advancement to Candidacy (ATC) with the exception of GEOG 895 and GEOG 898 must be taken on a letter grade basis and have earned a B− or better. Not more than three units of Special Study (GEOG 899) and one unit of Special Study (GEOG 699) may be included on the ATC. Internship (GEOG 688) units do not appear on the ATC. Each student must consult with the appropriate graduate advisor regularly and design an individual program leading towards the culminating experience requirement (thesis or research paper).

For advancement to candidacy, the student must select a culminating experience committee comprised of two or three members, at least two of whom must be from the department, and present a research proposal to the department faculty. Note that culminating experience committee members may have specific requirements for methodological background courses (e.g., the choice of GEOG 701, GEOG 702 or GEOG 705) so this should be considered when planning your course schedules.

Upper division courses offered by the department may be included with the approval of the graduate advisor. Depending upon a student's background and/or objective, additional courses in geography or related fields may be required on advisement.

Geography (M.A.): Concentration in Resource Management and Environmental Planning — Minimum 30 units

Program (15–16 units)
Select one of the following: 3–4
GEOG 705 Geographical Analysis
GEOG 701 Field Methods in Human Geography
GEOG 702 Field Methods in Physical Geography
GEOG 751 Environmental Management 3
GEOG 801 Scope and Method in Geography 1 3
GEOG 810 Seminar in Physical Geography 3
GEOG 820 Human and Social Geography 3

1 To be taken by the student during the first year after admission to classified graduate status.

Additional Graduate Courses (3–7 units)
Select 3–7 units on advisement from the following:
BUS 857 Business Management, Ecology, and Environmental Leadership 3
GEOG 815 Seminar in GIScience 3
GEOG 858 Seminar in Environmental and Land Use Planning 3
GEOG 896 Directed Reading in Geography 3
IR/GEOG 735 Seminar in Global Environmental Policy 3
Additional Graduate Seminars or Upper Division Courses (4–9 units)

selected from the following, on advisement, with a minimum of one course from each category below.

**Category I: Resource Management and Environmental Planning**
- ECON 550 Environmental Economics 3
- GEOG 422 Environmental Perception 3
- GEOG 427 Agriculture and Food Supply 4
- GEOG 430 Transforming Food and Agriculture Systems: Local to Global 4
- GEOG 644 Water Quality 3
- GEOG 646 The Geography of Marine Resources 4
- GEOG 647 Geography of Water Resources 4
- GEOG/USP 652 Environmental Impact Analysis 4
- GEOG/USP 658 Land-Use Planning 4

**Category II: Techniques**
- GEOG 702 Field Methods in Physical Geography (if not chosen above) 4
- GEOG 610 Remote Sensing of the Environment I 4
- GEOG 711 Remote Sensing of the Environment II 4
- GEOG 720 Geographical Information Systems 4
- GEOG 721 Geographic Information Systems for Environmental Analysis 4
- GEOG/ERTH 642 Watershed Assessment and Restoration 4
- GEOG 644 Water Quality 3
- GEOG/ENVS 657 Natural Resource Management: Biotic Resources 4
- GEOG 705 Geographical Analysis (if not chosen above) 3

**Culminating Experience (3 units)**

Select one of the following:
- GEOG 895 Research Project (and Master’s Comprehensive Oral Examination) 3
- GEOG 898 Master’s Thesis (and Oral Defense of Thesis) 3

**Master’s Oral Examination**

A two-hour oral examination is required of all students. One hour is devoted to the research topic (GEOG 895) and a second hour focuses on a discussion of six foundation works in the discipline selected on individual advisement. The examination or either of its parts may be repeated only once. Students must have completed all course work prior to taking the oral examination, which can be scheduled only during the fall and spring semesters. Examination guidelines are available from the graduate advisor.

**Research Proposal**

The department requires all M.A. students to present a proposal of their research for culminating experience to faculty and peers within a semester of filing the Proposal for Culminating Experience. The object is to provide students with useful feedback in the critical developmental stage of the research experience. Students present a twenty minute synopsis of their research ideas to faculty and fellow graduate students focusing particularly on linking the research to a broader theoretical framework and presenting a methodology design to achieve the specifically stated objectives. This is followed by ten minutes (maximum) for questions and comments. Proposal presentations are scheduled as needed.

**Master of Science in Geographic Information Science**

Graduate Advisors: Leonhard Blesius, Jerry Davis, Ellen Hines, XiaoHang Liu

**Admission to the Program**

For admission to the graduate program, a student must meet the general University requirements as stated in the Bulletin. An applicant must have a baccalaureate degree from an accredited institution with a GPA of 3.25 or better in geography or a related discipline, with emphasis or experience in spatial data analysis, and have earned a grade of B or better in GEOG 603, or equivalent.

In addition to the general application and grade transcripts which are sent to the Graduate Studies Office, the department requires applicants to submit a detailed Statement of Purpose, GRE scores and two letters of recommendation. Check the department website for details on how to apply to the department; materials must be submitted in one packet. Personal interviews with the graduate advisors and appropriate department faculty are recommended.

**Written English Proficiency Requirements**

The University has a requirement for written English proficiency that is to be assessed at two different levels.

**Level One**

A score of 4.0 or better on the Analytical Writing portion of the GRE is taken as an indication of Level One writing proficiency. Any student whose GRE AW is 3.5 or lower is required to undertake remedial course work, which does not appear on the Advancement to Candidacy (ATC).

**Level Two**

Satisfactory completion of GEOG 895 or GEOG 898.

**Advancement to Candidacy**

In addition to fulfilling all University requirements, students must complete the required curriculum outlined below. All graduate seminars and all courses used on the Advancement to Candidacy (ATC) with the exception of Geography 895 and 898 must be taken on a letter grade basis and have earned a B- or better. Not more than three units of Special Study (GEOG 699) and 1 unit of Special Study (GEOG 699) may be included on the ATC. Each student must consult with their graduate advisor regularly and design an individual program leading towards the culminating experience requirement (thesis or research paper).

For advancement to candidacy, the student must select a culminating experience committee comprised of two or three members, at least two of whom must be full-time faculty in geography at SF State, and must present a research proposal to the department.

Upper division courses offered by the department may be included with the approval of the graduate advisor. Depending upon a student’s background and/or objective, additional courses in geography or a related field may be required on advisement. Note: A maximum of 30% undergraduate-only courses may be used in a graduate program.

Comprehensive Oral Examination (GEOG 895)

A two-hour oral examination is required of all students using this option. One hour is devoted to the research topic (GEOG 895) and a second hour of comprehensive oral examination on the theory and applications of GIScience. The examination or either of its parts may be repeated only once. Students must have completed all course work prior to taking the oral examination, which can be scheduled only during the fall and spring semesters. Examination guidelines are available from the graduate advisor.

Research Proposal

The department requires all graduate students to present a proposal of their research for culminating experience to faculty and peers within a
MARINE SCIENCE

College of Science and Engineering

Dean: Keith Bowman

Based at the Romberg Tiburon Center

As of Fall 2017, this Program is temporarily not accepting students.

For students interested in Marine and Estuarine Science at the Romberg Tiburon Center, please visit: http://rtc.sfsu.edu/riptides/index.htm

Administered by the Department of Biology

Website: http://biology.sfsu.edu/graduate/marine_sciencesRTC

Graduate Coordinator: Ellen M. Hines ehines@sfsu.edu

The M.S. in Marine Science program is an interdisciplinary program offered at San Francisco State University (SF State) by the College of Science and Engineering, based at the Romberg Tiburon Center (RTC; http://rtc.sfsu.edu), and administered by the Department of Biology. Faculty mentors in the program are from the Departments of Biology, Chemistry and Biochemistry, Physics, Geography & Environment, and Earth & Climate Sciences.

Program Scope

The interdisciplinary MS in Marine Science program includes faculty from a broad spectrum of marine, coastal and estuarine researchers from across SF State departments. The program provides the opportunity for students to acquire a practical and theoretical education in the marine sciences to prepare them for careers as research scientists, teachers, and marine technicians. Through RTC the program provides extensive field and laboratory work for advanced study in the marine sciences.

Master of Science in Marine Science

Admission to the Program

Prospective students from a variety of undergraduate backgrounds are encouraged to apply. Applications are administered by the Biology Department and must comply with the application procedures and deadlines of the Biology Department (http://biology.sfsu.edu/content/applying-sfsu-biology-graduate-programs). Note, the M.S. in Marine Science is distinct from the M.S. in Biology with a concentration in marine biology.

Marine Science (M.S.) – 30 units

Coursework Requirements

Students are required to complete a total of 30 units*, structured as follows:

- 9–10 units of research credits, comprised of:
  - Research
    - BIOL/CH5M/ERTH 897
    - GEQG 896
  - Thesis
    - BIOL/CH5M/ERTH/GEOQ 896

- 20 units of coursework that must include:
  - 6–8 units of graduate seminar courses

- 12–15 units of remaining coursework, as described below.

The 20 units of coursework are broken down below in the following categories I-V:

1. Scientific Methods for Professional Aquatic Scientists BIOL 708, 3 units:
   Required in the first semester of graduate school.

2. Students pick at least three of the following core seminars*:
   - BIOL 862 Advances in Ecology and Systematic Biology 2
   - BIOL 863 Advances in Marine Biology 2
   - BIOL 864 Advances in Microbiology 2
   - BIOL 865 Advances in Physiology and Behavioral Biology 2
   - GEOG 857 Issues in Marine and Estuarine Conservation 3

   - Students who have completed these courses under their undergraduate courses can take other courses after advisor’s approval.

3. Students can choose from a wide range of electives in consultation with their advisor.
   - Electives taught at RTC include:
     - BIOL 582 Biological Oceanography 4
     - CHEM 680 Chemical Oceanography 3
     - ERTH 870 Physical Oceanography 4
     - BIOL 534 Wetland Ecology 3
     - BIOL 585 Marine Ecology 3
     - ERTH 834 Coastal Processes 3
     - BIOL 731 Animal Physiology Laboratory - GWAR 4
     - BIOL 702 Biology of the Algae 3
     - GEOG 629 Coastal and Marine Applications of GIS 3
   
   - Electives taught at SF State, MLML, or elsewhere (e.g. UC Berkeley):
     - For example, Biometry, Environmental GIS, Conservation Biology, etc...

4. Current RTC Research, BIOL 883, 2-4 units. MS in MS students are expected to participate each semester in this formal course for the Wednesday RTC lecture series. Students are expected to enroll in BIOL 883 each semester, though the course can only count twice (4 units total) towards the degree. This course does not fulfill the graduate seminar requirement.

Moss Landing Marine Laboratories Courses

Most courses for the MS in Marine Science are offered at SF State’s Romberg Tiburon Center and on the main campus. Students may also take equivalent core courses or any elective courses at the Moss Landing Marine Laboratories on advisement. Consult the current Moss Landing Marine Laboratories course schedule, https://gradprog.mlml.calstate.edu/class-schedule.
MATHEMATICS

Website: math.sfsu.edu (http://math.sfsu.edu)

Chair: David Bao
Mathematics Undergraduate Advisors: D. Ellis, E. Hsu, S. Li
Mathematics Graduate Coordinators: Y. Cheung, J. Gubeladze
Statistics Undergraduate Advisor: M. Kafai

Program Scope
The Bachelor of Arts is offered for students with a general interest in mathematics; Bachelor of Science programs in applied mathematics and statistics are also offered. Courses are offered in mathematics education for prospective elementary and secondary teachers. Copies of program requirements are available in the mathematics department office.

The Bachelor of Arts in Mathematics has three concentrations:

- Liberal Arts
- Teaching
- Advanced Study

The Liberal Arts concentration is for students who desire a broad liberal arts education with an emphasis in mathematics.

The Teaching concentration is for students whose goal is to teach mathematics in middle school or high school. These students will obtain a solid understanding of the mathematics needed for teaching and classroom experience as volunteers in local public schools. They will also have the opportunity to develop the mathematical skills, flexibility, and perceptiveness to help future students cultivate fruitful wonderful ideas, and to help students connect their thinking to formal mathematical structures. Students who complete this concentration will have satisfied the early field experience requirement and the subject matter competency requirement for a single subject credential in mathematics.

The Advanced Study concentration is for students who plan to pursue a masters or doctoral degree in mathematics. Students who choose this concentration will obtain a solid foundation in the cornerstones of advanced mathematics: linear algebra, abstract algebra, vector analysis, real analysis and complex analysis.

The Bachelor of Science in Applied Mathematics responds to the needs of business and industry for applied mathematical scientists. The program also responds to the needs of those students who enjoy mathematics for its own sake but who also have interests in other fields to which mathematics is applied. Applied mathematicians and statisticians are employed in such areas as operations research, systems analysis, computing, data analysis, biological sciences (for example, doing research on DNA topology, mathematical cancer biology, or meeting the special needs of biostatistics), communications research, and in the management sciences.

The primary aim of applied mathematics is to elucidate scientific concepts and to describe and predict scientific phenomena through the use of mathematics. The applied mathematician is at once a mathematical specialist and a systems analyst, whose task it is to confront highly complex real-world situations with mathematical analysis. In industry, the applied mathematician has an opportunity to test both background and training in solving problems of a practical nature. It is necessary to have not only a grasp of the mathematical theories involved, but also an appreciation for the specific science or technology concerned. In this way, one can arrive at usable mathematical formulations of scientific and engineering problems.

The applied mathematics program prepares students in several areas. First, students acquire a broad knowledge of the techniques and methods of applied mathematics. These techniques include differential equations, optimization, statistics, numerical analysis, computer programming, and operations research. Second, students learn to model scientific phenomena and complex real-world systems, (Mathematical Modeling, Applied Mathematics Project) and to use these models to understand and predict the behavior of these systems. Finally, they learn how to communicate these results to other scientists and managerial decision makers.

The Minor in Mathematics is available for students desiring a program of study in mathematics that is coherent but not as extensive as the B.A. program. It could provide an excellent background for prospective secondary school teachers who want to be able to teach in mathematics as well as in their major area, or for students majoring in a science such as biology or economics who want to emphasize the quantitative aspects of their major.

The College of Business and the College of Science and Engineering offer the Bachelor of Science in Statistics for students who are planning careers as statisticians in a wide variety of industrial and business activities, and government services.

The Bachelor of Science in Statistics is for students who are planning careers as statisticians in industry, business, government, or biomedical research. Statistics is basic to quantitative research in the biological, physical, and social sciences. Because its methods are based on mathematics, it requires a firm understanding of mathematical methods as well as an appreciation of scientific method, computation, and practical problems. To give the student both breadth and depth and to introduce the student to a variety of fields where statistics may be applied, three emphases are offered: science, business, and economics.

The Master of Arts in Mathematics is offered with the purpose of extending students’ experience in mathematics. A student’s goal may be to prepare for a career in government, industry, or community college teaching, to enhance competency as an elementary or secondary school teacher, or to prepare for further graduate study.

The described degrees, when supplemented by the appropriate courses, can also prepare students for graduate study in other fields such as accounting, mathematical biology, computer science, economics, engineering, physics, and statistics.

Career Outlook
The degree programs in mathematics and statistics prepare students for additional graduate work; teaching careers; and work in business, industry, and government that apply mathematical and statistical concepts. In addition, specific careers in actuarial science, investment
firms, computer industry, biomedical research and the government sector (such as NASA and the NSA) are especially attractive.

Mathematics Faculty
Professors
Ardila, Axler, Bao, Beck, Cheung, Ellis, Goetz, Gubeladze, Hosten, Hsu, Kafai, Kys, Langlois, Li, Robbins, Schuster

Associate Professors
Krause, Piriyatinska

Assistant Professors
Clader, He, Lai, Ross, Seashore

Statistics Faculty

Majors
- Bachelor of Arts in Mathematics: Concentration in Mathematics for Advanced Study (p. 1220)
- Bachelor of Arts in Mathematics: Concentration in Liberal Arts (p. 1227)
- Bachelor of Arts in Mathematics: Concentration in Teaching (p. 1234)
- Bachelor of Science in Applied Mathematics (p. 1241)
- Bachelor of Science in Statistics (p. 1248)

Minor
- Minor in Mathematics (p. 1255)

Masters
- Master of Arts in Mathematics (p. 1255)

Bachelor of Arts in Mathematics: Concentration in Mathematics for Advanced Study

Undergraduate degree programs in mathematics presuppose a background equivalent to two years of high school algebra, one year of plane geometry, and at least one semester of trigonometry. Students in doubt as to their satisfaction of these prerequisites should consult the mathematics department. MATH 60, MATH 70, and MATH 199 may be used to remedy deficiencies. Because of the sequential nature of mathematics courses, all students must consult with a departmental advisor at regular intervals during their degree programs. MATH 500 through MATH 599 may not be counted as electives toward the mathematics major or minor. CR/NC grades are not acceptable in courses to be counted for a mathematics major or minor program.

The Bachelor of Arts in Mathematics can be earned by completing any one of three concentrations:

- Concentration in Mathematics for Advanced Study (48 units): this concentration prepares students for graduate study of mathematics.
- Concentration in Mathematics for Liberal Arts (42 units): this concentration is intended for students planning non-technical careers.
- Concentration in Mathematics for Teaching (45 units): this concentration matches the state-approved subject matter program for the single-subject credential in mathematics.

Mathematics majors who successfully complete MATH 300GW spring 2010 or thereafter or MATH 301GW in spring 2009 or thereafter will have satisfied the University's Graduation Writing Assessment Requirement (GWAR).

Mathematics (B.A.): Concentration in Mathematics for Advanced Study — 48 units

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

- American Ethnic and Racial Minorities (AERM) | LD or UD | 3
- Environmental Sustainability (ES) | LD or UD | 3
- Global Perspectives (GP) | LD or UD | 3
- Social Justice (SJ) | LD or UD | 3

Note: LD = Lower Division; UD = Upper Division.

First-Time Student Roadmap (4 Year)

This roadmap opens in a new tab. (p. 1223)

Transfer Student Roadmap (2 Year)

For students with an AA-T in Mathematics. This roadmap opens in a new tab. (p. 1225)

This degree program is an approved pathway ("similar" major) for students earning the ADT in Mathematics

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
• How to complete the remaining 60 units for the degree in four
semesters.

Students who have earned an ADT should seek advising in the major
department during the first semester of attendance.

General Advising Information for Transfer
Students

1. Before transfer, complete as many lower division requirements or
electives for this major as possible.
2. The following courses are not required for admission, but are required
for graduation. Students are strongly encouraged to complete these
units before transfer; doing so will provide more flexibility in course
selection after transfer.
   • a course in U.S. History
   • a course in U.S. & California Government
   • a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and
(2) above at a California Community College (CCC), please visit http://
www.assist.org. Check any geographically accessible CCCs; sometimes
options include more than one college. Use ASSIST to determine:
   • Which courses at a CCC satisfy any lower division major requirements
     for this major, including 2nd-semester composition;
   • Which courses at a CCC satisfy CSU GE, US History, and US & CA
     Government.

Remedial courses are not transferable and do not apply to the minimum
60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the
minimum 60 units required for upper division transfer (for example, if
course was not passed on the first attempt, or was taken to earn a better
grade).

Before leaving the last California community college of attendance,
obtain a summary of completion of lower division General Education
units (IGETC or CSU GE Breadth). This is often referred to as a GE
certification worksheet. SF State does not require delivery of this
certification to Admissions, but students should retain this document for
verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or
College-Level Examination Program courses: AP/IB/CLEP credit is
not automatically transferred from the previous institution. Units are
transferred only when an official score report is delivered to SF State.
Credit is based on the academic year during which exams were taken.
Refer to the University Bulletin in effect during the year of AP/IB/CLEP
examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and
mathematics (STEM) disciplines often defer 6-9 units of lower division
general education in areas C and D until after transfer in order to focus
on preparation courses for the major. (This advice does not apply to
students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs
or CSUs

Review SF State’s lower division General Education requirements.
Note that, as described below, the four basic skills courses required for
admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses
that fulfill the remaining areas of SF State’s lower division GE pattern are
available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking
(GE A3) may not be widely offered outside the CCC and CSU systems.
Students should attempt to identify and take an appropriate course no
later than the term of application to the CSU. To review more information
about the A3 requirement, please visit http://bulletin.sfsu.edu/
undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition
course before transfer. This is usually the next course after the typical
“freshman comp” course, with a focus on writing, reading and critical
analytical skills for academic purposes, and developing skills in
composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets
both US and CA/local government requirements may be an appropriate
option, particularly if transferring from outside of California.

All students must meet the transfer eligibility
requirements outlined below for admission.
For more information, visit the Undergraduate
Admissions section.

• Complete 60 or more transferable semester units or 90 or more
  quarter units
• Earn a college grade point average of 2.00 or better in all transferable
  courses. Non-local area residents may be held to a higher GPA
  standard.
• Be in good standing at the last college or university attended
• Complete 30 semester units (45 quarter units) of general education,
  including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with
     intermediate algebra as a prerequisite (same as CSU GE area B4)
• The four basic skills courses and a minimum of 60 transferable
  semester units (90 quarter units) must be completed by the spring
  semester prior to fall admission, or by the fall semester prior to spring
  admission. Earn a “C” or better grade in each basic skills course.

**Total Units**: 120-122

---

1. To avoid taking additional units, it is recommended that you meet **LLD and SF State Studies** requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. **Complementary Studies**

   Students who pursue a Bachelor of Arts in Mathematics with Concentrations in Liberal Arts, Teaching, or Advanced Studies must complete 12 complementary units, within a coherent group of courses with a prefix other than MATH, and not cross-listed with MATH. Complementary Studies units for the Mathematics major may come from:

   1. Any courses offered by other departments in the College of Science & Engineering (CoSE), or
   2. Any of the following courses outside of CoSE:
      - DS 312 Data Analysis with Computer Applications (3 units)
      - DS 408 Computer Simulation (3 units)
      - ECON 101 Introduction to Microeconomic Analysis (3 units)
      - ECON 301 Intermediate Microeconomic Theory (3 units)
      - ECON 302 Intermediate Macroeconomic Theory (3 units)
      - FIN 350 Business Finance (3 units)
      - ISYS 363 Information Systems for Management (3 units)
      - ISYS 463 Information Systems Analysis and Design (3 units)
      - ISYS 464 Managing Enterprise Data (3 units)
      - ISYS 650 Business Intelligence (3 units)
      - PHIL 205 Formal Logic I (3 units)
      - PHIL 350 Philosophy of Science (3 units)
      - PHIL 351 Philosophy of Risk (3 units)
      - PHIL 694 Philosophical Logic Workshop (3 units)
      - PHIL 695 Advanced Logic Workshop (3 units)

4. Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

5. **Major Electives**

   Two elective courses numbered 400 or above except MATH 475, MATH 565, MATH 575, MATH 576, MATH 577, and MATH 578.
Bachelor of Arts in Mathematics: Concentration in Mathematics for Advanced Study – MATH Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Mathematics. At least 12 units in the major (MATH 226, MATH 227, MATH 228) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

</table>

1. If ENG 214 or equivalent is not completed prior to transfer, MATH 301GW must be taken in a subsequent semester. Time for degree completion may be affected.
2. Major Concentration Elective Course numbered 400 or above (except MATH 475, MATH 565, MATH 576, MATH 577, MATH 578).
3. MATH 310, MATH 376, MATH 435 offered fall semesters only.
To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

University-Wide Requirements: 9–18 Units
- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper Division GE, areas B, C and D (9 units)
- Students entering this major with the AS-T in Mathematics are not required to fulfill SF State Studies requirements.
- Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

Mathematics for Advanced Study Major: 33–36 Units
MATH 226-MATH 227-MATH 228 met in transfer; CSC 210 may have been met in transfer.
- Core (12 units)
- Concentration (21–24 units)

University Electives: Six or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. UD GE and the major.
Bachelor of Arts in Mathematics:
Concentration in Mathematics for Liberal Arts

Website: math.sfsu.edu (http://math.sfsu.edu)

The Liberal Arts concentration is for students who desire a broad liberal arts education with an emphasis in mathematics.

Mathematics (B.A.): Concentration in Mathematics for Liberal Arts — 42 units

Core Courses (24 units)

</table>

Four elective courses numbered 300 or above except MATH 375, 475, 12565, 575, 576, 577, 578.

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

Complementary Studies

Students who pursue a Bachelor of Arts in Mathematics with Concentrations in Liberal Arts, Teaching, or Advanced Studies must complete 12 complementary units, within a coherent group of courses with a prefix other than MATH, and not cross-listed with MATH. Complementary Studies units for the Mathematics major may come from:

1. Any courses offered by other departments in the College of Science & Engineering (CoSE), or
2. Any of the following courses outside of CoSE:

<table>

**SF State Studies**

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.
Students who have earned an ADT should seek advising in the major
department during the first semester of attendance.

General Advising Information for Transfer
Students
1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   • a course in U.S. History
   • a course in U.S. & California Government
   • a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and
(2) above at a California Community College (CCC), please visit http://
www.assist.org. Check any geographically accessible CCCs; sometimes
options include more than one college. Use ASSIST to determine:

• Which courses at a CCC satisfy any lower division major requirements
   for this major, including 2nd-semester composition;
• Which courses at a CCC satisfy CSU GE, US History, and US & CA
   Government.

Remedial courses are not transferable and do not apply to the minimum
60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the
minimum 60 units required for upper division transfer (for example, if
course was not passed on the first attempt, or was taken to earn a better
grade).

Before leaving the last California community college of attendance,

obtain a summary of completion of lower division General Education
units (IGETC or CSU GE Breadth). This is often referred to as a GE
certification worksheet. SF State does not require delivery of this
certification to Admissions, but students should retain this document for
verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or
College-Level Examination Program courses: AP/IB/CLEP credit is
not automatically transferred from the previous institution. Units are
transferred only when an official score report is delivered to SF State.
Credit is based on the academic year during which exams were taken.
Refer to the University Bulletin in effect during the year of AP/IB/CLEP
examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and
mathematics (STEM) disciplines often defer 6-9 units of lower division
general education in areas C and D until after transfer in order to focus
on preparation courses for the major. (This advice does not apply to
students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs
or CSUs

Review SF State's lower division General Education requirements.
Note that, as described below, the four basic skills courses required for
admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses
that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

<td><strong>Units</strong></td>
<td></td>
<td>15</td>
</tr>
<tr>
<td><strong>Total Units</strong></td>
<td></td>
<td>120-122</td>
</tr>
</tbody>
</table>

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. **Complementary Studies**
   Students who pursue a Bachelor of Arts in Mathematics with Concentrations in Liberal Arts, Teaching, or Advanced Studies must complete 12 complementary units, within a coherent group of courses with a prefix other than MATH, and not cross-listed with MATH. Complementary Studies units for the MATH major may come from:
   1. Any courses offered by other departments in the College of Science & Engineering (CoSE), or
   2. Any of the following courses outside of CoSE:

   - DS 312 Data Analysis with Computer Applications (3 units)
   - DS 408 Computer Simulation (3 units)
   - ECON 101 Introduction to Microeconomic Analysis (3 units)
   - ECON 301 Intermediate Microeconomic Theory (3 units)
   - ECON 302 Intermediate Macroeconomic Theory (3 units)
   - FIN 350 Business Finance (3 units)
   - ISYS 363 Information Systems for Management (3 units)
   - ISYS 463 Information Systems Analysis and Design (3 units)
   - ISYS 464 Managing Enterprise Data (3 units)
   - ISYS 650 Business Intelligence (3 units)
   - PHIL 205 Formal Logic I (3 units)
   - PHIL 350 Philosophy of Science (3 units)
   - PHIL 351 Philosophy of Risk (3 units)
   - PHIL 694 Philosophical Logic Workshop (3 units)
   - PHIL 695 Advanced Logic Workshop (3 units)

4. Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

5. **Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.**

### Major Elective

Any MATH course numbered 300 or above except MATH 375, MATH 475, MATH 565, MATH 575, MATH 576, MATH 577, MATH 578.
Bachelor of Arts in Mathematics: Concentration in Mathematics for Liberal Arts – MATH Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Mathematics. At least 12 units in the major (MATH 226, MATH 227, MATH 228) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

Total Units 60

1. Major Concentration Elective Course numbered 300 or above (except MATH 375, MATH 475, MATH 565, MATH 575, MATH 576, MATH 577, MATH 578)
2. MATH 300GW offered in spring semesters only

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 9–18 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
• American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
• Upper Division GE, areas B, C and D (9 units)
• Students entering this major with the AS-T in Mathematics are not required to fulfill SF State Studies requirements.
• Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

Mathematics for Liberal Arts Major: 27–30 Units
MATH 226-MATH 227-MATH 228 met in transfer; CSC 210 may have been met in transfer.

• Core (12 units)
• Concentration (15–18 units)

University Electives: 12 or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. UD GE and the major.
Bachelor of Arts in Mathematics: Concentration in Teaching

Undergraduate degree programs in mathematics presuppose a background equivalent to two years of high school algebra, one year of plane geometry, and at least one semester of trigonometry. Students in doubt as to their satisfaction of these prerequisites should consult the mathematics department. MATH 60, MATH 70, and MATH 199 may be used to remedy deficiencies. Because of the sequential nature of mathematics courses, all students must consult with a departmental advisor at regular intervals during their degree programs. MATH 500 through MATH 599 may not be counted as electives toward the mathematics major or minor. CR/NC grades are not acceptable in courses to be counted for a mathematics major or minor program.

The Bachelor of Arts in Mathematics can be earned by completing any one of three concentrations:

• Concentration in Mathematics for Advanced Study (48 units): this concentration prepares students for graduate study in mathematics.
• Concentration in Mathematics for Liberal Arts (42 units): this concentration is intended for students planning non-technical careers.
• Concentration in Mathematics for Teaching (45 units): this concentration matches the state-approved subject matter program for the single-subject major in mathematics.

Mathematics majors who successfully complete MATH 300GW spring 2010 or thereafter or MATH 301GW in spring 2009 or thereafter will have satisfied the University’s Graduation Writing Assessment Requirement (GWAR).

Mathematics (B.A.): Concentration in Teaching — 45 Units

Core Courses (24 units)

Complementary Studies

Students who pursue a Bachelor of Arts in Mathematics with Concentrations in Liberal Arts, Teaching, or Advanced Studies must complete 12 complementary units, within a coherent group of courses with a prefix other than MATH, and not cross-listed with MATH. Complementary Studies units for the Mathematics major may come from:

1. Any courses offered by other departments in the College of Science & Engineering (CoSE), or
2. Any of the following courses outside of CoSE:

<table>
<thead>
<tr>
<th>Code</th>

</tbody>
</table>

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

First Time Student Roadmap (4 Year)
This roadmap opens in a new tab. (p. 1237)

Transfer Student Roadmap (2 Year)
For students with an AS-T in Mathematics. This roadmap opens in a new tab. (p. 885)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Mathematics
California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students
1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.

   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is
not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission.

For more information, visit the Undergraduate Admissions section.

• Complete 60 or more transferable semester units or 90 or more quarter units
• Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
• Be in good standing at the last college or university attended
• Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
• The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. **Complementary Studies**

   Students who pursue a Bachelor of Arts in Mathematics with Concentrations in Liberal Arts, Teaching, or Advanced Studies must complete 12 complementrary units, within a coherent group of courses with a prefix other than MATH, and not cross-listed with MATH. Complementary Studies units for the Mathematics major may come from:
   1. Any courses offered by other departments in the College of Science & Engineering (CoSE), or
   2. Any of the following courses outside of CoSE:
      a. DS 312 Data Analysis with Computer Applications (3 units)
      b. DS 408 Computer Simulation (3 units)
      c. ECON 101 Introduction to Microeconomic Analysis (3 units)
      d. ECON 301 Intermediate Microeconomic Theory (3 units)
      e. ECON 302 Intermediate Macroeconomic Theory (3 units)
      f. FIN 350 Business Finance (3 units)
      g. ISYS 363 Information Systems for Management (3 units)
      h. ISYS 463 Information Systems Analysis and Design (3 units)
      i. ISYS 464 Managing Enterprise Data (3 units)
      j. ISYS 650 Business Intelligence (3 units)
      k. PHIL 205 Formal Logic I (3 units)
      l. PHIL 350 Philosophy of Science (3 units)
      m. PHIL 351 Philosophy of Risk (3 units)
      n. PHIL 694 Philosophical Logic Workshop (3 units)
      o. PHIL 695 Advanced Logic Workshop (3 units)

4. Consider taking a class with a combined laboratory or a separate lab to fulfill B3 if not already satisfied.

5. MATH 475 serves as the capstone course for the major.

Total Units 120-122

---

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. Complementary Studies

   Students who pursue a Bachelor of Arts in Mathematics with Concentrations in Liberal Arts, Teaching, or Advanced Studies must complete 12 complementary units, within a coherent group of courses with a prefix other than MATH, and not cross-listed with MATH. Complementary Studies units for the Mathematics major may come from:
   1. Any courses offered by other departments in the College of Science & Engineering (CoSE), or
   2. Any of the following courses outside of CoSE:
      a. DS 312 Data Analysis with Computer Applications (3 units)
      b. DS 408 Computer Simulation (3 units)
      c. ECON 101 Introduction to Microeconomic Analysis (3 units)
      d. ECON 301 Intermediate Microeconomic Theory (3 units)
      e. ECON 302 Intermediate Macroeconomic Theory (3 units)
      f. FIN 350 Business Finance (3 units)
      g. ISYS 363 Information Systems for Management (3 units)
      h. ISYS 463 Information Systems Analysis and Design (3 units)
      i. ISYS 464 Managing Enterprise Data (3 units)
      j. ISYS 650 Business Intelligence (3 units)
      k. PHIL 205 Formal Logic I (3 units)
      l. PHIL 350 Philosophy of Science (3 units)
      m. PHIL 351 Philosophy of Risk (3 units)
      n. PHIL 694 Philosophical Logic Workshop (3 units)
      o. PHIL 695 Advanced Logic Workshop (3 units)

4. Consider taking a class with a combined laboratory or a separate lab to fulfill B3 if not already satisfied.

5. MATH 475 serves as the capstone course for the major.
**Bachelor of Science in Applied Mathematics**

The primary aim of applied mathematics is to elucidate scientific concepts and to describe and predict phenomena through the use of mathematics. The applied mathematician is at once a mathematical specialist and a systems analyst whose task is to confront complex real-world problems with mathematical analysis. In business and industry, the applied mathematician has opportunities to utilize both background and training in solving problems of a practical nature. To do so, one must know the mathematical theories involved and have an appreciation for the specific science or technology that provides the source of the problem.

**Applied Mathematics (B.S.) – 54 units**

**Required Courses (39 units)**

Note: LD = Lower Division; UD = Upper Division.

**First-Time Student Roadmap (4 Year)**

This roadmap opens in a new tab. (p. 1244)
Transfer Student Roadmap (2 Year)

For students with an AA-T in Mathematics. This roadmap opens in a new tab. (p. 1246)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Applied Mathematics

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#A3EL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.
All students must meet the transfer eligibility requirements outlined below for admission. For more information, visit the Undergraduate Admissions section.

• Complete 60 or more transferable semester units or 90 or more quarter units

• Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.

• Be in good standing at the last college or university attended

• Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)

• The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

| Major Elective (6 Units Total) – Take One | 5 | 3 |
| Major Application Elective (9 Units Total) | 4 |
| GE Area UD–C: Upper Division Arts and/or Humanities (Consider SF State Studies Course) | 3 |
| **Units** | 13 |

**Eighth Semester**

| MATH 697 | Applied Mathematics Project II | 6 | 2 |
| Major Application Elective (9 Units Total) | 4 | 3 |
| SF State Studies or University Elective | 9 |
| **Units** | 14 |
| **Total Units** | 120-121 |

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114 if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.

4. A coherent collection of three courses emphasizing applications of mathematics, chosen with the consent of the applied mathematics advisor.

5. **Major Electives**
   - MATH 430 Mathematics of Optimization (3 units)
   - MATH 442 Probability Models (3 units)
   - MATH 447 Design and Analysis of Experiments (3 units)
   - MATH 448 Introduction to Statistical Learning and Data Mining (3 units)
   - MATH 449 Categorical Data Analysis (3 units)
   - MATH 471 Introduction to Fourier and Wavelet Analysis (3 units)
   - MATH 477 Partial Differential Equations (3 units)
   - MATH 491 Game Theory (3 units)
   - MATH 494 Non-Parametric Statistics (3 units)
   - MATH 495 Introduction to Wavelets and Frames with Applications (3 units)

6. MATH 696/MATH 697 serve as the capstone experience for the major.
# Bachelor of Science in Applied Mathematics – MATH Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Mathematics. At least 12 units in the major (MATH 226, MATH 227, MATH 228) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

¹ MATH 400 and MATH 441 offered spring semesters only.
² MATH 376 offered fall semesters only.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:
University-Wide Requirements: 9–18 Units
- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE, areas B, C and D (9 units)
- Students entering the major with the AS-T in Mathematics are not required to fulfill SF State Studies or Complementary Studies requirements.

Applied Mathematics Major: 39–42 Units
MATH 226-MATH 227-MATH 228 met in transfer; CSC 210 may have been met in transfer.
- Required Courses (24–27 units)
- Major Electives (15 units), including three courses emphasizing applications of mathematics, chosen on advisement

University Electives: Zero or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. UD GE and the major.
Bachelor of Science in Statistics

The Bachelor of Science in Statistics is an interdisciplinary program offered for students who intend to pursue an advanced degree, or who are planning careers as statisticians in industry, business, government, or scientific research.

To give the students both breadth and depth and to introduce them to a variety of fields where statistics may be applied, we offer three emphases for the degree: science, business, and economics.

**Statistics (B.S.) – 54 units**

**Core Requirements (45 units)**

First-Time Student Roadmap (4 Year)
This roadmap opens in a new tab. (p. 1251)

Transfer Student Roadmap (2 Year)
For students with an AS-T in Mathematics. This roadmap opens in a new tab. (p. 1253)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Mathematics

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.
Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

**For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

<tr>
<td>SF State Studies or University Elective – Take Three</td>
<td></td>
<td>9</td>
</tr>
</tbody>
</table>

**Total Units:** 120-122

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.
4. **Major Emphasis (12 units)**
   - Select four courses from one emphasis in consultation with the statistics advisor.
   - **Business Emphasis**
     - DS 408 Computer Simulation (3 units)
     - DS 412 Operations Management (3 units)
     - DS 604 Applied Business Forecasting (3 units)
     - DS 624 Quality Management (3 units)
     - ISYS 363 Information Systems for Management (3 units)
     - ISYS 463 Information Systems Analysis and Design (3 units)
     - ISYS 464 Managing Enterprise Data (3 units)
     - ISYS 569 Information Systems for Business Process Management (3 units)
     - ISYS 650 Business Intelligence (3 units)
   - **Economics Emphasis**
     - ECON 301 Intermediate Microeconomic Theory (3 units)
     - ECON 302 Intermediate Macroeconomic Theory (3 units)
     - ECON 312 Introduction to Econometrics (3 units)
     - ECON 715 Mathematical Economics (3 units)
     - ECON 731 Econometric Theory (3 units)
     - ECON 825 Applied Time Series Econometrics (3 units)
   - **Science Emphasis**
     - MATH 370 Real Analysis I (3 units)
     - MATH 376 Ordinary Differential Equations I (3 units)
     - MATH 400 Numerical Analysis (3 units)
     - MATH 430 Mathematics of Optimization (3 units)
     - MATH 460 Mathematical Modeling (3 units)
     - MATH 491 Game Theory (3 units)
     - MATH 493 Introduction to Actuarial Mathematics (3 units)
     - MATH 494 Non-Parametric Statistics (3 units)
Bachelor of Science in Statistics – MATH Associate Degree for Transfer (ADT) Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Mathematics. At least 12 units in the major (MATH 226, MATH 227 and MATH 228) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University–Wide Requirements: 9–18 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE, areas B, C and D (9 units)
- Students entering the major with the AS-T in Mathematics are not required to fulfill SF State Studies or Complementary Studies requirements.
Statistics Major: 39–42 units
MATH 226, MATH 227 and MATH 228 met in transfer; CSC 210 may have been met in transfer.

- Core (27–30 units)
- Emphasis (12 units) in one of the following areas of emphasis: Business, Economics, or Science. Consult with a department advisor.

University Electives: Zero or More Units
Depends on the number of units transferred, course choices made at the community college, and how transferred units are applied to the requirements above.
Minor in Mathematics

At least 12 units of courses counted toward the minor, including at least 6 upper division units, must be completed at SF State.

Mathematics Minor — 24 units

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 226</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 227</td>
<td>Calculus II</td>

</tr>
<tr>
<td>MATH 228</td>
<td>Calculus III</td>
<td>4</td>
</tr>
</tbody>
</table>

Electives (12 units)

Upper division electives on advisement.

Master of Arts in Mathematics

Admission to Program

In addition to the general requirements for admission, applicants to the master’s program must have a 3.0 grade point average in the following three courses, or their equivalent:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 325</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 335</td>
<td>Modern Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 370</td>
<td>Real Analysis I</td>
<td>3</td>
</tr>
</tbody>
</table>

Applicants who fail to satisfy this requirement but who are qualified in all other respects may be admitted on the condition that they bring their grades in these courses up to the 3.0 average during their first two semesters of graduate study (these three courses, however, may not be counted as electives toward the M.A. degree).

Written English Proficiency Requirement

All students in graduate programs at SF State must demonstrate Level One (entry) and Level Two (exit) writing proficiency in accordance with University, departmental and or programmatic guidelines.

Level One

- Prior to admission: Minimum score of 4.0 on the Analytical Writing Analysis (AWA) on the GRE test.
- Conditional Admission: Applicants who do not satisfy Level I prior to admission must pass SCI 614 or MATH 729 with a grade of B-minus or better not later than the second semester. (Students should note that SCI 614 can be taken only through the College of Extended Learning and may not count as units toward the degree. MATH 729 is only offered in spring semesters.)

Level Two

Satisfactory completion of the Master’s Thesis (MATH 898), or take two comprehensive examinations and write an expository paper.

Upper division courses acceptable on the Advancement to Candidacy form will be determined by the student with approval of the graduate coordinator.

Mathematics (M.A.) — Minimum 30 units

Program (12 units)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 710</td>
<td>Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 850</td>
<td>Algebra</td>
<td>3</td>
</tr>
</tbody>
</table>

Select and additional 6 units from unpaired graduate courses other than MATH 898 or MATH 899

Upper Division/Graduate Mathematics or Related Courses (18 units)

Of the remaining 18 units at least 3 unpaired graduate units in mathematics must be included and at most 9 units may be selected from approved unpaired undergraduate upper division courses. MATH 730 must be included among these 18 units unless the student had earned a B or higher grade in an undergraduate complex analysis course. Student must complete either a thesis with oral defense or take the comprehensive examinations and write an expository paper. MATH 898 if chosen, will count 3 units toward the degree.

Culminating Experience

Candidates for the M.A. in Mathematics must complete a Culminating Experience. Two options are available.

Thesis Option

Students may choose to write a thesis and present an oral defense. Students considering the thesis option should contact the department chair or graduate advisor for further details. A master’s thesis should contain new theorems or algorithms, a novel application, or an original approach to an established result. The resulting manuscript must be prepared according to university guidelines following a style similar to that used by the Notices of the American Mathematical Society. Each MA thesis has a principal advisor and two additional readers. The expected time to completion for this paper is one academic year. Thesis guidelines are available from the mathematics graduate coordinators.

Comprehensive Examinations/Expository Paper Option

Students selecting this option take two written examinations and write an expository paper. Students must take two examinations selected from algebra, analysis, and statistics. Written examinations are administered during the last two weeks of each semester. Examinations last two and a half hours, and a student takes no more than one examination per day. Departmental syllabi for the examinations are available at least four months in advance of each administration. Each examination requires students to integrate material from several undergraduate and graduate courses, to demonstrate their ability to write short proofs in correct mathematical English, and to demonstrate the falsity of propositions by counter-examples. Students who fail an examination may repeat it at least once, with additional attempts requiring the written approval of the graduate coordinators.

The expository paper is completed in two stages. First, students must complete a departmental proposal form, including: the title and abstract of the proposed paper, the what-why-how aspects of the research in question, a brief preliminary bibliography, and the approval of the proposal by a committee consisting of a faculty advisor and one additional reader from the Mathematics faculty. Once students have an approved proposal, they may begin work on the project under the guidance of the faculty advisor. Completion of the paper is subject to signed approval by all members of the committee.

Further information about these options can be obtained from the department website: http://math.sfsu.edu.
PHYSICS AND ASTRONOMY

College of Science and Engineering
Dean: Keith Bowman

Department of Physics and Astronomy
TH 334
Phone: (415) 338–1659
Fax: (415) 338–2178
E-mail: physics@sfsu.edu

Chair: Maarten Golterman
Graduate Coordinator: Susan M. Lea

Program Scope
The Physics and Astronomy Department offers strong undergraduate and graduate programs in physics, astronomy, and astrophysics, which are designed to prepare students for a variety of careers in science, technology, and teaching, as well as for graduate study. The goal is to educate versatile physicists and astronomers who combine a solid knowledge of theory with real-world skills in problem-solving, data acquisition and analysis, and computer-based simulation and analysis. The department specializes in the "hands-on" approach so important in the 21st century. Students at all levels are encouraged to work on a research project under the direction of a faculty supervisor. The projects may involve experimental laboratory work, astronomical observations and data analysis, or theoretical modeling using analytical and computational approaches.

The Bachelor of Arts in Physics is suited for students whose career goals involve the combination of physics with other fields such as engineering, business, or humanities. This program also provides excellent preparation for technical writers, technical salespeople, and laboratory technicians and research assistants.

The Bachelor of Arts in Physics with a Concentration in Astronomy is similar to the B.A. in Physics, but with upper division work concentrated in astronomy. This program also provides excellent preparation technical writers, as well as observatory or planetarium staff.

The Bachelor of Science in Physics is designed to educate students who plan to pursue further education in physics or related fields (M.S. or Ph.D. programs), or who plan to seek employment as physicists, scientific associates, or technical staff members in industry, national laboratories, or academic laboratories. This program combines the education in physics fundamentals of the B.A. program with additional advanced courses, laboratory, and computer work, and more specialized work in a specialty such as solid state physics, optical physics, or computational physics. Students in this program are strongly encouraged to gain research experience. Graduates should have the fundamental mathematical, scientific, and learning skills to enable them to be lifelong learners who can rapidly master new scientific and technical developments.

The Bachelor of Science in Physics with a Concentration in Astrophysics is similar to the B.S. in Physics program, but with significant upper division work in astronomy, as appropriate for students planning employment or graduate study in the area of astrophysics. A senior project with thesis is required.

The Bachelor of Science in Physics with a Concentration in Physics for Teaching is designed for students interested in high school or middle school teaching. This program stresses education in physics fundamentals together with laboratory work and direct classroom teaching experience. Elective units enable students to gain a breadth of knowledge in one or more additional subjects important for high-school teachers, e.g., mathematics, general science, or chemistry. Students may also elect to take advantage of the department's single subject matter program in physics to demonstrate their preparedness to enter a credential program to complete their training as teachers.

A satisfactory score on an exit examination is required for all Bachelor's degrees.

A Minor in Physics and a Minor in Astronomy are available for students desiring a coherent program in physics or astronomy but one not as extensive as the B.A. It provides an excellent background for prospective secondary school teachers who wish to teach in physics or astronomy as well as in their major area, or for engineers who want additional depth in areas such as solid state physics or optical physics.

The goal of the Master of Science in Physics is to provide a solid, in-depth background in theoretical and experimental physics, appropriate for students pursuing further education in the field via Ph.D. programs in physics, astronomy, or certain engineering fields, or for those seeking employment as physicists/astronomers in physics/astronomy-related jobs and professions; e.g., as technical associates, laboratory physicists, physics or astronomy data analyzers, engineers, or in education as instructors in community colleges. This program combines advanced education in core physics topics with additional advanced courses, laboratory and computer work, and more concentrated work in a specialty such as solid state physics, particle physics, quantum optics, astrophysics, or computational physics. Students in this program are strongly encouraged to gain research experience.

The Master of Science in Physics with a concentration in Astronomy offers a program that is more closely tailored to students interested in careers in astronomy teaching and outreach, or employment in astronomical observatories and laboratories. It is also suitable for those seeking entry into Ph.D. programs in astronomy.

Professors
Chen, Cool, Golterman, Greensite, Lea, Marzke, Neuhauser

Associate Professors
Barranco, Mahdavi, Man

Assistant Professors
Jensen, Kane, Newaz

Adjunct Professors
Adler, Barsony, Lipschultz, Fischer, McCarthy

Lecturers
Bland, Caudy, Dhakal, Digel, Fielder, Magalhaes, Tennant, Wu, Yadak

Majors
• Bachelor of Arts in Physics (p. 1257)
• Bachelor of Arts in Physics: Concentration in Astronomy (p. 1264)
Bachelor of Science in Physics (p. 1271)
- Bachelor of Science in Physics: Concentration in Astrophysics (p. 1278)
- Bachelor of Science in Physics: Concentration in Physics for Teaching (p. 1285)

Minors
- Minor in Astronomy (p. 1292)
- Minor in Physics (p. 1292)

Masters
- Master of Science in Physics (p. 1292)
- Master of Science in Physics: Concentration in Astronomy (p. 1293)

Bachelor of Arts in Physics

Undergraduate Programs in Physics and Astronomy

High school preparation for these programs should include two years of algebra, one year of geometry, one-half year of trigonometry, one year of chemistry, and one year of physics. Some experience in computer programming is valuable. All students, especially those who have not completed a substantial chemistry course in high school, are strongly urged to take CHEM 115 and CHEM 215—CHEM 216 in their first year of college.

It is suggested that students in these programs consult with their advisor before selecting courses to meet General Education requirements. Unnecessary repetition of elementary topics might be avoided by careful selection of courses. A plan of study prepared in consultation with a department advisor is a prerequisite to entry into upper division study. Students who are considering teaching physics at the secondary school level should see a credential advisor in the department before planning the major since specific courses. A competency assessment is required for admission to the credential program.

- A maximum of 6 units taken CR/NC may be counted toward any undergraduate degree.
- All prerequisites for upper division courses must be completed with a grade of C– or better. See course descriptions for prerequisite requirements.

Physics (B.A.) — 52 units

Lower/Upper Division Prerequisites (27 units)

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

1 PHYS 490 and PHYS 491GW satisfy the GWAR requirement when taken in sequence in Fall 2010 or later.

Complementary Studies

Upon completion of the B.A. in Physics program, students will have taken 12 units of calculus courses that satisfy the Complementary Studies requirement for a B.A. degree.

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

First-Time Student Roadmap (4 Year)
This roadmap opens in a new tab. (p. 1260)

Transfer Student Roadmap (2 Year)
For students with an AA-T in Physics. This roadmap opens in a new tab. (p. 1260)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Physics
California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students
1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is
not automatically transferred from the previous institution. Units are
transferred only when an official score report is delivered to SF State.
Credit is based on the academic year during which exams were taken.
Refer to the University Bulletin in effect during the year of AP/IB/CLEP
examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and
mathematics (STEM) disciplines often defer 6–9 units of lower division
general education in areas C and D until after transfer in order to focus
on preparation courses for the major. (This advice does not apply to
students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements.
Note that, as described below, the four basic skills courses required for
admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses
that fulfill the remaining areas of SF State’s lower division GE pattern are
available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking
(GE A3) may not be widely offered outside the CCC and CSU systems.
Students should attempt to identify and take an appropriate course no
later than the term of application to the CSU. To review more information
about the A3 requirement, please visit http://bulletin.sfsu.edu/
undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition
course before transfer. This is usually the next course after the typical
“freshman comp” course, with a focus on writing, reading and critical
analytical skills for academic purposes, and developing skills in
composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets
both US and CA/local government requirements may be an appropriate
option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

**For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more
  quarter units
- Earn a college grade point average of 2.00 or better in all transferable
courses. Non-local area residents may be held to a higher GPA
  standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education,
  including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with
     intermediate algebra as a prerequisite (same as CSU GE area B4)

- The four basic skills courses and a minimum of 60 transferable
  semester units (90 quarter units) must be completed by the spring
  semester prior to fall admission, or by the fall semester prior to spring
  admission. Earn a "C" or better grade in each basic skills course.

</tbody>
</table>

**Units**: 14

**Total Units**: 120

---

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. **Complementary Studies**

   Upon completion of the B.A. in Physics program, students will have taken 12 units of calculus courses that satisfy the Complementary Studies requirement for a B.A. degree.

   Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.
# Bachelor of Arts in Physics – PHYS Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Physics. Twenty-four units in the major (MATH 226, MATH 227, MATH 228, PHYS 220, PHYS 222, PHYS 230, PHYS 232, PHYS 240 and PHYS 242) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

1. Take PHYS 330 if MATH 245 complete.
2. A course in differential equations and linear algebra is required before taking PHYS 330 and PHYS 385. Students transferring in without an equivalent to MATH 245 must delay taking PHYS 330 and PHYS 385 until the following Fall semester, which will affect other elements of this sample roadmap. Time for degree completion may be affected. Students in this situation should consult with a department advisor for an alternate advising plan.
3. PHYS 320/PHYS 321 offered fall semesters only.
4. Take PHYS 385 if MATH 245 complete.
5. PHYS 325, PHYS 360, PHYS 370, PHYS 491GW and PHYS 695 offered spring semester only.
6. The Physics major requires a minimum of four elective units; PHYS 325 (offered in spring semesters) and PHYS 460 (offered in fall semesters) are strongly recommended.
To Do at SF State:

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 9–18 Units**
- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units); US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE, areas B, C and D (9 units)
  - Students entering the major with the AS-T in Physics are not required to fulfill SF State Studies requirements.
- Complementary Studies is met in major with required mathematics.

**Physics B.A. Major: 25–28 Units**

MATH 226, MATH 227, MATH 228, PHYS 220, PHYS 222, PHYS 230, PHYS 232, PHYS 240, and PHYS 242 met in transfer.

- Prerequisites (3 units if MATH 245 equivalent not completed before transfer; see note 2 above)
- Upper division Requirements (21 units)
- Upper division Electives (4 units; see note 7 above.)

**University Electives: 15 or More Units**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. both in UD GE and the major. Upper division electives recommended in order to meet the minimum 40-unit requirement.
Bachelor of Arts in Physics: Concentration in Astronomy

Undergraduate Programs in Physics and Astronomy

High school preparation for these programs should include two years of algebra, one year of geometry, one-half year of trigonometry, one year of chemistry, and one year of physics. Some experience in computer programming is valuable. All students, especially those who have not completed a substantial chemistry course in high school, are strongly urged to take CHEM 115 and CHEM 215–CHEM 216 in their first year of college.

It is suggested that students in these programs consult with their advisor before selecting courses to meet General Education requirements. Unnecessary repetition of elementary topics might be avoided by careful selection of courses. A plan of study prepared in consultation with a department advisor is a prerequisite to entry into upper division study. Students who are considering teaching physics at the secondary school level should see a credential advisor in the department before planning the major since specific courses. A competency assessment is required for admission to the credential program.

- A maximum of 6 units taken CR/NC may be counted toward any undergraduate degree.
- All prerequisites for upper division courses must be completed with a grade of C– or better. See course descriptions for prerequisite requirements.

</table>

1 At least eight units of upper division astronomy, physics, geosciences, mathematics or related subjects, selected on advisement. No more than three units of 600 level courses may count toward this requirement.

Upon completion of the BA degree, students will have taken 12 units of calculus courses that satisfy the Complementary Studies requirement for a B.A. degree.

Note: A minimum of 40 upper division units must be completed for the degree (including upper division units required for the major, general education, electives, etc.). A student can complete this major yet not attain the necessary number of upper division units required for graduation. In this case, additional upper division courses will be needed to reach the required total.

Complementary Studies

Upon completion of the B.A. in Physics program, students will have taken 12 units of calculus courses that satisfy the Complementary Studies requirement for a B.A. degree.

Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

(LLD)
A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division
general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

**For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

Total Units 13

---

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. **Complementary Studies**  
   Upon completion of the B.A. in Physics program, students will have taken 12 units of calculus courses that satisfy the Complementary Studies requirement for a B.A. degree.  
   Students who have earned AA-T or AS-T degrees and are pursuing a similar B.A. degree at SF State are required to fulfill the Complementary Studies requirement as defined by the major department. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.

4. **Major Elective (8 units)**  
   At least 8 units of upper division astronomy, physics, geosciences, mathematics or related subjects, selected on advisement. No more than 3 units of 600 level courses may count toward this requirement.
Bachelor of Arts in Physics: Concentration in Astronomy – PHYS Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Physics. Twenty-four units in the major (MATH 226, MATH 227, MATH 228, PHYS 220, PHYS 222, PHYS 230, PHYS 232, PHYS 240 and PHYS 242) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

¹ ASTR 115, ASTR 301 and PHYS 320/PHYS 321 offered fall semesters only.
² ASTR 300, ASTR 340GW, ASTR 470, PHYS 480 and PHYS 695 offered spring semesters only.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 9–18 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
• Upper division GE, areas B, C and D (9 units)
• Students entering the major with the AS-T in Physics are not required to fulfill SF State Studies requirements.
• Complementary Studies is met in major with required mathematics.

**Physics B.A. (Astronomy) Major: 28 Units**
MATH 226, MATH 227, MATH 228, PHYS 220, PHYS 222, PHYS 230, PHYS 232, PHYS 240 and PHYS 242 met in transfer.

• Prerequisites (3 units)
• Upper division Requirements (17 units)
• Upper division Electives (8 units) Selected on advisement. Units may be in astronomy, physics, geosciences, mathematics, or related subjects. No more than 3 units of 600-level courses may count towards elective units.

**University Electives: 14 or More Units**
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. both in UD GE and the major. Upper division electives recommended in order to meet the minimum 40-unit requirement.
Bachelor of Science in Physics

Undergraduate Programs in Physics and Astronomy

High school preparation for these programs should include two years of algebra, one year of geometry, one-half year of trigonometry, one year of chemistry, and one year of physics. Some experience in computer programming is valuable. All students, especially those who have not completed a substantial chemistry course in high school, are strongly urged to take CHEM 115 and CHEM 215–CHEM 216 in their first year of college.

It is suggested that students in these programs consult with their advisor before selecting courses to meet General Education requirements. Unnecessary repetition of elementary topics might be avoided by careful selection of courses. A plan of study prepared in consultation with a department advisor is a prerequisite to entry into upper division study. Students who are considering teaching physics at the secondary school level should see a credential advisor in the department before planning the major since specific courses. A competency assessment is required for admission to the credential program.

- A maximum of 6 units taken CR/NC may be counted toward any undergraduate degree.
- All prerequisites for upper division courses must be completed with a grade of C– or better. See course descriptions for prerequisite requirements.

1271
General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.
Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission.
For more information, visit the Undergraduate Admissions section.

• Complete 60 or more transferable semester units or 90 or more quarter units
• Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
• Be in good standing at the last college or university attended
• Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
• The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.

**Total Units** 120-121

---

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. **Major Electives (10 units)**  
   Upper division astronomy, physics, mathematics, or related sciences courses
# Bachelor of Science in Physics – PHYS Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017-2018 with an AS-T in Physics. Twenty-four units in the major (MATH 226, MATH 227, MATH 228, PHYS 220, PHYS 222, PHYS 230, PHYS 232, PHYS 240 and PHYS 242) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence.  

**Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** ([http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students](http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students)).

</tbody>
</table>

---

1. HIST 470 and HIST 471 satisfy GE UD-C and US/CA Government.
2. Take PHYS 330 if MATH 245 complete.
A course in differential equations and linear algebra is required before taking PHYS 330 and PHYS 385. Students transferring in without an equivalent to MATH 245 must delay taking PHYS 330 and PHYS 385 until the following Fall semester, which will affect other elements of this sample advising plan. **Overall time for degree completion will be extended. Students in this situation should consult with a department advisor for an alternate advising plan.**

Phys 320/PHYS 321, PHYS 430, PHYS 460 and PHYS 490 are offered fall semesters only.

Take PHYS 385 if MATH 245 complete.

Students proficient in computer programming may substitute upper division units in astronomy, mathematics, or physics, subject to department chair’s approval. PHYS 325, offered in spring semesters, is a recommended substitute.

AIS 460 and RRS 600/HIST 466 also satisfy Upper Division GE: UD-D and US History.

Phys 360, Phys 370, Phys 431, Phys 457 and Phys 695 offered spring semesters only.

Phys 385 must be taken before Phys 360.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 9–12 Units**

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- Upper division GE (9 units): If necessary, specific choices can be made to satisfy the US History and Government requirements and UD-C and UD-D at the same time. See notes.
- Students entering the major with the AS-T in Physics are not required to fulfill SF State Studies or Complementary Studies requirements.

**Physics B.S. Major: 44–47 Units**

- Prerequisites (3 units if MATH 245 equivalent not completed before transfer; see note 3 above)
- Upper division Requirements (34 units)
- Upper division Electives (10 units): May be units in astronomy, physics, mathematics, or related sciences.

**University Electives: Four or More Units**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. both in UD GE and the major.
Bachelor of Science in Physics: Concentration in Astrophysics

Undergraduate Programs in Physics and Astronomy

High school preparation for these programs should include two years of algebra, one year of geometry, one-half year of trigonometry, one year of chemistry, and one year of physics. Some experience in computer programming is valuable. All students, especially those who have not completed a substantial chemistry course in high school, are strongly urged to take CHEM 115 and CHEM 215–CHEM 216 in their first year of college.

It is suggested that students in these programs consult with their advisor before selecting courses to meet General Education requirements. Unnecessary repetition of elementary topics might be avoided by careful selection of courses. A plan of study prepared in consultation with a department advisor is a prerequisite to entry into upper division study. Students who are considering teaching physics at the secondary school level should see a credential advisor in the department before planning the major since specific courses. A competency assessment is required for admission to the credential program.

- A maximum of 6 units taken CR/NC may be counted toward any undergraduate degree.
- All prerequisites for upper division courses must be completed with a grade of C− or better. See course descriptions for prerequisite requirements.

**Physics (B.S.): Concentration in Astrophysics – 71 units**

**Prerequisites (27 units)**

First-Time Student Roadmap (4 Year)
This roadmap opens in a new tab. (p. 1281)

Transfer Student Roadmap (2 Year)
For students with an AA-T in Physics. This roadmap opens in a new tab. (p. 1283)

This degree program is an approved pathway ("similar" major) for students earning the ADT in Physics
California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a "similar" major after transfer. Determinations about "similar" majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a "similar" major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students
1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs
Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses...
that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AEEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

**For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a “C” or better grade in each basic skills course.
## Bachelor of Science in Physics: Concentration in Astrophysics Roadmap

120 Total Units Required  
Minimum Number of Units in the Major: 71

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. **Major Electives (6 units)**
   Chosen from upper division courses in Physics or Astronomy with consent of an advisor. Three of the 6 units must be in a course numbered 400–499. Up to 1 unit of a 600 level course in ASTR.
Bachelor of Science in Physics: Concentration in Astrophysics – PHYS
Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Physics. Twenty-four units in the major (MATH 226, MATH 227, MATH 228, PHYS 220, PHYS 222, PHYS 230, PHYS 232, PHYS 240, PHYS 242) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

</tbody>
</table>

1. ASTR 301, ASTR 400, PHYS 320, PHYS 430 and PHYS 460 offered fall semesters only.
2. Take PHYS 330 if MATH 245 complete.
A course in differential equations and linear algebra is required before taking PHYS 330 and PHYS 385. Students transferring in without an equivalent to MATH 245 must delay taking PHYS 330 and PHYS 385 until the following Fall semester, which will affect other elements of this sample roadmap. **Overall time for degree completion will be extended. Students in this situation should consult with a department advisor for an alternate advising plan.**

If ENG 214 or equivalent must be completed before enrollment in ASTR 340GW.

Take PHYS 385 if MATH 245 complete.

ASTR 300, ASTR 340GW, ASTR 470, ASTR 697, PHYS 360 and PHYS 370 offered spring semesters only.

PHYS 385 must be taken before PHYS 360.

AIS 460 and HIST 466 satisfy GE: UD-D and US History.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

**University-Wide Requirements: 9–12 Units**

- ENG 214 or equivalent A4 course if not completed prior to transfer (0–3 units)
- Upper division GE (9 units): If necessary, specific choices can be made to satisfy the US History and Government requirements and UD-C and UD-D at the same time. See notes.
- Students entering the major with the AS-T in Physics are not required to fulfill SF State Studies or Complementary Studies requirements.

**Physics B.S. (Astrophysics) Major: 44–47 units**

MATH 226, MATH 227, MATH 228, PHYS 220, PHYS 222, PHYS 230, PHYS 232, PHYS 240, PHYS 242 met in transfer.

- Prerequisites (3 units if MATH 245 equivalent not completed before transfer; see note 3 above)
- Upper division Requirements (38 units)
- Upper division Electives (6 units): Units in physics or astronomy selected with consent of advisor. Three of the six elective units must be in course(s) numbered 400-499. No more than one unit of a 600-level ASTR course may count towards the electives.

**University Electives: Four or More Units**

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. both in UD GE and the major.
Bachelor of Science in Physics: Concentration in Physics for Teaching

Undergraduate Programs in Physics and Astronomy

High school preparation for these programs should include two years of algebra, one year of geometry, one-half year of trigonometry, one year of chemistry, and one year of physics. Some experience in computer programming is valuable. All students, especially those who have not completed a substantial chemistry course in high school, are strongly urged to take CHEM 115 and CHEM 215–CHEM 216 in their first year of college.

It is suggested that students in these programs consult their advisor before selecting courses to meet General Education requirements. Unnecessary repetition of elementary topics might be avoided by careful selection of courses. A plan of study prepared in consultation with a department advisor is a prerequisite to entry into upper division study. Students who are considering teaching physics at the secondary school level should see a credential advisor in the department before planning the major since specific courses. A competency assessment is required for admission to the credential program.

- A maximum of 6 units taken CR/NC may be counted toward any undergraduate degree.
- All prerequisites for upper division courses must be completed with a grade of C– or better. See course descriptions for prerequisite requirements.

Physics (B.S.): Concentration in Physics for Teaching – 64 units

Lower/Upper Division Prerequisites (27 units)

SF State Studies

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM) | UD or UD | 3 |
| Environmental Sustainability (ES) | | | |

1 PHYS 490 and PHYS 491GW satisfy the GWAR requirement when taken in sequence in Fall 2010 or later.
Global Perspectives (GP)  
LD or UD  3  
Social Justice (SJ)  
LD or UD  3  

Note: LD = Lower Division; UD = Upper Division.

First-Time Student Roadmap (4 Year)
This roadmap opens in a new tab. (p. 1288)

Transfer Student Roadmap (2 Year)
For students with an AA-T in Physics. This roadmap opens in a new tab. (p. 1290)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Physics

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.

2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLER.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.
Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical "freshman comp" course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

**For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units.
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended.
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

| Total Units | 120 |

1. To avoid taking additional units, it is recommended that you meet LLD and SF State Studies requirements (AERM, GP, ES, SJ) within your GE or major.

2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.

3. Selected in consultation with a departmental advisor to prepare to teach a second subject in addition to physics, or general science at 9th grade level. Electives may be lower-division or upper-division courses.
Bachelor of Science in Physics: Concentration in Physics for Teaching – PHYS Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AS-T in Physics. Twenty-four units in the major (MATH 226, MATH 227, MATH 228, PHYS 220, PHYS 222, PHYS 230, PHYS 232, PHYS 240 and PHYS 242) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

1. Take PHYS 330 if MATH 245 complete.
2. A course in differential equations and linear algebra is required before taking PHYS 330 and PHYS 385. Students transferring in without an equivalent to MATH 245 must delay taking PHYS 330 and PHYS 385 until the following Fall semester, which will affect other elements of this sample roadmap. Overall time for degree completion will be extended. Students in this situation should consult with a department advisor for an alternate advising plan.
3. PHYS 320/PHYS 321, PHYS 490 and SCI 652 offered fall semesters only.
Take PHYS 385 if MATH 245 complete.
PHYS 360, PHYS 370, PHYS 491GW and PHYS 695 offered spring semesters only.
PHYS 385 must be taken before PHYS 360.

To Do at SF State:
Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

University–Wide Requirements: 9–18 Units
- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE, areas B, C and D (9 units)
- Students entering the major with the AS-T in Physics are not required to fulfill SF State Studies or Complementary Studies requirements.

Physics B.S. (Teaching) Major: 37–40 Units
MATH 226, MATH 227, MATH 228, PHYS 220, PHYS 222, PHYS 230, PHYS 232, PHYS 240, PHYS 242 met in transfer.
- Prerequisites (3 units if MATH 245 equivalent not completed before transfer; see note 1 above)
- Upper division Requirements (25 units)
- Electives (12 units): May be lower or upper division. Selected in consultation with a department advisor; courses should prepare students to teach a second subject in addition to physics, or general science at 9th grade level.

University Electives: Five or More Units
Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. both in UD GE and the major.

Upper Division Electives selected on advisement: 3

Graduate students are expected to attend colloquia and must attend at least five per semester unless excused by the graduate coordinator.

Written English Proficiency Requirement

The University has a requirement for written English proficiency that is to be assessed at two levels.

Level One (preadmission)

is satisfied by obtaining a score of 4.5 or above in the analytical writing portion of the GRE. Applicants who do not receive a minimum score of 4.5 on the GRE may be admitted conditionally and must complete SCI 614, SCI 5600W, or PHYS 340GW with a grade of B or better during the first year.

Level Two

is satisfied by submitting a thesis which your thesis committee agrees meets the level two standard, or by submitting a paper of at least ten pages which the graduate coordinator agrees meets the level two standard.

Examinations

The oral defense of the thesis is delivered to the student’s advisory committee and includes responses to questions from the committee on subjects related to the thesis topic. The master’s comprehensive oral examination (PHYS 896EXM) is delivered to the student’s advisory committee and covers all areas of theoretical and experimental physics deemed appropriate by the committee. The oral defense of thesis or master’s comprehensive oral examination may be repeated once, under conditions specified by the committee, upon petition by the student.

Prior to taking graduate courses numbered 700–799, M.S. students must pass a written examination in undergraduate-level physics. Those intending to concentrate in astronomy may also be separately tested on appropriate undergraduate-level material prior to taking astronomy courses numbered 700–799; testing will occur at the discretion of the graduate coordinator. The requirement may be satisfied by achieving a satisfactory score on the Physics Major Field Test or Physics GRE. While new graduate students may take graduate courses during their first semester with the department (in consultation with the graduate coordinator), they must pass this test before taking graduate courses in subsequent semesters. If a student fails to pass the test, he or she will be advised to take appropriate undergraduate courses to remedy those gaps that prevented him or her from passing the test. Tests taken more than six months prior to enrollment as a graduate student in the department do not fulfill this requirement.

Master of Science in Physics

Students wishing to be admitted to the Master of Science in physics program should have completed an undergraduate major in physics, with a minimum 3.0 grade point average in physics and mathematics courses, and minimum 3.0 GPA in the last 60 semester units. Students whose undergraduate degree is in another field may be admitted to conditionally classified status, but additional undergraduate-level course work will be required to make up the deficiency. Contact the graduate coordinator for further details.

Progress toward Degree

Classified or conditionally classified graduate students who do not successfully complete two courses per year toward their Advancement to Candidacy are subject to disqualification.

Group II: Graduate Physics Electives (6 units)

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
</table>

Elective graduate physics or astronomy courses with numbers in the range from PHYS 700 - PHYS 790 and ASTR 700 - ASTR 798 only, (note that PHYS 800 - PHYS 899 do not count in this category).
**Group III: General Electives (6-9 units)**
Elective advanced upper division (numbered 400 or above) or graduate courses in physics, astronomy, or appropriately related subjects, selected on advisement and with approval of graduate coordinator (note that PHYS 800 - PHYS 899 count in this category). *Note: Students who choose the Culminating Experience Exam (PHYS 896EXM - 0 units) will choose 9 units of General Electives. Students who choose the Master's Thesis (3 units) will choose 6 units of General Electives.

**Group IV: Thesis and/or Oral Examination *(0-3 units)*
PHYS 896EXM Culminating Experience Examination 0
or
PHYS 898 Master's Thesis (and Oral Defense of Thesis) 3

*Note: Degree total to include no more than 6 units of PHYS 800 - PHYS 899, nor more than 4 units of PHYS 730.

**Master of Science in Physics: Concentration in Astronomy**

The Master of Science in Physics with a concentration in Astronomy is similar to the M.S. in Physics program, but with a selection of core courses that is better suited to those planning to pursue careers in astronomy teaching and outreach, or in astronomical observatories and laboratories. It is also suitable for those seeking entry into Ph.D. programs in astronomy.

**Progress toward Degree**
Classified or conditionally classified graduate students who do not successfully complete two courses per year toward their Advancement to Candidacy are subject to disqualification.

Graduate students are expected to attend colloquia and must attend at least five per semester unless excused by the graduate coordinator.

**Written English Proficiency Requirement**
The University has a requirement for written English proficiency that is to be assessed at two levels.

**Level One (preadmission)**
is satisfied by obtaining a score of 4.5 or above in the analytical writing portion of the GRE. Applicants who do not receive a minimum score of 4.5 on the GRE may be admitted conditionally and must complete SCI 614, SCI 560GW, or PHYS 340GW with a grade of B or better during the first year.

**Level Two**
is satisfied by submitting a thesis which your thesis committee agrees meets the level two standard, or by submitting a paper of at least ten pages which the graduate coordinator agrees meets the level two standard.

**Examinations**
The oral defense of the thesis is delivered to the student's advisory committee and includes responses to questions from the committee on subjects related to the thesis topic. The master's comprehensive oral examination (PHYS 896EXM) is delivered to the student's advisory committee and covers all areas of theoretical and experimental physics deemed appropriate by the committee. The oral defense of thesis or master's comprehensive oral examination may be repeated once, under conditions specified by the committee, upon petition by the student.

Prior to taking graduate courses numbered 700–799, M.S. students must pass a written examination on undergraduate-level physics. Those intending to concentrate in astronomy may also be separately tested on appropriate undergraduate-level material prior to taking astronomy courses numbered 700–799; testing will occur at the discretion of the graduate coordinator. The requirement may be satisfied by achieving a satisfactory score on the Physics Major Field Test or Physics GRE. While new graduate students may take graduate courses during their first semester with the department (in consultation with the graduate coordinator), they must pass this test before taking graduate courses in subsequent semesters. If a student fails to pass the test, he or she will be advised to take appropriate undergraduate courses to remedy those gaps that prevented him or her from passing the test. Tests taken more than six months prior to enrollment as a graduate student in the department do not fulfill this requirement.

Website: http://psychology.sfsu.edu
Chair: Dawn Terrell

Program Scope

Undergraduate Program
Psychology is a broad field of study and practice comprised of several different yet complementary areas of specialization. The Bachelor of Arts in Psychology is built around a core set of courses in theory and methods and three broad areas of study: basic psychological processes, psychological development and individual differences and social, cultural, organizational, and community contexts. Several themes of common interest extend across these broad areas including an appreciation for cultural and human diversity, ethics and values, a sense of individual empowerment, historical antecedents, critical thinking and the understanding of self and others.

The Bachelor of Arts in Psychology offers a foundation in the analysis and critical evaluation of psychological literature, the communication of psychological concepts and facts both orally and in writing, and the development of psychological research including design, data analysis, measurement, and basic computer operation. Our B.A. degree provides an excellent foundation for work in the community in many fields that involve human relations and behavior. In addition, the undergraduate degree is an excellent preparation for graduate school in all fields of psychology and other behavioral and social sciences as well as for graduate programs in business, law, medicine, and many other professional fields.

Impaction
The B.A. in Psychology program is impacted. This means that there are more students interested in studying psychology than the program can accommodate. Therefore, entrance into the program is a selective and competitive process. Applications must be received during the application filing period and no later than the November 30 deadline. Admissions decisions will be made in March or April of the following calendar year. Transfer applicants not admitted to the program, but who meet GE and University admissions requirements, will be admitted to their alternate majors. Continuing SF State students not admitted to the program will remain in their current majors.

Application Filing Periods
Applications for admissions to the psychology major are accepted only during the application filing period for the fall semester: October 1 to November 30 (for admission for the following fall). Applications are not accepted for spring semesters. Applications received outside of the fall semester open filing period will not be considered.

Transfer applicants from other colleges must submit an application via CSU Mentor at http://www.csumentor.edu.

Continuing SF State students must submit their application form directly to the psychology department.

Honors Thesis
Participation in an honors thesis is strongly recommended for students who plan to go to graduate school in psychology. Students need a written commitment by a psychology department faculty member who will agree to supervise the honors thesis, a 3.5 GPA in all upper division coursework, and senior standing. For more details, contact the Honors Thesis Coordinator.

Pre-Psychology
Pre-Psychology is designed for undeclared freshman and sophomore students who have an interest in the psychology major. During the two years prior to being admitted students should concentrate on completing their lower division GE requirements. Certain psychology courses can be used to meet these requirements: PSY 111 (A3), PSY 171 (B4), and PSY 200 (D1, E). Students apply to the Psychology major in the fall semester before they will reach 60 units. Students who have an interest in psychology should contact the department for academic advising.

Note: Completion of the pre-psychology program does not guarantee entry into the major program.

Career Outlook
The undergraduate program provides a foundation of skills and knowledge for careers both outside and inside of psychology. Since most jobs require a well-developed sense of how people function, a degree in psychology is often a desired background for positions in both government and industry. Undergraduate work in psychology includes training to develop the abilities to analyze critically and to understand complex behaviors, to deal with interpersonal problems, and to use research tools.

The following are some careers that graduates with bachelor’s degrees in psychology have entered.

Psychological Research and Development: – data analysis assistant; educational research assistant; public opinion poll-taker; research assistant in mental health; research design technician; statistician; survey interviewer.

Mental Health and Social Services: – alcohol treatment center assistant; child care program assistant; corrections counselor; counseling assistant; counselor; child/adolescent; crisis center counselor; drug abuse program assistant; psychiatric technician.

Business and Government: – employment interviewer; human factors assistant; human resources manager; personnel analyst; psychometrist; public relations assistant.

Teaching: – high school psychology instructor.

Graduate Programs and Career Preparation
The psychology department offers a Master of Arts in Psychology with concentrations in Developmental Psychology, Mind, Brain & Behavior, and Social Psychology. The department also offers a Master of Science in Psychology with concentrations in Clinical Psychology, Industrial/Organizational Psychology, and School Psychology. Students with master’s degrees in psychology may teach at a community college and may teach as lecturers at four-year colleges and universities. Each concentration has been designed to meet student needs and to qualify students for vocational goals relevant to that concentration. Close liaison
between students and advisors is an important feature of every graduate concentration.

The Developmental Psychology concentration focuses on life-span development from conception through aging. Major interest areas include social and emotional development, parent-child relations, family processes, sex differences, development across cultures and ethnic minority groups, learning, cognition, and psycholinguistics. The program is appropriate for students who wish to enter doctoral programs, and prepares them for academic, research, and applied careers in the field of child and developmental psychology.

The Mind, Brain, & Behavior concentration is for students seeking to become broadly informed and productive research psychologists who will be prepared to enter doctoral programs or perform competently as research associates in diverse areas of psychology. This program offers the opportunity for course work and research in such areas as biofeedback, emotion, physiological psychology, clinical research, program evaluation, psycholinguistics, and cognition. The program also prepares students for teaching in community colleges.

The Social Psychology concentration is designed to provide appropriate preparation and experience to students who intend to proceed to doctoral study, as well as for students who intend to develop careers at the master’s level in research, in community college teaching, or in applications of social psychology. The program emphasizes achievement of competency in research skills (design, implementation, and interpretation of findings), familiarity with the theoretical and empirical literature of the discipline, and proficiency in application of social psychology to the solution of social problems; e.g., peace and conflict resolution, intergroup relations, and cultural diversity in modern society.

The Clinical Psychology concentration is intended to qualify students to provide mental health services in community mental health centers, schools, hospitals, private practice, managed care, and similar careers. The program provides the academic preparations and pre-master’s supervised hours required for the State of California Marriage and Family Therapy license.

The program with an Industrial-Organizational concentration is designed to qualify students for professional careers in organizational behavior and human resource functions in business, industry, or government; or for doctoral programs in industrial/organizational psychology.

By completing the School Psychology concentration, some additional coursework, and an internship experience, students can qualify for the State of California Pupil Personnel Services Credential with authorization in School Psychology. This preparation qualifies students for a career as a School Psychologist in California public and private schools.

Professors
Ben-Zeev, Colvin, Cookston, Gard, Geisler, Harris, Kim, Lewis, Matsumoto, Miller, Paap, Terrell, Wright

Associate Professors
Howell, Morsella, Paik, Smith, Tate

Assistant Professors
Barber, Eschleman, Hagan, Holley, Mello, Rodriguez, Suri

Majors
• Bachelor of Arts in Psychology (p. 1296)

Minors
• Minor in Psychology
This minor is under temporary suspension. Please contact department for further information.

Masters
• Master of Arts in Psychology: Concentration in Developmental Psychology (p. 1306)
• Master of Arts in Psychology: Concentration in Mind, Brain & Behavior (p. 1306)
• Master of Arts in Psychology: Concentration in Social Psychology (p. 1307)
• Master of Science in Psychology: Concentration in Clinical Psychology (p. 1307)
• Master of Science in Psychology: Concentration in Industrial/Organizational Psychology (p. 1308)
• Master of Science in Psychology: Concentration in School Psychology (p. 1309)

Credential
• Pupil Personnel Services Credential: School Psychology Designation (p. 1310)

Bachelor of Arts in Psychology

Prerequisite Core
PSY 200 (or equivalent) is a prerequisite for all upper division psychology courses. PSY 171 (or any quantitative reasoning course) is a prerequisite for PSY 371. ENG 214 (or a course that satisfies the lower division writing requirement) is a prerequisite for both PSY 305GW and PSY 400. PSY 371 is a prerequisite for all non-GE upper division psychology courses (PSY 371 may be taken concurrently with other major courses).

Degree Requirements
The major includes 14 units of core curriculum, 18 units of basic courses, and nine units of electives. Because of high demand, enrollment priority is given to psychology major students in all upper division psychology courses; courses numbered 300 and above are not open to freshman.

• Psychology majors must take PSY 200, PSY 305GW, PSY 371, and PSY 400 for a letter grade and achieve a grade of C or better in all four courses.
• Majors must achieve a grade of CR in PSY 303 and PSY 690.

Writing Competence
Good writing skills are necessary for success in the major. Students whose writing needs improvement should work on their skills by taking additional composition courses or by completing writing tutorials. Psychology majors who successfully complete PSY 305GW will have satisfied the University Graduation Writing Assessment Requirement (GWAR).
Psychology (B.A.) – 41 Units
Core Curriculum (14 Units)
Core courses should be taken in the order listed below.

PSY 200 General Psychology 3
PSY 303 Psychology: The Major and the Profession (online) 1
PSY 371 Psychological Statistics 3
PSY 400 Introduction to Research in Psychology 3
PSY 305GW Contemporary Issues in Psychology - GWAR 3
PSY 690 Future Directions for Psychology Majors (online) 1

Basic Courses (18 Units)
Choose two courses from each of the following Areas 1 through 3:

- Area 1: Basic Psychological Processes (6)
- Area 2: Psychological Development and Individual Differences (6)
- Area 3: Social, Cultural, Organizational and Community Contexts (6)

Electives (9 Units)
Choose 3 elective courses from courses in Areas 1–3 and/or from additional upper-division psychology courses

Areas of Study
Area 1: Basic Psychological Processes

PSY 432 Cognitive Development: Language, Thinking, and Perception 3
PSY 492 Perception 3
PSY 493 Motivation 3
PSY 494 Cognitive Psychology 3
PSY 495 The Psychology of Human Memory 3
PSY 498 Cognitive Neuroscience: Psychological Models 3
PSY 491 Learning 3
PSY 531 Psycholinguistics 3
PSY 581 Physiological Psychology I 3
PSY 582 Physiological Psychology II 3

Area 2: Psychological Development and Individual Differences

PSY 430 Adolescent Psychology 3
PSY 431 Developmental Psychology 1 3
PSY 433 Social, Emotional, and Personality Development 3
PSY 434 The Psychology of Aging 3
PSY 435 Behavior Problems of Children 3
PSY/SXS 436 The Development of Femaleness and Maleness 4
PSY 442 Health Psychology 3
PSY 451 Theories of Personality 3
PSY 452 Abnormal Psychology: Minor Variants of Personality 3
PSY 521 Introduction to Clinical Psychology 3

Area 3: Social, Cultural, Organizational and Community Contexts

PSY 440 Social Psychology 3
PSY 441 The Psychology of the Family 3
PSY 455 Cross-Cultural Perspectives in Psychology 3
PSY/SXS 456 Psychology of Human Sexual Behavior 3
PSY 461 Introduction to Industrial/Organizational Psychology 3
PSY 462 Personnel Psychology 3
PSY 463 Human Factors 3
PSY 465 The Psychology of Work-Life Stress 3
PSY 466 Training and Development in Organizations 3
PSY 472 Introduction to Legal Psychology 3
PSY 474 Psychology of Social Justice 3
PSY 475 Psychology of Policing 3
PSY 525 Community Psychology 3
PSY 547 Social Conflict and Conflict Resolution 3
PSY 558 Field Services Seminar 3
& PSY 559 and Psychological Field Service 3
PSY 645 Group Processes 3

Additional Courses That May Be Used for Electives

PSY 300 Current Issues in Psychology 3
PSY/SXS 320 Sex and Relationships 3
PSY 330 Child Development 1 3
PSY 443 The Science of Happiness 3
PSY 450/ SXS 400/SOC 400 Variations in Human Sexuality 3
PSY 571 Intermediate Psychological Statistics 3
PSY 601 Theoretical Backgrounds in Psychology 3
PSY 668 The Psychology of Leadership 3
PSY 680 Peer Advising in Psychology 3
PSY 685 Projects in the Teaching of Psychology 3
PSY 693 Proseminar I 3
PSY 694 Proseminar II 3
PSY 697 Senior Project Preparation 3
PSY 698 Senior Project in Psychology 3
PSY 699 Independent Study in Psychology 1-4

1 Students may not use PSY 330 as an elective if they have taken PSY 431.

Complementary Studies
Bachelor of Arts students must complete at least 12 units of complementary studies from courses with a prefix other than PSY, and not cross-listed with PSY. (Note: Students may not use an alternate prefix that is cross-listed with the primary prefix for the major.)

Students who complete two majors or a major and a minor automatically complete the complementary studies requirement. Additional ways to complete complementary studies for students in the Psychology major include 12 units of languages other than English, 12 units from an approved Study Abroad program, 12 units from partial completion of a certificate, or 12 units from any combination of courses in ANTH, BIO, CAD, CJ, CSC, COUN, EDUC, ETHS, PHIL, and SOC, or a coherent group of courses approved by a major advisor as complementary to the major. All of the units must be separate from units counted in the major. Courses which fulfill the complementary studies requirement may be lower or upper division units, resident or transfer units, or units taken in approved study abroad programs. Consult with your major advisor for assistance.

Students who have earned AA-T or AA-S degrees may use courses from community colleges to fulfill the Complementary Studies requirement provided the course has a prefix other than Psychology. Students should consult with a major advisor about how transfer units and/or SF State
units can best be applied to this requirement in order to ensure degree completion within 60 units.

**SF State Studies**

Courses certified as meeting the SF State Studies requirements may be upper or lower division in General Education (GE), in a major or minor, or an elective.

American Ethnic and Racial Minorities (AERM) | LD or UD | 3 |
Environmental Sustainability (ES)        | LD or UD | 3 |
Global Perspectives (GP)                 | LD or UD | 3 |
Social Justice (SJ)                      | LD or UD | 3 |

Note: LD = Lower Division; UD = Upper Division.

**Transfer Student Roadmap (2 Year)**

For students with an AA-T in Psychology. This roadmap opens in a new tab. (p. 1304)

This degree program is an approved pathway (“similar” major) for students earning the ADT in Psychology

California legislation SB 1440 (2009) mandated the creation of the Associate Degree for Transfer (ADT) to be awarded by the California Community Colleges. Two types of ADTs are awarded: Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T). Note: no specific degree is required for admission as an upper-division student. However, the ADT includes specific guarantees related to admission and graduation, and is designed to clarify the transfer process and strengthen lower-division preparation for the major.

An ADT totals 60 units and includes completion of all lower-division General Education requirements and at least 18 units in a specific major. Students pursuing an ADT are guaranteed admission to the CSU if minimum eligibility requirements are met, though not necessarily to the CSU campus of primary choice.

Upon verification that the ADT has been awarded prior to matriculation at SF State, students are guaranteed B.A. or B.S. completion in 60 units if pursuing a “similar” major after transfer. Determinations about “similar” majors at SF State are made by faculty in the discipline.

Degree completion in 60 units cannot be guaranteed when a student simultaneously pursues an additional major, a minor, certificate, or credential.

A sample advising roadmap for students who have earned an ADT and continue in a “similar” major at SF State is available on the Roadmaps tab and displays:

- How many lower-division units required for the major have been completed upon entry based on award of a specific ADT;
- Which lower-division requirements are considered complete upon entry based on award of a specific ADT;
- How to complete the remaining 60 units for the degree in four semesters.

Students who have earned an ADT should seek advising in the major department during the first semester of attendance.

**General Advising Information for Transfer Students**

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   - a course in U.S. History
   - a course in U.S. & California Government
   - a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://
www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

- Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;

Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6-9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

Transferring from institutions other than CCCs or CSUs

Review SF State's lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State's lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL.

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical "freshman comp" course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

All students must meet the transfer eligibility requirements outlined below for admission. For more information, visit the Undergraduate Admissions section.

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  a. One course in oral communication (same as CSU GE area A1)
  b. One course in written composition (same as CSU GE area A2)
  c. One course in critical thinking (same as CSU GE area A3)
  d. One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.

1. To avoid taking additional units, it is recommended that you meet **LLD and SF State Studies requirements** (AERM, GP, ES, SJ) within your GE or major.
2. ENG 114 can only be taken if you complete Directed Self-Placement (DSP) and select ENG 114; if you choose ENG 104/ENG 105 through DSP you will satisfy A2 upon successful completion of ENG 105 in the second semester; multilingual students may be advised into alternative English courses.
3. Consider taking a class combined with a laboratory or a separate lab to fulfill B3 if not already satisfied.
4. **Complementary Studies**

- Bachelor of Arts students must complete at least 12 units of complementary studies from courses with a prefix other than PSY, and not cross-listed with PSY. (Note: Students may not use an alternate prefix that is cross-listed with the primary prefix for the major).
- Students who complete two majors or a major and a minor automatically complete the complementary studies requirement. Additional ways to complete complementary studies for students in the Psychology major include 12 units of languages other than English, 12 units from an approved Study Abroad program, 12 units from partial completion of a certificate, or 12 units from any combination of courses in ANTH, BIO, CAD, CJ, CSC, COUN, EDUC, ETHS, PHIL, and SOC, or a coherent group of courses approved by a major advisor as complementary to the major. All of the units must be separate from units counted in the major. Courses which fulfill the complementary studies requirement may be lower or upper division units, resident or transfer units, or units taken in approved study abroad programs. Consult with your major advisor for assistance.
- Students who have earned AA-T or AA-S degrees may use courses from community colleges to fulfill the Complementary Studies requirement provided the course has a prefix other than Psychology. Students should consult with a major advisor about how transfer units and/or SF State units can best be applied to this requirement in order to ensure degree completion within 60 units.
5 Basic Courses (18 units)
Choose two courses from each of the following Areas 1 through 3:

• Area 1: Basic Psychological Processes (6)
  - PSY 432 Cognitive Development: Language, Thinking, and Perception (3 units)
  - PSY 492 Perception (3 units)
  - PSY 493 Motivation (3 units)
  - PSY 494 Cognitive Psychology (3 units)
  - PSY 495 The Psychology of Human Memory (3 units)
  - PSY 498 Cognitive Neuroscience: Psychological Models (3 units)
  - PSY 491 Learning (3 units)
  - PSY 531 Psycholinguistics (3 units)
  - PSY 581 Physiological Psychology I (3 units)
  - PSY 582 Physiological Psychology II (3 units)

• Area 2: Psychological Development and Individual Differences (6)
  - PSY 430 Adolescent Psychology (3 units)
  - PSY 431 Developmental Psychology (3 units)
  - PSY 433 Social, Emotional, and Personality Development (3 units)
  - PSY 434 The Psychology of Aging (3 units)
  - PSY 435 Behavior Problems of Children (3 units)
  - PSY 436 The Development of Femaleness and Maleness (4 units)
  - PSY 442 Health Psychology (3 units)
  - PSY 451 Theories of Personality (3 units)
  - PSY 452 Abnormal Psychology: Minor Variants of Personality (3 units)
  - PSY 521 Introduction to Clinical Psychology (3 units)

• Area 3: Social, Cultural, Organizational and Community Contexts (6)
  - PSY 440 Social Psychology (3 units)
  - PSY 441 The Psychology of the Family (3 units)
  - PSY 455 Cross-Cultural Perspectives in Psychology (3 units)
  - PSY 456 Psychology of Human Sexual Behavior (3 units)
  - PSY 461 Introduction to Industrial/Organizational Psychology (3 units)
  - PSY 462 Personnel Psychology (3 units)
  - PSY 463 Human Factors (3 units)
  - PSY 465 The Psychology of Work-Life Stress (3 units)
  - PSY 466 Training and Development in Organizations (3 units)
  - PSY 472 Introduction to Legal Psychology (3 units)
  - PSY 474 Psychology of Social Justice (3 units)
  - PSY 475 Psychology of Policing (3 units)
  - PSY 525 Community Psychology (3 units)
  - PSY 547 Social Conflict and Conflict Resolution (3 units)
  - PSY 558 Field Services Seminar (2 units)
  - and PSY 559 Psychological Field Service (1-3 units)
  - PSY 645 Group Processes (3 units)

6 Electives (9 units)
Choose 3 elective courses from courses in Areas 1~3 and/or from the following additional upper-division psychology courses:
  - PSY 300 Current Issues in Psychology (3 units)
  - PSY 320 Sex and Relationships (3 units)
  - PSY 330 Child Development (3 units)
  - PSY 443 The Science of Happiness (3 units)
  - PSY 450 Variations in Human Sexuality (3 units)
  - PSY 571 Intermediate Psychological Statistics (3 units)
  - PSY 601 Theoretical Backgrounds in Psychology (3 units)
  - PSY 668 The Psychology of Leadership (3 units)
  - PSY 680 Peer Advising in Psychology (3 units)
  - PSY 685 Projects in the Teaching of Psychology (1-4 units)
  - PSY 693 Proseminar I (3 units)
  - PSY 694 Proseminar II (3 units)
  - PSY 697 Senior Project Preparation (3 units)
  - PSY 698 Senior Project in Psychology (3 units)
  - PSY 699 Independent Study in Psychology (1-4 units)
Students may not use PSY 330 as an elective if they have taken PSY 431.
# Bachelor of Arts in Psychology – PSY Associate Degree for Transfer Roadmap

This is a sample pathway for students who transfer to San Francisco State University in 2017–2018 with an AA-T in Psychology. Three units in the major (PSY 200) and all lower division GE requirements have been satisfied. Additional units in the major may have been satisfied. Check with a major advisor about the most appropriate course sequence. **Degree completion guaranteed in 60 units; see the Associate Degree for Transfer (ADT) section for more information** (http://bulletin.sfsu.edu/undergraduate-admissions/transfer-students).

¹ PSY 435 also satisfies GE UD-D.

**To Do at SF State:**

Enough total units to reach 120 minimum for graduation; 40 units minimum at the upper division level; to include the following:

### University-Wide Requirements: 6–15 Units

- ENG 214 or equivalent A4 course (0–3 units) if not taken before transfer
- American Institutions (0–6 units): US History, US Government, California State and Local Government requirements if not taken before transfer
- Upper division GE, areas B and C (9 units): Major requirement also satisfies UD-D. See notes.
- Students entering this major with the AA-T in Psychology are not required to fulfill SF State Studies requirements.
• Complementary Studies: consult with a department advisor on how transfer units and/or SF State units can be applied to ensure degree completion within 60 units.

Psychology Major: 38 Units

PSY 200 met in transfer.

• Core Requirements (11 units)
• Basic Courses (18 units): Choose two courses from Areas 1, 2, and 3
• Electives (9 units): Choose courses in Areas 1–3 and/or additional upper-division psychology courses

University Electives: Seven or More Units

Depends on course choices made at the community college, how transferred units are applied to the requirements above, and course choices at SF State. Some courses may meet more than one requirement, e.g. in both UD GE and the major.
Master of Arts in Psychology: Concentration in Developmental Psychology

Program Coordinator: Jeff Cookston

Graduate Programs in Psychology

Application to a graduate program is a two-part process:

- Part One is the University application submitted to the Division of Graduate Studies.
- Part Two is the program application that must be submitted to the Psychology Department.

Part One and Part Two of the graduate admission application must be submitted by the deadline to be considered for admission. The department accepts applications for the fall semester only, with a deadline of February 1st. The clinical and school psychology programs generally require an interview, during the admissions process.

Applicants to each psychology graduate program are required to submit the results of the Graduate Record Examination — verbal, quantitative, and writing sections. Applicants should check the current application of the program they are applying to for the other requirements.

Students who intend to work toward the M.A. or the M.S. in Psychology must meet the prerequisites outlined at the beginning of each concentration.

Undergraduate deficiencies are to be rectified, as the graduate advisor deems fit, without being included as part of the program for a master’s degree.

In order to advance to candidacy, graduate students must meet all the general requirements for the specific program in which they are involved.

Written English Proficiency Requirement

Level One
Score of 4.0 or better on the GRE Analytical Writing Test.

Level Two
Satisfactory completion of the master’s thesis (PSY 898).

Prerequisites
A background in elementary statistics and developmental psychology (introductory course)

Psychology (M.A.): Concentration in Developmental Psychology — Minimum 35 units

**Master of Science in Psychology: Concentration in Clinical Psychology**

Program Coordinator: David Gard

The M.S. in Psychology with a concentration in Clinical Psychology provides students with a degree that confers eligibility to sit for the State of California Marriage and Family Therapy license after completing 3,000 approved hours, 1,700 hours of which must be acquired post-master’s.

**Graduate Programs in Psychology**

Application to a graduate program is a two-part process:

- Part One is the University application submitted to the Division of Graduate Studies.
- Part Two is the program application that must be submitted to the Psychology Department.

Part One and Part Two of the graduate admission application must be submitted by the deadline to be considered for admission. The department accepts applications for the fall semester only, with a
deadline of February 1st. The clinical and school psychology programs generally require an interview, during the admissions process.

Applicants to each psychology graduate program are required to submit the results of the Graduate Record Examination — verbal, quantitative, and writing sections. Applicants should check the current application of the program they are applying to for the other requirements.

Students who intend to work toward the M.A. or the M.S. in Psychology must meet the prerequisites outlined at the beginning of each concentration.

Undergraduate deficiencies are to be rectified, as the graduate advisor deems fit, without being included as part of the program for a master’s degree.

In order to advance to candidacy, graduate students must meet all the general requirements for the specific program in which they are involved.

**Written English Proficiency Requirement**

**Level One**
Score of 4.0 or better on the GRE Analytical Writing Test or equivalent.

**Level Two**
Satisfactory completion of the Comprehensive Written Examination (PSY 896 or PSY 896EXM [0 units]) or PSY 898 Master’s Thesis.

**Prerequisites**

Preparation in psychology, or in other fields which emphasize understanding of human functioning, as any of the social sciences or, in some instances, in fields that deal with specialized forms of human expression and experience. Required prerequisites are course work in psychological statistics and upper division courses in personality theory and abnormal psychology. Course work in developmental psychology and cultural perspectives is desirable. Preparation should also include experience working directly with people in a helping or service-oriented situation.

Master of Science in Psychology: Concentration in School Psychology

Program Coordinator: Diane Harris

This M.S. in Psychology, concentration in School Psychology leads to the Pupil Personnel Services Credential with authorization in School Psychology. Designed primarily for full-time SF State students, an M.S. is earned after successful completion of the fourth semester and the Pupil Personnel Services Credential with an authorization in School Psychology is awarded after successful completion of the sixth semester in the program.

Graduate Programs in Psychology

Application to a graduate program is a two-part process:

- Part One is the University application submitted to the Division of Graduate Studies.
- Part Two is the program application that must be submitted to the Psychology Department.

Part One and Part Two of the graduate admission application must be submitted by the deadline to be considered for admission. The department accepts applications for the fall semester only, with a deadline of February 1st. The clinical and school psychology programs generally require an interview, during the admissions process.

Applicants to each psychology graduate program are required to submit the results of the Graduate Record Examination – verbal, quantitative, and writing sections. Applicants should check the current application of the program they are applying to for the other requirements.

Students who intend to work toward the M.A. or the M.S. in Psychology must meet the prerequisites outlined at the beginning of each concentration.

Undergraduate deficiencies are to be rectified, as the graduate advisor deems fit, without being included as part of the program for a master’s degree.

In order to advance to candidacy, graduate students must meet all the general requirements for the specific program in which they are involved.

Prerequisites

Acceptance into the M.S. program is based upon evidence of psychological experience with children and families in institutions such as schools and service-oriented settings. Academic preparation is demonstrated by the capacity to make use of graduate-level academic work and professional training. These qualifications may be assessed by record of previous academic accomplishments in psychology or other related fields that emphasize an understanding of children and their families and include临床 work experience. Students entering the program should have completed courses in statistics and research, clinical, developmental, abnormal psychology, learning, personality, and cross-cultural psychology.

Written English Proficiency Requirement

Level One
Score of 4.0 or better on the GRE Analytical Writing Test or equivalent.

Level Two
Satisfactory completion of the Comprehensive Writing Examination (PSY 896 or PSY 896EXM [0 units]) or PSY 898 Master’s Thesis.

Pupil Personnel Services Credential: School Psychology Designation

The Pupil Personnel Services Credential is offered through the College of Extended Learning (CEL). To be eligible for the program, students may have completed the M.S. in Psychology from SF State with a concentration in School Psychology. Individuals who have attained an M.S. in Psychology with a concentration in School Psychology or a related master’s or doctoral degree from another university must have completed equivalent academic courses, a minimum of 576 hours of school psychology-related experience in schools supervised by a credentialed school psychologist, and all prerequisites and requirements for admission to the Pupil Personnel Services Credential: School Psychology Designation.

For information regarding prerequisites and eligibility requirements for the Program, review and complete all application procedures located on the Pupil Personnel Services Credential: School Psychology Designation website accessed through the Psychology Department’s website. A fee will be charged to evaluate and determine eligibility for the program.

Pupil Personnel Services Credential: School Psychology Designation – 24 units

ALL-UNIVERSITY PROGRAMS

Interdisciplinary Studies (Graduate)
Division of Graduate Studies
Interim Dean: Mi-Sook Kim
ADM 254
(415) 338-2234

Note: Admission only by permission. Meeting with graduate advisor required. Please see the Graduate Advisor for information on graduate program options. grad.sfsu.edu/content/current-students/graduate-studies-advising (http://grad.sfsu.edu/content/current-students/graduate-studies-advising)

Program Scope
Graduate Major
A degree in Interdisciplinary Studies is offered as a Master of Arts and a Master of Science to meet the unique needs and interests of students that cannot be met in a reasonable manner by one of the regularly offered graduate degree programs at SF State. Students pursuing an Interdisciplinary Studies program must develop a 30–36 unit plan of study that draws on courses from multiple disciplines with the intent to integrate the concepts, perspectives, and methodologies of those disciplines into a focused, central theme which may lead to new ways of looking at a subject, issues or problem. Usually, courses must be selected from three departments bridging at least two colleges within the University.

The courses to be applied toward the major must be carefully selected for their interrelatedness and general applicability to the objectives of the unique major being proposed. Only major themes that can be supported with integrity by existing coursework and faculty expertise will be approved. Determination of degree designation as an M.S. or M.A. is the decision of the major advisor and the Dean of Graduate Studies. This degree cannot be used to meet credential or licensing requirements. Students may not use courses from fields of study, such as, nursing, physical therapy or counseling which lead to licensure or certification unless a single course is specifically authorized by the department chair.

Budget restrictions by the State of California may close off acceptance of new students in these programs at any time without prior notice.

Eligibility for the Program
All applicants to this program must be eligible for admission to post-baccalaureate study as specified in the graduate admissions (p. 115) section of this Bulletin. The applicant should present evidence of a minimum 3.25 grade point average in the baccalaureate degree or in the last 60 semester units taken, and a pattern of undergraduate course work which will provide the foundation for the advanced degree work in the approved Interdisciplinary Studies major. Students must demonstrate English competency and proficiency before beginning the program which can be met by earning a score of 4.5 or better on the Graduate Record Exam (GRE) or GMAT analytical writing section. Students who have earned a masters or doctoral degree will be exempted from the pre-admission writing requirement, however; writing will be assessed based on the applicant’s required essays.

Final approval to pursue an interdisciplinary study degree is made by the Dean of Graduate Studies after all outstanding problems have been resolved.

Written English Proficiency Requirement
The University has a requirement for written English proficiency that is to be assessed at two different points in a student’s program. Level One must be met prior to admission. See above in Eligibility for the Program. A student who fails to meet the writing criteria will not be admitted.

Level Two is determined toward the end of the student’s program. The dean of Graduate Studies and faculty overseeing the program will assess Level Two writing through review of a final paper from a selected graduate course that requires intensive writing. In addition, the major advisor, in consultation with other committee members as necessary, will determine that the student writes in a “scholarly” manner in the subject area (theme) of the program. Most often the satisfactory completion of a master’s thesis or a written field research project will satisfy this second level requirement. How this second level requirement is being met must be indicated on the Advancement to Candidacy (ATC) form.

Advising for the Program
The applicant is responsible for developing the program proposal and obtaining the endorsements of three tenured/tenure-track faculty members of the university eligible to work in graduate programs as defined in the University Bulletin. The primary responsibility for academic program advising will rest with the members of this committee, especially the major advisor. The major advisor must come from a department/program in which a significant amount of the program course work is to be taken. At least one of the committee members must come from a different department/program from the primary focus of the student’s proposal. The Dean of Graduate Studies is responsible for the general administration of the program in lieu of the traditional college and department. Students interested in the Interdisciplinary Studies program should meet with a graduate advisor in Administration Building room 254. See the Graduate Studies website for advising information.

Program Requirements
Students in the Interdisciplinary Studies major must complete all requirements for a master’s degree (p. 120) offered by the university. In addition, students in the Interdisciplinary Studies program are expected to meet the following standards:

- Maintain close contact with the major advisor and other committee members in order to assure that the program is carefully planned, and that satisfactory progress is made toward its completion.
- Maintain a 3.0 GPA every semester in all coursework specified for the degree. CR/NC courses are not allowed except for the culminating experience course.
- Make continuous progress toward the degree in every semester until graduation, taking no fewer than nine units toward the degree each year. Courses not related to the degree are not permitted.
- Complete the 30–36 unit degree in no more than five years from the date of enrollment.

Advancement to Candidacy (ATC)
The Advancement to Candidacy form must:

- Include a minimum of 30 semester units of coursework exclusive of special (individual) study, experimental, transfer, and credit-by-examination type of credit; that includes courses from three disciplinary areas as specified by the degree advisors;
• Include a minimum of three units of a research methodology and three units of statistics beyond elementary statistics (e.g. MATH 124).
• At least 70 percent of the units required for the degree must be in graduate level courses (i.e., numbered 700 and above on this campus);
• Include no more than 12 units of coursework in any one discipline;
• Make provision for a three unit culminating experience requirement (e.g., 898, thesis; 894, creative work project; 895, field research project; etc.) that utilizes a committee of three faculty advisors sitting on the student’s committee; and
• Include the signature of the major and second advisors. The dean of Graduate Studies will review and approve the ATC in lieu of a college coordinator and on behalf of the university.

General Procedures for the Program
Developing an Interdisciplinary Studies degree takes a great deal of initiative, independent thought, and follow-through by the student. To initiate the process:

1. Meet with a Graduate Studies advisor to review program requirements and processes for developing a proposal.
2. Meet with the dean of Graduate Studies to discuss degree program.
3. Identify and meet with the primary faculty advisor and two additional tenured or tenure-line faculty members at SF State campus who have the expertise and interest in advising and supporting you in the proposed program of study. The primary faculty advisor must be from a department that offers a graduate degree. Lecturer faculty may not serve on Interdisciplinary Studies committees because lecturer faculty may not be available each semester for advising.
4. When the proposal form has been approved by all three advisors, submit the proposal with the faculty signatures to the Dean of the Graduate Studies for final approval. Following approval, you must be admitted to the University via the online CSU Mentor system.

Program Scope
Undergraduate Major
The Bachelor of Arts: Special Major is offered by San Francisco State University for those students who have unique academic goals, which cannot be satisfactorily attained through one of the regularly offered undergraduate major programs of San Francisco State University or other colleges and universities in the Bay Area. The special major consists of a combination of courses planned in advance to focus on an integrative and coherent theme identified by the student. A written statement must be developed which describes the goals of the proposed major. The program must be compatible with the general objectives of the university. Courses must be chosen by the student from at least three different departments in at least two different colleges of the university. (Department means any program area of the university offering course work.)

A special major may not duplicate any existing major programs, by name or content, which are offered at San Francisco State University, nor may it be used as a means of bypassing regularly prescribed graduation requirements. It must be planned and approved in advance, not created as an afterthought to utilize previously completed courses.

Bachelor of Arts: Special Major
Admission to the Program
In order to apply for a special major, a student must first be admitted to San Francisco State University. Special major status is granted only after consultation with an adviser and approval of the student’s proposal. Students may apply for admission to the special major program during or after their first semester of attendance at SF State.

Eligibility for the Program
Special major applicants are expected to have completed a minimum of 45 and a maximum of 90 units of university study with a cumulative grade point average of 3.0 (B). Records of such work, e.g., unofficial transcripts, degree progress report, and Advanced Standing Evaluation (if a transfer student), must be presented to the appropriate academic adviser in the special major program. In unusual circumstances, a student may request an exception to this provision.

Advising for the Program
Advising for students pursuing a special major is provided at the Undergraduate Advising Center by academic counselors designated by the Dean of Undergraduate Education and Academic Planning who is responsible for the coordination and overall administration of the program. Coursework in the major program must be approved in advance by departments offering the courses. Please be aware that some departments restrict course enrollment to their own majors.

To initiate the special major approval process, consult the advising website at http://advising.sfsu.edu/special-major.

General Advising Information for Transfer Students

1. Before transfer, complete as many lower division requirements or electives for this major as possible.
2. The following courses are not required for admission, but are required for graduation. Students are strongly encouraged to complete these units before transfer; doing so will provide more flexibility in course selection after transfer.
   • a course in U.S. History
   • a course in U.S. & California Government
   • a 2nd-semester course in written English composition

For information about satisfying the requirements described in (1) and (2) above at a California Community College (CCC), please visit http://www.assist.org. Check any geographically accessible CCCs; sometimes options include more than one college. Use ASSIST to determine:

• Which courses at a CCC satisfy any lower division major requirements for this major, including 2nd-semester composition;
Remedial courses are not transferable and do not apply to the minimum 60 units/90 quarters required for admission.

Additional units for courses that are repeated do not apply to the minimum 60 units required for upper division transfer (for example, if course was not passed on the first attempt, or was taken to earn a better grade).

Before leaving the last California community college of attendance, obtain a summary of completion of lower division General Education units (IGETC or CSU GE Breadth). This is often referred to as a GE certification worksheet. SF State does not require delivery of this certification to Admissions, but students should retain this document for verifying degree progress after transfer.

Credit for Advanced Placement, International Baccalaureate, or College-Level Examination Program courses: AP/IB/CLEP credit is not automatically transferred from the previous institution. Units are transferred only when an official score report is delivered to SF State. Credit is based on the academic year during which exams were taken. Refer to the University Bulletin in effect during the year of AP/IB/CLEP examination(s) for details regarding the award of credit for AP/IB/CLEP.

Students pursuing majors in science, technology, engineering and mathematics (STEM) disciplines often defer 6–9 units of lower division general education in areas C and D until after transfer in order to focus on preparation courses for the major. (This advice does not apply to students pursuing associate degree completion before transfer.)

**Transferring from institutions other than CCCs or CSUs**

Review SF State’s lower division General Education requirements. Note that, as described below, the four basic skills courses required for admission meet A1, A2, A3, and B4 in the SF State GE pattern. Courses that fulfill the remaining areas of SF State’s lower division GE pattern are available at most two-year and four-year colleges and universities.

Of the four required basic skills courses, a course in critical thinking (GE A3) may not be widely offered outside the CCC and CSU systems. Students should attempt to identify and take an appropriate course no later than the term of application to the CSU. To review more information about the A3 requirement, please visit [http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL](http://bulletin.sfsu.edu/undergraduate-education/general-education/lower-division/#AAEL).

Identify and complete a 2nd-semester written English composition course before transfer. This is usually the next course after the typical “freshman comp” course, with a focus on writing, reading and critical analytical skills for academic purposes, and developing skills in composing, revising, and the use of rhetorical strategies.

Waiting until after transfer to take a single course at SF State that meets both US and CA/local government requirements may be an appropriate option, particularly if transferring from outside of California.

**All students must meet the transfer eligibility requirements outlined below for admission.**

**For more information, visit the Undergraduate Admissions section.**

- Complete 60 or more transferable semester units or 90 or more quarter units
- Earn a college grade point average of 2.00 or better in all transferable courses. Non-local area residents may be held to a higher GPA standard.
- Be in good standing at the last college or university attended
- Complete 30 semester units (45 quarter units) of general education, including four basic skills courses:
  - One course in oral communication (same as CSU GE area A1)
  - One course in written composition (same as CSU GE area A2)
  - One course in critical thinking (same as CSU GE area A3)
  - One course in mathematics or quantitative reasoning, with intermediate algebra as a prerequisite (same as CSU GE area B4)
- The four basic skills courses and a minimum of 60 transferable semester units (90 quarter units) must be completed by the spring semester prior to fall admission, or by the fall semester prior to spring admission. Earn a "C" or better grade in each basic skills course.
MICHAEL ALBERT (1977), Professor of Management; B.A. (1972), State University of New York, Albany; M.B.A. (1974), Ph.D. (1977), Georgia State University.

MICHELLE ALEGRIA-HARTMAN (2004), Adjunct Professor of Biology; B.A. (1982), University of California, Berkeley; B.S. (1985), M.A. (1993), San Francisco State University; Ph.D. (2002), University of California, Davis.

DIANE ALLEN (2008), Associate Professor of Physical Therapy; B.S. (1978), University of California, San Francisco; M.S. (1991), University of North Carolina, Chapel Hill; Ph.D. (2005), University of California, Berkeley.

GWEN ALLEN (2007), Associate Professor of Art; B.A. (1994), Smith College; M.A. (1999), Stanford University; Ph.D. (2004), Stanford University.

SARAH ALLEN (2004), Adjunct Professor of Biology;

TOMÁS ALMAGUER (2000), Professor of Latina/Latino Studies; B.A. (1971), University of California, Santa Barbara; Ph.D. (1979), University of California, Berkeley.

FRANK ALMEDA (1998), Adjunct Professor of Biology; B.A. (1968), University of South Florida; Ph.D. (1975), Duke University.

KIMBERLEY WIDIC ALTURA (2001), Associate Dean of Undergraduate Studies; B.A. (1994), University of Maryland, College Park; M.S. (1997), San Francisco State University.

GABRIELA E. ALVARENGA (2005), Academic Counselor, Undergraduate Advising Center; B.A. (1999), M.S. (2001), San Francisco State University.

DAVID ANDERSON (1996), Professor of Kinesiology; B.Ed. (1987), Kuring-gai College of Advanced Education, Sydney, Australia; M.A. (1990), Long Beach State University; Ph.D. (1994), Louisiana State University.

MARC ANDERSON (2007), Associate Professor of Chemistry and Biochemistry; B.S. (1995), University of Colorado, Boulder; Ph.D. (2001), University of California, Santa Cruz.

JOSEPHINE ARCE (1998), Professor of Elementary Education; B.A. (1976), University of California, Santa Barbara; M.A. (1978), California State University, Los Angeles; Ed.D. (1997), University of San Francisco.

MICHAEL ARCEGA (2013), Assistant Professor of Art; B.F.A. (1999), San Francisco Art Institute; M.F.A. (2009), Stanford University.
FEDERICO ARDILA (2005), Professor of Mathematics; B.S. (1998), Ph.D. (2003), Massachusetts Institute of Technology.

JOAN ARHELGER (1999), Professor of Theatre Arts; B.A. (1967), Carroll College; graduate studies, University of Wisconsin, Madison.

FRED ASTREN (1996), Professor of Jewish Studies; B.E.S. (1979), University of Minnesota; M.A. (1989), Ph.D. (1993), University of California, Berkeley.

TANYA AUGSBURG (2007), Associate Professor of Liberal Studies; B.A. (1987), New York University; M.A. (1993), Emory University; Ph.D. (1996), Emory University.

BRUCE AVERY (1994), Professor of English; B.A. (1984), San Francisco State University; M.A. (1987), University of Connecticut; Ph.D. (1992), University of California, Santa Cruz.

GUADALUPE AVILA (1993), Associate Clinical Director, Counseling and Psychological Services; B.S. (1973), M.S.W. (1975), California State University, Fresno; Licensed Clinical Social Worker (1985).

SHELDON AXLER (1997), Professor of Mathematics; B.A. (1971), Princeton University; Ph.D. (1975), University of California, Berkeley.

ANITA AXT (1979), Lecturer in French; B.A. (1960), University of California, Berkeley; Certificat de Hautes Etudes En Lettres et Civilisation françaises (1960), Université d’Aix-Marseille; M.A.T. (1976), College of Notre-Dame; M.A. (1984), San Francisco State University.

MOJTABA AZADI (2015), Assistant Professor of Mechanical Engineering; B.S. (1998), University of Tehran; M.S. (2000), Sharif University of Technology; Ph.D. (2010), University of Alberta.

MOHAMMAD AZADPUR (2003), Professor of Philosophy; B.A. (1986), Bucknell University; M.A. (1993), University of Pittsburgh; Ph.D. (1999), University of Virginia.

CRISTINA A. AZOCAR (2007), Associate Professor of Journalism; B.A. (1993), San Francisco State University; M.A. (1996), San Francisco State University; Ph.D. (2001), University of Michigan.

KATY S. AZOURY (1988), Professor of Decision Sciences; B.S. (1967), American University of Beirut; M.S. (1969), Syracuse University; Ph.D. (1979), University of California, Los Angeles.

SALLY BAAK (2000), Professor of Management; B.S. (1993), University of California, Berkeley, and the Georg-August Universitaet, Goettingen, Germany; Ph.D. (2000), University of Southern California.

JAMES R. BAGLEY (2015), Assistant Professor of Kinesiology; B.S. (2008), California Polytechnic State University; M.S. (2010), CSU, Fullerton; Ph.D. (2015), Ball State University.

DOUGLASS BAILEY (2008), Professor of Anthropology; B.A. (1985), Dartmouth College; M.Phil. (1986), Ph.D. (1991), Cambridge University.

PAMELA BAJ (1990), Professor of Nursing; B.S. (1975), Boston University; M.S. (1980), D.N.Sc. (1983), University of California, San Francisco.

MARK BAKER (1999), Lecturer in English; B.A. (1990), University of California, Irvine; M.A. (1999), San Francisco State University.

PATRICIA BALDWIN (1999), Lecturer in English; B.A. (1994), University of California, Santa Barbara; M.A. (1996), San Francisco State University.

ELIF BALIN (2016), Assistant Professor of Counseling; B.S. (2006), Boğaziçi University; M.S. (2008), Middle East Technical University; Ph.D. (2014), Penn State University.

DANIELA BALKANSKA (2009), Assistant Professor of Finance; B.S. (2000), Concord University; Ph.D. (2009), University of California, Irvine.

SANJOY BANERJEE (1990), Professor of International Relations; B.A. (1976), Lehigh University; Ph.D. (1982), Yale University.

DAVID BAO (2007), Professor of Mathematics; B.S. (1976), University of Notre Dame; Ph.D. (1983), University of California, Berkeley.

MICHAEL BAR (2005), Associate Professor of Economics; B.A. (1997), University of Haifa; Ph.D. (2005) University of Minnesota.

SARAH J. BARBER (2014), Assistant Professor of Psychology; B.S. (2003), University of North Carolina at Chapel Hill; M.A. (2005), Ph.D. (2010), Stony Brook University.

LUÍZ C. BARBOSA (1991), Professor of Sociology; B.S. (1982), Southeast Missouri State University; M.A. (1985), University of Oklahoma; Ph.D. (1989), University of Washington.

GEORGE BARGANIER (2014), Assistant Professor of Criminal Justice Studies; B.S. (1999), Grambling State University; M.A. (2002), University of Minnesota; Ph.D. (2011), University of California, Berkeley.

JOANNE BARKER (2003), Associate Professor of American Indian Studies; B.A. (1991), University of California, Irvine; Ph.D. (2000), University of California, Santa Cruz.

CARLOS BARON (1978), Professor Emeritus of Theatre Arts; B.A. (1969), advanced study, University of California, Berkeley; M.A. (1988), San Francisco State University.
ALISON E. BAROODY (2013), Assistant Professor of Child and Adolescent Development; B.S. (2005), University of Illinois; M.S. (2007), Purdue University; Ph.D. (2011), Purdue University.

JOSEPH A. BARRANCO (2007), Associate Professor of Physics and Astronomy; A.B. (1993), Harvard University; Ph.D. (2004), University of California, Berkeley.

JOHN E. BARSOtti (1973), Professor of Broadcast and Electronic Communication Arts; B.A. (1973), San Francisco State University; Ed.D. (1986), University of San Francisco.

PATRICIA BARTSCHER (1983), University Counsel; Associate Professor of Law; B.A. (1975), University of California, Los Angeles; J.D. (1978), Hastings College of the Law; M.A. (1985), University of California, Berkeley.

FRANK T. BAYLISS (1975), Professor of Biology; B.S. (1966), California State University, Long Beach; Ph.D. (1971), University of California, Davis.

BRIAN BEATTY (2003), Associate Professor of Instructional Technologies; B.A. (1983), Marquette University; M.A. (1988), San Francisco State University; Ph.D. (2002), Indiana University.

MATTHIAS BECK (2004), Professor of Mathematics; Staatsexamen & Diplom (1997), Universität Würzburg; Ph.D. (2000), Temple University.

MAZIAR BEHROOZ (2002), Associate Professor of History; B.A. (1982), Saint Mary's College of California; M.A. (1985), San Francisco State University; C.Phil. (1989), Ph.D. (1993), University of California, Los Angeles.

SUSAN BEILAU (2008), Assistant Professor of Art; B.A. (1993), University of California, Santa Cruz; MFA (1999), University of Nebraska, Lincoln.

AARON BELKIN (2009), Professor of Political Science; BA (1988), Brown University; MA (1992), Ph.D. (1998), University of California, Berkeley.

DODIE BELLAMY (2000), Lecturer in Creative Writing; B.A. (1973), M.S. (1977), Indiana University, Bloomington.

JOSEPH FREDERICK BENJAMIN IV (2001), Academic Counselor; New Student Programs; B.A. (1998), San Francisco State University; M.A. (2001), California State University, Hayward.

CAREL BERTRAM (2002), Associate Professor of Humanities; M.A. (1988), University of California, Berkeley; Ph.D. (1998), University of California, Los Angeles.

SUBODH BHAT (1993), Professor of Marketing; B.Com. (1980), M.Com. (1983), Bombay; Ph.D. (1992), University of Georgia.

PETER BIELLA (1999), Professor of Anthropology; B.A. (1972), M.A. (1975), San Francisco State University; Ph.D. (1999), Temple University.

KELVIN BILLINGSLEY (2013), Assistant Professor of Chemistry and Biochemistry; B.S. (2002), University of South Carolina; Ph.D. (2008), Massachusetts Institute of Technology.

LEONHARD BLESIUS (2007), Associate Professor of Geography and Environment; Abitur (1979), Leibniz Gymnasium; M.Sc. (1987), Philips University; Ph.D. (2002), University of Iowa.

NICOLE D. BOLTER (2015), Assistant Professor of Kinesiology; B.S. (2000), University of California, Berkeley; M.S. (2007), University of Virginia; Ph.D. (2010), University of Minnesota, Twin Cities.

DARIUS BOST (2014), Assistant Professor of Sexuality Studies; B.A. (2004), Wake Forest University; M.A. (2005), Wake Forest University; M.A. (2009), Rutgers University-Newark; Ph.D. (2014), University of Maryland-College Park.

KEITH J. BOWMAN (2015), Professor of Mechanical Engineering; Dean of the College of Science and Engineering; B.S. (1981), M.S. (1983), Case Western Reserve University; Ph.D. (1987), University of Michigan.

KATHRYN BOYER (2004), Associate Professor of Biology; B.S. (1988), University of Maryland, College Park; M.S. (1994), San Diego State University; Ph.D. (2002), University of California, Los Angeles.

CHRISTINE BRANDES (2011), Assistant Professor of Music and Dance; B.M. (1986), Ohio State University; M.A. (1994), Case Western Reserve University.

MARCO BRAVO (2005), Associate Professor of Elementary Education; B.A. (1994), Santa Clara University; M.A. (1995), Harvard University; Ph.D. (2003), University of California, Berkeley.

JENNIFER L. BRECKLER (1986), Professor of Biology; B.A. (1975), University of California, Berkeley; Ph.D. (1980), University of California, Los Angeles.

NICOLE BRODSKY (1999), Lecturer in English; B.A. (1994), University of Florida; M.F.A. (1999), San Francisco State University.

YVONNE N. BUI (2014), Professor of Special Education, Professor of Communicative Disorders; B.A. (1994), University of California at Berkeley; M.A. (1997), San Francisco State University; Ph.D. (2002), University of Kansas.

SACHA BUNGE (1990), Professor of Psychology, Dean, Faculty Affairs and Professional Development; B.A. (1975), M.A. (1978), San Francisco State University; M.A. (1986), Ph.D. (1989), University of California, Berkeley.

T. ADAM BURKE (2001), Professor of Health Education/Holistic Health; B.S. (1977), Michigan State University; M.P.H. (1978), University of California, Los Angeles; Ph.D. (1984), University of California, Santa Cruz; L.Ac. (1986), American College of Traditional Chinese Medicine.

TERRENCE BURKE (2005), Athletic Coach; B.A. (1982), University of California.

LAURA W. BURRUS (1996), Professor of Biology; B.S. (1986), College of William and Mary; Ph.D. (1991), University of Wisconsin.

JULIA BURSTEN (2015), Assistant Professor of Philosophy; B.A. (2008), Rice University; M.A. (2010), Ph.D. (2015), University of Pittsburgh.

ANITA CABRERA (1996), Lecturer in English; B.A. (1986), University of California, Berkeley; M.A. (1995), San Francisco State University.

SARITA N. CANNON (2006), Associate Professor of English; A.B. (1998), Harvard University; Ph.D. (2005), University of California, Berkeley.

REBECCA CARABEAZ (2008), Associate Professor of Nursing; B.S. (1987), University of San Francisco; M.S. (1995), University of California, San Francisco; Ph.D. (2003) University of California, San Francisco.

MARTIN CARCIERI (2007), Associate Professor of Political Science; B.A. (1979), California State University, Los Angeles; M.A. (1981), California State University, Los Angeles; J.D. (1986), UC Hastings College of Law; Ph.D. (1997), University of California, Santa Barbara.

JOHN CASKEY (1998), Associate Professor of Geology; B.A. (1987), Humboldt State University; M.S. (1991), Ph.D. (1996), University of Nevada.

NONA CASPERS (2002), Professor of Creative Writing; B.A. (1985), University of Minnesota; M.F.A. (1996), San Francisco State University.

GINA CASTRO (1999), Senior Assistant Librarian; B.A. (1976), University of North Florida; M.L.S., Florida State University; M.A., San Francisco State University.

ALISON CEREZO (2013), Assistant Professor of Counseling; B.A. (2000), University of California, Los Angeles; M.A. (2003), California State University, Los Angeles; Ph.D. (2009), University of Oregon.

NICHOLAS CERTO (1992), Professor of Special Education; B.A. (1970), M.A. (1972), Marquette University; Ph.D. (1976), University of Wisconsin.

JIYOUNG CHA (2014), Assistant Professor of Broadcast and Electronic Communication Arts; B.A. (1998), Catholic University of Korea; M.A. (2004), Syracuse University; Ph.D. (2009), University of Florida.

YEE-HUNG MARK CHAN (2014), Assistant Professor of Biology; B.A. (2001), Harvard University; Ph.D. (2008), Stanford University.

CHUN CHIA CHANG (2007), Associate Professor of Accounting; B.S. (1998), National Taiwan University; M.P.A. (2000), St. Louis University; Ph.D. (2006), University of Houston.

DAVID D. CHAO (1990), Professor of Information Systems; B.S. (1976), National Taiwan University; M.S. (1982), University of Georgia; Ph.D. (1990), University of Washington.

ANOSHUA CHAUDHURI (2003), Professor of Economics; B.A. (1994), Jadavpur University; M.A. (1996), Delhi School of Economics; Ph.D. (2003), University of Washington.

VIVIAN CHÁVEZ (2000), Associate Professor of Health Education; B.A. (1985), Universidad Complutense, Madrid, Spain; B.A. (1985), San Francisco State University; M.PH. (1992), Dr.PH. (1999), University of California, Berkeley.

CHRISTOPHER CHEKURI (2004), Associate Professor of History; B.A. (1997), Ph.D. (2005), University of Wisconsin, Madison.

CHENG CHEN (2009), Associate Professor of Civil Engineering; B.S. (1999), M.S. (2002), Tongji University, Shanghai; Ph.D. (2007), Lehigh University.

JOSEPH CHEN (2006), Associate Professor of Biology; B.S. (1995), Harvey Mudd College; Ph.D. (2001), Harvard University.

LILY CHEN (1998), Professor of Biomedical Laboratory Science; B.S. (1984), National Taiwan University; M.A. (1988), Ph.D. (1991), State University of New York, Buffalo.

VICTORIA CHEN (1999), Professor of Communication Studies; B.A. (1983), Simon Fraser University (British Columbia); M.A. (1985), University of California, Santa Barbara; Ph.D. (1988), University of Massachusetts, Amherst.

YE-MOW CHEN (1984), Professor of Finance; B.A. (1976), National Taiwan University; M.A. (1980), Ph.D. (1984), The Ohio State University.

ZHIGANG CHEN (1998), Professor of Physics; B.S. (1985), Yanzhou Teacher’s College (PRC); M.S. (1988), University of Science and Technology of China; Ph.D. (1995), Bryn Mawr College; Postdoctoral Research Associate, Princeton University.

MIN CHEN (2015), Assistant Professor of Accounting; B.A. (2008), North China University of Technology; M.A. (2011), East Tennessee State University; Ph.D. (2015), Kent State University.

HARRIET CHIANG (1999), Lecturer in Journalism; B.A. (1979), University of California, Berkeley; J.D. (1984), U.C. Hastings, College of Law.

KORY LAWSON CHING (2008), Assistant Professor of English; B.A. (1994), M.A. (1997), University of California, Irvine; Ph.D. (2008), University of Illinois, Urbana-Champaign.

YVETTE L. CHING (1978), Senior Program Coordinator, Educational Opportunity Program; B.A. (1975), advanced study, San Francisco State University.

TENDAI CHITEWERE (2007), Associate Professor of Geography and Environment; B.S. (1995), State University of New York, Oneonta; M.P.S. (1997), Cornell University; Ph.D. (2006), Binghamton University.

STEVE CHOE (2015), Associate Professor of Cinema; A.B. (1997), Brown University; M.A. (2001), University of Pennsylvania; M.Phil. (2002), Universiteit van Amsterdam; Ph.D. (2008), University of California, Berkeley.

SUSAN CHOLETTE (2002), Associate Professor of Decision Sciences; B.S.E. (1989), Princeton University; Ph.D. (1996), Stanford University.

FANGYU CHOU (2005), Associate Professor of Nursing; B.S. (1991), Kaohsiung Medical University; M.S. (1996), University of Michigan; Ph.D. (2002), University of California, San Francisco.
SHIH-CHU CHOU (2016), Assistant Professor of Accounting; B.B.A. (2008), National Taiwan University; M.P.A. (2010), The University of Texas at Austin; Ph.D. (2016), The University of Texas at Dallas.

FATIMA ZAHRACHRIFI ALAOUI (2016), Assistant Professor of Communication Studies; B.A. (2007), Al Akhawayn University; M.A. (2010), Ph.D. (2014), University of Denver.

JULIE A. CHRONISTER (2007), Professor of Counseling; B.A. (1993), Boston University; M.Ed. (1998), University of Massachusetts, Boston; Ph.D., (2004), University of Wisconsin, Madison.

DIANA CHU (2004), Associate Professor of Biology; B.A. (1991), University of California, Berkeley; Ph.D. (1997), University of California, Los Angeles.

HSIO-YUN CHU (2006), Associate Professor of Design and Industry; B.A. (1998), Harvard University; M.S. (2002), Stanford University.

JENSEN CHUNG (1989), Professor of Communication Studies; B.A. (1970), National Chengchi University, Taiwan; M.A. (1976), University of Georgia; Ph.D. (1989), State University of New York, Buffalo.

FRANK CIPRIANO (2000), Adjunct Professor of Biology; B.A. (1979), M.S. (1983), San Jose State University; Ph.D. (1992), University of Arizona.

EMILY CLADER (2016), Assistant Professor of Mathematics; B.A. (2009), Columbia University; Ph.D. (2014), University of Michigan.

HILARY CLARK (2004), Adjunct Professor of Biology; B.S. (1982), B.S. (1988), San Francisco State University; Ph.D. (1993), University of California, Berkeley.

LARRY CLARK (1990), Professor of Cinema; B.S. (1970), Miami University, Ohio; M.F.A. (1977), University of California, Los Angeles.

SOPHIE CLAVIER (2003), Associate Professor of International Relations; B.A. (JD) (1984), M.A. (SJD) (1986), France; M.A. (1993), San Francisco State University; Ph.D. (2003), La Sorbonne, France.

ANDREANA CLAY (2003), Associate Professor of Sociology; B.A. (1993), University of Missouri, Columbia; M.A. (1997), University of Memphis; Ph.D. (2004), University of California, Davis.

KIM COBLE (2016), Associate Professor of Physics and Astronomy; B.A. (1993), University of Pennsylvania; M.S. (1994), Ph.D. (1999), University of Chicago.

WILLIAM COCHLAN (2000), Adjunct Professor of Biology, Research Scientist, Romberg Tiburon Center; B.S. Honors (1978), University of British Columbia; M.S. (1982), Dalhousie University; Ph.D. (1989), University of British Columbia; post-doctoral study (1992), Scripps Institute of Oceanography; (1994), University of Southern California.

BRENDA COCHRANE (1992), Associate Professor of Labor and Employment Studies; B.Ed. (1963), University of Durham, England; B.S. (1975), University of Utah; M.S. (1979, 1983), Ph.D. (1985), University of Oregon.

SARAH COHEN (2003), Associate Professor of Biology; B.A. (1982), Swarthmore College; Ph.D. (1992), University of Washington.

ROY CONBOY (1991), Professor of Theatre Arts, Professor of Creative Writing; B.S. (1974), Eastern New Mexico University; M.F.A. (1976), University of California, Irvine.

EDWARD F. CONNOR (1997), Professor of Biology; B.A. (1974), New College; M.S. (1977), Ph.D. (1979), Florida State University.

JEFFREY T. COOKSTON (2002), Professor of Psychology; B.A. (1992), Southwestern University; M.A. (1997), Ph.D. (2000), University of Texas, Austin.

ADRIENNE COOL (1996), Professor of Physics and Astronomy; B.S. (1984), Yale College; M.S. (1986), Columbia University; Ph.D. (1994), Harvard University.

BARBARA COOPER (1993), Lecturer in English; B.A. (1988), Antioch University West; M.A. (1993), San Francisco State University.

KAREN COOPMAN (1998), Lecturer in English; B.A. (1987), University of California, Berkeley; M.A. (1997), San Francisco State University.

PAOLA CORTES-ROCCA (2007), Associate Professor of Modern Languages and Literatures; Licienatura en Letras (1993), University of Buenos Aires; M.A. (2001), Princeton University; Ph.D. (2005), Princeton University.

SUSAN COUREY (2006), Associate Professor of Special Education; B.S. (1986), Buffalo State College; M.E. (1996), Ph.D. (2006), Vanderbilt University.
DANIELLE COWLEY (2013), Assistant Professor of Special Education; B.S. (2002), Morningside College; M.S. (2004), Ithaca College; Ph.D. (2013), Syracuse University.

ILANA CRISPI (2016), Assistant Professor of Art; B.A. (1999), Brown University; M.F.A. (2006), Mills College.

KAREN CROW-SANCHEZ (2007), Associate Professor of Biology; B.A. (1986), California State University Northridge; M.S. (1995), San Francisco State University; Ph.D. (2003), University of California, Santa Cruz.

TRACY CUMMING (2001), Assistant Athletic Director; B.S. (1991), University of Iowa; M.A. (1995), Kent State University.

LAWRENCE CUMMINS (2009), Athletic Coach; B.A. (1979), Santa Clara University.

SACHI CUNNINGHAM (2012), Assistant Professor of Journalism; B.A. (1994), Brown University; M.J. (2005), University of California, Berkeley.

D

MURRAY DAILEY (2000), Adjunct Professor of Biology, Research Scientist, Romberg Tiburon Center; B.S. (1961), University of Nevada, Reno; M.S. (1964), American University of Beirut (Lebanon); Ph.D. (1966) Colorado State University.

SINA DAMANGIR (2014), Assistant Professor of Marketing; B.S. (2006), M.B.A. (2009), Sharif University of Technology; Ph.D. (2014), University of Houston.

BARBARA DAMASHEK (2003), Associate Professor of Theatre Arts; B.A. (1966), State University of New York, Buffalo NY; M.F.A. (1969), Yale School of Drama.

THOMAS DANIELS (2001), Adjunct Professor of Biology; B.A. (1975), Duke University; Ph.D. (1980), University of Michigan.

JUANITA DARLING (2008), Associate Professor of International Relations; B.A. (1976), California State University, Fullerton; M.A. (1989) University of Southern California; Ph.D. (2006) University of North Carolina, Chapel Hill.

JENNIFER DAUBENMIER (2016), Assistant Professor of Health Education; B.A. (1994), University of Michigan; M.A. (1997), University of California, Berkeley; Ph.D. (2002), University of California, Berkeley.

CARLOS DAVIDSON (2005), Professor of Environmental Studies; B.A. (1982), M.A. (1990), University of California, Berkeley; Ph.D. (2000), University of California, Davis.

MARK ALLAN DAVIS (2016), Assistant Professor of Theatre and Dance; B.A. (2005), University of Massachusetts Amherst; M.F.A. (2007), Smith College.

KURT DAW (2008), Professor of Theatre Arts; B.A. (1977), University of Idaho; M.F.A. (1981), Southern Methodist University; Ph.D. (1996), The Union Institute and University Graduate School.

JOSE ACACIO DE BARROS (2007), Associate Professor of Liberal Studies; B.S. (1988), Federal University at Rio de Janeiro, Brazil; M.S. (1989), Brazilian Center for Research in Physics, Rio de Janeiro, Brazil; Ph.D. (1991), Brazilian Center for Research in Physics, Rio de Janeiro, Brazil.

PETRA DEKENS (2007), Associate Professor of Oceanography; B.A. (1998), University of California, Santa Cruz; M.S. (2000), University of California, Santa Barbara; M.S. (2001), University of California, Santa Barbara; Ph.D. (2007), University of California, Santa Cruz.

VICTOR DE LA ROSA (2006), Associate Professor of Art; B.A. (1999), San Francisco State University; M.F.A. (2001), University of California, Davis; M.F.A. (2004), Rhode Island School of Design.

JOSE R. DE LA TORRE (2008), Assistant Professor of Biology; B.A. (1990), University of California, Berkeley; Ph.D. (1998), University of California, San Francisco.
DAVID P. DEMPSEY (1989), Professor of Meteorology; B.S. (1978), University of California, Davis; Ph.D. (1985), University of Washington.

WILFRED DENETCLOW JR. (2000), Associate Professor of Biology; B.S. (1983), Fort Lewis College; Ph.D. (1991), University of California, Berkeley.

CAROLINA DE ROBERTIS (2016), Assistant Professor of Creative Writing; B.A. (1996), University of California, Los Angeles; M.F.A. (2007), Mills College.

GEOFFREY DESA (2008), Associate Professor of Management; B.S. (1999), Georgia Institute of Technology; M.S. (2001), Stanford University; Ph.D. (2008), University of Washington.

DENNIS E. DESJARDIN (1990), Professor of Biology; B.S. (1983), M.A. (1985), San Francisco State University; Ph.D. (1989), University of Tennessee.

JANE G. DeWITT (1995), Professor of Chemistry; B.S. (1986), University of California, Santa Barbara; Ph.D. (1993), Stanford University.

ROLAND DE WOLK (1993), Lecturer in Journalism; A.B. (1975), University of California, Berkeley.

JANIS DICKINSON (2001), Adjunct Professor of Biology; B.S. (1981), Binghamton University; Ph.D. (1987), Cornell University.

STEVE DICKISON (1999), Lecturer in Creative Writing; B.A. (1980), University of Minnesota, Duluth.

THERESE DOAN (2011), Assistant Professor of Nursing; B.A. (1991), San Francisco State University; M.S. (2007), Ph.D. (2009), University of California, San Francisco.

CARMEN R. DOMINGO (1997), Professor of Biology; B.S. (1987), University of California, Irvine; Ph.D. (1995), University of California, Berkeley.

PATRICIA DONOHUE (2011), Assistant Professor of Instructional Technologies; B.A. (1970), M.A. (1997), San Francisco State University; Ph.D. (2009), University of Hawaii at Manoa.

COURTNEY DONOVAN (2007), Associate Professor of Geography and Environment; B.A. (1998), Syracuse University; M.A. (2001), The University of Arizona; Ph.D. (2008), University of Washington.

TIMOTHY B. D’ORAZIO (1984), Professor of Civil Engineering; B.S. (1975), M.S. (1976), University of Michigan; Ph.D. (1982), University of California, Berkeley.

MARIE DRENNAN (2007), Associate Professor of Broadcast and Electronic Communication Arts; B.A. (1992), Reed College, Portland, Oregon; M.A. (2001), San Francisco State University; M.A. (2003), San Francisco State University; M.F.A. (2007), San Francisco State University.

ROBERT DREWES (2001), Adjunct Professor of Biology; B.A. (1969), San Francisco State University; Ph.D. (1981), University of California, Los Angeles.

ANDREW E. DUBIN (1986), Professor of Educational Administration; B.A. (1972), City College of New York; M.S. (1981), California State University, Fullerton; Ph.D. (1983), Claremont Graduate School.

RICHARD DUGDALE (2000), Adjunct Professor of Biology; Research Scientist, Romberg Tiburon Center; B.S. (1950), M.S. (1951), Ph.D. (1955), University of Wisconsin.

JOZO J. DUMOVIC (1994), Professor of Computer Science; B.S. (1964), M.S. (1973), Ph.D. (1976), University of Belgrade, Yugoslavia.

IRENE F. DULLER (2008), Lecturer in Asian American Studies; B.A. (2000), California State University, Fullerton; M.A. (2005), San Francisco State University.

JEFFREY DUNCAN-ANDRADE (2004), Associate Professor of Latina/Latino Studies, Associate Professor of Equity, Leadership Studies and Instructional Technology; B.A. (1992), M.A. (1997), Ph.D. (2002), University of California, Berkeley.

CHERYL DUNVE (2014), Assistant Professor of Cinema; B.A. (1990), Temple University; M.F.A. (1992), Rutgers University.

DERETHA DuVAL (1993), Clinical Counselor, Counseling and Psychological Services; B.A. (1977), Sonoma State University; M.S. (1979), San Francisco State University.

SHARON L. EATON (1982), Associate Professor of Nursing; B.N.Sc. (1960), Queen’s University; M.S. (1969), University of California, San Francisco; Ed.D. (1984), University of San Francisco.

LAWRENCE EILENBERG (1983), Professor of Theatre Arts; A.B. (1968), Cornell University; M.Phil. (1971), Ph.D. (1975), Yale University.

MICHÉLE J. ELIASON (2007), Professor of Health Education; B.S. (1979), University of Iowa; Ed. S. (1981), University of Iowa; Ph.D. (1984), University of Iowa.

BURCU AKAN ELLIS (2004), Associate Professor of International Relations; B.A. (1994), Bilkent University, Turkey; Ph.D. (2001), American University.

DAVID ELLIS (1979), Professor of Mathematics; B.S. (1964), Hunter College; M.S. (1966), Ph.D. (1969), City University of New York.

JAMIE PEARL ENG (1981), Professor of Decision Sciences; B.S. (1973), Massachusetts Institute of Technology; M.S., Sc.D. (1977), Harvard University.

BETTINA ENGELBRECHT (2008), Assistant Professor of Biology; Diploma (1993), University of Würzburg; Doctorate (1998), University of Darmstadt, Germany; Habilitation (2006), University of Darmstadt, Germany.

ELAHE ENSSANI (1998), Associate Professor of Civil Engineering; B.S. (1976), Sharif (Aryamehr) University of Technology (Iran); M.S. (1978), Eng. (1980), Ph.D. (1987), University of California, Berkeley.

AURA ALEGRA EROY-REVELES (2011), Assistant Professor of Chemistry; B.A. (2001), Amherst College; Ph.D. (2008), University of California, Santa Cruz.

KEVIN ESCHLEMAN (2012), Assistant Professor of Psychology; B.A. (2005), University of California, Santa Cruz; M.S. (2008), Ph.D. (2011), Wright State University, Dayton, OH.

RAYMOND ESQUERRA (2000), Professor of Chemistry; B.S. (1990), Stanford University; Ph.D. (1997), University of California, Santa Cruz.

YANAN FAN (2006), Associate Professor of Secondary Education; B.A. (1992), Capital Normal University, Beijing, China; M.A. (2000), Beijing Normal University, Beijing, China; Ph.D. (2006), Michigan State University.

BOBBY FARLICE (1988), Clinical Counselor, Counseling and Psychological Services; B.A. (1978), Antioch University; M.A. (1999), San Francisco State University.

TODD FELDMAN (2009), Assistant Professor of Finance; B.S. (1999), State University of New York, Binghamton; M.S. (2004), University of California, Davis; M.A. (2006), Ph.D. (2009), University of California, Santa Cruz.

NIXORA M. FERMAN (2008), Academic Counselor, Undergraduate Advising Center; B.A. (1999), San Francisco State University; M.S. (2003), California State University, Long Beach.

JOSE RAMÓN FERNANDEZ-Peña (2004), Associate Professor of Health Education; M.D., School of Medicine, National Autonomous University of Mexico.

BO FERNS (2006), Associate Professor of Hospitality and Tourism Management; B.A. (1996), Ocean University of Qingdao, China; M.A. (1999), School of Tourism Economics and Management Tourism Institute of China; M.S. (2003), Ph.D., Purdue University.

EUGENIO FERRARI (2000), Adjunct Professor of Biology; B.A. (1966), Ginnasio-Liceo "L.A. Muraton" (Italy); Ph.D. (1974), University of Pavia (Italy).

JASON FERREIRA (2005), Associate Professor of Race and Resistance Studies; B.A. (1992), University of Illinois, Urbana-Champaign; M.A. (1995), Ph.D. (2003), University of California, Berkeley.

MARIANA FERREIRA (2003), Professor of Liberal Studies; B.A. (1988), M.A. (1992), Universidade de Sao Paulo, Brazil; Ph.D. (1996), University of California, Berkeley and San Francisco.

CHARLOTTE FERRETTI (1992), Professor of Nursing, Director, Marian Wright Edelman Institute; B.S. (1980), University of San Francisco; M.S. (1983), University of California, San Francisco; Ed.D. (1991), University of San Francisco.

RICHARD FESTINGER (1990), Professor of Music; B.M. (1976), San Francisco State University; M.A. (1978), Ph.D. (1983), University of California, Berkeley.

GLENN E. FIELDNAN (1990), Associate Professor of Environmental Studies; B.A. (1976), Metropolitan State College, Denver; M.A. (1980), University of Colorado, Denver; Ph.D. (1980), University of Denver.

ALEXIS FILIPPINI (2007), Assistant Professor of Special Education; B.A. (2002), University of California, Santa Barbara; M.A. (2005), University of California, Santa Barbara; Ph.D. (2007), University of California, Santa Barbara.

CHRISTOPHER FINLEY (2011), Assistant Professor of Art; B.F.A. (1993), Art Center College of Design.

DEBRA FISCHER (2003), Adjunct Professor of Physics and Astronomy; B.S. (1975), University of Iowa; M.S. (1992), San Francisco State University; Ph.D. (1998), University of California, Santa Cruz.

DAWN-ELISSA FISCHER (2008), Associate Professor of Africana Studies; B.A. (1999), Washington University; St. Louis; M.A. (2002), University of Florida.

BRIAN FISHER (2001), Adjunct Professor of Biology; B.A. (1988), University of Iowa; M.S. (1992), University of Utah; Ph.D. (1996), University of California, Davis.

ALAN FISK (1992), Acting Director and WorkAbility IV Coordinator; Career Center; B.A. (1989), M.S. (1992), San Francisco State University.

MAUREEN FITZGERALD (2000), Lecturer in English; B.A. (1992), University of California, Santa Barbara; M.A. (1999), San Francisco State University.

SANDRA D. FITZGERALD (2013), Assistant Professor of Counseling; B.A. (1997), University of California, Santa Cruz; M.S. (2008), San Diego State University; Ph.D. (2013), University of Wisconsin, Madison.

IFETAYO M. FLANNERY (2016), Assistant Professor of Africana Studies; B.S. (2009), Georgia State University; M.A. (2011), State University of New York, Albany; Ph.D. (2016), Temple University.

DORIS FLOWERS (1991), Professor of Equity; Leadership Studies and Instructional Technology; B.S. (1980), M.S. (1982), University of the District of Columbia; Ph.D. (1990), University of Virginia.

HALCYON FOSTER (2008), Assistant Professor of Elementary Education; B.A., B.S. (1992), Nebraska Wesleyan University; M.M. (1997), Florida State University; Ph.D. (2004), Illinois State University.

VALERIE FRANCISCO-MENCHAVEZ (2016), Assistant Professor of Sociology; B.A. (2006), San Francisco State University; M.A. (2009), Ph.D. (2012), City University of New York, The Graduate Center.

AMBER FRIESEN (2012), Assistant Professor of Special Education; B.A./B.Ed (2003), University of Lethbridge; M.Ed.(2008), Ph.D. (2011), Indiana University.

DAVID FROST (2009), Assistant Professor of Sexuality Studies; B.A. (2003), State University of New York; M.A.(2006), M.Phil (2007), Ph.D. (2009), City University of New York.

JON FUNABIKI (2006), Professor of Journalism; B.A. (1972), San Francisco State University.

ROBERT A. FUNG (1990), Lecturer in Asian American Studies; B.A. (1976), University of California, Davis; M.A. (1978), Goddard College; J.D. (1983), New College of California School of Law.

MEGUMI FUSE (2000), Associate Professor of Biology; B.S. (1987), University of Toronto; M.S. (1990), York University; Ph.D. (1998), University of Toronto.

G

ROBERT S. GABRNER (2009), Professor in Ed. D Program in Educational Leadership; B.A. (1963), Cornell University; M.A. (1966), University of Wisconsin; Ed.D. (1997), University of California, Berkeley.

CONNIE MARIE GAGLIO (1997), Associate Professor of Management; B.A. (1975), State University of New York, Brockport; Ph.D. (1997), University of Chicago.

ANNE GALJOUR (2001), Lecturer in Creative Writing; B.A. (1980), Nicholl's State University.

AHMAD R. GANJI (1987), Professor of Mechanical Engineering; B.S. (1973), Sharif (Arayeh) University of Technology (Tehran, Iran); M.S. (1975), Ph.D. (1979), University of California, Berkeley.

OSWALDO GARCIA (1989), Professor of Meteorology; B.S. (1969), Columbia University; M.S. (1972), Ph.D. (1976), State University of New York, Albany.

MARCELA GARCÍA-CASTAÑO (2013), Assistant Professor of Political Science; B.A. (2007), University of Arizona; M.A. (2009), Ph.D. (2013), University of Washington.

DAVID GARD (2005), Professor of Psychology; B.A. (1992), University of California, Irvine; M.S. (1996), San Francisco State University; Ph.D. (2004), University of California, Berkeley.

JESSE D. GARNER (2013), Associate Professor of Journalism; B.A. (2010), San Francisco State University.

GEORGE GASSNER (2000), Professor of Chemistry; B.S. (1989), University of Minnesota; Ph.D. (1995), University of Michigan, Ann Arbor.

DON RICO GELERA (2009), Tutorial Coordinator; Educational Opportunity Program; B.S. (1990), San Francisco State University; M.S. (2009), San Francisco State University.

SHELDON GEN (2003), Associate Professor of Public Administration; B.S. (1990), California Polytechnic State University, San Luis Obispo; M.P.A. (1995), University of Southern California; Ph.D. (2004), Georgia Institute of Technology.

GRETCHEN LYNN GEORGE (2013), Assistant Professor of Consumer and Family Studies/Dietetics; B.S. (2000), California Polytechnic State University, San Luis Obispo; M.A. (2002), Appalachian State University; Ph.D. (2013), University of California, Davis.

ALEXANDER GEROULD (2012), Assistant Professor of Criminal Justice Studies; B.A. (1989), San Francisco State University; J.D. (1992), University of San Francisco; M.A. (2001), San Francisco State University.

SHAWN GINWRIGHT (2004), Associate Professor of Africana Studies; B.A. (1989), M.A. (1992), San Diego State University; Ph.D. (1999), University of California, Berkeley.

SUGIE GOEN-SALTER (1997), Professor of English; B.A. (1981), University of California, Berkeley; M.A. (1992), San Francisco State University; Ph.D. (1997), Stanford University.

MINDI GOLDEN (2006), Associate Professor of Communication Studies; B.A. (1992), Humboldt State University; M.A. (1995), San Jose State University; Ph.D. (2005), University of Utah.

MICHAEL A. GOLDMAN (1988), Professor of Biology; B.A. (1976), University of Rochester; Ph.D. (1981), Purdue University.

MAARTEN GOLTENMAN (2001), Professor of Physics; Doctoral Exam (1983), University of Utrecht; Ph.D. (1986), University of Amsterdam.

RICARDO GOMES (1992), Professor of Design and Industry; B.A. (1980), Massachusetts College of Art; M.F.A. (1984), University of California, Los Angeles.

DANIEL P. GONZALES (1971), Professor of Asian American Studies; B.A. (1974), San Francisco State University; J.D. (1977), Hastings College of Law.

MARTIN M. GONZALEZ (1996), Professor of Broadcast and Electronic Communication Arts; B.A. (1978), California State University, Chico; M.A. (1993), Ohio State University.

KATHERINE GORDY (2008), Assistant Professor of Political Science; B.A. (1993), State University of New York at Albany; Ph.D. (2005), Cornell University.

MARTHA GORZYCKI (2002), Professor of Cinema; B.A. (1984), Yale University; M.F.A. (2002), San Francisco State University.

TERRY GOSLINER (2001), Adjunct Professor of Biology; B.A. (1972), University of California, Berkeley; M.S. (1973), University of Hawaii; Ph.D. (1978), University of New Hampshire.

MARGARET GOULD BURKE (2004), Adjunct Professor of Biology; B.A. (1974), Hollins College; Ph.D. (1979), Duke University.

NELSON GRAFF (2003), Associate Professor of English; B.A. (1990), San Jose State University; M.A. (1996), Ph.D. (2000), University of Wisconsin, Madison.

ZAKARIAS GRAFILO (2002), Adjunct Professor of Music; B.A. (2000), San Francisco State University; Member, Alexander String Quartet.

MICHAEL A. GRAHAM (1984), Professor of Political Science; B.A. (1966), M.A. (1974), Oklahoma State University; Ph.D. (1982), University of California, Santa Barbara.

ELIZABETH GRAY (2002), Adjunct Professor of Biology; B.A. (1987), Harvard University; Ph.D. (1994), University of Washington.

TERESA GRAY (2015), Assistant Professor of Special Education; B.A. (2000), University of California Santa Cruz; M.A. (2008), San Jose State University; Ph.D. (2015), Boston University.

FREDERIK H. GREEN (2012), Associate Professor of Modern Languages and Literatures; B.A.(Hons) (2000), Cambridge University; M.Phil. (2004), Ph.D. (2009), Yale University.

JOHN GREENLEAF (2000), Adjunct Professor of Biology; B.S. (1955), University of Illinois; M.A. (1956), New Mexico Highland University; M.S. (1962), Ph.D. (1963), University of Illinois.

JEFFREY P. GREENSITE (1984), Professor of Physics; B.S. (1972), University of California, San Diego; Ph.D. (1980), University of California, Santa Cruz.

LINFIELD GREER (1977), Academic Counselor, Undergraduate Advising Center; B.A. (1977), M.S. (1991), San Francisco State University.

MARK C. GRIFFIN (1998), Associate Professor of Anthropology; B.A. (1985), University of North Carolina at Wilmington; M.A. (1989), Northern Illinois University; Ph.D. (1993), Purdue University.
CHARLES GRISWOLD (1998), Adjunct Professor of Biology; B.S. (1972), M.S. (1977), Ph.D. (1983), University of California, Berkeley.

IOSEB GUBELADZE (2003), Professor of Mathematics; M.A. (1983), Tbilisi University; Ph.D. (1985) Leningrad University; Habilitation (1990), Sanct Petersburg State University.

CLAUDIA GUedes (2005), Associate Professor of Kinesiology; B.S. (1989), Federal University of Juiz de Fora, Brazil; M.S. (1995); Ph.D. (2002), State University of Campinas, Brazil.

JANE GUERIN (1989), Lecturer in English; B.A. (1952), Geneva College; M.A. (1977), San Francisco State University.

OSCAR GUERRA-NUNEZ (2015), Assistant Professor of Broadcast and Electronic Communication Arts; M.S. (2010), Tecnologico de Monterrey University, Mexico City; Ph.D. (2014), University of North Carolina at Chapel Hill.

ANTON GULIJAIC (2007), Associate Professor of Chemistry and Biochemistry; M.S. (1993), Moscow State University, Moscow, Russia; Ph.D. (1999), Bowling Green State University.

QIAN GUO (1998), Associate Professor of Geography and Environment; B.S. (1982), M.S. (1987), Beijing Normal University; Ph.D. (1996), University of Tennessee, Knoxville.

SUIJAN GUO (2002), Professor of Political Science; B.A. (1983), University of International Business and Economy, Beijing, China; M.A. (1987), Peking University, China; M.A. (1993), Marquette University; Ph.D. (1999), University of Tennessee.

DAVID GUTNICK (2004), Adjunct Professor of Biology; B.S. (1961), M.S. (1963), University of California, Davis; Ph.D. (1967), University of Southern California; post doctoral training (1967-69), NIH.

KATHRYN A. HAMEL (2005), Associate Professor of Kinesiology; B.S. (1996); M.S. (1998), State University of New York at Buffalo; Ph.D. (2002), Pennsylvania State University.

MICHAEL HAMMER (2003), Associate Professor of Modern Languages and Literatures; B.A. (1991), M.A. (1997), Brigham Young University; Ph.D. (2003), University of California, Los Angeles.

XUE (SNOW) HAN (2016), Assistant Professor of Finance; B.B.A. (2007), Remin University of China; M.S. (2009), Washington University in St. Louis; Ph.D. (2016), University of Georgia.

LAWRENCE HANLEY (2008), Professor of English; B.A. (1983), Franklin and Marshall College; Ph.D. (1993), University of Illinois, Urbana-Champaign.

WENDEL HANNA (2002), Associate Professor of Music; B.A. (1985), University of South Florida; M.A. (1987), Yale University; Ph.D. (2000), University of Oregon, Eugene.

MARCI HANSON (1982), Professor of Special Education; B.S. (1970), University of Oregon; M.S. (1974), Pennsylvania State University; Ph.D. (1978), University of Oregon.

CAROLINE D. HARNLY (1982), Librarian; B.A. (1973), McPherson College; M.S. Librarianship (1974), Western Michigan University.

JASON HARRIS-BOUNDY (2005), Assistant Professor of Management; B.S. (1990), M.B.A. (1993), Brigham Young University; Ph.D. (2006), University of Washington.

RICHARD HARVEY (2005), Associate Professor of Health Education/Holistic Health; B.A. (1981), University of California, Santa Cruz; M.A. (1997), San Francisco State University; Ph.D. (2005), University of California, Irvine.

HAMED HASHMINIA (2013), Assistant Professor of Decision Sciences; B.Sc. (2003), University of Tehran; M.Sc. (2005), Sharif University of Technology; M.A. (2007), University of British Columbia; Ph.D. (2012), University of British Columbia.

RON HAYDUK (2016), Associate Professor of Political Science; B.A. (1981), B.S.W. (1981), Rutgers University; Ph.D. (1996), Graduate Center of the City University of New York.
ZHENG-HUI HE (1997), Professor of Biology; B.S. (1983), Hunan Agricultural University (China); M.S. (1986), South China Agricultural University; Ph.D. (1994), University of Virginia.

MORRIS HEAD (1984), Senior Coordinator, Campus Academic Resource Program; B.S. (1973), M.Ed. (1976), Southern University; advanced study, Washington State University.

BARBARA HENDERSON (1998), Professor of Elementary Education; B.A. (1984), Haverford College; Ph.D. (1996), Stanford University.

LOGAN HENNESSY (2007), Associate Professor of Liberal Studies; B.A. (1996), Boston University; M.S. (2000), University of California, Berkeley; Ph.D. (2005), University of California, Berkeley.

SIBYLLA HERBRICH (1999), Lecturer in Journalism; A.A. (1982), Maximilian’s Junior College (Germany).

GILBERT H. HERDT (1998), Professor of Sexuality Studies, Professor of Anthropology; B.A. (1971), M.A. (1972), California State University, Sacramento; M.A. (1973), University of Washington; Ph.D. (1978), Australian National University.

KATHERINE M. HETHERINGTON (2014), Assistant Professor of Accounting; B.A. (1999), Pomona College; J.D. (2005), University of Washington School of Law; LL.M. (2008), University of Florida Levin College of Law.

KIRSTEN HILBERT (2002), Lecturer in English; B.A. (1991), University of California, Los Angeles; M.A. (2000), San Francisco State University.

CYDNEY HILL (2004), Senior Assistant Librarian; B.A. (1975), School of Theology, Seattle Pacific University; M.L.I.S. (2003), San Jose State University.

MARIKO HINGSTON (1985), Career Counselor, Career Center; B.A. (1975), University of Colorado; M.S. (1996), San Francisco State University.

FOO NIN HO (1993), Professor of Marketing; B.S. (1985), College of the Ozarks; M.B.A. (1987), University of Central Arkansas; Ph.D. (1993), University of Mississippi.

NGA HO-DAC (2014), Assistant Professor of Marketing; B.E. (1998), Ho Chi Minh City University of Technology; M.B.A (2001), Asian Institute of Technology; Ph.D. (2012), University of Utah.

JOHN HODGES (2000), Adjunct Professor of Computer Science; B.S. (1976), M.S. (1978), University of Michigan; Ph.D. (1993), University of California, Los Angeles.

COLLEEN HOFF (2008), Professor of Sexuality Studies; B.A. (1986), San Francisco State University; M.A. (1992), Ph.D. (1994), California School of Professional Psychology.

BRADLEY HOGARTH (2015), Assistant Professor of Music; B.M. (2008), Eastman School of Music; M.M. (2012), San Francisco Conservatory of Music.

SARAH HOLLEY (2011), Assistant Professor of Psychology; B.A. (1999), Yale University; M.A. (2006), Ph.D. (2010), University of California, Berkeley.

MARLON HOM (1986), Professor of Asian American Studies; B.A. (1970), San Francisco State University; M.A. (1972), Indiana University; Ph.D. (1979), University of Washington.

SUNGYEE HONG (2007), Associate Professor of Special Education; B.A. (1996), Taegu University, Korea; M.A. (1998), University of Arizona; Ph.D. (2002), University of Arizona.

PAMELA HOOD (1998), Associate Professor of Philosophy; B.A. (1989), San Jose State University; M.A. (1992), San Francisco State University; Ph.D. (2001), Claremont Graduate University.

PAUL HOOVER (1999), Professor of Creative Writing; B.A. (1968), Manchester College; M.A. (1973), University of Illinois.

LAWRENCE HORVATH (2009), Associate Professor of Secondary Education; B.S. (1984), University of California, Davis; M.A. (1994), California State University, San Francisco.

PAMELA HOWARD (2005), Associate Librarian; M.S. (1984), University of Florida, Gainesville; M.L.I.S. (2003), San Jose State University

RYAN HOWELL (2007), Associate Professor of Psychology; B.S. (1998), Westmont College, Santa Barbara; M.A. (2002), University of California, Riverside; Ph.D. (2005), University of California, Riverside.

JULIAN D. HOXTER (2008), Associate Professor of Cinema; B.A. (1987), M.A. (1989), University of East Anglia; advanced studies (1990-93), University of California, Los Angeles.

TSAI-HSING HSIA (1995), Associate Professor of Special Education; B.A. (1979), Toochow University, Taipei; M.S. (1982), Indiana University; Ph.D. (1993), University of Oregon.

PING HSIAO (1989), Professor of Finance; L.L.B. (1981), National Taiwan University; M.A. (1983), Sonoma State University; Ph.D. (1989), University of Southern California.

SU-JANE HSIEH (1992), Professor of Accounting; B.L. (1978), National Chengchi University; M.A. (1980), The University of Nebraska; Ph.D. (1985), Purdue University.

PI-CHING HSU (1994), Professor of History; B.A. (1982), National Taiwan University; M.A. (1990), Ph.D. (1994), University of Minnesota.

WILLIAM TSUN-YUK HSU (1992), Professor of Computer Science; B.S. (1983), M.S. (1985), Purdue University; Ph.D. (1992), University of Illinois.

JIUNN C. HUANG (1986), Professor of Accounting; B.C. (1971), National Chengchi University; M.B.A. (1976), West Texas State University; Ph.D. (1980), North Texas State University; C.M.A. (1983).

CHARMAYNE MARY LEE HUGHES (2015), Health Equity Institute Associate Professor of Kinesiology; B.Sc. (2002), Tri-State University; M.A. (2005), San Diego State University; Ph.D. (2010), Purdue University.

PAMELA C. HUNT (1995), Professor of Special Education; B.A. (1975), University of California, Berkeley; M.A. (1980), San Francisco State University; Ph.D. (1988), San Francisco State University and University of California, Berkeley.

JOSEPH HUNTER (1990), Athletic Coach; B.S. (1987), Sonoma State; M.S. (1994), San Francisco State University.

DOUG HUPKE (1992), Assistant Athletic Director; B.A. (1987), University of San Francisco; M.S. (1992), San Francisco State University.

YADIRA IBARRA (2016), Assistant Professor of Earth and Climate Sciences; B.A. (2009), Brown University; Ph.D. (2014), University of Southern California.

DINA A. IBRAHIM (2003), Associate Professor of Broadcast and Electronic Communication Arts; B.A. (1994), M.A. (1996), The American University in Cairo; Ph.D. (2003), University of Texas at Austin.

ANDREW S. ICHIMURA (2001), Associate Professor of Chemistry and Biochemistry; B.S. (1986), Bates College; Ph.D. (1992), University of Massachusetts.

FREDERICK W. ISAACSON (1982), Associate Professor of Communication Studies; B.A. (1968), M.A. (1970), San Francisco State College; Ph.D. (1973), University of Denver.

NINA JABLONSKI (1998), Adjunct Professor of Biology; B.A. (1975), Bryn Mawr College; Ph.C. (1978), Ph.D. (1981), University of Washington.

PATRICIA JACKSON (2003), Professor of Cinema; B.A. (1968), Stanford University.

CARRIE J. JACOBSON (2014), Assistant Professor of Nursing; B.A. (1995), Stanford University; M.S. (2003), Ph.D. (2014), University of California San Francisco.

JEFF JACOBY (2006), Associate Professor of Broadcast and Electronic Communication Arts; B.A. (1978), The Evergreen State College; M.F.A. (2006), Art Institute of Boston at Lesley University.

KRISTAN JENSEN (2015), Assistant Professor of Physics; B.S. (2005), University of Puget Sound; Ph.D. (2010), University of Washington.

SCOTT JERRIS (1997), Professor of Accounting; B.S. (1982), State University of New York, Albany; Ph.D. (1987), Purdue University.

HAO JIANG (2007), *Associate Professor of Computer and Electrical Engineering;* B.E. (1994), Tsinghua University, Beijing, China; Ph.D. (2000), University of California, San Diego.

ZHAOSHUO JIANG (2014), *Assistant Professor of Civil Engineering;* B.A. (2003), Guangzhou University, Guangzhou; M.S. (2006), University of Connecticut; Ph.D. (2012), University of Connecticut.

COLIN JOHNSON (2008), *Professor of Hospitality and Tourism Management;* B.A. (1986), Open University, UK; M.B.A. (1991), University of Manchester, UK; Ph.D. (2002), Fribourg University, Switzerland.

SUSANNA JONES (2016), *Director of Social Work, Professor of Social Work;* B.A. (1991), California State University, Northridge; M.S.W. (1993), San Jose State University; Ph.D. (2005), City University of New York, Graduate Center.

ANDREW JORON (2014), *Assistant Professor of Creative Writing;* B.A. (1979), University of California at Berkeley.

ALAN JUNG (1989), *Interim Associate Vice President of Academic Resources, Professor of Finance;* B.S. (1975), M.S. (1977), University of California, Berkeley; M.B.A. (1982), San Francisco State University; Ph.D. (1990), University of California, Berkeley.

RACHELE KANIGEL (2004), *Associate Professor of Journalism;* B.A. (1983), San Francisco State University; M.S. (2002), Columbia University, Graduate School of Journalism.

DAVID H. KAVANAUGH (1998), *Adjunct Professor of Biology;* B.A. (1967), San Jose State University; M.A. (1970), University of Colorado; Ph.D. (1978), University of Alberta (Canada).

SUSAN KAZARIAN (2011), *Clinical Education Coordinator, Associate Program Director;* B.A. (1977), San Francisco State University; M.A. (1997), Golden Gate University.

MARTHA KENNEY (2014), Assistant Professor of Women and Gender Studies; B.A. (2006), University of King’s College; Ph.D. (2013), University of California, Santa Cruz.

MARILICE KERN (1994), Professor of Kinesiology; B.A. (1979), University of California, Berkeley; M.A. (1981), University of California, Davis; Ph.D. (1987), University of California, Berkeley.

MINA KIM (2007), Associate Professor of Elementary Education; B.A. (1995), M.S. (1997), Sungkyunkwan University, Seoul, Korea; Ph.D. (2005), Indiana University, Bloomington.

MI-SOOK KIM (1999), Interim Dean, Division of Graduate Studies, Professor of Kinesiology; B.A. (1990), M.S. (1992), Chung-Ang University; Ph.D. (1999), Purdue University.

JUNSE KIM (2009), Lecturer in Creative Writing; B.S. (1990), University of Illinois, Urbana-Champaign; M.F.A. (2000), Goddard College.

WILLIAM J. KIMMERER (1991), Adjunct Professor of Biology, Research Scientist, Romberg Tiburon Center; B.S. (1967), Purdue University; Ph.D. (1980), University of Hawaii.

ANITA KITSEES (1985), Lecturer in English; B.A. (1964), University College of Swansea, United Kingdom; M.A. (1991), San Francisco State University.

ANNE KOCH (2009), Assistant Professor of Management; B.A. (1993), MA (1998), Ph.D. (2003), University of Lüneburg.

PATRICK KOCIOLEK (2001), Adjunct Professor of Biology; B.S. (1980), St. Mary’s College of Maryland; M.S. (1982), Bowling Green State University; Ph.D. (1988), University of Michigan.

KIM KOMENIC (2015), Assistant Professor of Journalism; B.A. (1979), San Jose State University; M.A. (2007), University of Missouri.

ALBERT KOO (1998), Associate Director of Graduate Programs, College of Business; B.A. (1996), San Francisco State University; Ed. M. (1997), Harvard University.

STEVEN KOVACS (1990), Professor of Cinema; B.A. (1968), Yale College; M.A. (1970), Ph.D. (1973), Harvard University.

CATHERINE KUDLICK (2012), Professor of History, Director, Paul K. Longmore Institute on Disability; B.A. (1980), University of California, Santa Cruz; M.A. (1983), Ph.D. (1988), University of California, Berkeley.

MISTY L. KUHN (2014), Assistant Professor of Chemistry and Biochemistry; B.A. (2002), Hanover College; Ph.D. (2009), Loyola University Chicago.

ANAGHA K. KULKARNI (2013), Assistant Professor of Computer Science; B.E. (2001), University of Pune, India; M.S. (2006), University of Minnesota; Ph.D. (2013), Carnegie Mellon University.

MINU KUMAR (2007), Assistant Professor of Marketing; B.S. (1996), Bangalore University, Bangalore; M.B.A (2002), Ph.D. (2008), University of Mississippi.

KWONG-LIEN KARL KWAN (2008), Associate Professor of Counseling; B.A. (1988), M.S. (1990), Illinois State University; Ph.D. (1996), University of Nebraska, Lincoln.

WAI-LEUNG KWOK (1990), Associate Professor of English; B.A. (1977), Kenyon College; Ph.D. (1990), University of California, Irvine.

JUDITH KYSH (2000), Professor of Mathematics, Professor of Secondary Education; B.A. (1962), M.A. (1965), University of California, Berkeley; Ph.D. (1999), University of California, Davis.

MARIE-PAUL LADEN (2000), Associate Professor of Modern Languages and Literatures; Licence d’anglais (1968), Maîtrise d’anglais (1970), Université de Bretagne Occidentale; Ph.D. (1980), Brown University.

ERIC LAMM (2007), Associate Professor of Management; B.A. (1995), Brandeis University; M.S. (2005), Boston College; Ph.D. (2007), Boston College.

DAVID LANDY (2009), Associate Professor of Philosophy; B.A. (2001), Bard College; M.A. (2003), Ph.D. (2008), University of North Carolina at Chapel Hill.

JEAN-PIERRE LANGLOIS (1984), Professor of Mathematics; C.E.A. (1975), Université Pierre et Marie Curie (Paris), Ph.D. (1982), University of California, Berkeley.

DANIEL J. LANGTON (1967), Professor of English, Professor of Creative Writing; B.A. (1952), M.A. (1954), San Francisco State University; Ph.D. (1970), University of California, Berkeley.

DANIEL LANGTON (1967), Professor of Creative Writing; B.A. (1952), M.A. (1954), San Francisco State University; Ph.D. (1970), University of California, Berkeley.

CHRISTY LAO (2001), Associate Professor of Elementary Education; B.A. (1986), Jinan University, China; M.S. (1990), Ph.D. (1993), University of Southern California.

PAVLINA LATKOVA (2008), Assistant Professor of Recreation, Parks, and Tourism; B.S. (2001), California State University Sacramento; M.S. (2003), California State University Sacramento; Ph.D. (2008), Michigan State University.

JENNY LAU (2001), Professor of Cinema; B.S. (1976), University of Hong Kong; M.A. (1981), Bowling Green State University; Ph.D. (1989), Northwestern University.

JANELLE LAWSON (2015), Assistant Professor of Special Education; B.A. (2006), University of California, Los Angeles; M.A. (2011), California State University, Los Angeles; Ph.D. (2015), California State University, Los Angeles and University of California, Los Angeles.

MAI-NHUNG LE (1997), Professor of Asian American Studies; B.A. (1990), University of California, Davis; M.P.H. (1992), Yale University; DrPH. (2002), University of California, Berkeley.

SERGEY LEBEDEV (2016), Assistant Professor of International Business; B.S. (2007), M.S. (2009), Moscow State University; Ph.D. (2016), University of Texas at Dallas.

GRETHEN LeBUHN (2000), Professor of Biology; B.A. (1984), Vanderbilt University; M.S. (1991), University of Connecticut; Ph.D. (1998), University of California, Santa Barbara.

JENNY LEDERER (2014), Assistant Professor of English; B.A. (1999), University of California, Santa Cruz; M.A. (2003), Ph.D. (2009), University of California, Berkeley.

JONATHAN H.X. LEE (2009), Associate Professor of Asian American Studies; B.A., B.S. (1999), University of California, Riverside; M.A. (2002), Graduate Theological Union and Pacific Lutheran Theological Seminary; Ph.D. (2009), University of California, Santa Barbara.

MATTHEW LEE (2001), Professor of Kinesiology; B.S. (1995), University of Western Louisiana; Ph.D. (2001), Louisiana State University.

MING-YEH LEE (1999), Professor of Equity, Leadership Studies and Instructional Technology; B.A. (1989), National Chengchi University, Taiwan; M.Ed. (1992), University of Illinois, Urbana-Champaign; Ed.D. (1997), University of Georgia.

STEVEN LEE (2000), Adjunct Professor of Biology; B.S. (1981), State University of New York, Binghamton; M.S. (1984), New York University; Ph.D. (1990), University of California, Berkeley.

JIHYUN LEE (2016), Assistant Professor of Kinesiology; B.A. (2005), M.S. (2007), Seoul National University; Ph.D. (2013), The Ohio State University.

MARY L. LEECH (2005), Associate Professor of Geology; B.S. (1994), San Jose State University; Ph.D. (1999), Stanford University.

WILLIAM LENARZ (2000), Adjunct Professor of Biology; B.S. (1963), Humboldt State University; M.S. (1965), Ph.D. (1969), University of Washington.

SONJA LENZ-RASHID (2003), Associate Professor of Social Work; M.S.W. (1998), San Jose State University; Ph.D. (2003), University of California, Berkeley.

ANDREW LEVINE (1988), Lecturer in English; B.A. (1977), York University; M.A. (1991), San Francisco State University.

BARRY A. LEVINE (1981), Professor of Computer Science; B.S. (1970), University of Illinois; M.S. (1974), California State University, Chico; Ph.D. (1979), Oregon State University.

ALAN LEVITON (2001), Adjunct Professor of Biology; B.A. (1949), M.A. (1953), Ph.D. (1960), Stanford University.

MATT LEVY (2013), Assistant Professor of Information Systems; B.B.A. (1999), Texas Tech University; M.B.A. (2007), San Diego State University; Ph.D. (2013), Louisiana State University.

JULIA M. LEWIS (1984), Professor of Psychology; B.A. (1973), University of Minnesota; M.A. (1974), Ph.D. (1979), University of California, Los Angeles.

CHRIS WEN-CHAO LI (2000), Professor of Modern Languages and Literatures; B.S. (1990), National Taiwan University; M.Phil (1992), D.Phil (1997), Oxford University.

DONGLIN LI (2004), Associate Professor of Finance; B.E. (1993), Tsinghua University; M.E. (1996), University of International Business and Economics; Ph.D. (2004), University of California, Berkeley.

GEORGE Li (2004), Professor of Finance; B.S. (1985), Northwestern University; M.S. (1992), Carnegie Mellon University; Ph.D. (2002), University of California, Berkeley.

WEN-WEN Li (2008), Associate Professor of Nursing; B.S. (1994), National Taiwan University; M.S. (1998), University of Washington; Ph.D. (2004) University of California, San Francisco.

CHENWEI Li (2016), Assistant Professor of Management; B.A. (2005), Nankai University; M.A. (2007), Peking University; Ph.D. (2013), The University of Alabama.

HSIN-YA LIAO (2008), Assistant Professor of Counseling; B.S. (1995), National Taiwan University; M.A. (1998), New York University; Ph.D. (2006), University of Illinois at Urbana-Champaign.

FRED LIFGITZ (1989), Adjunct Professor of Music; advanced study, Indiana University and the Tanglewood School of Music; member, Alexander String Quartet.

SHENGLE LIN (2012), Assistant Professor of Finance; B.A. (2006), Dalian University of Technology; M.A. (2008), Ph.D. (2009), George Mason University.

MARTHA LINCOLN (2016), Assistant Professor of Anthropology; B.A., Hampshire College; Ph.D. (2013), Graduate Center of the City University of New York.

NEIL LINDEMAN (2005), Associate Professor of Technical and Professional Writing; B.A. (1994), M.A. (1997), Brigham Young University; Ph.D. (2005), Iowa State University.

SILVAN LINN (2012), Assistant Professor of Industrial Design; B.I.D. (2008), Carleton University; M.S.D. (2011), Arizona State University.

MATT LIPPS (2010), Assistant Professor of Art; B.F.A. (1998), California State University, Long Beach; M.F.A. (2004), University of California, Irvine.

SHUMING LIU (2007), Associate Professor of Finance; B.S. (1995), Nanjing University of Science and Technology, China; M.S. (1998), The Graduate School of the People’s Bank of China, China; Ph.D. (2008), University of Texas at Austin.

XIAOHANG LIU (2003), Professor of Geography and Environment; B.S. (1994), Peking University; M.S. (1998), Rutgers University; Ph.D. (2003), University of California, Santa Barbara.

JOHN LOGAN (2009), Associate Professor of Labor and Employment Studies, Director of Labor and Employment Studies; M.A. (1989), University of Glasgow; M.A. (1991), University of Windsor; Ph.D. (2000), University of California.

DOUGLAS LONG (2001), Adjunct Professor of Biology; B.S. (1988), University of California, Riverside; M.A. (1990), Ph.D. (1994), University of California, Berkeley.

KENT A. LORENZ (2016), Assistant Professor of Kinesiology; B.Ed. (1999), B.P.E. (2002), University of Alberta; M.S. (2005), San Diego State University; Ph.D. (2014), Arizona State University.

KAREN E. LOVAAS (1991), Associate Professor of Communication Studies; B.A. (1974), University of Maryland; M.A. (1980), San Francisco State University; Ph.D. (1993), University of Hawaii.

AMY LOVE (1998), Lecturer in English; B.A. (1972), Pomona College; M.A. (1998), San Francisco State University.

MARY ELIZABETH LOVE (1987), Professor of Health Education; B.A. (1976), The Pennsylvania State University; M.S. (1978), University of South Carolina; Ph.D. (1987), University of Massachusetts.

JEROLD LOWENSTEIN (2004), Adjunct Professor of Biology; B.S. (1948), Columbia University; M.D. (1953), Columbia College of Physicians and Surgeons.

SANDRA RUDNICK LUFT (1962), *Professor of Humanities*; B.A. (1956), University of California, Berkeley; M.A. (1959), Ph.D. (1963), Brandeis University.

M

HAMID MAHMOODI (2005), *Professor of Computer and Electrical Engineering*; B.S. (1998), Iran University of Science and Technology; M.S. (2000), University of Tehran, Iran; Ph.D. (2005), Purdue University, West Lafayette, Indiana.

LAURA MAMO (2010), *Professor of Health Education*; B.A. (1991), University of Wisconsin, Madison; Ph.D. (2002), University of California, San Francisco.

BRUCE MANNING (1999), *Professor of Chemistry*; B.A. (1985), University of Massachusetts; Ph.D. (1993), University of California, Davis.

GEOFFREY W. MARCY (1994), *Adjunct Professor of Physics and Astronomy*; B.A. (1976), University of California, Los Angeles; Ph.D. (1982), University of California, Santa Cruz.

ALEXIS MARTINEZ (2007), *Associate Professor of Sociology*; B.A. (1996), Sonoma State University; M.P.H. (1998), Yale University; Ph.D. (2006), University of California, San Francisco.

KATYNYKA MARTINEZ (2007), *Associate Professor of Latina/Latino Studies*; B.A. (1995), University of California at Santa Cruz; Ph.D. (2003), University of California at San Diego.

RONALD MARTINEZ (2012), *Assistant Professor of English (TESOL)*; CTEFLA (1992), University of Cambridge; B.A. (1995), West Virginia University; DELTA (2005), University of Cambridge; M.S.(2007), University of Oxford; Ph.D. (2011), University of Nottingham.

MARTY MARTINSON (2012), *Assistant Professor of Health Education*; B.A. (1985), University of California, Berkeley; M.Ed. (1995), University of Massachusetts, Amherst; M.P.H. (2005), Dr.P.H. (2009), University of California, Berkeley.

CHRIS MAYS (2000), *Senior Assistant Librarian*; B.S. (1996), San Francisco State University; M.L.I.S. (1998), San Jose State University.

JOSEPH McBRIDE (2002), Professor of Cinema; Studies at the University of Wisconsin, Madison; Doctoral Equivalency (2002), San Francisco State University.

CHRIS MCCARTHY (2005), Adjunct Assistant Professor of Physics and Astronomy; B.A. (1990), University of California, Berkeley; M.S. (1995), San Francisco State University; M.S. (1997), Ph.D. (2001), University of California, Berkeley.

EDWARD MCCAUHGAN (2005), Professor of Sociology; B.A. (1972), University of California, Santa Cruz; M.A. (1974), Stanford University; Ph.D. (1995), University of California, Santa Cruz.

SAMUEL MCCORMICK (2012), Associate Professor of Communication Studies; B.A. (2001), Indiana University; M.A. (2003), University of Colorado-Boulder; Ph.D. (2007), University of Iowa.

JOHN E. McCOSKER (1986), Adjunct Professor of Biology; B.A. (1967), Occidental College; Ph.D. (1973), Scripps Institution of Oceanography, University of California, San Diego.

JASON MCDANIEL (2009), Associate Professor of Political Science; B.A. (1995), University of Southern California; M.A. (2001), University of Southern California; Ph.D. (2007), University of Southern California.

MICHAEL Mcgowan (2000), Adjunct Professor of Biology; B.A. (1977), M.A. (1984), San Francisco State University; Ph.D. (1985), University of Miami.

GILLIAN McIntosh (2007), Assistant Professor of Classics; B.A. (1994), Queen’s University, Kingston, ON, Canada; M.A. (1997), Queen’s University, Kingston, ON, Canada; Ph.D. (2003), Ohio State University.

MIDORI YAMAMOTO McKEON (1990), Professor of Modern Languages and Literatures; B.A. (1972), University of Tokyo; M.A. (1978), Ph.D. (1996), University of California, Berkeley.

DANIEL REED MEIER (1997), Professor of Elementary Education; B.A. (1982), Wesleyan University; M.A. (1984), Harvard University; Ph.D. (1994), University of California, Berkeley.

PETER MELHUS (2006), Associate Professor of Management; BSME (1973), The Cooper Union for the Advancement of Science and Art; M.B.A. (1978), Santa Clara University.

PAUL MENDEZ (1986), Coordinator, Transfer Access Bridge, College of Education; B.A. (1978), San Francisco State University.

DON MENN (1999), Lecturer in Journalism; B.A. (1971), Stanford University; M.A. (2010), San Francisco State University.

ZAHIRA HUSSEINALI MERCHANT (2013), Assistant Professor of Instructional Technologies; B.Com (1995), Mithibai Motiram Kundnani College, Mumbai; Postgraduate Diploma (1999), Narsee Monjee Institute of Management Studies, Mumbai; Postgraduate Diploma (2001), South Indian Education Society, Mumbai; M.S. (2007), Ph.D. (2012), Texas A & M University.

JANELLE METZ (2000), Career Counselor, Career Center; B.A. (1990), University of California, Davis; M.S. (1999), California State University, Sacramento.

DEBORAH MILLER (1997), Lecturer in English; B.A. (1988), University of California, Santa Cruz; M.A. (1995), San Francisco State University.

PATRICIA MILLER (2010), Professor of Psychology; B.A. (1966), Ph.D. (1970), University of Kansas.

MARIYN MITCHELL (1997), Professor of Kinesiology; B.S. (1972), M.A. (1973), Kent State University; Ph.D. (1976), University of Wisconsin, Madison.

JULIA MIYAOKA (2003), Associate Professor of Decision Sciences; B.S. (1988), California Polytechnic State University, San Luis Obispo; M.S. (1991), Ph.D. (2003), Stanford University.

HAFEZ MODIZADEH (1998), Professor of Music; B.A. (1983), San Jose State University; M.F.A. (1986), University of California, Los Angeles; Ph.D. (1992), Wesleyan University.

CHRISTOPHER MOFFATT (1998), Associate Professor of Biology; B.S. (1989), University of Toronto; M.A. (1991), Ph.D. (1994), Johns Hopkins University; Postdoctoral Fellow, University of Massachusetts.

MAHMOOD MONSHIPOUR (2007), Associate Professor of International Relations; B.A. (1975) Teachers’ Training University, Tehran, Iran; M.A. (1979), Allamah Tabataba’i University, Tehran, Iran; Ph.D. (1987), University of Georgia.

KENNETH MONTEIRO (1987), Professor of Psychology, Dean, College of Ethnic Studies; B.A. (1976), Dartmouth College; Ph.D. (1982), Stanford University.
CARLOS MONTEMAYOR (2009), Associate Professor of Philosophy; J.D. (2001), Universidad Nacional Autónoma de México (UNAM); M.A. (2003), New School for Social Research; Ph.D. (2009), Rutgers University.

LAURA MOORHEAD (2015), Assistant Professor of Journalism; B.S. (1991), Ball State University; M.A. (2010), Ph.D. (2015), Stanford University.

KAREN MORRISON (2016), Assistant Professor of History; Ph.D. (2003), University of Florida.

KATHLEEN MORTIER (2015), Assistant Professor of Special Education; B.A. (1991), Sint-Andreas Instituut, Bruges; M.A. (1998), San Francisco State University; Ph.D. (2010), Ghent University, Ghent.

KATHLEEN L. MOSIER (1997), Professor of Psychology; B.A. (1971), University of Detroit; M.A. (1983), San Jose State University; Ph.D. (1990), University of California, Berkeley.

LYN MOTAI (1987), Lecturer in English; B.A. (1971), University of California, Berkeley; M.A. (1987), San Francisco State University.

LIK MUI (2003), Associate Professor of Information Systems; B.S. (1995), M.Eng. (1995), Massachusetts Institute of Technology; M.Phil. (1997), Oxford University; Ph.D. (2003), Massachusetts Institute of Technology.

PATRICE MULHOLLAND (2001), Assistant Director of International Programs; B.A. (1989), M.A. (1990), San Francisco State University.

JUDITH MUNTER (2014), Professor of Equity, Leadership Studies and Instructional Technology; B.S. (1978), University of Wisconsin; M.S. (1988), Florida International University; Ph.D. (1997), Florida State University.

G. ALEJANDRO MURGUIA (1991), Professor of Latina/Latino Studies; B.A. (1990), M.F.A. (1992), San Francisco State University.

DAVID A. MUSTART (1972), Professor of Geology; B.S. (1965), University of British Columbia; Ph.D. (1972), Stanford University.

ROBERT MUTTI (1982), Lecturer in Philosophy; B.A. (1969), University of California, Santa Barbara; M.A. (1979), San Francisco State University; Ph.D. (1997), University of California, Davis.

JENNIFER MYLANDER (2007), Associate Professor of English; B.A. (1996), Lawrence University; M.A. (2000), University of Illinois, Urbana-Champaign; Ph.D. (2006), University of Illinois, Urbana-Champaign.

DANIELLE MYSLIWEIC (2008), Assistant Professor of Art; B.A. (1998), Wesleyan University; M.F.A (2004), Hunter College.

N

LEORA NANUS (2014), Assistant Professor of Geography and Environment; B.S. (1995), University of California, Santa Cruz; M.S. (2000), Western Washington University; Ph.D. (2008), University of Colorado, Boulder.

ATHENA NAZARIO (2005), Senior Assistant Librarian; B.A. (1994), University of Evansville; M.L.S. (1999), Rutgers University.

ELISABETTA NELSEN (1987), Professor of Modern Languages and Literature; M.A. (1976), University of Florence (Italy); Ph.D. (1987), University of California, Berkeley.

MELISSA NELSON (2002), Associate Professor of American Indian Studies; B.A. (1991), University of California, Santa Cruz; Ph.D. (2000), University of California, Davis.

BARBARA J. NEUHAUSER (1986), Professor of Physics; B.S. (1969), Purdue University; M.S. (1970), Stanford University; Ph.D. (1985), Stanford University.

AKM NEWAZ (2014), Assistant Professor of Physics and Astronomy; B.Sc. (1998), Dhaka University; M.A. (2003), Ph.D. (2006), State University of New York at Stony Brook.

JOEL NICHOLSON (1996), Professor of International Business; B.A. (1976), Central Washington University; graduate study (1978), Washington State University; M.B.A. (1985), Gonzaga University; Ph.D. (1991), The Florida State University.

ROBERT C. NICKERSON (1978), Professor of Information Systems; B.S. (1968), M.S. (1969), University of California, Berkeley; Ph.D. (1978), University of California, Santa Cruz.
KARINA J. NIELSEN (2014), Professor of Biology; Director of the Romberg Tiburon Center for Environmental Studies; B.S. (1992), Brooklyn College of the City University of New York; Ph.D. (1998), Oregon State University.

RICK NIZZARDINI (2005), Clinical Counselor; Counseling and Psychological Services; B.A. (1990), Emory University; J.D. (1993), Vanderbilt University School of Law; M.S.W. (1998), Smith College School for Social Work.

JAN NULL (1991), Adjunct Professor of Meteorology; B.S. (1974), University of California, Davis.

NADAV NUR (2004), Adjunct Professor of Biology, Research Scientist, Romberg Tiburon Center;

0

STEVEN OBRESKI (2000), Adjunct Professor of Biology, Research Scientist, Romberg Tiburon Center; B.S. (1960), Columbia University; Ph.D. (1968), University of Chicago.

KAZUNORI OKADA (2006), Associate Professor of Computer Science; B.E. (1992), Nagoya University, Japan; M.S. (1996), Ph.D. (2001), University Southern California.

ALBERTO EMILIO OLIVARES (1979), Project Coordinator, Office of Student Programs and Leadership Development; B.A. (1979), advanced study, San Francisco State University.

DAVID OLISHER (2004), Associate Professor of English; B.A. (1979), Williams College; M.A. (1996), Ph.D. (2003), University of California, Los Angeles.

ROSALIND ON (1991), Academic Counselor, Undergraduate Advising Center; B.A. San Francisco State University; M.S. San Francisco State University.

ABDIEL OÑATE (1988), Professor of History; B.A. (1971), Universidad Nacional Autonoma de Mexico; advanced study (1975), University of East Anglia; Ph.D. (1984), El Colegio de Mexico.

PETER ORNER (2003), Professor of Creative Writing; B.A. (1990), University of Michigan; J.D. (1996), Northeastern University; M.F.A. (1998), University of Iowa.

CRISTIAN ORREGO (1993), Adjunct Professor of Biology; B.S. (1965), Indiana University; Ph.D. (1971), Brandeis University.

TIFFANY O’SHAUGHNESSY (2015), Assistant Professor of Counseling; B.A. (2003), The Metropolitan State College of Denver; M.Ed. (2008), Ph.D. (2009), Lehigh University.

ÖZGÜR ÖZLUK (2002), Associate Professor of Decision Sciences; B.S. (1994), Bilkent University, Turkey; M.S. (1997), Ph.D. (1999), University of North Carolina, Chapel Hill.

LEYLA OZSEN (2008), Associate Professor of Decision Sciences; B.S. (1997), Cornell University; M.S. (1999), Stanford University; Ph.D. (2004), Northwestern University.

P

KENNETH PAAP (2008), Professor of Psychology; B.A. (1968), M.S. (1972), Ph.D. (1975), University of Wisconsin, Madison.

ZUWENA PACKER (2013), Assistant Professor of Creative Writing; B.A. (1994), Yale University; M.A. (1995), Johns Hopkins University; M.F.A. (1999), University of Iowa.

JAE PAIK (2006), Associate Professor of Psychology; B.A. (1999), Ph.D. (2005), Indiana University, Bloomington.

VERONIKA PAPYRINA (2007), Associate Professor of Marketing; B.S. (1994), M.S. (1994), Moscow State University; Ph.D. (2007), University of Western Ontario.

V. THOMAS PARKER (1980), Professor of Biology; B.A. (1973), University of Texas; M.A. (1975), Ph.D. (1977), University of California, Santa Barbara.

GORDON PARRY (2000), Adjunct Professor of Biology; B.S. (1972), Ph.D. (1975), University College London, University of London

SALLY PASION (2000), Associate Professor of Biology; B.A. (1981), Harvard University; Ph.D. (1995), University of California, Los Angeles.

BRUCE PATON (2002), *Associate Professor of Management*; B.A. (1976), Wesleyen University; M.B.A. (1980), Stanford University; Ph.D. (2002), University of California, Santa Cruz.

Justin Peck (2015), *Assistant Professor of Political Science*; B.A. (2005), Brandeis University; M.A. (2010), Ph.D. (2014), University of Virginia.

Ellen Peel (1989), *Professor of Comparative Literature, Professor of English*; B.A. (1973), Radcliffe College; M.Phil. (1979), Ph.D. (1982), Yale University.

Anabel O. Pelham (1977), *Professor of Gerontology*; B.A. (1971), Florida Technological University; M.A. (1975), San Francisco State University; Ph.D. (1980), University of California, San Francisco.

Erik Peper (1976), *Professor of Health Education/Holistic Health*; B.A. (1967), Harvard University; Ph.D. (1976), Union Graduate School.

Jacob E. Perera (1977), *Professor of Interdisciplinary Studies in Education*; B.S. (1966), New Mexico State University; M.A. (1970), San Francisco State University; Ed.D. (1985), University of California, Berkeley.

Dragutin Petkovic (2003), *Professor of Computer Science*; B.S. (1976), M.S. (1979), University of Belgrade, Yugoslavia; Ph.D. (1983), University of California, Irvine.

Frances Phillips (1982), *Lecturer in Creative Writing*; B.A. (1973), Reed College; M.A. (1975), San Francisco State University.

Michael J. Potepan (1991), *Associate Professor of Economics*; B.A. (1979), California State University, San Bernardino; Ph.D. (1985), University of California, Davis.

Catherine E. Powell (2001), *Senior Assistant Librarian*; B.A. (1988), Boston University; M.S. (1991), Simmons College.

Arno Puder (2008), *Professor of Computer Science*; Diploma (1993), University of Kaiserslautern, Germany; Ph.D. (1997), University of Frankfurt, Germany.

Ronald E. Purser (1997), *Professor of Management*; B.A. (1985), Sonoma State University; Ph.D. (1990), Case Western Reserve University.
JAMES QUESADA (1994), Associate Professor of Anthropology; B.A. (1978), Sonoma State University; M.A. (1986), San Francisco State University; Ph.D. (1994), University of California, San Francisco and Berkeley.

MARIA ISABEL QUIITA (1999), Professor of Elementary Education; B.S. (1980), Philippine Normal University; M.Ed. (1991), University of the Philippines; Ph.D. (1997), University of Illinois, Urbana-Champaign.

NANCY J. RABOLT (1981), Professor of Consumer and Family Studies/Dietetics; B.S. (1969), State University of New York, Oneonta; M.S. (1973), Southern Illinois University, Ph.D. (1984), University of Tennessee.

SANDRA RADTKA (1999), Professor of Physical Therapy; B.S. (1974), University of Michigan; M.A. (1977), University of North Carolina, Chapel Hill; Ph.D. (1985), University of California, Berkeley.

MARIA RAGGIO (1997), Professor of Special Education; B.A. (1978), M.S. (1980), San Francisco State University; Ph.D. (1992), University of California, San Francisco.

STEPHEN RALSTON (2004), Adjunct Professor of Biology; B.A. (1971), University of California, Los Angeles; M.S. (1975), University of Hawaii, Honolulu; Ph.D. (1981), University of Washington, Seattle.

ROBERT M. RAMIREZ (1992), Professor of Biology; B.S. (1981), University of California, Riverside; Ph.D. (1990), University of California, Davis.

MARLA A. RAMIREZ (2016), Assistant Professor of Sociology; B.A. (2007), University of California, Los Angeles; M.A. (2011), Ph.D. (2015), University of California, Santa Barbara.

BALA RAVIKUMAR (2001), Adjunct Professor of Biology; B.E., M.S. (1983), Indian Institute of Science (India); Ph.D. (1987), University of Michigan.

R. DAVID REBANAL (2016), Assistant Professor of Health Education; B.S. (1997), University of Scranton; M.P.H. (2001), Hunter College of the City University of New York; Dr.P.H. (2014), University of California, Berkeley.

KELLY L. REDDY-BEST (2013), Assistant Professor of Consumer and Family Studies/Dietetics; B.S. (2006), Johnson & Wales University; M.S. (2010), University of Rhode Island; Ph.D. (2013), Oregon State University.

NANCY L. REIST (1987), Professor of Broadcast and Electronic Communication Arts; B.S. (1979), M.S. (1983), Humboldt State University; Ph.D. (1987), University of Minnesota.

BELINDA I. REYES (2006), Associate Professor of Latina/Latino Studies; B.S. (1988), University of Illinois; Ph.D. (1994), University of California, Berkeley.

MARK REYNOLDS (2001), Adjunct Professor of Biology; B.A. (1980), University of Iowa; M.S. (1982), Idaho University; Ph.D. (1990), University of California, Berkeley.

BLAKE RIGGS (2009), Associate Professor of Biology; B.A. (1996), University of California, Santa Cruz; M.A. (2001), Ph.D. (2005), University of California, Santa Cruz.

MICHAEL C. RITTER Coordinator, Prevention Education Programs/C.E.A.S.E.; B.S. (1976), College of Charleston; M.S. (1984), San Francisco State University.

NEVILLE ROBBINS (1984), Professor of Mathematics; B.A. (1958), Columbia University; M.A. (1965), Harvard University; Ph.D. (1972), Polytechnic Institute of New York.

MARK ROBERGE (1994), Associate Professor of English; B.A. (1987), Bowdoin College; M.A. (1993), San Francisco State University; Ph.D. (2001), University of California, Berkeley.

NINA ROBERTS (2005), Associate Professor of Recreation, Parks, and Tourism; B.S. (1983), Bridgewater State College; M.A. (1992), University of Maryland; Ph.D. (2003), Colorado State University.

BRUCE ROBERTSON (2001), Associate Professor of Marketing; B.B.A., M.B.A. (1996), University of Toledo; Ph.D. (2000), University of Cincinnati.

DALE ROBINSON (2000), Adjunct Professor of Biology, Research Scientist, Romberg Tiburon Center; B.S. (1978), M.S. (1983), Portland State University; Ph.D. (1991), University of Southern California.

NANCY B. ROBINSON (2002), Professor of Special Education; B.S. (1971), University of California, Santa Barbara; M.S. (1975), Portland State University; Ph.D. (1987), University of Washington, Seattle.

RITA RODRIGUEZ (2008), Assistant Professor of Psychology; B.A. (1997), Mills College; M.S. (1999), San Francisco State University; Ph.D. (2007), Stanford University.

FERMIN ADRIAN RODRIGUEZ (2007), Associate Professor of Modern Languages and Literatures; Licenciatura in Literature (1996), University of Buenos Aires; Ph.D. (2006), University of Princeton.

SUSAN ROE (2012), Assistant Professor of Hospitality and Tourism Management; B.S. (1996), University of Wisconsin; M.S. (1999), Ph.D. (2012), University of Nevada, Las Vegas.
THERESA ROEDER (2005), Associate Professor of Decision Sciences; B.S. (1997), M.S. (1999), Case Western Reserve University; M.S. (2001), Ph.D. (2002), University of California, Berkeley.

GRETHEN ROLLWAGEN-BOLLENS (2004), Adjunct Professor of Biology, Research Scientist, Romberg Tiburon Center; B.A. (1985), Harvard University; M.S. (1996), University of Hawaii; Ph.D. (2003), University of California, Berkeley.

JOSEPH ROMEO (1993), Professor of Biomedical Laboratory Science; B.A. (1975), University of California, Berkeley; Ph.D. (1983), University of California, San Diego.

PETER ROOPNARINE (2001), Adjunct Professor of Biology; B.S. (1984), Mount Allison University; M.S. (1988), Nova Southeastern University Oceanographic Center; Ph.D. (1993), University of California, Davis.

ERIK J. ROSEGARD (2001), Assistant Professor of Recreation, Parks, and Tourism; B.A. (1987), University of California, Davis; M.S. (1993), Central Washington University; Ph.D. (1997), University of Utah.

SANDRA J. ROSEN (1994), Professor of Special Education; B.S. (1976), University of Illinois; M.A. (1978), San Francisco State University; Ph.D. (1986), Vanderbilt University.

DUSTIN ROSS (2016), Assistant Professor of Mathematics; B.A. (2007), University of Northern Iowa; M.S. (2009), Ph.D. (2013), Colorado State University.

SUE V. ROSSELL (2009), Professor of Sociology, Professor of Women and Gender Studies, Provost and Vice President for Academic Affairs; B.A. (1969), M.S. (1971), Ph.D. (1973), University of Wisconsin, Madison.

BARRY SAMUEL ROTHMAN (1986), Professor of Biology; B.S. (1969), Haverford College; Ph.D. (1975), California Institute of Technology.

SCOTT ROY (2011), Assistant Professor of Biology; B.A. (1999), Ph.D. (2005), Harvard University.

MERCEDES RUBIO (2005), Assistant Professor of Latina/Latino Studies; Ph.D., University of Michigan, Ann Arbor.

WILL RUSSELL (2004), Adjunct Professor of Biology; B.A. (1986), University of California, Santa Cruz; M.S. (1994), San Jose State University; Ph.D. (1999), University of California, Berkeley.

RANDOLPH RUTSKY (2003), Associate Professor of Cinema; B.A., M.A., University of Florida; Ph.D., University of California, Los Angeles.

JOHN RYAN (2009), Lecturer in Communication Studies; B.A. (2000), M.A. (2009), San Francisco State University.

S

BENJAMIN SABEY (2015), Assistant Professor of Music; B.M. (2002), Brigham Young University; M.A. (2004), Ph.D. (2009), University of California, San Diego.

MOHAMMAD RAMADAN SALAMA (2005), Associate Professor of Modern Languages and Literatures; B.A. (1990), M.A. (1995), University of Ain Shama, Al-Álsun Faculty, Cairo; M.A. (2000), Ph.D. (2005), University of Wisconsin, Madison.

RICHARD SAMMONS (1982), Lecturer in English, Lecturer in Humanities, Lecturer in Comparative Literature; B.A. (1962), University of Rochester; M.A. (1967), University of California, Berkeley.

EMMA V. SANCHEZ-VAZNAUGH (2006), Associate Professor of Health Education; B.S. (1996), University of San Francisco; M.P.H. (2001), San Francisco State University; Sc.D. (2016), Harvard University, School of Public Health.

XOCHITL SANCHEZ-ZARAMA (1999), Educational Opportunity Program Guardian Scholars, Director; Pre-collegiate/Community Partnerships, Coordinator; B.A. (1995), University of California, Berkeley.

JILLIAN SANDELL (2003), Professor of Women and Gender Studies; B.Sc. (1987), University of London, Goldsmiths College; B.A. (1991), Australian National University; Ph.D. (2002), University of California, Berkeley.

EVREN SAVCI (2013), Assistant Professor of Women and Gender Studies; B.A. (2002), M.A. (2004), University of Virginia; Ph.D. (2011), University of Southern California.

KIMBERLY SCHWARTZ (2007), Assistant Professor of Theatre Arts; B.Mus. (1993), Indiana University; M.F.A. (1997), California Institute of the Arts.

KIMBERLY SEASHORE (2015), Assistant Professor of Mathematics; B.A. (1992), Harvard College; M.A. (2007), San Francisco State University; Ph.D. (2015), University of California, Berkeley.

AIDA SEBALLOS (1975), Lecturer in Spanish; B.A. (1970), M.A. (1975), San Francisco State University.

RAVINDER SEHGAL (2007), Associate Professor of Biology; B.A., B.M. (1988), Oberlin College and Conservatory of Music; Ph.D. (1997), University of California, San Francisco; Postdoctoral Fellow (2001), San Francisco State University; Postdoctoral Fellow (2004), University of California, Davis.

SANJIT SENGUPTA (1996), Professor of Marketing; B.T. (1980), Indian Institute of Technology, Kanpur; M.M.S. (1982), University of Bombay, India; Ph.D. (1990), University of California, Berkeley.

GITANJALI SHAHANI (2007), Associate Professor of English; B.A. (1995), University of Bombay, India; M.A. (1997), University of Bombay, India; Ph.D. (2007), Emory University.
KEVIN SIMONIN (2014), Assistant Professor of Biology; B.A. (1998), University of Montana; M.S. (2003), Northern Arizona University; Ph.D. (2009), University of California Berkeley.

URSULA SIMONIS (1993), Professor of Chemistry; Diploma in Chemistry (1982), Ph.D. (1985), Westfalische Wilhelms Universitat, Munster, Germany.

IAN SINAPUELAS (2007), Associate Professor of Marketing; B.S. (1995), Ateneo de Manila University, Quezon City, Philippines; M.S. (2001), Purdue University; Ph.D. (2007), Purdue University.

JOSHUA SINGER (2008), Associate Professor of Design and Industry; B.A. (1988), Hampshire College; MFA (1991), Hunter College; MFA (2004), California College of the Arts.

RAHUL SINGH (2004), Professor of Computer Science; M.S.E., Moscow Power Engineering Institute; M.S., Ph.D. (1999), University of Minnesota.

DIPENDRA SINHA (1987), Professor of Mechanical Engineering; B.S. (1967), Patna University (Patna, India); M.S. (1978), Ph.D. (1981), University of Manchester, Institute of Science and Technology (England).

YUE-TING SIU (2016), Assistant Professor of Special Education; B.S. (2002), Boston University; M.A. (2006), University of Arizona; Ph.D. (2015), University of California at Berkeley.

LEONARD SKLAR (2003), Associate Professor of Geology; B.S. (1989), New York University; B.E.(1989), Cooper Union; M.S. (1990), Ph.D.(2003), University of California, Berkeley.

AMY SKONIECZNY (2007), Assistant Professor of International Relations; B.A. (1994), Humboldt State University; M.A. (2000), San Francisco State University; Ph.D. (2008) University of Minnesota.

ANASTASIA SMIRNOVA (2016), Assistant Professor of English Language and Literature; M.A. (2005), Ph.D. (2011), The Ohio State University.

NINA JO SMITH (1991), Coordinator, The SAFE Place; B.A. (1976), San Jose State University; M.A. (1992), San Francisco State University.

ROBERT C. SMITH (1989), Professor of Political Science; B.A. (1970), University of California, Berkeley; M.A. (1972), University of California, Los Angeles; Ph.D. (1975), Howard University.

VALERIE SOE (1997), Associate Professor of Asian American Studies; B.A. (1985), University of California, Los Angeles; M.F.A. (1987), School of the Art Institute of Chicago.

MARY SOLIDAY (2008), Professor of English; B.A. (1984), University of Kansas; M.A. (1986), University of Illinois, Urbana-Champaign; Ph.D. (1990), University of Illinois, Urbana-Champaign.

PATTI SOLOMON-RICE (2011), Assistant Professor of Special Education; B.S. (1977), University of Wisconsin, Madison; M.A. (1980), University of Montana, Missoula; Ph.D. (2010), San Francisco State University with University of California, Berkeley.

SADA SOORAPANTH (2005), Associate Professor of Decision Sciences; BENG (1992), Chulalongkorn University, Bangkok, Thailand; M.S. (1995), The University of Houston; Ph.D. (2002), The University of Michigan.

EDWARD SORENSEN (1990), Lecturer in Management; B.A. (1979), University of California, Berkeley; M.A. (1988), University of California, Davis.

GLORIA SOTO (1996), Professor of Special Education; B.S. (1988), Universidad Pontificia, Spain; M.S. (1991), Ph.D. (1994), Purdue University.

NANCY SOURS (1980), Lecturer in English; B.A. (1968), M.A. (1969), San Francisco State University; advanced study, University of California, Berkeley.

ALICE SOWAAL (2005), Associate Professor of Philosophy; B.A. (1993), University of California, Santa Barbara; M.A. (1996), University of California, Irvine; Ph.D. (2001), University of California, Irvine.

TONY SPARKS (2012), Assistant Professor of Urban Studies and Planning; B.A. (1998), University of Washington; M.A. (2002), Claremont Graduate University; Ph.D. (2009), University of Washington.

DIANTE M. SPENCER (1990), Professor of Music; B.S. (1978), Florida A & M University; M.M. (1980), Washington University, St. Louis; advanced study, University of San Francisco.

SUMMER STAR (2013), Assistant Professor of English; B.A. (2005), University of Iowa; M.A. (2007), Ph.D. (2012), University of California, Santa Barbara.

LORETTA STEC (1993), Professor of English; B.A. (1984), Boston College; M.Phil. (1990), Ph.D. (1993), Rutgers University.
SAUL STEIER (1982), Associate Professor of Humanities; B.A. (1963), Ph.D. (1973), University of California, Los Angeles.

KIM STEINER (2001), Adjunct Professor of Biology; B.A. (1975), Indiana University; M.S. (1977), Ph.D. (1982), University of California, Davis.

OSCAR J. STEWART (2016), Assistant Professor of Management; B.S. (2007), University of Minnesota; Ph.D. (2016), University of North Carolina at Charlotte.

JONATHON STILLMAN (2005), Associate Professor of Biology; B.S. (1991), University of Minnesota; Ph.D. (1998), Oregon State University.

ALEXANDER STINE (2013), Assistant Professor of Oceanography; Sc.B. (1996), Brown University; Sc.M. (2002), Massachusetts Institute of Technology; Ph.D. (2010), University of California, Berkeley.

MOLLY STREAR (2016), Assistant Professor of Counseling; B.A. (2004), University of Colorado, Denver; M.A. (2010), Ph.D. (2015), University of Northern Colorado.

JUDI E. STREBEL (2000), Professor of Marketing; B.A., M.S. (1986), University of California, Davis; Ph.D. (1997), University of California, Berkeley.

ROBERT STRONG (1993), Lecturer in Marketing; B.S. (1986), M.B.A. (1990), San Francisco State University.

MICHAEL SUDDUTH (2005), Lecturer of Philosophy; B.A. (1992), Santa Clara University; M.Phil. (1994), D. Phil. (1996), University of Oxford.

ANANTHA SUDHAKAR (2012), Assistant Professor of Asian American Studies; B.A. (1998), University of Virginia; M.A. (2000), University of Washington; Ph.D. (2011), Rutgers University.

GAURAV SURI (2016), Assistant Professor of Psychology; Ph.D. (2015), Stanford University.

DEAN P. SUZUKI (1989), Associate Professor of Music; B.A. (1976), Seattle Pacific College; M.A. (1981), University of Southern California.

ANDREA SWEI (2013), Assistant Professor of Biology; B.A. (2000), Ph.D. (2009), University of California, Berkeley.

JOHNNY SYMONS (2013), Assistant Professor of Cinema; B.A. (1988), Brown University; M.A. (1997), Stanford University.

RAY TADIO (2008), Associate Professor of Dance; B.A. (2002), San Jose State University; M.F.A. (2007), University of Wisconsin, Milwaukee.

TOMOKO TAKEDA (2007), Assistant Professor of Modern Languages and Literatures; B.A. (1995), Obirin University, Tokyo, Japan; M.A. (2000), University of Arizona; Ph.D. (2006), University of Oregon.

LISA TAKEYAMA (2006), Associate Professor of Economics; B.A. (1984), San Francisco State University; Ph.D. (1992), Stanford University.

CAROL TANG (2001), Adjunct Professor of Biology; B.A. (1989), University of California, Berkeley; M.S. (1993), Ph.D. (1996), University of Southern California, Los Angeles.

KIMBERLY TANNER (2004), Associate Professor of Biology; B.A. (1991), Rice University; Ph.D. (1997), University of California, San Francisco.

GUS TAKAKJI (1986), Professor of Civil Engineering; B.E. (1978), American University of Beirut; M.S. (1980), University of Florida; Ph.D. (1983), Clemson University.

CHARLOTTE TATE (2009), Associate Professor of Psychology; B.S. (1999), Loyola University, Chicago; M.S. (2001), Ph.D. (2006), University of Oregon.

SHERRIA TAYLOR (2015), Assistant Professor of Consumer and Family Studies/Dietetics; B.A. (2000), Oral Roberts University; M.A. (2003), University of Nevada, Reno; Ph.D. (2013), Loma Linda University.

KWOK-SIONG TEH (2006), Associate Professor of Mechanical Engineering; B.S. (1997), University of Illinois, Urbana-Champaign; M.S. (2001), University of Michigan, Ann Arbor; Ph.D. (2004), University of California, Berkeley.

M. DAWN TERRELL (1990), Professor of Psychology; B.A. (1980), University of California, Berkeley; M.S. (1982), M.Phil. (1983), Ph.D. (1989), Yale University.

AUTUMN THOYE (2016), Assistant Professor of Environmental Studies; B.S. (2005), University of North Carolina at Chapel Hill; M.S. (2008), Lund University; Ph.D. (2014), University of North Carolina at Chapel Hill.

CHANAN TIGAY (2012), Assistant Professor of Creative Writing; B.A. (1998), University of Pennsylvania; M.F.A. (2004), Columbia University.

ANNE TODGHAM (2009), Assistant Professor of Biology; B.A. (1997), University of Guelph; Ph.D. (2005) University of British Columbia.

JASSEN TODOROV (2008), Associate Professor of Music; B.M. (1998), Harid Conservatory of Music; M.M. (2000), Eastman School of Music.

BARBARA TOMASH (1995), Lecturer in Creative Writing; B.A. (1973), University of New Mexico, Albuquerque; M.F.A. (1998), San Francisco State University.

JENNIFER TRAINOR (2007), Associate Professor of English; B.A. (1990), University of California, Santa Barbara; M.A. (1994), San Francisco State University; M.A. (1996) University of California, Davis; Ph.D. (2000), University of California, Berkeley.

TRUONG TRAN (2004), Lecturer in Creative Writing; B.A. (1992), University of California, Santa Cruz; M.F.A. (1995), San Francisco State University.

PAUL TREVER (2010), Athletic Coach; B.A. (1998), Sonoma State University.

GIUSEPPE (PINO) TROGU (2007), Associate Professor of Design and Industry; B.A. (1983), Istituto Superiore Industrie Artistiche, Italy; M.F.A. (1986), Rhode Island School of Design.

NANCY TSENG (2014), Assistant Professor of Elementary Education; B.A. (1999), M.A. (2007), University of California, Davis; Ph.D. (2014), University of Maryland, College Park.

ANDREI TSYGANKOV (2000), Professor of Political Science; Professor of International Relations; Ph.D. (1991), Moscow State University; Ph.D. (2000), University of Southern California.

GULNUR TUMBAT (2005), Associate Professor of Marketing; B.S. (1996), M.S. (1999), Middle East Technical University, Turkey; M.B.A. (1999), Bilkent University, Turkey; Ph.D. (2005), University of Utah.

V

WESLEY UEUNTEN (2007), Associate Professor of Asian American Studies; B.A. (1983), University of Hawai‘i at Manoa; MA. (1989), University of Hawai‘i at Manoa; Ph.D. (2007), University of California, Berkeley.

CONNIE ULASEWICZ (1992), Professor of Consumer and Family Studies/Dietetics; B.A. (1976), Syracuse University; M.S. (1981), University of Maryland; Ph.D. (2003), Fielding Graduate University.

MARY ANN VAN DAM (1990), Director of the School of Nursing, Professor of Nursing; B.S. (1987), M.S. (1989), Ph.D. (2002), University of California, San Francisco.

ILONA VANDERGRIFF (1996), Professor of Modern Languages and Literatures; M.A. (1990), San Francisco State University; Ph.D. (1995), University of California, Berkeley.

BAS VAN FRAASSEN (2008), Professor of Philosophy; B.A. (1963), University of Alberta; M.A. (1964), Ph.D. (1966), University of Pittsburgh.

JULIANA VAN OLPHEN (2002), Associate Professor of Health Education; B.A. (1989), University of California, Berkeley; M.P.H. (1994), University of California, Los Angeles; Ph.D. (2000), University of Michigan, Ann Arbor.

ADOLFO ANTONIO VELASQUEZ (2005), Academic Counselor, Undergraduate Advising Center; B.A. (1994), San Francisco State University; M.S. (2004), San Francisco State University.

MARIA J. VERI (2008), Assistant Professor of Kinesiology; B.A. (1992), University at Albany, State University of New York; M.S. (1994), University of Tennessee, Knoxville; Ph.D. (1998), University of Tennessee, Knoxville.

LISA VICAR (1999), Lecturer in English; B.A. (1992), San Diego State University; M.A. (1999), San Francisco State University.

KRISTA VIKSE (2016), Assistant Professor of Chemistry; B.Sc. (2006), University of British Columbia Okanagan; Ph.D. (2011), University of Victoria.

JOY VIVEROS (2008), Executive Coordinator and Advisor, Fellowships Office; B.A. (1992), Mills College; Ph.D. (2003), University of California, Berkeley.

LUCIA VOLK (2003), Associate Professor of International Relations; B.A. (1991), Stanford University; M.A. (1994), Georgetown University; Ph.D. (2001), Harvard University.

JO H. VOLKERT (1978), Associate Vice President for Enrollment Planning and Management; B.A. (1973), Occidental College; M.S. (1975), Pepperdine University; Ph.D. (1985), Stanford University.

VANCE VREDENBURG (2007), Associate Professor of Biology; B.A. (1992), University of California, Santa Barbara; Ph.D. (2002), University of California, Berkeley.

VENISE WAGNER (2001), Associate Professor of Journalism; B.S. (1985), University of Illinois, Champaign-Urbana; M.A. (1987), Monterey Institute of International Studies.

JAMES WAGSTAFFE (1986), Lecturer in Journalism; B.A. (1977), Stanford University; J.D. (1980), Hastings College of Law.

LISA C. WALLIS (2002), Senior Assistant Librarian; B.S. (1994), M.S. (1999), University of Illinois, Urbana-Champaign.

ANDREW WALLS (2009), Associate Professor of Hospitality and Tourism Management; B.A. (1986), Florida Southern College; M.B.A. (1993), Florida Southern College; Ph.D. (2009), University of Central Florida.

LINDA WANEK (1993), Professor of Physical Therapy, Director of Physical Therapy; B.S. (1976), University of Kansas; M.S. (1980), University of North Carolina, Chapel Hill; Ph.D. (1993), University of Southern California.

HUI-MING (DEANNA) WANG (2005), Professor of Marketing; B.S. (1991), National Taiwan University, Taiwan; M.S. (1994), Stanford University; Ph.D. (2003), Purdue University.

LIHUA WANG (2006), Associate Professor of International Business; B.A. (1991), Nankei University, China; M.B.A. (1996), Chinese University of Hong Kong; Ph.D. (2003), Northwestern University.

LYNN WARDELEY (2009), Assistant Professor of English; B.A. (1979), Yale University; M.A. (1984), Ph.D. (1988), University of California, Berkeley.

RHONNIE WASHINGTON (1989), Professor of Theatre Arts; B.S. (1975), East Texas State University; M.A. (1976), Ph.D. (1983), University of Michigan, Ann Arbor.

NICOLE WATTS (2003), Associate Professor of Political Science; B.A. (1989), University of Washington; M.A. (1992), University of London School of Oriental and African Studies; Ph.D. (2001), University of Washington.

LAURA WAYTH (2013), Associate Professor of Theatre Arts; B.A. (1993), The State University of New York, Binghamton; M.F.A. (2003), American Repertory Theatre / Moscow Art Theatre School Institute for Advanced Theatre Training at Harvard University.

CHRISTOPHER S. WEINBERGER (2009), Associate Professor of Comparative Literature; B.A. (1996), Williams College; M.A. (1999), Ph.D. (2009), University of California, Berkeley.

STEVEN L. WEINSTEIN (1997), Associate Professor of Biology; B.S. (1980), State University of New York, Binghamton; Ph.D. (1992), University of California, San Francisco.

DAVID WICK (2007), Coordinator of Study Abroad Services; B.A. (1991), Macalester College; M.S.E. (2007), Arkansas State University, Jonesboro.

JAMES W. WILEY (2002), Professor of Sociology; B.A. (1965), San Diego State University; M.A. (1968), Ph.D. (1975), Vanderbilt University.

FRANCES WILKERSON (2000), Adjunct Professor of Biology, Research Scientist, Romberg Tiburon Center; B.A. (1977), M.A. (1980), University of Cambridge; Ph.D. (1980), University of Bristol.

NANCY LEE WILKINSON (1986), Professor of Geography and Environment; B.A. (1975), San Jose State University; M.A. (1978), Ph.D. (1983), University of Oregon.

GARY WILLIAMS (2001), Adjunct Professor of Biology; B.A. (1972), University of California, Berkeley; M.A. (1975), San Francisco State University; Ph.D. (1987), University of Cape Town (South Africa).

CLAUDIA WILSON (1985), Lecturer in English; B.A. (1973), University of Santa Cruz; M.A. (1982), San Francisco State University; Ph.D. (1999), University of California, Berkeley.

JACKSON WILSON (2009), Associate Professor of Recreation, Parks, and Tourism; B.A. (1996), University of Washington; M.A. (1999), Columbia University; Ph.D. (2009), Colorado State University.

YUMI WILSON (2004), Associate Professor of Journalism; B.A. (1990), University of Southern California; M.F.A. (2007), University of San Francisco.

STEPHANIE WINDLE (2013), Assistant Professor of Nursing; B.S.N. (1982), M.S.N. (1989), University of Wisconsin-Milwaukee; D.N.P. (2013), University of San Francisco.

LEAH WINGARD (2006), Associate Professor of Communication Studies; B.A. (1991), University of California, Santa Cruz; Bachelorgrad (1996), University of Copenhagen, Denmark; M.A. (1998), Ph.D. (2006), University of California, Los Angeles.

EVA SHEPPARD WOLF (2002), Associate Professor of History; B.A. (1992), University of California, Berkeley; Ph.D. (2000), Harvard University.

MICHELLE ANDREA WOLF (1983), Professor of Broadcast and Electronic Communication Arts; B.A. (1974), M.A. (1979), University of Massachusetts at Amherst; Ph.D. (1982), University of Texas.

PAMELA WOLFBURG (2003), Professor of Special Education; B.S. (1979), Kent State University; National Diploma (1983), Ludwig-Maximilians University of Munich with University of Düsseldorf, Germany; M.A. (1988), San Francisco State University; Ph.D. (1994), San Francisco State University with University of California, Berkeley.

JOHN W. WONDER (1994), Lecturer in Classics; B.A. (1973), University of California, Santa Barbara; M.A. (1983), San Francisco State University; Ph.D. (1993), University of California, Berkeley.

C. S. (JAMES) WONG (1990), Professor of Computer Science; B.S. (1984), University of Toronto; M.S. (1986), Southwest Texas State University; Ph.D. (1990), The University of Texas, Dallas.

JAMES WONG (2001), Career Counselor; Career Center; B.A. (1979), University of California, Santa Barbara; M.A. (1986), University of San Francisco; Master’s of Divinity (1992), San Francisco Theological Seminary.

LESLEY E. WONG (2012), Professor of Equity, Leadership Studies and Instructional Technology, President of the University; B.A. (1972), Gonzaga University; M.S. (1974), Eastern Washington University; Ph.D. (1986), Washington State University.

YUTIAN WONG (2009), Assistant Professor of Dance; B.A. (1992), University of California, Davis; Ph.D. (2001), University of California, Riverside.

JENNA WONG (2016), Assistant Professor of Civil Engineering; B.S. (2008), M.S. (2009), Ph.D. (2014), University of California, Berkeley.

JEANNIE WOO (2003), Lecturer in Asian American Studies; B.A. (1997), San Francisco State University; M.A. (2002), San Francisco State University.

DOÑELA C. WRIGHT (2016), Assistant Professor of Africana Studies; B.A. (2000), University of Maryland, Baltimore County; M.A. (2008), North Carolina A&T State University; Ph.D. (2016), Temple University.

WEIMING WU (1995), Professor of Chemistry; B.S. (1986), Nanjing University, China; Ph.D. (1992), University of Illinois.
YENBO WU (2000), Associate Vice President, Division of International Education; B.A. (1976), Capital Normal University, Beijing; ED.M. (1985), Ph.D. (1992), State University of New York, Buffalo.

YANG XIAO (2014), Assistant Professor of Modern Languages and Literatures; B.A. (1997), M.A. (2000), Hunan Normal University; Ph.D. (2010), University of Hawaii at Manoa.

DAVID J. XIQUES (2002), Associate Professor of Music; B.S. (1986), University of Pennsylvania, Millersville; M.M. (1991), Holy Names University, Oakland, California.

HUIZHONG XU (2016), Associate Professor of Physics and Astronomy; B.S. (1997), Fudan University; M.A. (2000), City College of New York; Ph.D. (2004), University of Maryland, College Park.

HUI YANG (2006), Associate Professor of Computer Science; B.S. (1993), Huazhong University, China; M.S. (2002), Ph.D. (2006), Ohio State University.

AGUIBOU Y. YANSANE (1983), Professor of International Relations; B.S. (1958), Université de Paris; B.S. (1964), Utah State University; M.A. (1967), Ph.D. (1971), Stanford University.

PAUL YARBRough (1989), Adjunct Professor of Music; B.A. (1974), Davidson College, Artists Diploma (1978), Hartt School of Music; member, Alexander String Quartet.

JIN YE (2015), Assistant Professor of Electrical Engineering; B.S. (2008), M.S. (2011), Xi’an Jiaotong University; Ph.D. (2014), McMaster University.

LAURA LEHUAHAN LIM (2006), Assistant Professor of English; B.A. (1990), Ph.D. (2005), Brandeis University.

GRACE YOO (1996), Professor of Asian American Studies; B.A. (1989), University of California, Irvine; M.P.H. (1993), Loma Linda University; Ph.D. (1999), University of California, San Francisco.

SEUNG HEE YOO (2009), Assistant Professor of Psychology; B.A. (1999), Yonsei University, Seoul, Korea; M.A. (2003), San Francisco State University; M.S. (2006), M.Phil. (2007), Ph.D. (2009), Yale University.

ILMI YOON (2000), Professor of Computer Science; B.S. (1992), Yonsei University (Korea); M.S. (1966), Ph.D. (2000), University of Southern California.

BETTY YU (2009), Associate Professor of Special Education; B.A. (1996), University of California at Berkeley; M.A. (1999), New York University; Ph.D. (2009), San Francisco State University with University of California at Berkeley.

HAO YUE (2015), Assistant Professor of Computer Science; B.Eng. (2009), Xidian University (China); Ph.D. (2015), University of Florida.

MARIA DEL ROSARIO ZAVALA (2012), Assistant Professor of Elementary Education; B.A. (2002), University of California, Santa Cruz; Ph.D. (2012), University of Washington, Seattle.

ERIC ZEEMERING (2007), Assistant Professor of Public Administration; B.A. (2001), Aquinas College, Grand Rapids; Ph.D. (2007), Indiana University.

XIAORONG ZHANG (2013), Assistant Professor of Computer Engineering; B.S. (2006), Huazhong University of Science and Technology; M.S. (2009), Ph.D. (2013), University of Rhode Island.

YABING ZHAO (2015), Associate Professor of Decision Sciences; B.S. (2007), Tongji University, China; Ph.D. (2015), The State University of New York at Buffalo.

DEHUA ZHENG (2003), Adjunct Professor of Asian American Studies; B.A. (1968), M.A. (1981), Zhongshan University, China; Ph.D. (1990), University of Hong Kong.

Andrew Zink (2007), Assistant Professor of Biology; B.A. (1994), Bowdoin College; Ph.D. (2002), Cornell University.
MARY BARSONY (2003), Adjunct Professor of Astronomy; B.A. (1976), University of California Berkeley; S.B. (1982), Massachusetts Institute of Technology; M.S. (1984), Ph.D. (1989) California Institute of Technology

MARGARET GOULD BURKE (2004), Adjunct Professor of Biology; B.A. (1974), Hollins College; Ph.D. (1979), Duke University.

PHILIP P. CHOY (1969), Adjunct Professor of Asian American Studies; B.A. (1952), University of California, Berkeley.

FRANK CIPRIANO (2000), Adjunct Professor of Biology; B.A. (1979), M.S. (1983), San Jose State University; Ph.D. (1992), University of Arizona.

HILARY CLARK (2004), Adjunct Professor of Biology; B.S. (1982), B.S. (1988), San Francisco State University; Ph.D. (1993), University of California, Berkeley.

WILLIAM COCHLAN (2000), Research Scientist, Romberg Tiburon Center, and Adjunct Professor of Biology; B.S. Honors (1978), University of British Columbia; M.S. (1982), Dalhousie University; Ph.D. (1989), University of British Columbia; post-doctoral study (1992), Scripps Institute of Oceanography; (1994), University of Southern California.

MURRAY DAILEY (2000), Research Scientist, Romberg Tiburon Center and Adjunct Professor of Biology; B.S. (1961), University of Nevada, Reno; M.S. (1964), American University of Beirut (Lebanon); Ph.D. (1966) Colorado State University.

THOMAS DANIELS (2001), Adjunct Professor of Biology; B.A. (1975), Duke University; Ph.D. (1980), University of Michigan.

JANIS DICKINSON (2001), Adjunct Professor of Biology; B.S. (1981), Binghamton University; Ph.D. (1987), Cornell University.

ROBERT DREWES (2001), Adjunct Professor of Biology; B.A. (1969), San Francisco State University; Ph.D. (1981), University of California, Los Angeles.

RICHARD DUGDALE (2000), Research Scientist, Romberg Tiburon Center and Adjunct Professor of Biology; B.S. (1950), M.S. (1951), Ph.D. (1955), University of Wisconsin.

EUGENIO FERRARI (2000), Adjunct Professor of Biology; B.A. (1966), Ginnasio-Liceo "L.A. Muraton" (Italy); Ph.D. (1974), University of Pavia (Italy).

DEBRA FISCHER (2003), Adjunct Professor of Astronomy; B.S. (1975), University of Iowa; M.S. (1992), San Francisco State University; Ph.D. (1998), University of California, Santa Cruz.

BRIAN FISHER (2001), Adjunct Professor of Biology; B.A. (1988), University of Iowa; M.S. (1992), University of Utah; Ph.D. (1996), University of California, Davis.

TERRY GOSLINER (2001), Adjunct Professor of Biology; B.A. (1972), University of California, Berkeley; M.S. (1973), University of Hawaii; Ph.D. (1978), University of New Hampshire.

ZAKARIAS GRAFILO (2002), Adjunct Professor of Music; B.A. (2000), San Francisco State University; Member, Alexander String Quartet.

ELIZABETH GRAY (2002), Adjunct Professor of Biology; B.A. (1987), Harvard University; Ph.D. (1994), University of Washington.

JOHN GREENLEAF (2000), Adjunct Professor of Biology; B.S. (1955), University of Illinois; M.A. (1956), New Mexico Highland University; M.S. (1962), Ph.D. (1963), University of Illinois.

CHARLES GRISWOLD (1998), Adjunct Professor of Biology; B.S. (1972), M.S. (1977), Ph.D. (1983), University of California, Berkeley.

DAVID GUTNIK (2004), Adjunct Professor of Biology; B.S. (1961), M.S. (1963), University of California, Davis; Ph.D. (1967), University of Southern California; postdoctoral training (1967-69), NIH.

JOHN HODGES (2000), Adjunct Professor of Computer Science; B.S. (1976), M.S. (1978), University of Michigan; Ph.D. (1993), University of California, Los Angeles.

NINA JABLONSKI (1998), Adjunct Professor of Biology; B.A. (1975), Bryn Mawr College; Ph.C. (1978), Ph.D. (1981), University of Washington.

DAVID JULIAN (2004), Research Scientist, Romberg Tiburon Center, and Adjunct Professor of Biology; B.S. (1988), M.A. (1991), San Francisco State University; Ph.D. (1997), University of California, San Francisco.

DAVID H. KAVANAUGH (1998), Adjunct Professor of Biology; B.A. (1967), San Jose State University; M.A. (1970), University of Colorado; Ph.D. (1978), University of Alberta (Canada).

WILLIAM J. KIMMERER (1991), Research Scientist, Romberg Tiburon Center, and Adjunct Professor of Biology; B.S. (1967), Purdue University; Ph.D. (1980), University of Hawaii.

PATRICK KOCIOLEK (2001), Adjunct Professor of Biology; B.S. (1980), St. Mary's College of Maryland; M.S. (1982), Bowling Green State University; Ph.D. (1988), University of Michigan.

STEVEN LEE (2000), Adjunct Professor of Biology; B.S. (1981), State University of New York, Binghamton; M.S. (1984), New York University; Ph.D. (1990), University of California, Berkeley.

WILLIAM LENARZ (2000), Adjunct Professor of Biology; B.S. (1963), Humboldt State University; M.S. (1965), Ph.D. (1969), University of Washington.

ALAN LEVITON (2001), Adjunct Professor of Biology; B.A. (1949), M.A. (1953), Ph.D. (1960), Stanford University.

FRED LIFSITZ (1989), Adjunct Professor of Music; advanced study, Indiana University and the Tanglewood School of Music; member, Alexander String Quartet.

DOUGLAS LONG (2001), Adjunct Professor of Biology; B.S. (1988), University of California, Riverside; M.A. (1990), Ph.D. (1994), University of California, Berkeley.

JEROLD LOWENSTEIN (2004), Adjunct Professor of Biology; B.S. (1948), Columbia University; M.D. (1953), Columbia College of Physicians and Surgeons.
GEOFFREY W. MARCY (1994), Adjunct Professor of Physics and Astronomy; B.A. (1976), University of California, Los Angeles; Ph.D. (1982), University of California, Santa Cruz.

CHRIS McCARTHY (2005), Adjunct Assistant Professor of Astronomy; B.A. (1990), University of California, Berkeley; M.S. (1995), San Francisco State University; M.S. (1997), Ph.D. (2001), University of California, Berkeley.

JOHN E. MCCOSKER (1986), Adjunct Professor of Biology; B.A. (1967), Occidental College; Ph.D. (1973), Scripps Institution of Oceanography, University of California, San Diego.

MICHAEL McGOWAN (2000), Adjunct Professor of Biology; B.A. (1977), M.A. (1984), San Francisco State University; Ph.D. (1985), University of Miami.

LEORA NANUS (2009), Assistant Adjunct Professor of Geology; B.S. University of California, Santa Cruz; M.S. Western Washington University; Ph.D. University of Colorado, Boulder.

JAN NULL (1991), Adjunct Professor of Meteorology; B.S. (1974), University of California, Davis.

NADAV NUR (2004), Research Scientist, Romberg Tiburon Center, and Adjunct Professor of Biology.

STEVEN OBRESKI (2000), Research Scientist, Romberg Tiburon Center, and Adjunct Professor of Biology; B.S. (1960), Columbia University; Ph.D. (1968), University of Chicago.

CRISTIAN ORREGO (1993), Adjunct Professor of Biology; B.S. (1965), Indiana University; Ph.D. (1971), Brandeis University.

GORDON PARRY (2000), Adjunct Professor of Biology; B.S. (1972), Ph.D. (1975), University College London, University of London

STEPHEN RALSTON (2004), Adjunct Professor of Biology; B.A. (1971), University of California, Los Angeles; M.S. (1975), University of Hawaii, Honolulu; Ph.D. (1981), University of Washington, Seattle.

BALA RAVIKUMAR (2001), Adjunct Professor of Biology; B.E., M.S. (1983), Indian Institute of Science (India); Ph.D. (1987), University of Michigan.

MARK REYNOLDS (2001), Adjunct Professor of Biology; B.A. (1980), University of Iowa; M.S. (1982), Idaho University; Ph.D. (1990), University of California, Berkeley.

DALE ROBINSON (2000), Research Scientist, Romberg Tiburon Center, and Adjunct Professor of Biology; B.S. (1978), M.S. (1983), Portland State University; Ph.D. (1991), University of Southern California.

GRETCHE W. ROLLWAGN-BOLLENS (2004), Research Scientist, Romberg Tiburon Center, and Adjunct Professor of Biology; B.A. (1965), Harvard University; M.S. (1996), University of Hawaii; Ph.D. (2003), University of California, Berkeley.

PETER ROOPNARINE (2001), Adjunct Professor of Biology; B.S. (1984), Mount Allison University; M.S. (1988), Nova Southeastern University Oceanographic Center; Ph.D. (1993), University of California, Davis.

WILL RUSSELL (2004), Adjunct Professor of Biology; B.A. (1986), University of California, Santa Cruz; M.S. (1994), San Jose State University; Ph.D. (1999), University of California, Berkeley.

DAVID SIME (2004), Adjunct Professor of Biology.

KIM STEINER (2001), Adjunct Professor of Biology; B.A. (1975), Indiana University; M.S. (1977), Ph.D. (1982), University of California, Davis.

ROBERT STRONG (1993), Lecturer in Marketing; B.S. (1986), M.B.A. (1990), San Francisco State University.

CAROL TANG (2001), Adjunct Professor of Biology; B.A. (1989), University of California, Berkeley; M.S. (1993), Ph.D. (1996), University of Southern California, Los Angeles.

LAURA WAYTH (2013), Assistant Professor of Theatre Arts; B.A. (1993), The State University of New York, Binghamton; M.F.A. (2003), American Repertory Theatre / Moscow Art Theatre School Institute for Advanced Theatre Training at Harvard University.

FRANCES WILKERS (2000), Research Scientist, Romberg Tiburon Center, and Adjunct Professor of Biology; B.A. (1977), M.A. (1980), University of Cambridge; Ph.D. (1980), University of Bristol.

GARY WILLIAMS (2001), Adjunct Professor of Biology; B.A. (1972), University of California, Berkeley; M.A. (1975), San Francisco State University; Ph.D. (1987), University of Cape Town (South Africa).

PAUL YARBROUGH (1989), Adjunct Professor of Music; B.A. (1974), Davidson College, Artists Diploma (1978), Hartt School of Music; member, Alexander String Quartet.

MARIA DEL ROSARIO ZAVA (2012), Assistant Professor of Elementary Education; B.A. (2002), University of California, Santa Cruz; Ph.D. (2012), University of Washington, Seattle.

DE HUA ZHENG, Adjunct Professor of Asian American Studies; B.A. (1968), M.A. (1981), Zhongshan University, China; Ph.D. (1990), University of Hong Kong.

Emeritus Emerita Faculty

Emeritus Emerita Faculty

KENNETH BRINEY, Ph.D., Health Education. Appointed 1968. Emeritus since 1990.

GUNNAR SAUSJORD, Ph.D., Elementary Education. Appointed 1953. Emerita since 1983.

COURSE DESCRIPTIONS

Course Descriptions, Symbols, and Terms

Explanation of Course Notations
Certain notations are uniformly used in the course descriptions in this Bulletin.

- Courses are not repeatable for credit unless a statement, "May be repeated for credit," appears in the course description.
- The figure in parentheses following the course title indicates the number of semester units for the course. Some courses may be offered for varying units and are indicated by specifying the range of units; e.g., (1–3).
- All course prerequisites are listed in italics at the beginning of the course description.
- The statement "Topic to be specified in Class Schedule" at the beginning of the course description indicates that a more specific topic has been developed for offering. The specific topic(s) will be listed in the Class Schedule.
- Some courses are offered jointly by one or more departments; e.g., 1 R 321 is also offered as PL 321. This notation appears at the end of the course description. "May not be repeated under alternate prefix."
- Course attributes are listed below the course descriptions signify General Education courses [GE], U.S. History and Government requirement courses [USH, USG], California State and Local Government courses [CSLG], and Graduation Writing Assessment Requirement courses [GWAR].

Course Descriptions
Course descriptions briefly describe the content or subject matter to be covered and provide additional information on units of credit, the level of instruction (see course numbering system) and prerequisites.

Students may not earn credit in a cross-listed course a second time under an alternate prefix.

Information on specific offerings (times, rooms, instructors) will be found in the Class Schedule which is available on the SF State Web site in advance of fall, spring and summer semesters. Experimental and variable topic courses which are offered each semester can be found in the Class Schedule.

Course Numbering System
Because of the differences in the organization and content of the various disciplines and professions, there is no uniform way of numbering courses that would be equally useful in all fields of knowledge.

In general, it may be assumed that advances in division level (lower, upper, graduate) correlate with more difficult and challenging academic work. Upper division courses typically include a statement that indicates the prerequisite course work. Sometimes, however, disciplines organize their course numbering partly in terms of criteria other than the degree of difficulty. It should be noted, too, that some students find introductory courses to be more demanding than advanced, specialized courses. In such courses, a more comprehensive approach and the first exposure to new ways of thinking may be harder for some individuals than covering a smaller, more familiar, area in much greater detail. Also, please note that the 9000–9999 series is designated for professional level courses which award Continuing Education Units (CEUs). CEUs are nationally recognized units of measurement for participation in education and training programs for which academic credit is not awarded. The following course numbering system is used at this university:

<table>
<thead>
<tr>
<th>Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>0–99</td>
<td>Remedial instruction and non-credit courses (units and grades earned will not count towards graduation requirements)</td>
</tr>
<tr>
<td>100–299</td>
<td>Lower division</td>
</tr>
<tr>
<td>300–699</td>
<td>Upper division</td>
</tr>
<tr>
<td>700–899</td>
<td>Graduate courses</td>
</tr>
<tr>
<td>900–999</td>
<td>Doctoral courses</td>
</tr>
<tr>
<td>9000–9999</td>
<td>Professional level courses offered for Continuing Education Units (CEUs); may neither be applied to nor substituted for graduation requirements.</td>
</tr>
</tbody>
</table>

Paired Courses
It is the policy of the university to permit individual departments or program areas to develop advanced undergraduate and graduate level courses with virtually identical subject matter and to offer them in a paired arrangement with a single instructor and a common meeting schedule. The mechanism of pairing graduate and advanced undergraduate courses is a means of facilitating programs or circumstances where limited resources otherwise would require that the quality of one program be sacrificed to maintain the quality of the other.

Special Course Numbers
For uniformity, certain types of courses have been listed by all departments and colleges with the same numbers:

- 699 and 899 are used for undergraduate and graduate independent study
- 893 for written creative works
- 894 for creative work projects
- 895 for field study or research projects
- 896 for directed reading
- 897 for graduate research
- 898 for master’s thesis

Experimental and Temporary Courses
All departments are authorized to offer experimental or temporary courses. These are not specifically described in the Bulletin. Descriptions may be obtained from the online Bulletin when such courses appear in the Class Schedule. The numbers 274, 277, 674, 677, and 874 are used by all departments to designate lower division, upper division, and graduate levels, respectively. The standard Bulletin description for these courses is:

274/277 Exploration in (name of discipline): (subtitle specifying content) (1–6)
A course involving exploration of a major problem or theme or an experimental method of instruction, with variable content as specified in the course subtitle in the Class Schedule. May be repeated for credit when different content is involved.

Remedial Instruction and Non-Credit Courses
Courses numbered 0–99 are remedial courses. Units and grades earned will not count towards meeting graduation requirements.
International Study Courses
San Francisco State University provides the opportunity for students enrolled in the California State University International Programs to receive credit for special study or for subjects taken at universities abroad. For details of the program, consult the International Programs page. The numbers 292, 492, and 792 are used to designate lower division, upper division, and graduate levels, respectively.

292 Projects in Study Abroad (subject to be designated by Overseas Resident Director, International Programs) (1–3)
Prerequisite: consent of major advisor. Open only to students in California State University International Programs. May be repeated for credit when different subjects are involved.

Independent Study
Under independent study courses, upper division and graduate students can pursue topics or problems of special interest beyond the scope of a regular course under the supervision of a faculty advisor. The work is of a research or creative nature, and normally culminates in a paper, project, comprehensive examination, or performance. Before registering, the student must have the topic approved by the instructor who will be supervising the independent study, as well as by the advisor and the department chair. (Forms are available in department offices and online at sfu.edu/~admisrec/reg/reg.html (http://www.sfu.edu/~admisrec/reg/reg.html).) The course numbers for independent study are 699 and 899. In most cases, independent study courses may be repeated for credit. Check the description for limitations.

Methods of Instruction
The forms and methods of teaching vary widely in specific classes. The more traditional methods of lecturing, discussion, laboratory work, and individually supervised research or projects are being supplemented by such learning resources as group and individual exercises, television, films and records, videotaping, and the use of the computer. Modern specialized facilities and equipment are used in many courses in different fields. These include: laboratories for teaching the sciences, a planetarium, studios for teaching the fine arts; a variety of facilities for teaching communications; a language laboratory for teaching foreign languages and linguistics courses; a speech and hearing clinic; the Tiburon Center for Environmental Studies; the Moss Landing Marine Laboratories; the Sierra Nevada Field Campus.

San Francisco State University encourages experimentation and innovation in teaching and welcomes a diversity of approaches. Increasingly and with growing help from students, efforts are being made on the campus to examine, evaluate, and improve the learning experiences.
Accounting (ACCT)

ACCT 100 Introduction to Financial Accounting (Units: 3)
Prerequisite: Passing ELM test.
Objectives, basic theory, principles, and methods of financial accounting. Reports as a framework for decision-making. Measuring and reporting financial position regarding income, costs, and revenue.

ACCT 101 Introduction to Managerial Accounting (Units: 3)
Prerequisite: ACCT 100 or equivalent with a grade of C- or better.
Use of accounting information to plan and control an organization’s financial activities. Processes used to plan and control costs and expenditures. Quantitative techniques used to evaluate alternative choices.

ACCT 199 Principles Equivalency Transfer (PET) (Unit: 1)
Prerequisite: Consent of instructor.
Special study project to allow full transfer credit of partially equivalent course(s) from another university/college for ACCT 100 and ACCT 101. (CR/NC grading only)

ACCT 300 Accounting and Finance Reporting (Units: 3)
Prerequisite: Passing ELM test.

ACCT 301 Intermediate Financial Accounting I (Units: 3)
Prerequisites: Restricted to Accounting majors and minors; ACCT 100 with a grade of C or better.
A comprehensive treatment of the theory and practice of accounting for assets, income, and the construction of financial statements. Additional topics include current liabilities and accounting changes. (Plus-minus letter grade only)

ACCT 302 Intermediate Financial Accounting II (Units: 3)
Prerequisites: Restricted to Accounting majors; ACCT 301 with a grade of C or better.
A comprehensive treatment of the theory and practice of accounting for investments, long-term liabilities, owners’ equity, leases, post-retirement benefits, income taxes, earnings per share, and the cash flow statement. (Plus-minus letter grade only)

ACCT 305 Cost Accounting (Units: 3)
Prerequisites: Restricted to Accounting majors; ACCT 101, ACCT 301, with grades of C or better.
Cost volume profit analysis, cost accumulation techniques, decentralization, transfer pricing, capital budgeting, cost allocation, budgeting, statistical cost estimation. Managerial uses of information for planning, control, and performance evaluation. (Plus-minus letter grade only)

ACCT 307 Accounting Information Systems (Units: 3)
Prerequisite: ACCT 301 with a grade of C- or better.
Development and use of accounting information systems for managerial control, and external reporting.

ACCT 317 Accounting Internship (Units: 1-3)
Prerequisites: ACCT 301; average GPA of 3.0 in upper division Accounting courses; and consent of instructor.
Work experience, related to the student’s academic program, with an accounting firm, private industry, government agency, or not-for-profit organization. (CR/NC grading only)

ACCT 501 Advanced Accounting (Units: 3)
Prerequisites: Restricted to upper division Accounting majors; ACCT 302 with a grade of C- or better.
Selected accounting problems. Business combinations and consolidated financial statements. Multi-national operations, segmental reporting, interim reporting, and partnerships.

ACCT 504 Government and Non-Profit Accounting (Units: 3)
Prerequisites: Restricted to upper division Accounting majors; ACCT 301 with a grade of C or better.
Financial reporting policies, procedures, and responsibilities of state and local government units, hospitals, trust entities, schools, voluntary health organizations, and other non-profit organizations. (Plus-minus letter grade only)

ACCT 506 Auditing (Units: 3)
Prerequisites: Restricted to upper division Accounting majors; ACCT 302, ACCT 307, DS 212 with grades of C- or better.
Principles and practice of auditing especially as it relates to the examination of financial statements by certified public accountants. Brief consideration of operational auditing. (Plus-minus letter grade only)

ACCT 507 Information Systems Auditing (Units: 3)
Prerequisites: Restricted to upper division Accounting majors; ACCT 302.
The accounting system environment with respect to computer implementation of procedures. Audit techniques and specific audit methodology to handle computerized audits.

ACCT 508 Federal Tax Accounting I (Units: 3)
Prerequisites: Restricted to upper division Accounting majors; ACCT 301 with a grade of C or better.
Federal income tax law as applied to individuals, corporations, and partnerships. Tax research and responsibilities in a tax practice.

ACCT 509 Federal Tax Accounting II (Units: 3)
Prerequisites: Restricted to upper division Accounting majors; ACCT 508.
Federal income tax focused on advanced topics applicable to individuals, corporations, and partnerships. Estate and gift taxation and income taxation of estates and trusts.

ACCT 513 International Accounting (Units: 3)
Prerequisites: Restricted to upper division Accounting majors; ACCT 301 with a grade C or better.
Covers the international aspects of accounting, financial reporting, and operations of multinational enterprises (MNE). (Plus-minus letter grade only)

ACCT 518 Accounting Fraud Examination (Units: 3)
Prerequisites: Restricted to upper division Accounting majors; ACCT 302 or equivalent.
Nature of fraud. Interactive case sessions on how fraud is committed and how to investigate fraud. (Plus-minus letter grade only)
ACCT 551 Principles of Internal Auditing (Units: 3)
Prerequisites: Restricted to upper division Accounting majors; ACCT 301 with a grade of C or better, ACCT 307 with a grade of C- or better.

Overview of the internal audit process; control of internal systems, audit evidence, and reporting the internal audit. (Plus-minus letter grade only)

ACCT 699 Independent Study (Units: 1-3)
Prerequisite: Consent of instructor, adviser, and department chair.

Intensive problem analysis under the direction of an accounting faculty member. May be used to make up partial equivalencies for transfer students. (CR/NC grading only)

ACCT 800 Financial Accounting I (Units: 3)
Prerequisites: Restricted to graduate business students; BUS 780 with a grade of B- or better; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

ACCT 801 Financial Accounting II (Units: 3)
Prerequisites: Restricted to graduate business student; BUS 780 with a grade of B- or better; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Accounting for investments, liabilities, stockholders' equity, pensions, leases, income taxes, earnings per share and cash flow. (Plus-minus letter grade only)

ACCT 802 Strategic Management Accounting (Units: 3)
Prerequisites: Restricted to graduate business students; BUS 780 with a grade of B- or better; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Use of cost data in management decision making as it relates to planning, cost control, and performance evaluation. Relevant management tools as they relate to cost management. Role of qualitative factors relevant to the managerial decision-making process. (Plus-minus letter grade only)

ACCT 803 Auditing Principles and Practice (Units: 3)
Prerequisites: Restricted to graduate business students; ACCT 800; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Application of auditing principles while examining financial statements. Review of internal control systems, sampling techniques, and report writing. Operational auditing, professional ethics, and auditors' liability. (Plus-minus letter grade only)

ACCT 804 Legal and Professional Responsibilities in Accounting (Units: 3)
Prerequisites: Restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Legal rules and principles that apply to business transactions, including contracts, property, the debtor-creditor relationship, the formation of business organizations, the Uniform Commercial Code, and the regulation of business conduct. Professional responsibilities of CPAs, government regulation of securities markets, and corporate financial reporting. (Plus-minus letter grade only)

ACCT 807 Seminar in Accounting Information Systems (Units: 3)
Prerequisites: Restricted to graduate business students; BUS 780 with a grade of B- or better; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

The development of accounting information systems and their uses for management decision-making and external reporting. Auditing and control of accounting information systems. (Plus-minus letter grade only)

ACCT 808 International Accounting (Units: 3)
Prerequisites: Restricted to graduate business students; ACCT 800 with a grade of B- or better; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

A survey of problems relating to accounting for multinational corporations doing business in a global environment and attempts to solve them. (Plus-minus letter grade only)

ACCT 811 Introduction to Federal Tax (Units: 3)
Prerequisites: Restricted to graduate business students; BUS 780 with a grade of B- or better (may be taken concurrently); graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

An in-depth introduction to federal tax problems: income, deductions, credits, exemptions, and property transactions. (Plus-minus letter grade only)

ACCT 812 Advanced Federal Taxation (Units: 3)
Prerequisites: Restricted to graduate business students; ACCT 811 or consent of instructor; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Focus on advanced topics applicable to individuals, partnerships, corporations, estates, and trusts. Extensive coverage of the tax consequences of property transactions and alternative minimum tax. Corporate tax topics include formation, operation, non-liquidating distributions, liquidating. Federal estate and gift taxation, and income taxation of trusts and estates are also covered. (Plus-minus letter grade only)

ACCT 818 Accounting Ethics (Units: 3)
Prerequisites: ACCT 800; restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Advanced topics in accounting ethics including the application of professional ethics and responsibilities in the accounting and business environment and an analysis of the underlying ethical reasoning. (Plus-minus letter grade only)

ACCT 822 Taxation of Property Transactions (Units: 3)
Prerequisites: Restricted to graduate business students; ACCT 811; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Examination of the income tax treatment gains and losses resulting from the disposition of various types of property by different taxpayers. (Plus-minus letter grade only)
ACCT 826 Taxation of Partnerships and Partners (Units: 3)
Prerequisites: Restricted to graduate business students; ACCT 811; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Overview of provisions of subchapter k; partnership tax; determination of tax consequences incident to the formation of a partnership; understanding the taxation of operations of a partnership; determination of partners and partnerships tax basis considerations; examination of tax consequences of property distributions to partners. (Plus-minus letter grade only)

ACCT 831 Financial Statement Analysis (Units: 3)
Prerequisites: Restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs, BUS 780.

Financial statement analysis and recent developments in financial accounting, ethics, and regulation. Relevant to CPAs, CMAs, and financial managers. (Plus-minus letter grade only)

ACCT 833 Current Issues in Auditing (Units: 3)
Prerequisites: Restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs, ACCT 803

Examination of institutional features of auditing, including the history of auditing, audit theory and the application of audit techniques during financial statement audits. (Plus-minus letter grade only)

ACCT 835 Corporate Governance and the Design and Testing of Internal Controls (Units: 3)
Prerequisites: Restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs, ACCT 800.

Examination of corporate governance structures as well as the design and testing of internal controls related to financial reporting. (Plus-minus letter grade only)

ACCT 848 Seminar in Cost Accounting (Units: 3)
Prerequisites: Restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs, BUS 780.

Examination of organizational control and strategic performance evaluation, measurement issues and current topics associated with cost accounting. (Plus-minus letter grade only)

ACCT 851 Advanced Financial Reporting (Units: 3)
Prerequisites: Restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs, ACCT 801 (may be taken concurrently).

Examination of the complexities of recording and reporting for business combinations, multi-national operations, partnerships, and foreign currency transactions, and in-depth study of the consolidated financial statements. (Plus-minus letter grade only)

ACCT 890 Ethics and Contemporary Accounting Issues (Units: 3)
Prerequisites: ACCT 800, two additional 800 level ACCT courses, enrollment priority for Master of Science in Accounting majors, consent of instructor, approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies.

Supervised independent and group research into contemporary topics and issues in accounting including international accounting standards and ethics, culminating in oral and written presentations. (Plus-minus letter grade only)

ACCT 899 Independent Study (Units: 1-3)
Prerequisite: Consent of instructor, advisor, and department chair.

Intensive study of a particular problem under the direction of an accounting faculty member. Open only to graduate students of demonstrated ability to do independent work. May be repeated for a total of 6 units. (Plus-minus letter grade only)
Africana Studies (AFRS)

AFRS 100 General Studies Colloquium (Units: 3)
Developing the individual's awareness of race and ethnicity as it impacts educational achievement and attainment from preschool to the university level. Social, economic, and political relationship between schools and community. Survey of theories, characteristics, methodologies, and application of innovative research methodologies to the African American educational experience and connection to other cultural communities.

AFRS 101 Introduction to Africana Studies (Units: 3)
Development of Africana Studies as an academic discipline. Topics include history, literature, psychology, politics, and others.

Course Attributes:
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 110 Critical Thinking and the Black Experience (Units: 3)
Developing the basic skills involved in understanding, criticizing, and constructing arguments by using materials reflective of experiences of Blacks and the third world culture in the United States.

AFRS 111 Black Cultures and Personalities (Units: 3)
The cultural influence on the development of Black personality configurations.

Course Attributes:
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 125 Black Community Involvement Workshop (Units: 3)
Exploration of community organizations through actual involvement in various community agencies. Social, economic, and political resources in the community. May be repeated once.

AFRS 200 Introduction to Black Psychology (Units: 3)
Theories, characteristic methodologies, and applicability to the African American behavioral experiences and interface with other cultural communities.

Course Attributes:
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AFRS 201 Kemet, Afrocentricity, and the Dawn of Science (Units: 3)
Kemetic Science and the primacy of Kemet (Egypt) in the development of modern science. The structured whole, the Nubian Vortex, Cartesian vs. Alchemical cosmologies, and the Afrocentric thought and achievement of African American scientists and engineers.

Course Attributes:
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AFRS 202 Black Men's Studies (Units: 3)
Exploration of diverse lives, experiences, and development of Black men and boys within the context of their families, communities, and society at large, and of the experience and development of Black manhood and masculinity from a cultural and historical lens within several societal dimensions.

Course Attributes:
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 203 Black Social Sciences (Units: 3)
Methodological principles, key theoretical concepts of western social sciences, and applications in third world critical perspective. Work of Black social scientists that have added to understanding black experience. Relevance of western methods and theories to Black development.

Course Attributes:
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 204 Black Creative Arts (Units: 3)
Culture of Black Americans through examination of the creativity of its women artists.

Course Attributes:
- C1: Arts
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AFRS 208 Introduction to African American History (Units: 3)
Examination of black history in the United States from Colonial times to the present. Critical review of major themes including enslavement, abolitionism, the Civil War, urbanization, freedom, and civil rights. The aftermath of each theme will be analyzed. (Plus-minus ABC/NC, CR/NC grading)

Course Attributes:
- U.S. History
- D2: Social Sciences: U.S. Hist
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AFRS 210 Introduction to Africana Literature (Units: 3)
Role of literature in the formulation, maintenance, and articulation of a cultural ethos.

Course Attributes:
- C3: Humanities: Literature
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 213 Science and Spirituality in Ancient Africa (Units: 3)
Science and mathematics, in an African religious-spiritual context, used to conduct business, build monuments, study star and planetary motion, and explain the origin and evolution of the universe. Basic systems of measurement and calculation from ancient and modern Africa.
AFRS 214 Second Year Written Composition: Africana Studies (Units: 3)
Prerequisite: ENG 114 or equivalent with a grade of CR or C- or better.

Development of expository and analytic writing skills through the study and appreciation of Black literature. Various authors and genres of Black literature from different historical and cultural periods. Literary criticism. Must be taken after student has completed 24 units and before completing 60 units. (Plus/minus ABC/NC, CR/NC allowed)

Course Attributes:
- A4: Written English Comm II
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 215 Introduction to Black Family Studies (Units: 3)
Theories and research about Black families in America. Emerging trends in Black families: ethnic stratification, family, and marital stability, socialization processes, and research issues.

Course Attributes:
- E1: Lifelong Learning Develop
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AFRS 221 African American Music: A 20th Century Survey (Units: 3)
History, growth, and development of African American music during the 20th century.

Course Attributes:
- C1: Arts
- Am. Ethnic & Racial Minorities

AFRS 225 Images and Issues in Black Visual Media (Units: 3)
Historical and developmental survey of black media; overview of the cultural economic, social and political forces that influence and shape black media in America (which in turns affects black images and identities all over the world); analysis of aesthetics, social theories, research methods and activist strategies that are associated with blackness, race and representation in film and television and in alternative media outlets.

AFRS 230 African American Gospel Workshop (Units: 3)
Workshop on gospel music: traditional African antecedents of gospel music, religious, and secular forms developed, and economic and political factors shaping gospel music. Guest appearance by a known gospel artist. Culminates in a student performance.

Course Attributes:
- C1: Arts
- Am. Ethnic & Racial Minorities

AFRS 256 Hip Hop Workshop (Units: 3)
History, aesthetics, mechanics, and politics of Rap music and Hip Hop culture. African American aspects and African-centered qualities of the cultural movement known as Hip Hop.

Course Attributes:
- E1: Lifelong Learning Develop
- C1: Arts
- Am. Ethnic & Racial Minorities
- Environmental Sustainability
- Global Perspectives
- Social Justice

AFRS 260 Power, Racism and Africana Liberation (Units: 3)
Behavioral and social sciences used to compare and analyze across time, space, and geographical region, responses to racism by world culture and civilization of people of African descent. [Formerly ETHS 260]

Course Attributes:
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AFRS 266 Black On-line: Cyberspace, Culture, and Community (Units: 3)
The impact of the information revolution and the digital divide on Black people worldwide. Understanding the need to blend cyber technology with the issues of Black culture and community. Fully on-line class; must have an e-mail address.

Course Attributes:
- E1: Lifelong Learning Develop
- C2: Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AFRS 271 Elementary Kiswahili Language and Culture (Units: 3)
Introduction to speaking, listening and understanding, writing, and reading skills in Kiswahili and Swahili culture and worldview.

AFRS 290 Malcolm X in the Context of Black Nationalism (Units: 3)
Critical examination of Malcolm X—his political, spiritual, economic, and social philosophy and programs in the historical context of Black nationalism. Review of his legacy in contrast and comparison to other Black leaders such as Martin Luther King.

AFRS 300 From Africa to Olmec America: Ancient African Prehistory and History (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Early African civilization and pre-colonial era: history of the ancient empires of Nubia, Ethiopia, Congo, Zimbabwe, Zulus, etc. History of colonialism; patterns of annexation; journey of Africans from Africa to the Caribbean, Latin and South America, and the U.S.

Course Attributes:
- Am. Ethnic & Racial Minorities
- Global Perspectives
AFRS 301 Africa in Global Perspective (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Physical, social, cultural, political, technological, economic, and business environment of Africa; policy determinants influencing economy; polity and business systems; interactions between modern development theory, world political economy, and domestic policy; strategies and constraints to reverse underdevelopment.

AFRS 302 Black Diaspora (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Dynamics of Black dispersal, 15th to 20th centuries; cross-currents and interactions within the Black world; constraints on the formation of Black solidarity movements; contemporary movements.

AFRS 303 African American History (Units: 3)
Prerequisites: AFRS 300, AFRS 301 or equivalent.
Recurrent themes and issues in Black history since the 19th century. Reconstruction and the emergence of mass movements and counter-ideologies.

AFRS 304 Black People and the American Experience (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
History of Black people and their American experiences from 1770 to 1954. Important constitutional, political, economic, and cultural issues as they developed nationally and locally.

AFRS 305 Ancient Egypt (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
History, religion, culture, economic system, and dynastic periods of the world’s greatest ancient civilization, Egypt or KMT, the Black country.

AFRS 310 Anthropology of Blackness (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Examination of anthropological theory, research, and practice as it relates to constructions of blackness as well as African-diasporic identities. African-diasporic contributions to anthropology, anthropological research, and theory concerning Africana identities will be explored.

AFRS 312 Kalifia: The Black Heritage of California (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
African American presence in the Golden State; the Black heritage in the establishment, development, and evolution of California from the Gold Rush era to the present.

AFRS 320 Black Politics, Mass Movements, and Liberation Themes (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Theoretical constructs and basic premises that draw on political experiences of Black people. Review of political science theories as they have been applied to Blacks in the U.S.

AFRS 326 Black Religion (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 335 The Black Woman: A Cultural Analysis (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Black women in the Americas, the Caribbean, and on the African continent: their struggles for rights as Blacks and as women, their contribution to the development of their societies, their political aptitude, and their artistic adeptness.

Course Attributes:
- E1: Lifelong Learning Develop
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AFRS 340 Economics of the Black Community (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Economic problems of Black people. Role of Black labor in the American capitalist economy. Welfare schemes and Black reaction to population control.

AFRS 345 Blacks in Urban America (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Structural and cultural conditions such as poverty, economics, welfare and political arrangements that impact urban America; particular attention to ways in which Black communities examine how poverty and race influence social policy and effective strategies and solutions for change.

AFRS 350 Black-Indians in the Americas (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Examines factors impacting on multiracial identity formation among Native communities throughout the Americas with a specific focus on Black-Indians; explores concepts and theories regarding blood quantum, sovereignty, and land rights, and the social, legal, and political understanding of mixed-race Native Americans.
(This course is offered as AIS 350, AFRS 350, and LTNS 355. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
AFRS 370 Health, Medicine, and Nutrition in the Black Community (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Theoretical and practical implications of health and healing in the Black community today. Personal and community perspectives. Historical health disparities in Black community. Includes interactive class activities and presentations from people in the community working to address these issues.

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Environmental Sustainability
- Social Justice

AFRS 375 Law and the Black Community (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Contemporary and historical investigations of city, state, and federal laws and how they affect the human rights, self-determination, and survival of the Black community in America. Administration of justice by court, police, security, and legislative agencies.

Course Attributes:
- Calif State & Local Govt
- U.S. Govt CA State Local Govt
- U.S. History
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 376 Government, the Constitution, and Black Citizens (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Nature and source of constitutional power—federal and state. Interaction of the Supreme Court with the Congress and with the Presidency; constitutional issues involving poor and Black citizens. [CSL may be available]

Course Attributes:
- U.S. Govt CA State Local Govt
- U.S. History
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 382 African American Economic History (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Factors which have constrained historically the economic status of African Americans in the labor market; industries and occupations; relationships to trade unions. How all these affect the income position of African American families.

AFRS 400 Black Arts and Humanities (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Creative efforts of Black writers and artists. Values expressed in these works and their relation to African-American culture.

Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 401 Pan African Black Psychology: A North American, South American and Caribbean Comparison (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examination of how the "identity" and "Consciousness" of Afro-Brazilian, African-American, and Haitian people have been complicated and confused by enslavement, westernization, and the imposition of a White Supremacist ideology. Comparison of the similarities and differences between Afro-Brazil, Haitian, and USA African American retention.

Course Attributes:
- Am. Ethnic & Racial Minorities

AFRS 411 African and African American Literature (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Literature of Blacks of two continents. Cultural phenomenon of the critical impact of American Black authors on African writing and perspective.

AFRS 450 African Philosophy and Cosmology (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Foundations of Black philosophy from ancient Africa to the present. Theories of knowledge and thought within the social and political context.

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities

AFRS 466 Black Lives Matter: Race and Social Movements (Units: 4)
Prerequisite: ENG 214 or equivalent.

Subordinate status of African-Americans and others in the U.S.; nexus between power, racism, and violence. Strategies for social change in terms of leadership, organization, and movements. (This course is offered as PLSI 466 and AFRS 466 [formerly ETHS 466]. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AFRS 515 Black Family Studies (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Structure, history, and functioning of the Black family: African cultural traditions related to Black family life.

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Environmental Sustainability
- Social Justice
AFRS 516 Research Methods (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Application of research methods to Black populations and the Black community.
Course Attributes:
- UD-D: Social Sciences
- Social Justice

AFRS 525 Black Child Development (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Analysis of both the traditional theoretical approaches to the study of Black children and innovative approaches: areas of cognitive development, socialization, education, personality development, and the social context of childhood.

AFRS 551 Fieldwork in Africana Studies (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Supervised fieldwork in community organizations enabling students to apply knowledge gained in classes to the solution of problems and the development of the community. Classwork, 2 units; fieldwork, 1 unit.

AFRS 600 Proseminar in Africana Studies (Units: 3)
Prerequisite: AFRS 214 or equivalent or consent of instructor.

Educational, sociological, psychological, political, economic, historical, and cultural aspects of the Black experience particularly as these pertain to Africana Studies curricula and programs.

AFRS 645 Literature of the Harlem Renaissance (Units: 3)
Prerequisite: AFRS 516 Research Methods or consent of instructor.

Reading of Harlem Renaissance writers including Countee Cullen, Nella Larsen, Zora Neale Hurston, and Langston Hughes. Hone reading and analytical writing skills through essays, class discussion, and structured group work.
Course Attributes:
- E1: Lifelong Learning Develop
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AFRS 646 Frantz Fanon’s Psychology of Violence, Negation, and Liberation (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

A critical discussion of human oppression and liberation. A study of the writings of Frantz Fanon and their use to understand various paradigms of oppression, the psychology of liberation, objectification, and negation, and the psychological value of African-centered thought.

AFRS 665 Black Journalism (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

History, social role, function, and organization of print and broadcast journalism in relation to Black Americans. Writing, planning, and publication of papers and magazines. May be repeated for a total of 6 units.
Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities

AFRS 678 Urban Issues of Black Children and Youth (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examination of Black children and youth by understanding Black culture and history, behavior patterns, language, attitude, and family backgrounds; the role of education in African American traditions, stressing strategies for attaining excellence in an equitable environment.

AFRS 685 Projects in the Teaching of Africana Studies (Units: 1-4)
Prerequisite: Upper division standing and consent of instructor.

Academic service learning practicum/internship experience as an undergraduate instructional aide. Participation in the teaching of a regular instructionally-related class. Limited to undergraduate students only. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.)

AFRS 694 Community Service Learning (Units: 1-3)
Prerequisites: Upper division standing or consent of instructor; must be taken concurrently with an Africana Studies course supporting community service learning.

Community service learning activity course. May be repeated for a total of 6 units. [CSL may be available]

AFRS 699 Independent Study (Units: 1-3)
Prerequisites: Consent of major adviser, department chair, and instructor. Supervised, individual study of a particular problem in Africana Studies. The student must state the problem, the method of data gathering, and the method of data analysis. May be repeated for a total of 6 units.

AFRS 705 Seminar in Africana Studies (Units: 3)
Prerequisite: Consent of instructor.

Historical and intellectual foundation of the Africana Studies discipline: critical knowledge base, cultural grounding, intellectual orientation. Major philosophical, cultural, political, economic, and social developments and traditions found in African and African American society.
All University (A U)

A U 101 First Year Experience (Units: 3)
Goals of higher education; mission and structure of the university; communication and information competency; academic skill development; personal and interpersonal skills related to academic success. (CR/NC grading only) [CSL may be available]

A U 200 Pathways Seminar for Pre-Health Majors (Units: 1-3)
Intended for students in Causeways initiative. Exploration of health-related fields to enhance options for majors leading to newly discovered career paths and formation of leadership, academic, and metacognitive skills for near-term and life-long advancement and learning. (Plus-minus ABC/NC, CR/NC)

A U 280 Community Service Learning Option (Units: 1-3)
Must be concurrently enrolled in a university course offering a community service learning (CSL) opportunity. Students perform community service and reflect on their experience as required by the concurrent course. May be repeated for a total of 6 units. [CSL may be available]

A U 301 Bay Area Environments (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Introduction to the complex nature of human and environment interaction in the SF Bay Area. Exploration of environmental issues, geologic processes, water, weather, climate and ecosystems, anthropogenic changes across the region, and the future of the Bay Area. (This course is taught in a hybrid modality [online and in-person]). (This course is offered as A U 301 and GEOG 301. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-B: Physical Life Science
• Partial Online Course
• Environmental Sustainability

A U 302 Bay Area Culture (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Ever since the Gold Rush, authors, journalists, artists, architects, and musicians have shaped the way people here and abroad understand Bay Area culture. Students study the region's vast projection of itself, paying special attention to transformational periods, movements, events, and figures.
Course Attributes:
• UD-C: Arts and/or Humanities
• Am. Ethnic & Racial Minorities
• Environmental Sustainability
• Global Perspectives

A U 303 Bay Area History and Society (Units: 3)
Prerequisite: ENG 214 or equivalent.
Exploration of the Bay Area, specifically San Francisco, Oakland, Berkeley, and San Jose, from a sociohistorical and global perspective. Exploration of various dimensions of the bay area's human and environmental composition and history, paying special attention to the built environment, immigration, globalization, race, and class. (This course is offered as A U 303 and HIST 451. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-D: Social Sciences
• Am. Ethnic & Racial Minorities
• Social Justice

A U 425 Advanced Peer Advising (Unit: 0)
Prerequisites: COUN 325, Peer Counselor Training, or consent of instructor.
Advanced leadership, communication and peer advising skills, as well as university rules, regulations, and services. Students take a meaningful role in the undergraduate orientation and/or peer advising program. (CR/NC grading only)

A U 600 Willie Brown Internship Seminar (Units: 3)
Prerequisite: Willie Brown Internship
Overview of public sector issues at the local level; focus on professional development and career pathways. Guest speakers will discuss topics related to the public sector. (Plus-minus letter grade only)

A U 694 Integrating Interdisciplinary Perspectives on Study Abroad (Unit: 1)
Prerequisites: ENG 214 or equivalent, acceptance into a study abroad program.
Culminating experience for students fulfilling GE Segment III through Study Abroad: Exploring Cultural Diversity. Student works with a faculty advisor to complete a paper of 10 or more pages that integrates disciplinary perspectives gained from study abroad with the student's own experiences living in a different culture.

A U 697 Tutoring Across Disciplines: Skills and Practices (Units: 3)
Prerequisite: Upper division standing and consent of instructor.
Current topics, principles, philosophy, and practice of tutoring across disciplines in a university academic tutoring setting. Interactive instruction and experience in techniques, strategies, and communication for effective tutoring and learning. (ABC/NC grading; CR/NC allowed)

A U 793 Cooperative Education Program (Units: 1-3)
Prerequisite: Graduate adviser or faculty approval. Intended for all academic majors.
Supervised employment in academically relevant fields of study. Objectives are career development, occupational experience, and educational subsidy. (CR/NC grading only)

A U 796 Tutoring Across Disciplines: Skills and Practices (Units: 3)
Prerequisite: Graduate standing and consent of instructor.
Current topics, principles, philosophy, and practice of tutoring across disciplines in a university academic tutoring setting. Interactive instruction and experience in techniques, strategies, and communication for effective tutoring and learning. (ABC/NC grading; CR/NC allowed)
American Indian Studies (AIS)

AIS 100 Introduction to American Indian Studies (Units: 3)
Introduction to American Indian Studies: the histories, cultures, identities, and contemporary issues of the indigenous American Indian, Alaskan Native, and Native Hawaiian groups. Topics range from colonialism, racialization, social formation, identity politics, and environmental issues to law and politics.

Course Attributes:
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 103 Introduction to Pacific Studies (Units: 3)
Examination of historic and contemporary issues related to Pacific Islander communities in the United States across the Pacific Islander diaspora. (This course is offered as RRS 103 and AIS 103. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- U.S. History
- D2: Social Sciences: U.S. Hist
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AIS 150 American Indian History in the United States (Units: 3)
The major indigenous cultures residing in the present U.S.; regional groups, structures, world views; major events that took place between the first Americans and new Americans from contact up to 1930.

Course Attributes:
- U.S. History
- D2: Social Sciences: U.S. Hist
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 160 Survey of Native California (Units: 3)
Native California from origin to contemporary times. Comparative data, adaptive strategies, and relations between the indigenous populations and European and Anglo-American contact.

Course Attributes:
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Environmental Sustainability
- Social Justice

AIS 162 American Indian Oral Literature (Units: 3)
Traditional Indian literatures: legend, origin stories, pre-contact poetry, oratory, and stories of the people. Forms, styles, images, and themes used by selected tribes to express the experience of their daily lives.

AIS 205 American Indians and U.S. Laws (Units: 3)
The legal history that has developed between the earliest settlers and the existing peoples of the American continent. Legal and social concepts that the settling communities had toward Indian Nations. [CSL may be available]

Course Attributes:
- U.S. Govt CA State Local Govt
- D3: Social Sciences: US CA Gov
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 230 Urban Indians (Units: 3)
Comparative examination of American Indian experiences in urban areas, in distinction from reservation and rural life.

Course Attributes:
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 235 American Indians: Image and Issues in the Mass Media (Units: 3)
Recurring images and treatment of American Indians, especially in film, television, advertising, popular literature, and commercial arts. Cultural, economic, social, and political forces that influence image and artistic expression.

Course Attributes:
- C1: Arts
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 300 American Indian Studies Research Methodologies (Units: 3)
Prerequisites: Upper division standing, AIS 100 (may be taken concurrently), ENG 214 or equivalent.

Overview of social scientific and literary theories/methods useful in the gathering and study of data on historical and contemporary American Indian nations, tribal groups, communities, individuals, and literature. (Plus-minus letter grade only)

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AIS 310 American Indian Religion and Philosophy (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Religious and philosophical aspects of the lifestyles of certain plains tribes in what is now called the U.S. Ancient religion, visions, and deity structures and how they have survived and have been modified by the impact of European cultures.

Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice
AIS 320 American Indian Music (Units: 3)
Prerequisite: AIS 100 or consent of instructor.

Relationships among music, cultural perspectives, and collective and individual selves of American Indians, Alaskan Natives, and Native Hawaiians.
Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 325 American Indian Art (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Contemporary and comparative examination of American Indian art, including American Indian theories of art and connections of art with other forms of cultural expression such as novels, poetry, songs, dances, and oral histories.
Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 330 American Indian Law (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Introduction to Native epistemologies, worldviews, social structures, and institutions relating to customary or "traditional" law, governance, justice, and ethics; overview of customary perspectives and practices; examination of contemporary revitalization efforts to restructure colonial paradigms of Native governance.
Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 350 Black-Indians in the Americas (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examines factors impacting on multiracial identity formation among Native communities throughout the Americas with a specific focus on Black-Indians; explores concepts and theories regarding blood quantum, sovereignty, and land rights, and the social, legal, and political understanding of mixed-race Native Americans. (This course is offered as AIS 350, AFRS 350, and LTNS 355. Students may not repeat the course under an alternate prefix.)
Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities

AIS 360 Modern American Indian Authors (Units: 3)
Prerequisite: ENG 214 or equivalent (may be taken concurrently).

Literatures of the native peoples of North American; comparison of oral and written literature, indigenous, and Western knowledge systems through different forms and forms and functions of literacy; examination of literature, narrative, oratory, poetry, short stories, and contemporary novels recorded and written by Indians from the mid 1850's through contemporary times. Changing literary forms, methods of recordings, celebrating and reaffirming 19th- and 20th-century Indian life.
Course Attributes:
- Am. Ethnic & Racial Minorities

AIS 400 American Indian Education (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Content, curriculum, and structure of education in reservation and off-reservation schools. Problems, goals, innovative restructuring, proposals for future.
Course Attributes:
- E1: Lifelong Learning Develop
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AIS 410 Perspectives of Native California Indians (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Cultural and historical perspective of California Indians. Contemporary problems, issues, and developments involving American Indians, both urban and rural.
Course Attributes:
- Am. Ethnic & Racial Minorities
- Environmental Sustainability

AIS 420 Native Genders and Feminism (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Introduction to Native genders and feminist theories, methods, and activism as developed within the United States and Canada with an overview of the field(s) with a focus on k and emergent scholarship and political issues. (This course is offered as AIS 420 and WGS 420. Students may not repeat the course under an alternate prefix.)
Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice
AIS 440 Native Sexualities and Queer Discourse (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
A comparative, interdisciplinary, socio-historical analysis of Native sexualities and gender constructions from indigenous centered perspectives; examination of the complexity of Native sexualities, gender formations, and queer indigenous identity movements. (This course is offered as AIS 440, SXS 440, and WGS 440. Students may not repeat the course under an alternate prefix.)
Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AIS 450 American Indian Science (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
American Indian sciences, theory and practice, traditional herboology, agricultural and environmental sciences, methods of food production, preservation, and preparation. Indian architectural modes and thermal clothing used by tribes from six regions of North America.

AIS 460 Power and Politics in American Indian History (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Modern political and social issues arising from U.S. American Indian relations: land, water, civil, and tribal rights with underlying historical and attitudinal differences behind these problems. [CSL may be available]
Course Attributes:
- U.S. History
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 470 American Indian Ethnicity: Problems in Identity (Units: 3)
Prerequisites: Upper division standing, AIS 100, AIS 150, or consent of instructor.
Examination of ethnicity focusing on the history and theory surrounding American Indian tribal and Pan-Indian identity formations within the nation-state and reservation contexts.
Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 490 Ancestors or Data? Culture, Conflict, and NAGPRA (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Political struggles surrounding the creation and implementation of the 1990 Native American Graves Protection and Repatriation Act (NAGPRA). Analysis of the law, impact of recent court decisions, and specific focus on cultural conflicts related to the concept of knowledge. (This course is offered as AIS 490, ANTH 490, and SOC 491. Students may not repeat the course under an alternate prefix.)

AIS 500 Language and Cultural Systems of North American Indians (Units: 3)
Prerequisite: AIS 100 or consent of instructor.
Relationship between American Indian language and culture, including topics and skills related to language learning and the historical conditions of cultural retention and revitalization efforts. (This course is offered as AIS 500 and ANTH 500. Students may not repeat the course under an alternate prefix.)

AIS 520 Before the Wilderness: American Indian Ecology (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Examines the environmental thought, ecological worldviews, and resource management practices of North American native peoples; reviews how European and American colonists justified the expropriation of native lands, the different perceptions of “land” and its connections to major ecological and cultural change.

AIS 535 American Indian Film (Units: 3)
Prerequisites: Upper division standing, ENG 214 or equivalent.
Examines how Native peoples have used film as a means of reclaiming and representing their histories, cultures, and identities. (Plus-minus letter grade only)
Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 550 American Indians in Contemporary U.S. History (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Overview of the historical lived realities of major indigenous cultures and people residing within the present day boundaries of the United States from 1930 through 2000. (Plus-minus letter grade only)
Course Attributes:
- U.S. History
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 560 Modern Creative and Performing Arts (Units: 3)
Prerequisite: AIS 100 or consent of instructor.
Individual and group performance of creative and performing arts in American Indian communities. Fine art, oral poetry, dramatic modes, and media. Adaptation of traditional modes to modern situations.
Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

AIS 610 Native Americans and Museums (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
A historical overview of the relationship between American Indians and the museums that house and display their cultural patrimony—questions of historical and cultural representation, rights of tribal communities, exhibition images, and representations of American Indians in museums are explored.
AIS 680 American Indian Studies Senior Seminar (Units: 3)
Prerequisites: AIS 300, AIS 694.

Directed guidance leading to the completion of a senior research project based on intensive study of a topic or problem related to American Indian peoples. (Plus-minus letter grade only)

AIS 681 Genetics, Biotechnology, and the Politics of Difference (Units: 3)
Prerequisites: Upper division standing; ENG 214 or equivalent.

Employs feminist science studies, critical race theory, and indigenous studies to analyze how the life sciences conceptualize, define, and study human differences. Considers how feminist insights into the social effects of genetics and biotechnology can influence scientific practice and discourse.
(This course is offered as WGS 681 and AIS 681. Students may not repeat the course under an alternate prefix.)

AIS 685 Projects in the Teaching of American Indian Studies (Units: 1-4)
Prerequisites: Upper division standing and consent of instructor.

Academic service learning practicum/internship experience as an undergraduate instructional aide. Participation in the teaching of a regular instructionally-related class. Limited to undergraduate students only. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.)

AIS 694 Community Service Learning (Units: 1-3)
Prerequisites: Consent of instructor; must be taken concurrently with any AIS course offering opportunity for community service learning.

Community service learning to be taken with any AIS course that supports community service learning. May be repeated for a total of 6 units. (CSL may be available)

AIS 699 Independent Study (Units: 1-3)
Prerequisite: Upper division standing or consent of instructor.

Supervised, individual study of a particular problem in American Indian studies. Student may select the supervisor and must state the problem, the method of data gathering, and the method of data analysis. May be repeated for a total of 6 units.

AIS 701 Seminar in American Indian Studies (Units: 3)
Prerequisite: Consent of instructor.

Issues in the study of American Indians: understanding of the Indian tribes and nations as sovereign political entities; political, economic, and social developments of self-determination and its implications for Indian tribes.
American Studies (AMST)

AMST 300 Perspectives on American Culture (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
American culture from the perspectives of different social sciences.
American national character, social thought, and political order.

AMST 310 The Arts and American Culture (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Figures in visual, literary, and performing arts who have reflected
American culture through mastery of their arts; relationships between
arts in periods of American cultural development.
(This course is offered as HUM 485 and AMST 310. Students may not
repeat the course under an alternate prefix.)
Course Attributes:
• UD-C: Arts and/or Humanities
• Am. Ethnic & Racial Minorities

AMST 410 California Culture (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Dynamics of California society and culture in recent times; world oasis,
flawed paradise, lifestyle crucible, and creative milieu; function in
American culture and Pacific relations.
(This course is offered as HUM 450 and AMST 410. Students may not
repeat the course under an alternate prefix.)
Course Attributes:
• UD-C: Arts and/or Humanities
Anthropology (ANTH)

ANTH 100 Introduction to Biological Anthropology (Units: 3)
Human beings in relation to the animal kingdom, geological time, and human evolution; fossil humans; human heredity; anthropometry; criteria of race; racial theories and problems.

Course Attributes:
- B2: Life Science

ANTH 110 Introduction to Archaeology (Units: 3)
Old and New World prehistory: discovery and invention, domestication of plants and animals, science, technology, and other aspects of culture.

Course Attributes:
- C2: Humanities
- Global Perspectives

ANTH 120 Introductory Social and Cultural Anthropology (Units: 3)

Course Attributes:
- D1: Social Sciences
- Social Justice

ANTH 130 Introduction to Visual Anthropology (Units: 3)
The role of film, photography, digital and multi-media in the examination of human diversity; the study of visual aspects of human behavior and the use of visual media in research and visual anthropology. (Plus-minus letter grade only)

ANTH 300 Foundations of Anthropology: History (Units: 3)
Prerequisites: ANTH 100, ANTH 110, ANTH 120.

Theoretical foundations of anthropology: major trends in anthropological thought and practice up to the present.

ANTH 301 Foundations of Archaeology (Units: 3)
Prerequisites: Upper division standing, ANTH 110, or consent of instructor.

Introduces and develops archaeological theory in its archaeological- anthropological paradigms with emphasis on the role of material culture. (Plus-minus letter grade only)

ANTH 302 Foundations of Human Variation (Units: 3)
Prerequisite: ANTH 100 or one course in college biology.

Examines the nature and extent of heritable differences among human populations in an evolutionary perspective. The role of genetics and environment in the formation of these differences is considered, as well as the social and biological concept of race.

Course Attributes:
- UD-B: Physical Life Science

ANTH 305GW Writing Anthropology - GWAR (Units: 3)
Prerequisites: ENG 214 or equivalent with a grade of C- or better, ANTH 120.

Advanced development of writing skills in anthropology; descriptive, interpretive, critical analyses, popular media, and scholarly research. Regional or topical theme varies. (ABC/NR grading only)

Course Attributes:
- Graduation Writing Assessment

ANTH 315 Regional Ethnography (Units: 3)
Prerequisites: Upper division standing, ENG 214.

Apply a cultural area study approach to People and Cultures around the world; focus on the history and contemporary cultures of East Asia, Central America, and West Africa. Topic to be specified in Class Schedule. May be repeated when topics vary.

ANTH 316 Contemporary Culture of Greece (Units: 3)
Prerequisite: ENG 214 or equivalent.

The culture of contemporary Greece within the framework of the social sciences, particularly anthropology and folklore. (This course is offered as MGS 316 and ANTH 316. Students may not repeat the course under an alternate prefix.)

ANTH 319 Cultures of the Middle East and North Africa (Units: 3)
Prerequisites: Upper division standing, ENG 214 or equivalent.

An introduction to the variety of cultures and communities in the Middle East and North Africa. Differences in history, religion, social organization, language, politics, and power are highlighted in lectures, ethnographies, and film.

ANTH 320 Racism: Cross-Cultural Analysis (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Cultural history of racism as related to colonialism and imperialism. Racism as on-going intellectual, political movement. Anti-racism and educational-anthropological methods to defeat racism. (This course is offered as ANTH 320 and CST 320. Students may not repeat the course under an alternate prefix.)

ANTH 321 Endangered Cultures (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Interaction between non-industrial and industrial societies; cultural degradation and extermination of non-industrial societies beginning 150 years ago.

ANTH 325 Class: Cross-Cultural Analysis (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Exploration of the cultural production of class and status in a comparative perspective. Reading of theoretical texts as well as ethnographies, exploration of class markers, and the production of distinction in students’ own lives.

ANTH 326 Origins of Art and Visual Representation (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Investigation of the emergence and development of art and visual representation as a human social, political, cognitive, and aesthetic behavior. Geographic coverage is global; temporal coverage from early humans through (pre)history. (Plus-minus letter grade only)
ANTH 327 Anthropology and Film (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Social and cultural anthropology through films, ethnographies, and popular writings of anthropologists.
(This course is offered as ANTH 327 and CINE 327. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-D: Social Sciences
• Global Perspectives

ANTH 328 Anthropology and Photography (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examination of the documentary, social, political, and aesthetic roles of photography (and the archive and photo-essay) in anthropology as a mode of representation and control, but also of resistance.
(This course is offered as ANTH 328 and JOUR 328. Students may not repeat the course under an alternate prefix.)

ANTH 333 Primate Behavior (Units: 4)
Prerequisite: Upper division standing or consent of instructor.

Exploration of the social lives of all primates. Topics include social organization, cooperation/competition, reproduction, communication, and the interrelationship between behavior and ecology. Students will conduct behavioral observations of primates at the zoo.

ANTH 343 Women and Work (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Position and roles of women in the productive activities of society: paid and unpaid. Patterns of household and workplace employment, discrimination in pay and working conditions, relevant laws, explanations for the evolution of patterns.
(This course is offered as LABR 343 and ANTH 343. Students may not repeat the course under an alternate prefix.)

ANTH 356 Archaeology of California (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Prehistoric heritage of California’s Native American cultures studied in the comparative light of ethnohistoric and ethno graphic data. Archaeological focus on culture-history, economy, settlement pattern, ecology, political organization, and processual adaptation.

ANTH 415 Culture and Sex in East Asia (Units: 3)
Prerequisites: Upper division standing, ANTH 120, or consent of instructor.

Examines from the perspective of critical anthropology on the role of culture in sex/gender power relations in East Asian societies.
(This course is offered as ANTH 415 and SXS 438. Students may not repeat the course under an alternate prefix.)

ANTH 420 Indigenous Media and Social Change (Units: 4)
Prerequisites: Upper division standing; completion of GE Areas A and B4 requirements [formerly GE Segment I].

Examination of contemporary visual culture, particularly commercial culture, for its impact on personal and collective identity. Technical aspects of creating and altering visual media.
(This course is offered as SOC 420 and ANTH 420. Students may not repeat the course under an alternate prefix.)

ANTH 450 Archaeology of Ritual and Religion (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examination of religion and ritual on a global level from prehistory to the present, from an archaeological perspective. (Plus-minus letter grade only)

ANTH 460 Historical Archeology (Units: 3)
Prerequisite: ANTH 110, or consent of instructor.

Introduction to historical archeology, key themes in historical archeology, critical examination of methods, development of historical archeology, key theoretical approaches, and case studies in historical archeology. (Plus-minus letter grade only)

ANTH 470 Archaeology of Mexico and Central America (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Overview of the prehistory and archaeology of what is now the nations states of Mexico and Central America.

ANTH 471 The Ancient Maya (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Civilization of the Maya Indians of Mexico and Guatemala. Recent findings in Maya archaeology and on interpretations of Maya history, politics, art, economy, and writing.

ANTH 485 Archaeology of Women (Units: 3)
Prerequisite: ANTH 110.

In conventional archaeology, the female half of human societies has been consistently ignored. Puts the forgotten sex back into the past, showing how an engendered archaeology modifies many of our views of human origins and prehistory.

ANTH 490 Ancestors or Data? Culture, Conflict, and NAGPRA (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Political struggles surrounding the creation and implementation of the 1990 Native American Graves Protection and Repatriation Act (NAGPRA). Analysis of the law, impact of recent court decisions, and specific focus on cultural conflicts related to the concept of knowledge.
(This course is offered as AIS 490, ANTH 490, and SOC 491. Students may not repeat the course under an alternate prefix.)

ANTH 500 Language and Cultural Systems of North American Indians (Units: 3)
Prerequisite: AIS 100 or consent of instructor.

Relationship between American Indian language and culture, including topics and skills related to language learning and the historical conditions of cultural retention and revitalization efforts.
(This course is offered as AIS 500 and ANTH 500. Students may not repeat the course under an alternate prefix.)

ANTH 501 Latin America: The National Period (Units: 3)
Prerequisites: Upper division standing or consent of instructor; ENG 214 or equivalent.

Latin America since independence (c. 1825). Histories of Latin American peoples: culture, race relations, women, political oppression and resistance, the economy, and development.
(This course is offered as HIST 501, ANTH 501, and LTNS 501. Students may not repeat the course under an alternate prefix.)
ANTH 525 Diversity in the Workplace (Units: 3)
Prerequisite: Upper division standing.

An overview of workplace diversity and strategies to utilize it positively. Theoretical debates and issues related to race, ethnic origin, gender, sexual orientation, class, age, and disability. Ways in which individuals and organizations can maximize benefits through respecting and working with diversity.
(This course is offered as LABR 525 and ANTH 525. Students may not repeat the course under an alternate prefix.)

ANTH 530 Human Osteology Practicum (Units: 4)
Prerequisite for ANTH 730: Graduate standing.
Prerequisite for ANTH 530: ANTH 100.

Human skeleton, bone dynamics, and anthropometric and morphological analysis of modern and fossil skeletal materials. Research on osteological and fossil materials. Classwork, 2 units; laboratory, 2 units.
(ANTH 730/ANTH 530 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ANTH 531 Fossil Humans Practicum (Units: 4)
Prerequisite for ANTH 731: Graduate standing or consent of instructor.
Prerequisite for ANTH 531: Upper division standing or consent of instructor.

(ANTH 731/ANTH 531 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ANTH 535 Paleopathology (Units: 3)
Prerequisite: ANTH 730/ANTH 530 or consent of instructor.

Bioarchaeology of disease and human health. Evolutionary, cultural, and biological factors of prehistoric epidemiology. (Plus-minus letter grade only.)
(ANTH 735/ANTH 535 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ANTH 545 Bioarchaeology (Units: 3)
Prerequisite: ANTH 530 or consent of instructor.

Reconstruction of past lifeways from examination of the human skeleton. Patterns of subsistence, diet, disease, demography, and physical activity reconstructed from skeletal populations.

ANTH 551 Anthropology of the Body (Units: 3)
Prerequisite: Upper division standing or ENG 214.

Comparative cross-cultural approach to the study of the individual in society as mediated through an anthropological inquiry of the body. Social construction of the body and self in everyday life, and ways that cultural practices, social structures, and psychological tests are inscribed and reproduced through the body and bodies.

ANTH 555 Urban Anthropology (Units: 3)
Prerequisites: Upper division standing; one course in cultural anthropology or USP 400.

Impact of urban environments upon human behavior cross-culturally. Ethnographic fieldwork techniques, the history and theoretical roots of urban anthropology, and case studies from around the world.
(This course is offered as ANTH 555 and USP 555. Students may not repeat the course under an alternate prefix.)

ANTH 557 Ethnography of the Inner City (Units: 4)
Prerequisite: ANTH 555.

Participant-observation fieldwork techniques; research projects in inner city communities in the Bay Area. Classwork, 3 units; activity, 1 unit.
(This course is offered as ANTH 557 and USP 557. Students may not repeat the course under an alternate prefix.)

ANTH 569 Cross-Cultural Aspects of Sex and Gender (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Sex, sexuality, and gender; the control of sexuality, cultural components of gender role and gender identity, and symbolic aspects of sex and gender.
(This course is offered as ANTH 569 and SXS 567. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- UD-C: Arts and/or Humanities
- Social Justice

ANTH 570 Anthropology of Religion (Units: 3)
Prerequisites: Upper division standing and/or ENG 214. Students who have never taken a college level ANTH course need consent of instructor in order to enroll.

Dynamics and function of religion and magic in human societies; cosmological systems; comparative study of elements, forms, and symbolism of religion.

ANTH 581 Anthropology and Folklore (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Nature and form of folklore, its cultural setting, transmissions and dynamics. Psychological, ethnic, and philosophical considerations of folklore and its relationship to drama, art, and music.

ANTH 585 Globalization and World Cultures (Units: 3)
Prerequisite: ANTH 120 or consent of instructor.

Effects of globalization and multinational corporations on cultures. Examination of contemporary globalization from a combined political-economic and cultural anthropological perspective.
(This course is offered as ANTH 585 and CST 585. Students may not repeat the course under an alternate prefix.)

ANTH 590 Anthropology of Women (Units: 3)
Prerequisite: ENG 114 or equivalent.

Ethnographic, physical, anthropological, and pre-historical materials on women. Theories on origins of the family, social structuring of sexuality, and changing sex and gender in modern societies.
(This course is offered as ANTH 590, CST 590, and WGS 595. Students may not repeat the course under an alternate prefix.)

ANTH 591 Applied Anthropology Media Workshop (Units: 4)
Prerequisites: Upper division standing, ANTH 120 or equivalent, or consent of instructor.

Carrying out ethnographic media projects for local, community-based organizations. Principles of visual anthropology, ethnographic research, and community-based learning are linked to learning practical skills of digital media production.
ANTH 592 Archaeological Methods (Units: 4)
Prerequisite: ANTH 110.
Archaeological theory and methods; field reconnaissance, research design, excavation and laboratory methods; archaeological chronology, typology, cartography, photography, and other skills. Classwork, 2 units; laboratory, 2 units.

ANTH 595 Visual Anthropology I (Units: 6)
Prerequisites: Restricted to Anthropology or Cinema major; ANTH 120, ANTH 300; or consent of instructor.
Introduction to ethnographic digital video production, including methods of ethnographic fieldwork, creation of field notes and research design; basics of digital video planning, production and editing. Classwork 3 units; laboratory and fieldwork 3 units. [CSL may be available] (This course is offered as ANTH 595 and CINE 595. Students may not repeat the course under an alternate prefix.)

ANTH 596 Visual Anthropology II (Units: 4)
Prerequisites: Restricted to Anthropology or Cinema major; ANTH 595 or CINE 595; or consent of instructor.
Advanced filmmaking-based applied anthropological fieldwork, collaboration, and digital post-production techniques. Students complete a video for which they conducted research during the previous semester. Classwork, 2 units; laboratory and fieldwork, 2 units. [CSL may be available] (This course is offered as ANTH 596 and CINE 596. Students may not repeat the course under an alternate prefix.)

ANTH 609 Approaches to the African Past (Units: 3)
Prerequisites: Upper division standing; ENG 214; or consent of instructor.
Explorations of different methodologies for studying the African past, including archaeology, anthropology, oral traditions, and history. (This course is offered as HIST 609 and ANTH 609. Students may not repeat the course under an alternate prefix.)
Course Attributes:
- UD-D: Social Sciences
- Global Perspectives

ANTH 620 History of Anthropological Film (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Historical overview of interconnections between anthropology and filmmaking, from traditional styles and approaches to mass market anthropology, the hyper-aesthetic, textual and reflexive turns and applied visual anthropology. [Formerly ANTH 303]

ANTH 630 Medical Anthropology (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
The interplay of culture, genetics, population, and environment; cross-cultural medical education; folk and urban medical systems as moral, social, and cognitive systems.

ANTH 651 Ethnographic Field Methods (Units: 4)
Prerequisite: Upper division standing or consent of instructor.
Anthropological data-gathering methods, participant observation, scheduled and open-ended interview, life history, survey, questionnaire, projective techniques, electronic aids. May be repeated for a total of 8 units. Classwork, 2 units; fieldwork, 2 units.

ANTH 652 Anthropological Statistics (Units: 4)
Prerequisite: Upper division standing or consent of instructor.
Methods and techniques for analysis of data: collecting and describing data; statistical inference and hypothesis testing; parametric and non-parametric techniques; SPSS training for data analysis. Classwork, 2 units; laboratory, 2 units.

ANTH 657 Ethnology of Dance (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Function of dance in pre-literate, pre-technological societies in the context of anthropological literature. (This course is offered as DANC 657 and ANTH 657. Students may not repeat the course under an alternate prefix.)
Course Attributes:
- UD-C: Arts and/or Humanities
- Global Perspectives

ANTH 685 Projects in Teaching Anthropology (Units: 1-3)
Prerequisites: Grade of B or better in course the student will be assisting in and consent of instructor.
Training and assistance in the teaching of anthropology. Students work as teaching assistants to instructors and receive training and instruction in teaching anthropology. Responsibilities include working with supervising faculty, assist in preparing course material, tutoring students, and conducting small discussions. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.) (CR/NC grading only)

ANTH 690 Senior Thesis (Units: 4)
Prerequisites: Successful completion with a grade of B or better in the following courses: ANTH 100, ANTH 110, ANTH 120, ANTH 300; major GPA 3.25.
Provides qualified students the opportunity to undertake a senior thesis. Supervised study of a topic mutually agreed upon by student and faculty.

ANTH 695 Anthropology Internship (Units: 3)
Prerequisites: ANTH 300, ANTH 301 or ANTH 302.
Internship in research, governmental and non-governmental agencies, museums and other public and private institutions. Students must find an anthropology faculty to serve as the academic supervisor. May be repeated for a total of 6 units.

ANTH 699 Independent Study (Units: 1-3)
Prerequisites: Consent of major adviser, department chair, and instructor.
Supervised, individual study of a particular problem in anthropology. The student must state the problem, method of data-gathering, and the method of data-analysis. [CSL may be available]

ANTH 701 Sexual Cultures, Sexual Identities (Units: 3)
Prerequisite: Restricted to graduate students in Human Sexualities Studies or consent of instructor.
Concepts of "sexual culture" and "sexual identity" in history and across cultures. (This course is offered as SXS 701 and ANTH 701. Students may not repeat the course under an alternate prefix.)
ANTH 710 Proseminar in Anthropological Theory and Method (Units: 3)
Prerequisite: Graduate standing in anthropology or consent of instructor.

Directed application of anthropological theory, methods and research techniques. Cannot be repeated for credit. Must be taken before or concurrently with other graduate seminars.

ANTH 715 Research Skills: The Craft of Anthropological Writing (Unit: 1)
Prerequisites: Graduate standing; concurrent enrollment in ANTH 710; or consent of instructor.

Strategies to enhance creative thinking. Advanced review of grammar and sentence construction. Organization of MA thesis argument and organization. Dominant writing styles in anthropology understood through the study of Author's Guides to publishing in major journals. (Plus-minus letter grade only)

ANTH 716 Research Skills: The Literature Review (Unit: 1)
Prerequisite: Graduate standing or consent of instructor.

The importance of qualitative and quantitative literature reviews in academic research. Finding the problem and contending with information glut. Advanced on- and offline search skills. Avoiding plagiarism, using evidence matrices, synthesizing data and mastering the authorial tone. (Plus-minus letter grade only)

ANTH 717 Research Skills: The Research Proposal (Unit: 1)
Prerequisite: Graduate standing or consent of instructor.

Developing the research question, originality and timeliness. Defining the research context and specific qualities and antecedents. Selecting the appropriate research method, suitability, practicality, and availability. Contending with ethical constraints and necessary permissions. (Plus-minus letter grade only)

ANTH 718 Research Skills: The Grant Proposal (Unit: 1)
Prerequisite: Graduate standing in anthropology or consent of instructor.

Topics in the foundations of proposal writing: good writing in a good proposal, software options, major granting agencies for anthropological research, proposal statement of need, goals and objectives, the budget, ethics and evaluation, and sustainability and capacity. (Plus-minus letter grade only)

ANTH 720 Foundations in Visual Anthropology (Units: 2)
Prerequisite: Graduate standing in anthropology or consent of instructor.

Classic and contemporary literature in visual anthropology: proxemics and kinesics, semiological studies, indigenous media, shared and sensory anthropological filmmaking, the archive as active, and three approaches to photography, colonialist, Photovoice, and photo elicitation. (Plus-minus letter only)

ANTH 721 Seminar in Archaeological Problems (Units: 2)
Prerequisite: Graduate standing in Anthropology or consent of instructor.

Archaeological approaches and explanations of the past understood through key works in interpretive archaeology and examples of the major archaeological theories. May be repeated for a total of 4 units. [Formerly ANTH 740]

ANTH 722 Seminar in Biological Anthropology (Units: 2)
Prerequisite: Graduate standing in Anthropology or consent of instructor.

Historical and contemporary primary literature in biological anthropology and the importance for anthropology of evolutionary theory, primatology, the primate fossil record, human diversity, anthropological genetics, and NAGPRA.

ANTH 723 Seminar in Problems in Cultural Anthropology (Units: 2)
Prerequisite: Graduate standing in Anthropology or consent of instructor.

Advanced exploration of literature in contemporary schools in cultural anthropology. Topics include post-structuralism, cultural materialism, neo-evolutionism, symbolic anthropology and others. May be repeated for a total of 4 units. [Formerly ANTH 770]

ANTH 730 Human Osteology Practicum (Units: 4)
Prerequisite for ANTH 730: Graduate standing.
Prerequisite for ANTH 530: ANTH 100.

Human skeleton, bone dynamics, and anthropometric and morphological analysis of modern and fossil skeletal materials. Research on osteological and fossil materials. Classwork, 2 units; laboratory, 2 units. (ANTH 730/ANTH 530 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ANTH 731 Fossil Humans Practicum (Units: 4)
Prerequisite for ANTH 731: Graduate standing or consent of instructor.
Prerequisite for ANTH 531: Upper division standing or consent of instructor.

The fossil evidence for human evolution. Comparative primate anatomy and function; skeletal morphology of hominid fossils. Ecological and geological settings. Trends and processes in human evolution. (ANTH 731/ANTH 531 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ANTH 735 Paleopathology (Units: 3)
Prerequisite: ANTH 730/ANTH 530 or consent of instructor.

Bioarchaeology of disease and human health. Evolutionary, cultural, and biological factors of prehistoric epidemiology. (Plus-minus letter grade only.)

(ANTH 735/ANTH 535 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ANTH 750 Seminar in Visual Anthropology: The Fixed Image (Units: 3)
Prerequisite: Graduate standing or consent of instructor.

Advanced examination of the fundamental theories, methods, histories, and works of the fixed image in visual anthropology. (Plus-minus letter grade only)

ANTH 755 Seminar in Visual Anthropology: The Moving Image (Units: 3)
Prerequisite: Graduate standing or consent of instructor.

Philosophical grounding and historical roots of anthropological film. Theories and anthropological approaches of and to transcultural production, co-production and consumption of moving images. (Plus-minus letter grading only)

ANTH 785 Teaching Anthropology (Units: 1-3)
Prerequisite: Graduate standing. Grade of B or better in course in which student will assist.

Training and assistance in the teaching of anthropology.

ANTH 894 Creative Work Project (Units: 3)
Prerequisite: Consent of instructor and approval of Advancement to Candidacy (ATC) for the Master of Arts and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.
ANTH 897 Directed Thesis Advising and Support (Units: 3)
Directed advising and support for development of theses and creative work projects both before and after enrollment in ANTH 894 or ANTH 898. Enrollment in ANTH 897 is required every spring semester until the culminating experience is completed. (CR/NC grading only)

ANTH 898 Master’s Thesis (Units: 3)
Prerequisite: Consent of instructor and the chair of the thesis committee; and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.

ANTH 899 Independent Study (Units: 1-3)
Prerequisites: ANTH 710 and consent of student’s graduate major adviser, department chair, and supervising faculty member.

Individual research into a problem in anthropology. Student must state the problem, her/his method of data-gathering, and her/his method of data analysis.
Apparel Design & Merchandising (ADM)

ADM 260 Textiles (Units: 3)
Prerequisite: Sophomore standing and above.
Fiber, yarn, and fabric terminology and production, with an emphasis on the chemical impact the fiber/textile industry has on the environment. Scientific innovations in fiber technology and dyeing, printing, finishing, and consumer care techniques.

Course Attributes:
• B1: Physical Science

ADM 261 Apparel Construction (Units: 3)
Prerequisite: Apparel Design and Merchandising majors or consent of instructor.
Principles and concepts in the clothing field. Pattern analysis, selection, fitting, and technical and experimental construction processes. Classwork, 2 units; laboratory, 1 unit.

ADM 262 Fashion Illustration (Units: 3)
Concepts, techniques, and media in illustrating contemporary and historical dress on the fashion figure. Classwork, 2 units; laboratory, 1 unit.

ADM 265 Introduction to the Fashion Industry (Units: 3)
Prerequisite: Apparel Design and Merchandising majors.
The fashion industry: investigation of the design, manufacturing, and distribution of textile and apparel products for different markets. Career opportunities within all market segments.

ADM 300 Designers of the 20th/21st Centuries (Units: 3)
Prerequisite: Upper division standing.
The impact that outstanding contemporary apparel and interior designers have on each other and the markets of both industries. Examination of common styles, media use, and characteristics of each designer as well as their typical market. (This course is offered as ADM 300 and ID 300. Students may not repeat the course under an alternate prefix.)

ADM 360GW Fashion, Clothing, and Society - GWAR (Units: 3)
Prerequisites: Apparel Design and Merchandising or Family & Consumer Sciences major; ENG 214 or equivalent with a grade of C- or better.
Social, psychological, and economic forces which underlie fashion and affect both the consumer and the clothing market. Physiology and safety of clothing; clothing for specific individuals and family members. (ABC/NC grading only)

Course Attributes:
• Graduation Writing Assessment

ADM 361 Apparel Design I: Flat Pattern (Units: 3)
Prerequisites: Apparel Design and Merchandising major; ADM 261.
Trends in French and American fashion applied to the development of original designs by the flat pattern method. Development of basic pattern and fitting problems. Classwork, 2 units; laboratory, 1 unit. Extra fee required.

ADM 362 Apparel Design II: Draping (Units: 3)
Prerequisites: Apparel Design and Merchandising major; ADM 261.
Original clothing designs by the French draping process. Historical perspective and influence on contemporary costume design. Classwork, 2 units; laboratory, 1 unit. Extra fee required.

ADM 365 Textile Laboratory (Unit: 1)
Prerequisite: Apparel Design and Merchandising major.
Yarn and cloth identification, textile fiber identification through microscopic and chemical testing; stain removal, detergency, dye, and finish tests.

ADM 366 Forecasting Apparel and Interior Design Trends (Units: 3)
Prerequisite: College level drawing class or consent of instructor.
Forces in society that influence apparel and interior design trends; data used to develop trend reports, color reports, retail reports, culminating in a professional forecasting presentation of colors, silhouettes, fabrications, and lifestyles. (This course is offered as ADM 366 and ID 366. Students may not repeat the course under an alternate prefix.)

ADM 369 Fashion Merchandising and Buying (Units: 3)
Prerequisites: Apparel Design and Merchandising major; ADM 360GW.
Factors that affect the merchandising and management of fashion products. Buying functions and the differences of buying techniques used by various types of manufacturers and retailers.

ADM 466 Computer Applications in Clothing and Textile Industry (Units: 3)
Prerequisites: Apparel Design and Merchandising major; ADM 360GW.
Computer software applied to statistical analysis of data, research variables, and development of formal presentation of data based on apparel research. Extra fee required.

ADM 560 Textiles and Apparel in the World Marketplace (Units: 3)
Prerequisites: Graduating senior Apparel Design and Merchandising major; ADM 360GW; concurrent enrollment in CFS 600.
World textile and apparel production and consumption. U.S. apparel import program including domestic policies and international agreements. U.S. textile and apparel exports, international apparel manufacturers, and retailers.

Course Attributes:
• Global Perspectives

ADM 561 Culture and Historical Costume (Units: 3)
Prerequisites: Senior Apparel Design and Merchandising major; ADM 360GW.
Variations in dress patterns developed from the study of historical and cultural influences on western clothing and textiles.

ADM 566 Fashion and the Consumer (Units: 3)
Prerequisites: Senior Apparel Design and Merchandising major; ADM 360GW, ADM 466.
Consumer influences: fashion, mass media, ready-to-wear market, demographics, societal trends, current developments and research in clothing and textiles; relation to behavior and satisfying clothing needs.
ADM 569 Visual Merchandising and Promotion (Units: 3)
Prerequisites for CFS 769: Restricted to Family and Consumer Sciences graduate student; ID 240, a college level drawing class.
Prerequisites for ADM 569: Restricted to Apparel Design & Merchandising graduating senior; ID 240, a college level drawing class; concurrent enrollment in ADM 560, CFS 600.

Application of principles of visual presentation in window displays, point-of-purchase, and other retail venues. Practice with equipment, materials, and techniques used in the presentation of merchandise. Principles and methods of promotion for manufacturers and retailers. [CSL may be available]
(CFS 769/ADM 569 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ADM 661 Advanced Apparel Design Problems (Units: 3)
Prerequisites for CFS 761: Restricted to Family and Consumer Sciences graduate student; ADM 361, ADM 362.
Prerequisites for ADM 661: Restricted to Apparel Design & Merchandising graduating senior; ADM 361, ADM 362; concurrent enrollment in ADM 560, CFS 600.

Clothing design problems related to specific populations. Development of design prototypes based on market analyses of fashion trends. Classwork, 2 units; laboratory, 1 unit. Extra fee required.
(CFS 761/ADM 661 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ADM 665 Product Development for Apparel (Units: 3)
Prerequisites: Apparel Design and Merchandising senior; ADM 260, ADM 265, ADM 360GW, ID 240, or consent of instructor.

Design, merchandising, and quality assurance in the apparel and sewn products industry. Development and implementation of a design idea geared to a specific market.
Course Attributes:

• Environmental Sustainability
Arabic (ARAB)

ARAB 101 First Semester Arabic (Units: 5)
Basic elementary Arabic. Conversation in the language, dictation, reading, study of the fundamentals of grammar, simple oral and written exercises, and an introduction to Arabic-speaking cultures.
Course Attributes:
  • C2: Humanities
  • Am. Ethnic & Racial Minorities
  • Global Perspectives

ARAB 102 Second Semester Arabic (Units: 5)
Prerequisite: ARAB 101 or equivalent.
Continuation of First Semester Arabic.
Course Attributes:
  • C2: Humanities
  • Global Perspectives

ARAB 103 Third Semester Arabic (Units: 5)
Prerequisite: ARAB 102 or equivalent.
Understanding, speaking, reading, and writing Modern Standard Arabic at the intermediate level.
Course Attributes:
  • C2: Humanities
  • Global Perspectives

ARAB 104 Fourth Semester Arabic (Units: 5)
Prerequisite: ARAB 103 or consent of instructor.
Continuation of Third Semester Arabic. Expansion of vocabulary, comprehension, and communicative and writing abilities in Modern Standard Arabic at the intermediate level with a rich cultural component.
Course Attributes:
  • C2: Humanities
  • Global Perspectives

ARAB 206 Intermediate Conversation (Units: 3)
Prerequisite: ARAB 101 or equivalent or consent of instructor.
The development of conversational skills focusing on topic-structures drills and activities appropriate to the context in which the language will be spoken.
Course Attributes:
  • C2: Humanities
  • Global Perspectives

ARAB 260 Arab Culture and Identity in English (Units: 3)
Prerequisite: ENG 214 or consent of instructor.
Arab cultures in the context of the history of the Arab world, through its religious and ethnic diversity, Arab family structures, values, traditions, and customs. Introduction to Arabic literatures and music. Taught in English. [Formerly ARAB 401]
Course Attributes:
  • C2: Humanities
  • Global Perspectives

ARAB 300 Reading Qur’anic Arabic (Units: 3)
Prerequisite: Completion of al-Kitaab Part 1 or equivalent, or at least four semesters of Arabic or equivalent. For native speakers, consent of instructor.
An introduction to readings of the Qur’an, with emphasis on oral quality and literary value.

ARAB 305 Arab American Art and Artists of the Diaspora (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Examination of the ethnic, religious, and artistic diversity of Arab American visual artists. Topics include politics, language, culture, identity, economics, and many other issues.
(This course is offered as RRS 305 and ARAB 305. Students may not repeat the course under an alternate prefix.)
Course Attributes:
  • Am. Ethnic & Racial Minorities
  • Global Perspectives

ARAB 312 Arab and Arab American Literary Expressions (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Exploration of Arab and Arab American women's experiences through interdisciplinary lens and utilization of multiple approaches to expand notions of literary expressions.
(This course is offered as RRS 312 and ARAB 312. Students may not repeat the course under an alternate prefix.)
Course Attributes:
  • Am. Ethnic & Racial Minorities
  • Global Perspectives
  • Social Justice

ARAB 400 Islam and Fiction in English (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Introduction to various representations of Islam in modern fiction, both in the Islamic world and beyond, focusing on the literary cultural influences portrayed in texts that address Islam and Muslims whether centrally or peripherally.
(This course is offered as ARAB 400 and ETHS 400. Students may not repeat the course under an alternate prefix.)

ARAB 450 Contemporary Arabic and Arab American Literature (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Contemporary literature from Arab American and Arabic speaking communities and their diasporas. Exploration of the political and cultural context of the Arab region by using poetry and fiction as a foundation.
(This course is offered as RRS 450 and ARAB 450. Students may not repeat the course under an alternate prefix.)
Course Attributes:
  • UD-C: Arts and/or Humanities
  • Am. Ethnic & Racial Minorities
  • Global Perspectives
ARAB 510 History of Arabic Literature I: Classical Arabic Literature (Units: 3)
Prerequisite: Four semesters of lower division Arabic or equivalent or consent of instructor.

Introduction to major themes and ideas in classical Arabic literature, focusing on major poetry and prose works from the pre-Islamic and early Caliphate eras.
(This course is offered as ARAB 510 and ETHS 510. Students may not repeat the course under an alternate prefix.)

ARAB 511 History of Arabic Literature II: Modern Arabic Literature (Units: 3)
Prerequisite: Four semesters of lower division Arabic or equivalent or consent of instructor.

Introduction to major themes and ideas in modern and contemporary Arabic literature from various countries (e.g., Morocco, Algeria, Egypt, Syria, Sudan), focusing on major works from the late 19th century to the present.
(This course is offered as ARAB 511 and ETHS 511. Students may not repeat the course under an alternate prefix.)

ARAB 600 Modern Arabic Literature and Film in English (Units: 3)
Prerequisite: ENG 214 or equivalent.

Fostering critical skills in reading literary texts and cultivating appreciation of literary concepts through different textual media. Understanding dynamics of exchange between modern Arabic fiction and film, including narrative elements.

ARAB 650 Modern Arabic Fiction in English (Units: 3)
Prerequisite: ENG 214 or consent of instructor.

Introduction to modern Arabic literature and the intertwining of fiction and history. [Taught in English]
(ARAB 850/ARAB 650 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ARAB 850 Modern Arabic Fiction in English (Units: 3)
Prerequisite: ENG 214 or consent of instructor.

Introduction to modern Arabic literature and the intertwining of fiction and history. [Taught in English]
(ARAB 850/ARAB 650 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Art (ART)

ART 103 Shop Safety for Artists (Unit: 1)
Prerequisite: Restricted to Art majors and minors.
Introduction to best and safe practices for art practitioners whose work requires fabrication using power tools, welding, and a variety of hand tools used in wood and metal work. Activity.

ART 201 Western Art History I (Units: 3)
Conceptual and technical relationship of visual culture to the social, political, and economic life of the Ancient Greek, Ancient Roman, Byzantine, Early Medieval, Romanesque, Gothic, Renaissance, and Southern Baroque periods.
Course Attributes:
  • C1: Arts

ART 202 Western Art History II (Units: 3)
Conceptual and technical relationship of visual culture to the social, political, and economic life of the Northern Baroque, Rococo, Neoclassical, Romantic, Impressionist, and Modernist periods.
Course Attributes:
  • C1: Arts

ART 205 Asian Art History (Units: 3)
Conceptual and technical relationship of visual form to values in the art of China, Korea, Japan, India, Tibet, and South-East Asia. (This course is offered as ART 205 and HUM 205. Students may not repeat the course under an alternate prefix.)
Course Attributes:
  • C1: Arts
  • Global Perspectives

ART 210 Introduction to Digital Media Arts (Units: 3)
Fundamentals, principles, and tools for 2D/3D graphics, time-based media, and interactive art; aesthetics, visual and verbal language; art historical and current practices in the media. Classwork, 1 unit; activity, 2 units.

ART 222 Introduction to Textile Art (Units: 3)
Studio experiences correlating textile media with basic techniques and processes. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 231 Drawing 1 (Units: 3)
Studio experiences with dry and wet materials. Visual translation of threedimensional objects to a two-dimensional surface, as well as approaches to copying, abstraction and pattern using linear, tonal and volumetric indication, and perspective, with attention to composition. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 232 Drawing as Thinking: Sketchbooks as a Portable Studio (Units: 3)
Introduction to a variety of drawing techniques and approaches to develop observational, expressive, and thinking vocabularies in art practice; methodologies for the studio and the field using sketchbooks. Classwork, 1 unit; activity, 2 units.

ART 235 Printmaking 1 (Units: 3)
Studio experiences correlating drawing and printmaking media with basic techniques and processes. Classwork, 1 unit; activity, 2 units. Extra fee required.
Course Attributes:
  • C1: Arts

ART 236 Introduction to Screen Printing (Units: 3)
Introduction to screen printing processes through the production of small editions. Consideration of screen print history, fundamentals of visual representations, and the role of prints in contemporary art. Classwork, 1 unit; activity, 2 units.

ART 240 Introduction to Contemporary Sculpture (Units: 3)
Studio experiences exploring sculptural, theoretical, and visual processes using a variety of materials, methods, and context as means of investigation. Emphasis on personal creative growth and development. Classwork, 1 unit; activity, 2 units. Extra fee required.
Course Attributes:
  • C1: Arts

ART 245 Ceramics 1 (Units: 3)
Studio experiences correlating clay media with basic techniques and processes. Classwork, 1 unit; activity, 2 units. Extra fee required.
Course Attributes:
  • C1: Arts

ART 260 Photography 1 (Units: 3)
Black and white film processing and printing. Study of photography as a creative medium. 35mm camera with manually adjustable apertures and shutter speeds required. Automatic cameras not acceptable. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 303 The Artist in the 20th-21st Centuries: Cultures in Collision--Cultures in Fusion (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Multi-cultural, multi-ethnic overview of selected topics in 20th-21st century art. Examines artists who have moved out of their own cultural frameworks to create alternative expressions.

ART 306 Modern and Contemporary Art in a Global Context: 1945-Present (Units: 3)
Prerequisites: Upper division standing or consent of instructor; restricted to art majors.
A survey of major movements and themes in art internationally since 1945. [Formerly ART 506]

ART 311 Interactive Arts 1 (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Skills, knowledge, concepts, and aesthetics in designing interactive artworks using basic electronics, microcomputers, and microcontrollers in a fine arts context. Classwork, 1 unit; activity, 2 units.
ART 365 Documentation and Archiving Practices for the Visual Artist (Unit: 1)
Prerequisite: Restricted to upper division Studio Art and Art History majors and minors.
Focus on practical tools employed by visual artists in documentation and archiving of artworks, including but not limited to photography fundamentals, studio lighting fundamentals for 2D and 3D artworks, labeling of artworks, archiving of digital files, and digital imaging practices.

ART 370 Introduction to Art Practice (Unit: 1)
Prerequisites: Restricted to junior Art majors; ENG 214 or equivalent with a grade of C or better; or consent of instructor.
Orientation to major program and concentrations; resources; and extracurricular opportunities; and issues and trends in art practice. How to select a faculty adviser and develop a program of major study. Introduction to vocational outlooks and opportunities for graduate study. (CR/NC only)

ART 400GW Writing About Art - GWAR (Units: 3)
Prerequisites: Restricted to upper division Art majors and minors; ENG 214 or equivalent with a grade of C or better.
Introduction to basic art historical methodologies with an emphasis on formal analysis and formal description of works of art. (ABC/NC grade only)

Course Attributes:
- Graduation Writing Assessment

ART 401 Greek Art and Archaeology (Units: 3)
Prerequisite: ENG 214 or equivalent.
Survey of Greek material culture (art, architecture, city planning, etc.) from the Bronze Age to second century CE. (This course is offered as CLAR 420 and ART 401. Students may not repeat the course under an alternate prefix.)

ART 402 Roman Art and Archaeology (Units: 3)
Prerequisite: ENG 214 or equivalent.
Survey of Roman material culture (art, architecture, city planning, etc.) from the foundation of Rome to the reign of Justinian. (This course is offered as CLAR 425 and ART 402. Students may not repeat the course under an alternate prefix.)

ART 403 Queer Art History (Units: 3)
Prerequisites: ART 201 or ART 202 or equivalent, consent of instructor.
Case studies, primarily of Western art. Homophobia, censorship, reconstructing gay and lesbian history, major artists, visual codes, eroticism, lesbian feminism, families and communities, racial diversity, AIDS, other issues. (This course is offered as ART 403 and SXS 405. Students may not repeat the course under an alternate prefix.)

ART 405 Art, Literature, and Power in the Renaissance (Units: 3)
Prerequisite: ART 201 or ART 202 or equivalent.
European renaissance and baroque art and literature, related to power structures affecting all aspects of culture and society. (This course is offered as ART 405 and HUM 405. Students may not repeat the course under an alternate prefix.)

ART 406 Renaissance Art (Units: 3)
Prerequisites: ART 201, ART 202, or equivalents.
Painting, sculpture, and architecture of the 14th, 15th, and 16th centuries in Italy and Northern Europe.

ART 410 Conceptual Strategies I (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Conceptual strategies for artists such as listing, language, chance, etc. Conceptual frameworks, methods, and strategies with studio art production and digital media. Primacy of ideas and processes in studio work. Influences among technology, art, culture, and everyday life. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 412 Computer Applications in Conceptual Design I (Units: 3)
Prerequisites: Upper division standing; priority enrollment given to Art majors.
Digital computer as a design tool. Programming to create and manipulate graphic imagery, including graphic, sound, and text events. No computer background required. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 416 Contemporary Asian Art (Units: 3)
Prerequisite: ART 205 or equivalent.
Art history survey of Asian art in India, China, Japan, Philippines, Thailand, Vietnam and Indonesia from late 19th century to present. Exploration of post-colonialism, Orientalism, globalization and neo-traditionalism themes. (Formerly a topic under ART 502)

ART 417 The Art and Architecture of Islam (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Case study examination of the tradition and practices of Islamic art and architecture, artistic developments from the 7th century to the present, and regional variations in Africa, Asia, and Europe. (Formerly ART 504)

ART 418 Art History, Ancient to 19th Century: Special Areas (Units: 3)
Prerequisites: Restricted to Art majors and minors; ART 201 or ART 202 or equivalent.
Investigation of specific themes, periods, styles, geographical areas, and/or media in art history from the Ancient period through the 19th century. Topics to be specified in the class schedule. May be repeated when topics vary.

ART 419 Art History, 20th and 21st Century: Special Areas (Units: 3)
Prerequisites: Restricted to Art majors and minors, ART 201, ART 202, or equivalents.
Investigation of specific themes, periods, styles, geographical areas and/or media in art history during the Modern and Contemporary periods. Topics to be specified in the class schedule. May be repeated when topics vary.

ART 421 Global Perspectives in Art History: Special Areas (Units: 3)
Prerequisites: Restricted to Art majors and minors; ART 205 or equivalent.
Investigation of specific themes, periods, styles, geographical areas and/or media in art history with an emphasis on global practices and perspectives emerging in Asia, Africa, the Middle East, Latin America, and their diasporas. Topics to be specified in the class schedule. May be repeated when topics vary.
ART 422 Weaving I - Beginning (Units: 3)
Prerequisite: ART 222 or equivalent.
Basic weaving techniques using four harness looms. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units on advisement. Extra fee required.

ART 423 Constructed Surfaces (Units: 3)
Prerequisites: Restricted to upper division Art majors and minors; ART 222.
Exploration in relief surface treatments using a variety of approaches incorporating textile-related techniques. Possibilities of raw materials and substrates for adhesion, integration or construction; conceptual contribution that material selection and working process make. Classwork, 1 unit; activity, 2 units. (Plus-minus letter grade only) Extra fee required.

ART 424 Surface Design Studio (Units: 3)
Prerequisite: ART 222 or equivalent.
Fundamental surface design techniques on fabric for producing two- and three-dimensional forms with emphasis on the design process and concept development. Studio activities from portfolio samples to larger fine art pieces are explored. May be repeated for a total of 6 units on advisement. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 430 The Language of Observational Painting (Units: 3)
Prerequisites: Restricted to junior standing Art majors and minors; ART 231 or equivalent.
Exploration and development of oil painting practice with an emphasis on translating three dimensions into two using color, value, and mark-making toward representational ends. Traditional and non-traditional approaches to starting, developing, and resolving paintings, how to distinguish and articulate quality and meaning in works of art. Classwork, 1 unit; activity, 2 units.

ART 431 Painting 1 (Units: 3)
Prerequisites: Restricted to art majors; ART 231 or equivalent.
Concepts, techniques, and disciplines of painting. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 432 Drawing 2 (Units: 3)
Prerequisites: Restricted to Art majors; ART 231 or equivalent.
Drawing concepts and media. Classwork, 1 unit; activity, 2 units. Extra fee required. May be repeated for a total of 6 units.

ART 433 Figure Drawing (Units: 3)
Prerequisites: Restricted to Art majors; ART 231 or equivalent.
Figure drawing concepts in varied media. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 434 Color Workshop (Units: 3)
Prerequisites: Restricted to Art majors; ART 231 or equivalent.
Color vocabulary and theoretical concepts of color. Color is fundamental to painting and other disciplines. Pigments, dyes, inks. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 435 Printmaking Workshop: Relief (Units: 3)
Prerequisites: ART 235 and 3 units of drawing from ART 231, ART 432, ART 433, ART 533, or equivalent.
Relief workshop. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 436 Printmaking Workshop: Intaglio (Units: 3)
Prerequisites: ART 235 and 3 units of drawing from ART 231, ART 432, ART 433, ART 533, or equivalent.
Intaglio workshop. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 437 Printmaking Workshop: Lithography (Units: 3)
Prerequisites: ART 235 and 3 units from ART 231, ART 432, ART 433, ART 533, or equivalent.
Lithography workshop. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 438 Monoprinting (Units: 3)
Prerequisites: ART 235 and 3 units of drawing from ART 231, ART 432, ART 433, ART 533, or equivalent.
Exploration of process. Experimentation and re-evaluation of the medium and its relationship to traditional printmaking. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 439 Screen Printing (Units: 3)
Prerequisites: Restricted to Art majors and minors; ART 235 or equivalent.
Screen printing processes that utilizing hand drawn and photo-emulsion stencils with a focus on printing on paper and the role of screen prints in contemporary art. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required. (Plus-minus letter only) [Formerly under ART 536, topic “Silkscreen”]

ART 440 Material Research and Conceptual Strategies (Units: 3)
Prerequisites: Restricted to Art majors; ART 240 or equivalent.
Development of sculptural/artistic ideas, skills, materials, and steel and wood fabrication. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 445 Ceramics 2 (Units: 3)
Prerequisites: Restricted to Art majors; ART 245 or equivalent.
Clay and glaze. Form exploration with wheel and hand-building techniques. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 12 units with consent of instructor. Extra fee required.

ART 460 Photography 2 (Units: 3)
Prerequisites: Restricted to Art majors; ART 260 or equivalent beginning black and white chemical process photo course.
Advanced black and white photochemical processes, techniques that utilize contemporary art concepts and approaches. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 501 Western Art: Special Areas (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Investigation of specific themes, periods, styles, and/or media in Western Art History. Topic to be specified in Class Schedule. May be repeated as topics vary.

ART 502 Asian Art: Special Areas (Units: 3)
Prerequisite: ART 205 or equivalent.
Investigation of specific themes, issues, and media in Asian and Asian American art history. Topic to be specified in the Class Schedule. May be repeated when topics vary.
ART 507 Art of China (Units: 3)
Prerequisite: ART 205 or equivalent.

Historical development of painting, sculpture, and other arts in China from earliest times to the 19th century within the larger context of Chinese culture. (This course is offered as ART 507 and HUM 507. Students may not repeat the course under an alternate prefix.)

ART 509 Art Productions: Studio, Art History, Art Education (Unit: 1)
Prerequisite: Upper division Art majors and minors.

Research, design, and development of visual material for instructional purposes. Concurrent enrollment permitted in two different sections of the course. Laboratory. May be repeated for a total of 3 units.

ART 511 Conceptual and Information Arts: Special Areas (Units: 3)
Prerequisites: Restricted to upper division Art majors or consent of instructor.

Examination of conceptual and theoretical aspects of digital media and emerging technologies for artists in relation to visual art practice. Topic to be specified in Class Schedule. Classwork, 1 unit; activity, 2 units. May be repeated when topics vary. Extra fee required.

ART 513 Digital Video and Sound (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

An introduction to digital video art including video production, history and current practices. Extra fee required. [Formerly under ART 511, topic “Digital Video: Interactive Images”]

ART 516 Advanced Topics in Art History (Units: 3)
Prerequisites: Restricted to upper division Art majors and minors; at least one 300 or 400 level art history course.

Investigation of advanced topics in art history. Topic to be specified in the class schedule. May be repeated for a total of 12 units when topics vary.

ART 522 Weaving 2 - Intermediate (Units: 3)
Prerequisite: ART 422 or equivalent.

Expands on the technical and creative skills acquired in Weaving I. Intermediate hand weaving and textile concepts using eight-harness floor looms. Exploration of multi-harness weave structures from sampling towards individual art projects. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 524 Surface Design 3 (Units: 3)
Prerequisite: ART 424 or equivalent.

Experimental surface design applied to the study of costume. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 525 Textiles Studio Process (Units: 3)
Prerequisites: Restricted to upper division Art majors or minors; ART 222, two upper division ART courses; or consent of instructor.

Advanced studio experience for self-guided studio projects and assignments. Exploration and investigation of technique and mechanics necessary to create fully resolved and in-depth works of art. Classwork, 1 unit; laboratory, 2 units. May be repeated for a total of 6 units. (Plus-minus letter grade only.)

ART 527 Repeat Pattern for Fine Art (Units: 3)
Prerequisites: Restricted to upper division Art majors and minors or consent of instructor; basic computer skills and familiarity with Photoshop and Illustrator.

Studio experience exploring pattern repeat principles, mechanics, and creation toward contemporary uses in various disciplines of fine arts and design; methods of producing repeat pattern, from handmade to computer-aided, are discussed and demonstrated. Classwork, 1 unit; activity, 2 units. Extra fee required. (Plus-minus ABC/NC, CR/NC) [Formerly a topic under ART 523]

ART 529 Textile Futures (Units: 3)
Prerequisites: Restricted to upper division Art majors and minors; ART 222, 3 units from ART 422 or ART 424 or ART 624; or consent of instructor.

Exploration of the intersection of textiles and emergent technologies and processes towards new ways of creating, defining, and experiencing textiles. Students will learn about the current climate of future textiles in practice, concept, and theory and will develop their own project concepts. Classwork, 1 unit; activity, 2 units. (Plus-minus letter grade only) Extra fee required. [Formerly ART 523, topic “Textile Futures”]

ART 530 Intermediate Painting: The Expanded Field (Units: 3)
Prerequisites: Restricted to upper division Art majors and minors; ART 430 or equivalent.

Contemporary approaches and concerns in painting practice. Topics to be specified in the Class Schedule. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 9 units when topics vary.

ART 531 Painting 2 (Units: 3)
Prerequisites: Restricted to Art majors; ART 431.

Special problems in painting. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 533 Figure Painting (Units: 3)
Prerequisites: Restricted to Art majors; ART 431, ART 433 or equivalent.

Problems in painting the human figure. May be repeated for a total of 6 units. Classwork, 1 unit; activity, 2 units. Extra fee required.

ART 534 Mixed Media Painting (Units: 3)
Prerequisites: Restricted to Art majors; ART 231, ART 431 or equivalents.

Formal, conceptual, and structural aspects of painting using traditional and non-traditional mediums, including mechanical and digital reproduction. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 535 Artist’s Books (Units: 3)
Prerequisite: 3 units of printmaking in ART 435, ART 436, ART 437, ART 438 or equivalent.

Intensive exploration of the artist book from the perspective of the bookbinder, printer, and writer including the ways in which contemporary artists self-publish. Includes units on the creative process, book structures, and letterpress printing. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required. (Plus-minus letter only) [Formerly under ART 536, topic “BookArts”]

1393
ART 536 Printmaking: Special Areas (Units: 3)
Prerequisite: 3 units of printmaking from ART 435, ART 436, ART 437, ART 438 or equivalent, or consent of instructor.
Topic to be specified in Class Schedule. Classwork, 1 unit; activity, 2 units. May be repeated when topics vary. Extra fee required.

ART 539 Art Productions: Drawing, Painting, and Printmaking (Unit: 1)
Prerequisite: Upper division Art majors and minors.
Research, design, and development of visual material for instructional purposes. Concurrent enrollment permitted in two different sections of the course. Laboratory. May be repeated for a total of 4 units.

ART 540 Sculpture and the Expanded Practice (Units: 3)
Prerequisites: Restricted to Art majors; ART 440.
Development of sculptural expertise and personal creative growth. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 9 units. Extra fee required.

ART 541 Installation Art (Units: 3)
Prerequisite: 400 level studio course.
Investigation of personal aesthetic and theoretical issues as they relate to creating sculptural installation works where the whole (context/environment) is more than the sum of parts. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 543 Hydrarchy: Nautical Art, Watercraft & the Art of Resistance (Units: 3)
Prerequisite: Restricted to senior Art majors and minors; 400 level studio course; or consent of instructor.
Focus on generating artworks in a variety of media, informed by investigation of broad nautical themes, culture, and myth; cultural diaspora; international trade; and native versus invasive ecosystems. Classwork, 1 unit; activity, 2 units. [Formerly ART 677]

ART 544 Raku (Units: 3)
Prerequisites: Priority enrollment given to Art majors; ART 545 or consent of instructor.
Methods of obtaining basic glazes, advanced slip decoration and design, building and understanding of varied oriental raku kilns, and reduction and oxidation firing. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 545 Ceramics 3 (Units: 3)
Prerequisites: Restricted to Art majors; ART 445 with a grade of C or better.
Problems in ceramics. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 546 Glaze Surfaces (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Conducting advanced experiments in the production of a clay body. Calculating, executing, and experimenting with various aspects of the glaze potential. Constructing kilns and participating in their firing. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 560 Photography 3 (Units: 3)
Prerequisites: Restricted to Art majors; ART 260, ART 460 or equivalent.
Introduction to imaging processes using Adobe Photoshop. This is a bridge course where analog media is translated to digital information for printing. Assignments combine technical exercises with conceptual themes in contemporary photography. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 6 units. Extra fee required.

ART 562 Color Photography I (Units: 3)
Prerequisites: Restricted to Art majors; ART 460 or equivalent.
Advanced digital color photography and image processing and printing. Digital camera with Camera Raw file capability required. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 9 units. Extra fee required.

ART 563 Topics in Photography (Units: 3)
Prerequisites: Restricted to Art majors; ART 460.
Examination and exploration of the concepts, and implementation of, the tools and techniques of photographic and lens-based processes and practices. Topic to be specified in the Class Schedule. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 9 units when topics vary. Extra fee required.

ART 570 Internships in the Visual Arts (Units: 1-3)
Prerequisites: Restricted to upper division Art majors and minors; 20th/21st century art history course with a grade of B or better.
Internship experience in the arts that include gallery work, studio assistantships, research, etc. (Plus-minus ABC/NC, CR/NC)

ART 600 Studio Process: Self Directed Practice (Units: 3)
Prerequisites: Restricted to senior Studio or Art History/Studio majors; minimum of two 500 level studio courses in a single discipline within Art.
Interdisciplinary studio capstone course that combines research, art making, seminar, and critique. Lecture, 1 unit; activity, 2 units. May be repeated for a total of 6 units. (Plus-minus letter grade only)

ART 602 Art History Seminar (Units: 3)
Prerequisite: Upper division Art majors with an art history or dual art history/studio concentration, or consent of instructor.
Advanced seminar in specific topics, themes, and research methods in Art History. Topics to be specified in the Class Schedule. May be repeated when topics vary. (ABC/NC grading; CR/NC allowed)

ART 610 Conceptual Strategies III (Units: 3)
Prerequisites: ART 410, ART 412, 6 units of ART 511, and consent of instructor.
Production and research projects. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 9 units.

ART 612 Computer Applications in Conceptual Design III (Units: 3)
Prerequisites: ART 410, ART 412, and 3 units of ART 511, and consent of instructor.
Conceptual design computer applications workshop. Classwork, 1 unit; activity, 2 units. May be repeated for a total of 9 units. Extra fee required.
ART 619 Exhibition Design (Units: 3)
Prerequisites: Restricted to upper division Art major or student in
Museum Studies program.
Theory and production of exhibitions, including planning, collecting,
preparation, annotation, and criticism. May be repeated for a total of 6
units.
ART 624 Sculptural Cloth and Fiber (Units: 3)
Prerequisite: ART 222 or consent of instructor.
Exploration of object making, as well as ideas in installation, through the
learning of ways to shape cloth and fiber into forms and structures using
a variety of textile related techniques and approaches. Classwork, 1 unit;
activity, 2 units. Extra fee required.
ART 631 Painting 3 (Units: 3)
Prerequisite: Portfolio review.
Advanced painting course that supports diverse practices and old and
new methods of image making. Students complete a body of work while
developing awareness of contemporary conceptual and profession
concerns. Classwork, 1 unit; activity, 2 units. May be repeated for a total
of 9 units. Extra fee required.
ART 635 Advanced Printmaking (Units: 3)
Prerequisite: Departmental recommendation and consent.
Advanced printmaking projects emphasizing aesthetic and technological
developments. Classwork, 1 unit; activity, 2 units. May be repeated for a total
of 6 units. Extra fee required.
ART 640 Independent Research & Practice Development (Units: 3)
Prerequisites: Restricted to Art majors; ART 540; and departmental
recommendation and consent.
Sculpture workshop. Classwork, 1 unit; activity, 2 units. May be repeated
for a total of 9 units. Extra fee required.
ART 645 Ceramics 4 (Units: 3)
Prerequisites: Restricted to art majors; departmental recommendation
and consent.
Ceramics workshop. Classwork, 1 unit; activity, 2 units. May be repeated
for a total of 9 units. Extra fee required.
ART 660 Photography 4 (Units: 3)
Prerequisites: Restricted to Art majors; ART 560 or equivalent.
Photography workshop. Classwork, 1 unit; activity, 2 units. May be
repeated for a total of 9 units. Extra fee required.
ART 662 Color Photography II (Units: 3)
Prerequisites: Restricted to Art majors; ART 562 or ART 563.
Advanced digital color printing and image processing. Digital camera with
Camera Raw file capability required. Classwork, 1 unit; activity, 2 units.
May be repeated for a total of 6 units. Extra fee required.
ART 663 Honors Seminar in Photography (Units: 3)
Prerequisites: Restricted to senior Art majors and minors; concurrent
enrollment in any 500 or 600 level photography course.
Examination of philosophical and critical issues in contemporary
photography art practice that include reading salient texts, looking at
contemporary photography and examining in this context student work.
ART 670 Art as Inquiry - Interdisciplinary Studio Experiences (Units: 3)
Prerequisites: Senior Art major; two 500 level or one 600 level course in
area of emphasis.
Self-directed studio research/inquiry focusing on the why, what and how
of studio art practice. Emphasis on contemporary practice and theory,
creating a cohesive body of work, and critical feedback. Classwork, 1 unit;
activity, 2 units. May be repeated for a total of 6 units.
ART 685 Projects in the Teaching of the Visual Arts (Units: 1-3)
Prerequisites: Consent of instructor and completion of equivalent course
in the subject matter.
Teaching experiences in art, art education, and art history through
assigned instructional projects as classroom aides. Training in teaching
principles including supervised classroom teaching activities. (Students
may earn a maximum of 4 units toward the baccalaureate degree for any
course(s) numbered 685 regardless of discipline.)
ART 699 Independent Study (Units: 1-3)
Prerequisites: Upper division standing, consent of instructor, advisor, and
college dean.
Independent study, under supervision of a faculty member selected by
the student, of some aspect of the field not covered by regular courses.
May be repeated for a total of 4 units with consent of instructor, adviser,
and department chair. No more than 3 units can be taken during any one
semester.
ART 700 Contemporary Art History: Practice, Theory, Criticism (Units: 3)
Prerequisite: Classified graduate standing in Art.
Seminar in contemporary art history, theory, and criticism as they apply
to the creative artist. Should be completed in the first semester of
enrollment of classified graduate studies. (Plus-minus letter grade only)
ART 701 Art History: Images and Meaning (Units: 3)
Prerequisites: Classified graduate standing and/or consent of instructor;
ART 602, ART 700.
Advanced research seminar in art history. Historical area studies,
iconography, and textual analyses. May be repeated for a total of 6 units.
ART 702 Graduate Art History Methods (Units: 3)
Prerequisite: Classified graduate status.
Graduate seminar in art history research methods. May be repeated for a
total of 6 units.
ART 703 Art History Research Applications (Units: 3)
Prerequisite: ART 700 or ART 701 or consent of instructor.
Develop professional skills in problem formulation, visual and textual
analysis, and art historical argument.
ART 704 Interdisciplinary Critique Seminar (Units: 3)
Prerequisites: Classified standing in art, consent of instructor and
graduate major adviser.
Intensive critical investigation of selected aspects of the visual arts. May
be repeated for a total of 18 units.
ART 705 Contemporary Art (Units: 3)
Prerequisites: ART 700 and not less than 6 units of art history including
ART 203 or ART 506 or equivalents taken within the last 5 years.
Focus on the research of both the visual theories and the
accomplishments of the post-WW II period and the changing attitudes
and styles that form contemporary traditions.
ART 750 Seminar in Teaching Art Practice (Units: 3)
Prerequisite: Classified M.F.A. graduate standing or consent of instructor.
Development of teaching and related career preparation skills, philosophies and curriculum planning in art practice fields. Strongly recommended for teaching assistants in ART 850. May be taken by advanced undergraduates preparing for college level teaching careers in art.

ART 780 Art Processes and Practices: Visiting Artists and Scholars (Unit: 1)
Prerequisite: Classified graduate standing and consent of instructor.
Introduction to and exploration of specific approaches and processes in individual art practice, including writing, discussion and material research. May be repeated for a total of 6 units. (CR/NC grading only)

ART 789 Professional Practices for Visual Artists (Units: 3)
Prerequisite: MFA students in School of Art.
Deepen the understanding of the practical tools employed by professional contemporary artists, including but not limited to grant writing, work fabrication, exhibition design, daily practice, and professional identity in relationship to each student's individual practice. (Plus-minus ABC/NC)

ART 850 Directed Experience in Public Roles for Artists (Units: 3)
Prerequisites: Classified graduate standing in art, consent of supervising instructor and graduate major adviser.
Supervised directed experiences and seminar in the teaching of art and/or internship in other public roles that artists occupy, etc. May be repeated for a total of 6 units.

ART 852 Directed Experience in Art Education (Units: 3)
Prerequisites: Classified graduate standing, consent of the supervising instructor and the graduate major adviser.
Experiences in the teaching of art under the supervision of an instructor.

ART 853 Directed Experience in Museum Education (Units: 3)
Prerequisites: ART 700, ART 705, or ART 602 and consent of the graduate major adviser.
Intern experience in museums, community centers, and art programs under the supervision of an Art Department instructor. May be repeated for a total of 6 units.

ART 882 Tutorial in Studio (Units: 3)
Prerequisites: Classified graduate standing in art and consent of instructor and graduate major adviser.
Critical direction on a one-to-one basis. Intended to develop a student's individual vision and capabilities as a professional artist. May be repeated for a total of 6 units.

ART 890 Creative Work Research (Units: 3)
Prerequisites: ART 700, ART 704, ART 705, and consent of major adviser.
Development of creative research in the art area with direct application to the creative work project. Must be taken in the semester before acceptance in ART 894.

ART 894 Creative Work Project (Units: 3)
Prerequisites: ART 890, consent of instructor and approval of Advancement to Candidacy (ATC) for the Master of Fine Arts and Culminating Experience (CE) forms by Graduate Studies.
ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before enrollment. Not repeatable unless taken previously for an M.A. at State. May be repeated with approval of the department chair.

ART 897 Research Projects in Art (Units: 3)
Prerequisites: ART 700, ART 704, ART 705, and consent of graduate major adviser.
Development of a problem of major interest to a student with direct application of methods of research, research findings, and production to creative activity in the art area.

ART 898 Master's Thesis (Units: 3)
Prerequisites: ART 700, ART 701, ART 702, ART 703, consent of instructor and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. One semester paper demonstrating art historical theory, methods, research. ATC and Proposal for Culminating Experience Requirement forms must be approved by Graduate Studies before registration. (CR/NC grading only.)

ART 899 Independent Study (Units: 1-3)
Prerequisite: Classified graduate standing and consent of instructor.
Independent study, under supervision, of some aspect of the field related to the student's final thesis or project. May be repeated for a total of 6 units with consent of instructor. (CR/NC grading only)
Asian American Studies (AA S)

AA S 101 First year experience (Units: 3)
Prerequisites: First year freshmen or transfer students; concurrent enrollment in one of the following courses: AA S 110, AA S 210, AA S 216, RRS 103, or RRS 303.

Foundations of intellectual, academic, and career preparation for students enrolled in Asian American Studies courses.

AA S 102 Identity, Equity, and Student Success (Units: 3)
Exploration of racial/cultural identity, equity, and student success. Topics include an overview of academic success skills, racial/cultural identity development, social justice, equity and personal and community responsibility, educational strategies and planning, interpersonal communication, career development, health issues, and self-assessment strategies. May be repeated for a total of 6 units.

AA S 110 Critical Thinking and the Asian American Experience (Units: 3)
Development of basic critical thinking skills involved in understanding, criticizing, and constructing arguments reflective of the experience of Asian Americans and key themes in Asian American Studies. (Note: In order for this course to satisfy General Education, students must earn a C- or CR or higher grade if taken fall 2014 or later.) Course Attributes:

- A3: Critical Thinking
- Am. Ethnic & Racial Minorities

AA S 210 History of Asians in the United States (Units: 3)
Comparative analysis of the experience of different Asian American groups and their place in the general history and development of American society. [Formerly AA S 200]

Course Attributes:

- U.S. History
- D2: Social Sciences: U.S. Hist
- Am. Ethnic & Racial Minorities

AA S 211 Contemporary Asian Americans (Units: 3)
Examination of factors that define minority groups and their positions in contemporary U.S. society, using Asian Americans as a case study. [Formerly ETHS 220]

Course Attributes:

- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 212 Asian Americans and Mass Media (Units: 3)
Images and treatment of Asian Americans in mass media, especially motion pictures, television, advertising, popular literature, and commercial art. American minorities in the entertainment industry. [Formerly AA S 518 and AA S 693]

Course Attributes:

- C1: Arts
- Am. Ethnic & Racial Minorities

AA S 213 Asian Americans and American Ideals and Institutions (Units: 3)
The Asian American experience in the U.S., focusing on basic governmental ideals and institutions. Impact of Asians on legal-constitutional America and the countervailing impact of political-legal structures imposed on Asians. [Formerly AA S 205]

Course Attributes:

- U.S. Govt CA State Local Govt
- D3: Social Sciences: US CA Gov
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 214 Second Year Written Composition: Asian American Studies (Units: 3)
Prerequisite: ENG 114 or equivalent with a grade of CR or C- or better. Reading and writing with speech as a supportive language skill. Must be taken after completing 24 units and before completing 60 units. (Plus/minus ABC/NC, CR/NC allowed)

Course Attributes:

- A4: Written English Comm II
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 216 Introduction to Asian American Literature (Units: 3)
Reading and analysis of Asian American literature. Appreciation of literature from a literary standpoint with a focus on history, identity, and representation. [Formerly AA S 206]

Course Attributes:

- C3: Humanities: Literature
- Am. Ethnic & Racial Minorities

AA S 218 Asian American Culture (Units: 3)
Ethnic values and cultures in America using Asian American arts, languages, and literatures. How these works reflect and express the character of the Asian American experience and the forces that have shaped that experience. [Formerly ETHS 210]

Course Attributes:

- E1: Lifelong Learning Develop
- C2: Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AA S 301 Asian Americans of Mixed Heritages (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Issues concerning Asian Americans of mixed racial and ethnic heritages, focusing on mixed heritage identities in relation to their ethnic and cultural sensibilities. [Formerly AA S 550]

Course Attributes:

- E1: Lifelong Learning Develop
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice
AA S 320 Chinese in the United States (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

The Chinese American experience in critical historical perspective from the beginning of immigration in the 19th century to the present. [Formerly AA S 310]

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AA S 322 Chinese American Language and Literature (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Cultural identity of the Chinese American as it is expressed in the language and literature, Chinese community and its influence on the creative process in literature.

Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 323 Chinese American Identities (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Historical, institutional, and cultural sources of Chinese American identity and sensibility. Mental health issues related to self-perception, stereotypes, family problems, institutional racism, and the development of autonomy. [CSL may be available] [Formerly AA S 318]

Course Attributes:
- E1: Lifelong Learning Develop
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AA S 330 Nikkei in the United States (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Historical experience of Japanese Americans in the United States: prewar immigration and settlement, the struggle against racial exclusion, World War II incarceration, and the postwar return and development of contemporary Nikkei community. [Formerly AA S 331]

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 332 Japanese American Art and Literature (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examination of Japanese American art and literature through historical, social and cultural factors that influenced its development. Specific works and artists representing different genres and periods will be analyzed. [Formerly AA S 444]

Course Attributes:
- E1: Lifelong Learning Develop
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 333 Japanese American Identities (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Japanese American character, identity, self-image, and behavioral manifestations of the interaction of American and Japanese cultural values. [Formerly AA S 335]

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities

AA S 337 Okinawan American Heritage and Culture (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Summer exchange course in Okinawa. Opportunity to deepen students' knowledge of the Okinawan American cultural heritage and contemporary politics. Topics include history, traditional and contemporary culture, and issues in the homeland.

AA S 350 Filipina/os in the United States (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Immigration of the Filipina/os to the United States; various coping mechanisms used in response to adjustment problems; changing structure of the community. [Formerly AA S 456]

Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities

AA S 352 Filipina/o American Literature, Art, and Culture (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Critical perspectives on Filipina/o American culture through the examination of diverse genres of art and literature primarily written in English about Filipina/os in the United States, the Philippines, and in diaspora. [Formerly AA S 363]

Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice
AA S 353 Filipina/o American Identities (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Historical, social, and cultural influences that impact the identities of Filipina/o Americans through a framework of decolonization. [Formerly AA S 355]

Course Attributes:
• UD-D: Social Sciences
• Am. Ethnic & Racial Minorities
• Social Justice

AA S 360 Koreans in the United States (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Korean Americans in the U.S., examining the historical experience and the sociological, political, and economic implications of being a minority and immigrant in the U.S. [Formerly AA S 380]

Course Attributes:
• E1: Lifelong Learning Develop
• UD-D: Social Sciences
• Am. Ethnic & Racial Minorities
• Global Perspectives
• Social Justice

AA S 370 Vietnamese in the United States (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Origins and causes of Vietnamese movements to the U.S. and nature of Vietnamese experience in America in terms of political, cultural, and economic factors.

Course Attributes:
• E1: Lifelong Learning Develop
• UD-D: Social Sciences
• Am. Ethnic & Racial Minorities
• Global Perspectives
• Social Justice

AA S 372 Vietnamese American Literature (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

A critical survey of Vietnamese American literature, taking into account issues of race, class, gender, sexuality, and trauma.

Course Attributes:
• UD-C: Arts and/or Humanities
• Am. Ethnic & Racial Minorities

AA S 373 Vietnamese American Identities (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Vietnamese American experience since 1975: psychological adaptation, educational adjustment, socioeconomic integration, and cultural/ethnic maintenance. [Formerly AA S 375]

Course Attributes:
• E1: Lifelong Learning Develop
• UD-D: Social Sciences
• Am. Ethnic & Racial Minorities
• Global Perspectives
• Social Justice

AA S 377 Cambodians in the United States (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examine push-pull factors that led people to flee Cambodia; focus on constraints and strategies (institutional, artistic, community, cultural) deployed by Cambodian Americans to negotiate their status in the US. politically, culturally, economically, and socially. [Formerly AA S 393]

Course Attributes:
• E1: Lifelong Learning Develop
• UD-C: Arts and/or Humanities
• Am. Ethnic & Racial Minorities
• Global Perspectives
• Social Justice

AA S 510 Asian Americans in California (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Asian American contributions to the building of the state from their first arrival in the 19th century to their role within California’s multiracial racial formation and their growing influence on contemporary California. [Formerly AA S 300]

Course Attributes:
• UD-D: Social Sciences
• Am. Ethnic & Racial Minorities
• Environmental Sustainability
• Social Justice

AA S 512 Asian American Children’s/Adolescent Literature (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Literary works with Asian American themes that are written for youth (preschool to middle school). How Asian Americans are depicted from the 19th century to the present in this literature. [CSL may be available] [Formerly AA S 502]

Course Attributes:
• UD-C: Arts and/or Humanities
• Am. Ethnic & Racial Minorities
• Social Justice
AA S 514 Asian American Community Arts Workshop (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Interdisciplinary collaboration in a variety of Asian American creative art forms through community-based workshops. Classwork, 2 units; activity, 1 unit. [Formerly AA S 304]
Course Attributes:

- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities

AA S 516 Asian American Photographic Explorations (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Photography as a personal tool for the exploration, recording, understanding, and expression of Asian American life. Classwork, 2 units; laboratory, 1 unit. [Formerly AA S 308]
Course Attributes:

- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities

AA S 540 South Asians in the United States (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

History of South Asian immigration to the U.S., and how South Asian Americans negotiate ethnic belonging and national citizenship. Topics include racialization, class divides, gender, inequalities, queer politics, and youth culture. [Formerly AA S 340]
Course Attributes:

- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AA S 541 South Asian Diaspora (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Uses transnational and comparative frameworks to examine South Asian immigration to various countries; how colonialism, nationalism, and the politics of race, gender, class, and sexuality shape diasporic identities and communities. [CSL may be available] [Formerly ETHS 657]
(This course is offered as RRS 657 and AA S 541. Students may not repeat the course under an alternate prefix.)
Course Attributes:

- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AA S 570 Southeast Asians in the United States (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Comparative exploration of Southeast Asian America by examining the histories and experiences of Burmese, Cambodian, Filipina/o, Hmong, Indonesian, Lao, Mien, Mong, Vietnamese, and Thai Americans. [Formerly AA S 390]
Course Attributes:

- E1: Lifelong Learning Develop
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AA S 581 Asian American Women (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Social, political, and economic situation of Asian American women within the family, their communities, and the larger society. [Formerly AA S 603]
Course Attributes:

- Am. Ethnic & Racial Minorities
- Social Justice

AA S 582 Asian American Women’s Literature and the Arts (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Works by Asian American women writers and artists; how Asian American women are depicted in literature and the arts. [Formerly AA S 622]
Course Attributes:

- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 584 Asian American Sexualities (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Introduction to Asian American queer theory and sexuality studies. Examination of how sexuality impacts the lived experience of immigration, race, gender, class and generational difference among Asian Americans.
Course Attributes:

- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice
AA S 585 Asian American Religiosities (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Major issues particular to the predicaments of Asian Americans and their religions; interdisciplinary and anchored in critical Asian American Studies perspectives constructed within the context of the intersections of race and religion.
Course Attributes:
- E1: Lifelong Learning Develop
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

AA S 587 Asian Americans and Environmental Justice (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Examination of the environmental racism issues faced by Asian Americans and how their communities have organized for justice.
Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Environmental Sustainability
- Social Justice

AA S 588 Asian American Media Workshop (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Film and media arts as self-expression, reflection of community, and a tool for activism in the Asian American community. Classwork, 2 units; activity, 1 unit.
Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities

AA S 591 Asian American Community Health Issues (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Examination of community health concepts and needs specific to the Asian American communities; practical skills in community health issues and service. [Formerly AA S 575]
Course Attributes:
- E1: Lifelong Learning Develop
- UD-B: Physical Life Science
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 595 Asian American Communities and Public Policy (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Public policy issues, their impact on and the responses from the Asian American communities; relationship and complexities of local, state, and federal policies facing the Asian American communities. [CSL may be available] [Formerly ETHS 665]
Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 681 Asian American Community Changes and Development (Units: 3)
Prerequisites: Upper division Asian American Studies majors and minors only; 6 units of AA S GE courses or consent of instructor.
Asian American community origins, changes, economics; trends in residential and community patterns; and effects of immigration and population growth. [CSL may be available] [Formerly AA S 680]
Course Attributes:
- UD-D: Social Sciences
- Am. Ethnic & Racial Minorities
- Social Justice

AA S 684 Asian Americans in Education (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Exploration of the historical and contemporary narratives and counter-narratives of Asian Americans in education, development of Asian American Studies, pedagogical issues and interventions that have shaped their identities and communities, and the duality of education as a tool for oppression and as a means toward liberation. (Plus-minus ABC/NC, CR/NC)

AA S 685 Projects in the Teaching of Asian American Studies (Units: 1-4)
Prerequisites: Upper division standing; 3.3 GPA in AA S courses; and consent of instructor. Limited to undergraduate students only.
Academic service learning practicum/internship experience as an undergraduate instructional aide. Participation in the teaching of a regular instructionally-related class. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.)

AA S 688 Asian American Community Service Internship (Units: 3)
Prerequisite: Upper division standing and consent of instructor.
Supervised fieldwork/service for 100 hours minimum in an approved Asian American organization or agency, plus regular meetings with supervising faculty. May be repeated for a total of 6 units. (CR/NC grading only) [CSL may be available]

AA S 696 Critical Approaches to Asian American Studies (Units: 3)
Prerequisites: Asian American Studies majors and minors with 24 upper division units in AA S classes or consent of instructor.
Study of fundamental tools of critical thinking and theorization through the lens of Asian American Studies. Focus on reading, thinking, and writing critically by exposing topics and theories of Asian and Ethnic Studies. (Plus-minus letter grade only)
AA S 697 Proseminar in Asian American Studies (Units: 3)
Prerequisite: Asian American Studies majors with 24 upper division units in AA S classes or consent of instructor.
Practical application of research methodology in Asian American Studies through critical examination, analysis, and peer critique to develop a publishable product. [CSL may be available]

AA S 699 Independent Study (Units: 1-3)
Prerequisites: Upper division standing with 3.0 GPA and consent of instructor and department chair.
Supervised individual study of a particular issue in Asian American Studies. May be repeated for a total of 6 units.

AA S 710 Critical Approaches to Asian American Studies (Units: 3)
Prerequisite: Classified graduate level standing in Asian American Studies or consent of instructor.
Critical understanding of theory and research methodologies in Asian American Studies; available resources as preparation for graduate-level research. Guidance in literature review and bibliography in the student’s chosen area.

AA S 800 Theory and History in Asian American Studies (Units: 3)
Prerequisite: Graduate standing in Asian American Studies or consent of instructor.
Integration of historical review with contemporary theory relating to Asian Americans.

AA S 810 Seminar: Asian American Immigration (Units: 3)
Prerequisite: Classified graduate level standing in Asian American Studies or consent of instructor.
Theoretical and methodological understanding of Asian immigration to the U.S. Asian Americans within structures of American immigration history.

AA S 822 Seminar: Asian American Literature and Arts (Units: 3)
Prerequisite: Classified graduate level standing in Asian American Studies or consent of instructor.
Intersections of history, gender, culture, and creativity as they pertain to the conception of an Asian American literary aesthetic; Asian American literature within the genre of U.S. literature.

AA S 833 Seminar: Asian American Family and Identity (Units: 3)
Prerequisite: Classified graduate level standing in Asian American Studies or consent of instructor.
Issues concerning Asian Americans in family and group structures.

AA S 865 Asian American Community and Public Policy (Units: 3)
Prerequisite: Classified graduate level standing in Asian American Studies or consent of instructor.
Assessment and critique of policy issues, their impact on, and the responses from, the Asian American community. Relationship and complexities of local, state, and federal policies facing the contemporary Asian American community.

AA S 875 Asian American Community Health Issues (Units: 3)
Prerequisite: Classified graduate level standing in Asian American Studies or consent of instructor.
Major health issues, their impact on and the responses from the Asian American community. Health perspectives and practices affected by the cultural dichotomy between Asia and Euro-America. (AB/NC grading only)

AA S 880 Selected Topics in Asian American Studies (Units: 3)
Prerequisite: Graduate standing in Ethnic Studies or consent of instructor.
Seminar in selected topics in Asian American Studies. May be repeated as topics vary.

AA S 884 Critical Asian American Educational Experience and Pedagogy (Units: 3)
Prerequisite: Graduate standing or consent of instructor.
Historical narratives and counter-narratives of Asian Americans and education; the development of Asian American Studies; pedagogical issues and interventions that have shaped Asian American identities and communities. (Plus-minus AB/NC grading only; RP allowed)

AA S 895 Field Study in Asian American Studies (Units: 3)
Prerequisites: Consent of instructor and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies.
An alternate culminating study in fulfillment of the requirement for the master’s degree; student develops a project under advisement and direction of graduate adviser. Advancement to Candidacy (ATC) and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

AA S 896 Directed Reading in Asian American Studies (Units: 3)
Prerequisite: Consent of instructor and graduate adviser.
Directed reading in one specific area of Asian American studies based upon a standing bibliography or reading list, in consultation and under the supervision of a specialist in that field. May be repeated for a total of 6 units.

AA S 898 Master’s Thesis (Units: 3)
Prerequisites: Consent of instructor and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. Advancement to Candidacy (ATC) and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

AA S 899 Independent Study (Units: 3)
Prerequisite: Consent of instructor and graduate adviser.
Plan, develop, and complete a project under the direction of a supervising faculty member who is a specialist in that field.
Astronomy (ASTR)

ASTR 115 Introduction to Astronomy (Units: 3)
Designed for non-science majors (majors should take ASTR 300). Stonehenge; solar system; sun, stars and stellar evolution, pulsars; black holes; nebulae; galaxies, quasars, big bang, and expanding universe; search for extraterrestrial life. Opportunity for telescopic observation.
Course Attributes:
  • B1: Physical Science

ASTR 116 Astronomy Laboratory (Unit: 1)
Prerequisite: ASTR 115 (may be taken concurrently).
Fundamentals of astronomical observation, including optics and spectroscopy. Planetarium exploration of the stars, sun, and moon. Opportunity for telescopic observation.
Course Attributes:
  • B3: Lab Science

ASTR 120 Introduction to Astrobiology: Life in the Universe (Units: 3)
Prerequisite: Completion of ELM requirement.
A scientifically quantitative and rigorous examination of topics and processes in astronomy, geology, and biology that bear on the possible formation and evolution of life on other planets. Motivated by the discovery of exoplanets and life in extreme environments.

ASTR 300 Stars, Planets, and the Milky Way (Units: 3)
Prerequisite: PHYS 220 or PHYS 111 with a grade of C- or better.
Quantitative study of stars, stellar evolution, and the Milky Way; emphasis on the observational basis of our knowledge of the Galaxy's structure and contents. Application of Newton's laws to exoplanets, determination of stellar masses, and evidence for dark matter. (Plus-minus letter grade only)

ASTR 301 Observational Astronomy Laboratory (Units: 2)
Prerequisites: ASTR 115 or ASTR 300, PHYS 220 or PHYS 111, with grades of C- or better.
Principles and practices of astronomical observation including telescope and detector design and operation; coordinate and magnitude systems; collection, analysis, and presentation of astronomical data.

ASTR 340GW The Big Bang - GWAR (Units: 3)
Prerequisites: ENG 214 or equivalent with a grade of C or better, PHYS 320 or equivalent with a grade of C- or better.
Introduction to cosmology, from earlier human conceptions of the universe, through the hot big bang and inflation; early universe, nucleosynthesis, dark matter, dark energy, photon, and neutrino backgrounds, and observational tests of cosmology. (ABC/NC grading only)
(This course is offered as ASTR 340GW and PHYS 340GW. Students may not repeat the course under an alternate prefix.)
Course Attributes:
  • Graduation Writing Assessment

ASTR 341 Planetarium Training (Unit: 1)
Prerequisites: ASTR 115, ASTR 116, and consent of instructor.
Planetarium operation, understanding of night sky. Speaking and writing for public and education programs. Laboratory.

ASTR 400 Stellar Astrophysics (Units: 3)
Prerequisites: CSC 309, MATH 245 or MATH 376, PHYS 320, all with grades of C- or better.
Introduction to stellar astrophysics: the birth, life, and death of stars; stellar atmospheres and spectra; stellar interiors; energy generation and transport; star formation; stellar evolution and death; the Solar Cycle and the Sun-Earth connection.
(Do not pair with ASTR 400.)

ASTR 405 Exoplanetary Science (Units: 3)
Prerequisites: ASTR 115, PHYS 220, PHYS 330, or consent of instructor.
Study of extra-solar planets including history, detection methods, planet formation, and exoplanetary atmospheres. Exploration of statistics of exoplanetary systems, habitability, and placing the Solar System in a larger context.

ASTR 470 Observational Techniques in Astronomy (Units: 3)
Prerequisites: ASTR 300, ASTR 301 recommended, CSC 309 strongly recommended, all with grades of C- or better.
Astronomical instrumentation and data analysis; statistical analysis, CCD photometry, spectroscopy, image processing, instrument design. Classwork, 2 unit; laboratory, 1 unit.
[Formerly paired with ASTR 770. Students who complete the course at one level may not repeat the course at the other level]

ASTR 498 Astronomy Research Literature (Units: 2)
Prerequisites: ASTR 300, PHYS 320, with grades of C- or better, or consent of instructor.
Critical reading and analysis of current literature in astronomy and astrophysics. Culminating experience for undergraduates.
(Do not pair with ASTR 498.)

ASTR 685 Projects in the Teaching of Astronomy (Unit: 1)
Prerequisite: ASTR 301 or ASTR 470 with a grade of B or better and consent of instructor.
Methods for effective student teaching in the SF State Observatory and/ or Planetarium. Leading of Observatory Open Nights; development and/or presentation of Planetarium shows. May be repeated for a total of 3 units. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.)

ASTR 697 Senior Project (Units: 1-3)
Prerequisites: Senior standing; ASTR 470 with a grade of C- or better.
Culminating experience for the B.S. in Physics: Concentration in Astrophysics. Observational or theoretical projects under the direction of department faculty. Student must submit a written report of work accomplished. May be repeated for a total of 6 units.

ASTR 699 Independent Study (Units: 1-3)
Prerequisites: Approval of department and consent of instructor; for advanced students majoring or minoring in astronomy or astrophysics.
Special study in the laboratory, field, or library under the direction of a member of the astronomy faculty. The student must present a written report of the work accomplished to the faculty and to the department. May be repeated for a maximum of 12 units.
ASTR 700 Stellar Astrophysics (Units: 3)
Prerequisites: CSC 309, MATH 245 or MATH 376, PHYS 320, all with grades of C- or better.

Introduction to stellar astrophysics: the birth, life, and death of stars; stellar atmospheres and spectra; stellar interiors; energy generation and transport; star formation; stellar evolution and death; the Solar Cycle and the Sun-Earth connection.
(STAR 700/ASTR 400 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

ASTR 722 Radiative Processes and Gas Dynamics in Astrophysics (Units: 3)
Prerequisites: Graduate standing; ASTR 400, PHYS 370, PHYS 430, PHYS 460, or equivalents; PHYS 785 recommended.

Radiative transfer; bremsstrahlung, Compton scattering, and synchrotron radiation; fluid dynamics and astrophysical shocks. Applications may include accretion, star formation, galaxy formation, star and galaxy clusters, active galactic nuclei, jets, and cosmic ray acceleration.

ASTR 742 Galaxies and Cosmology (Units: 3)
Prerequisites: ASTR 300, PHYS 370, PHYS 430, or equivalents, ASTR 400 or equivalent recommended.

Formation and evolution of galaxies and large-scale structure. Models of hierarchical structure formation in a universe dominated by dark matter. Observational constraints from the discovery of the expansion of the universe to ongoing experiments probing the nature of dark energy.

ASTR 770 Observational Techniques in Astronomy Research (Units: 3)
Prerequisites: CSC 309 or equivalent with a grade of B- or better, ASTR 400 or ASTR 700 or equivalent.

Astronomical photometry, spectroscopy, and astrometry in the research context. Statistical analysis, observational research program design, proposal writing. [Formerly paired with ASTR 470. May not repeat the course at a different level.] Classwork, 2 unit; laboratory, 1 unit. (Plus-minus letter grade only)

ASTR 798 Astronomy Research Literature (Units: 2)
Prerequisites: ASTR 300, PHYS 320, with grades of C- or better, or consent of instructor.

Critical reading and analysis of current literature in astronomy and astrophysics. Culminating experience for undergraduates.
(STAR 798/ASTR 498 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Athletics (ATHL)

ATHL 240 Off Season Conditioning (Units: 2)
Conditioning for men's and women's basketball, men's baseball, men's and women's cross-country, men's and women's soccer, women's softball, men's and women's swimming, women's tennis, women's indoor track and field, men's and women's track and field, women's volleyball, men's wrestling. No more than 6 units of off-season conditioning credit is allowed toward graduation requirements.

ATHL 250 Men's Intercollegiate Basketball (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 252 Women's Intercollegiate Basketball (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 254 Women's Intercollegiate Cross-country (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 256 Women's Intercollegiate Soccer (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 258 Women's Intercollegiate Softball (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 268 Women's Intercollegiate Volleyball (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 271 Men's Intercollegiate Baseball (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 275 Men's Intercollegiate Cross-country (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 278 Men's Intercollegiate Soccer (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 283 Men's Intercollegiate Wrestling (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.

ATHL 292 Women's Intercollegiate Track and Field (Units: 2)
No more than 6 units of intercollegiate credit is allowed toward graduation requirements.
Biology (BIOL)

BIOL 100 Human Biology (Units: 3)
Not intended for biology majors.
Course Attributes:
• E1: Lifelong Learning Develop
• B2: Life Science
• Social Justice

BIOL 101 Human Biology Laboratory (Unit: 1)
Prerequisite: BIOL 100.
Laboratory exercises demonstrating scientific processes, including the scientific method, analysis of data, and drawing appropriate conclusions. Extra fee required.
Course Attributes:
• B3: Lab Science

BIOL 150 The World of Plants (Units: 3)
Intended for non-biology majors.
World of plants, their place in nature, and the relation to humans. Growing plants, field observations, and studies of the economic uses of plants. Classwork, 2 units; laboratory and fieldwork, 1 unit. Extra fee required.
Course Attributes:
• B2: Life Science
• B3: Lab Science
• Environmental Sustainability

BIOL 160 Marine Biology (Units: 3)
Introduction to the marine environment including oceanic, intertidal, and near shore communities of plants, animals, and microbes. Emphasis is on marine biological and chemical processes and environmental issues both locally and globally.
Course Attributes:
• B2: Life Science
• Environmental Sustainability

BIOL 170 Animal Diversity (Units: 3)
Intended for non-biology majors.
Describes the diversity of animal life and provides an overview of basic concepts of evolution, the fossil record, physiology, behavior, ecology, geographical distribution, and issues in the conservation of biodiversity.
Course Attributes:
• B2: Life Science
• Environmental Sustainability

BIOL 171 Animal Diversity Laboratory (Unit: 1)
Prerequisite: BIOL 170 (may be taken concurrently).
Examination of photographic specimens of animal species, their habitats, and their anatomy. Computer exercises to illustrate evolutionary, ecological, and physiological principles. Extra fee required.

BIOL 176 Science and Politics of Stem Cell Biology (Units: 3)
Not open to biology majors.
Foundation for understanding concepts in stem cell biology, social, and political issues in stem cell research and regenerative medicine.
Course Attributes:
• B2: Life Science
• Am. Ethnic & Racial Minorities
• Social Justice

BIOL 210 General Microbiology and Public Health (Units: 3)
Intended for non-biology majors.
Basic concepts of microbiology; practical applications to medicine, public health, and the environment.

BIOL 211 General Microbiology and Public Health Laboratory (Unit: 1)
Prerequisite: BIOL 210 (may be taken concurrently). Intended for non-biology majors.
Laboratory techniques in isolation, enumeration, and identification of microorganisms. Extra fee required.

BIOL 212 Principles of Human Physiology (Units: 3)
Prerequisites: CHEM 101 or CHEM 115, BIOL 100 and BIOL 101 or BIOL 210, with grades of C or better. Intended for non-majors.
Physiology of human organ systems and principles of homeostasis.
[Formerly BIOL 610]

BIOL 213 Principles of Human Physiology Laboratory (Unit: 1)
Prerequisite: BIOL 212 (may be taken concurrently).
Laboratory exercises in mammalian physiology. To accompany or follow BIOL 212. Extra lab fee required. [Formerly BIOL 611]

BIOL 220 Principles of Human Anatomy (Units: 4)
Prerequisites: BIOL 100 and BIOL 101, or BIOL 212 and BIOL 213.
Study of the gross anatomy of the human body; body systems involving gross structure and history; computerized virtual anatomy lab experience supplemented with enhanced skeletal and specimen study and cadaver visits. (Plus-minus letter grade only)

BIOL 230 Introductory Biology I (Units: 5)
Prerequisites: Restricted to majors and minors in biology and biochemistry, majors in kinesiology, and majors in environmental studies under the natural resources management and conservation concentration B.S. program.
Fundamentals of biology: chemical basis of life, cell structure, bioenergetics, plant and animal physiology, and genetics. Classwork, 3 units; laboratory, 2 units. Extra fee required.

BIOL 240 Introductory Biology II (Units: 5)
Prerequisite: BIOL 230 with a grade of C- or better.
Fundamentals of biology: gene expression, development, evolution, ecology, and the diversity of microbes, plants, and animals. Classwork, 4 units; laboratory, 1 unit. Extra fee required.
BIOL 300 Nature Study (Units: 3)
Prerequisite: One course in college biology. Intended for non-biology majors.
Identification, structure, adaptation, life history, habits, habitat, economic status, conservation of common plants and animals. Two all-day field trips scheduled on two separate weekends. Classwork, 2 units; laboratory and fieldwork, 1 unit. Extra fee required.
Course Attributes:
• UD-B: Physical Life Science
• Environmental Sustainability

BIOL 310 Biology for Today's World (Units: 3)
Prerequisite: College course in biology.
Course Attributes:
• UD-B: Physical Life Science
• Environmental Sustainability

BIOL 313 Principles of Ecology (Units: 3)
Prerequisite: One course in college biology or an environmentally-oriented subject. Intended for non-majors.
Ecological principles and methods. Introduction to population, community, and ecosystem ecology. Trips to various habitats. Classwork, 2 units; laboratory and fieldwork, 1 unit. Extra fee required.

BIOL 317 Ecology of California (Units: 3)
Prerequisite: College course in biology.
Examines ecology, natural history of California, and impact humans have on the environment in a perceptual and scientific content. Focus on principal processes underlying the evolution/diversity of California's terrestrial/aquatic flora/fauna.

BIOL 318 Our Endangered Planet (Units: 3)
Prerequisite: One course in college biology. Intended for non-majors.
The effect of humans on the ecology of our environment. Species extinctions, the role of genetics, nature reserves, biology of small populations, and restoration ecology.
Course Attributes:
• E1: Lifelong Learning Develop
• UD-B: Physical Life Science
• Am. Ethnic & Racial Minorities
• Environmental Sustainability
• Global Perspectives

BIOL 322 Human Sexuality: Integrative Science (Units: 3)
Prerequisite: BIOL 100 or equivalent or consent of instructor.
Presents basic scientific foundations of human sexuality. Explores the symbiotic relationships between biology and society throughout the life cycle. Discusses the challenges associated with human sexuality and the tools for dealing with them.

BIOL 326 Disease! (Units: 3)
Prerequisite: BIOL 100 or equivalent or consent of instructor. Intended for non-majors.
Origin and natural history of selected infectious and non-infectious human diseases including causal agents, mechanisms, and historical impact. Factors involved in the incidence and distribution of disease.
Course Attributes:
• UD-B: Physical Life Science
• Global Perspectives
• Social Justice

BIOL 327 AIDS: Biology of the Modern Epidemic (Units: 3)
Prerequisite: One course in college biology. Intended for biology majors and non-majors.
Modern epidemic of AIDS is viewed from biological and social perspectives: virology, epidemiology, the immune system, disease states, diagnosis, treatment, prevention, public health issues, sexuality, response of the scientific community, comparison with other historical epidemics.
Course Attributes:
• UD-B: Physical Life Science
• Global Perspectives

BIOL 328 Human Anatomy (Units: 4)
Prerequisites: Restricted to sophomore standing or above with a major in biology, biochemistry, chemistry, clinical science, or kinesiology, BIOL 230 with a grade of C- or better, or consent of instructor.
Gross structures of the human body. Classwork, 3 units; laboratory, 1 unit. Extra fee required.

BIOL 330 Human Sexuality (Units: 3)
Prerequisite: One course in college biology or consent of instructor. Intended for B.A. in General Biology majors and non-majors.
Development, structure, function, and dysfunction of reproductive and sexual systems in humans, physiology of sexual response, variations in sexual expression, law, birth control and abortion, sexual health, sexual motivation, love, and sexual values.
Course Attributes:
• E1: Lifelong Learning Develop
• UD-B: Physical Life Science

BIOL 332 Health Disparities in Cancer (Units: 3)
Prerequisite for BIOL 832: Graduate standing or consent of instructor. Prerequisites for BIOL 332: BIOL 230, BIOL 240, BIOL 355.
Major determinants of health disparities in cancer including ethnic differences in biology and prevention and treatment of cancer. Strategies to overcome these disparities through research, health education, outreach, advocacy, and policy changes.
(BIOL 832/BIOL 332 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Course Attributes:
• Am. Ethnic & Racial Minorities
• Global Perspectives
• Social Justice
BIOL 337 Evolution (Units: 3)
Prerequisites: BIOL 230, BIOL 240, BIOL 355. Intended for biology majors and non-majors.

The principles of evolutionary biology, concentrating on basic population genetic mechanisms and methods of analysis.

BIOL 344GW Research Skills - GWAR (Units: 3)
Prerequisite for BIOL 844: Graduate standing or consent of instructor.
Prerequisites for BIOL 344GW: ENG 214 or equivalent with a grade of credit or C- or better, BIOL 230, BIOL 240, and consent of instructor.

Practical skills for successfully conducting undergraduate research. Focus on experimental design, critical review of literature, effective oral and written scientific presentation, and development of research plan. (Plus/minus ABC/NC)
(BIOL 844/BIOL 344GW is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Course Attributes:

• Graduation Writing Assessment

BIOL 349 Bioethics (Units: 3)
Prerequisite for BIOL 849: Graduate standing or consent of instructor.
Prerequisite for BIOL 349: Upper division standing.

Biomedical ethics: experiments on humans and laboratory animals, genetic engineering, in vitro fertilization, fetal research, abortion, the health care system, organ transplants, death and dying. (BIOL 849/BIOL 349 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Course Attributes:

• UD-B: Physical Life Science
• Social Justice

BIOL 350 Cell Biology (Units: 3)
Prerequisites: Restricted to upper division standing; biology and biochemistry majors; BIOL 230, BIOL 240, CHEM 130 with a grade of C- or better.

Cell structure and function, extracellular matrix interactions, signal transduction, and regulatory mechanisms in cell growth and differentiation.

BIOL 351GW Experiments in Cell and Molecular Biology - GWAR (Units: 4)
Prerequisites: Upper division standing; restricted to Biology and Biochemistry majors; ENG 214 or equivalent with a grade of CR or C- or better, BIOL 350, BIOL 355.

Experiments introducing laboratory techniques: microscopy, cytochemistry, spectrophotometric quantitation of macro-molecules, organelle isolation, animal cell culture, gene expression, protein analysis, recombinant DNA techniques. Classwork, 2 units; laboratory, 2 units. Extra fee required. (Plus/minus ABC/NC)
Course Attributes:

• Graduation Writing Assessment

BIOL 355 Genetics (Units: 3)
Prerequisites: Restricted to upper division standing; Biology and Biochemistry majors; BIOL 230, BIOL 240, CHEM 130 with a grade of C- or better.

Viral, prokaryotic, and eukaryotic genetics. Population, human, and molecular genetics.

BIOL 356 Honors Genetics (Units: 2)
Prerequisite: BIOL 355 with a grade of B or better. Intended for biology majors.

Advanced topics, new ideas, unsolved problems, reading of original research, and review of articles in genetics: Mendelian, molecular, and population. (Plus-minus letter grade only)

BIOL 357 Molecular Genetics (Units: 3)
Prerequisite: BIOL 356 or equivalent with a grade of C- or better. Intended for Biology majors.

Current ideas in molecular biology including the transfer and expression of genetic information, interaction and hybridization of genes, molecular mutagens, and molecular evolution. Ethical questions.

BIOL 358 Forensic Genetics: Math Matters (Units: 4)
Prerequisites: Restricted to sophomore, junior, or senior students in Biology, Chemistry, Mathematics, and Computer Science programs; BIOL 230 with a grade of C- or better, MATH 199, or consent of instructor.

Statistical forensic genetics with a focus on social impact; statistical exploration and analyses in R programming language; original scientific research project; critical analysis of forensics in the media; forensic genetics policy proposal project. Classwork, 3 units; laboratory, 1 unit. (Plus-minus letter only)

BIOL 380 Evolutionary Developmental Biology (Units: 3)
Prerequisites: BIOL 230, BIOL 240 with grades of C- or better, BIOL 355 and BIOL 337 are highly recommended. Intended for Biology majors.

Examines embryogenesis in a comparative format to understand the diversity and evolution of developmental mechanisms from primitive multicellular organisms to mammals. (Plus-minus letter grade only)

BIOL 382 Developmental Biology (Units: 3)
Prerequisites for BIOL 782: Graduate standing; BIOL 350, BIOL 355 or equivalents with grades of C- or better; or consent of instructor.
Prerequisites for BIOL 382: BIOL 350, BIOL 355 with grades of C- or better. Intended for Biology and Biochemistry majors.

Early embryonic development: exploration of the molecular genetic basis for tissue differentiation. Gene regulation, chromatin, sex determination, oncogenesis, aging, and pattern formation. Extra fee required. (BIOL 782/BIOL 382 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BIOL 391 Microscopy and Photomicrography (Units: 2)
Prerequisite: One course in college physics or consent of instructor. Intended for upper division Biology majors.

The use of the microscope with brightfield, darkfield, phase contrast, and fluorescent optics. Principles of photomicrography. Classwork, 1 unit; laboratory, 1 unit. Extra fee required.
Biology (BIOL)  

**BIOL 401 General Microbiology (Units: 3)**  
Prerequisites: BIOL 230, BIOL 240, CHEM 233 with a grade of C- or better. Intended for Biology and Biochemistry majors.  
Morphology, physiology, genetics, molecular biology, evolution, and taxonomy of microorganisms; bacteria and viruses; importance of microbes in biotechnology, ecology, and public health.

**BIOL 402GW General Microbiology Laboratory - GWAR (Units: 3)**  
Prerequisites: Restricted to Biology majors; ENG 214 with a grade of C- or better; BIOL 401 (may be taken concurrently).
Laboratory techniques in the isolation, cultivation, and identification of microbes, especially bacteria; microbial properties including nutrition, gene transfer, enzyme induction, and viral replication. Composition, 1 unit; laboratory, 2 units. Extra fee required. (Plus/minus ABC/NC  
Course Attributes:
- Graduation Writing Assessment

**BIOL 411 Environmental Microbiology (Units: 3)**  
Prerequisites: BIOL 401, BIOL 402GW, BIOL 355, CHEM 340 or CHEM 349. Intended for Biology majors.
Study of microbes and microbial communities using molecular and genomic approaches; primary research data includes novel microbial genomes and metagenomes. (Plus-minus letter grade only)

**BIOL 420 General Virology (Units: 3)**  
Prerequisites: BIOL 401, BIOL 402GW with a grade of C- or better, or consent of instructor. Intended for biology majors.
Molecular aspects of virus structure, genetics, reproduction, and infection. Bacterial, animal, and plant viruses. (Plus-minus letter grade only)

**BIOL 425 Emerging Diseases (Units: 3)**  
Prerequisites: BIOL 230, BIOL 240, BIOL 355 or BIOL 401 or BIOL 350, CHEM 130.
Biology of the emerging diseases that threaten humans and wildlife. The molecular biology, genetics, epidemiology, ecology, and economic impact of emerging viruses.

**BIOL 430 Medical Microbiology (Units: 3)**  
Prerequisites: BIOL 401 with a grade of C or better, consent of instructor. Preference to graduating Biology seniors and majors requiring this course. Principles of infection, immunity, and characterization of medically important microbial agents.

**BIOL 431 Medical Microbiology Laboratory (Units: 2)**  
Prerequisites: BIOL 401, BIOL 402GW with a grade of C- or better, BIOL 430 (may be taken concurrently), consent of instructor. Enrollment priority for B.S. Biology majors.
Basic principles and current standard diagnostic procedures in medical microbiology. Classwork, 1 unit; laboratory, 1 unit. (Plus-minus letter grade only)

**BIOL 435 Immunology (Units: 3)**  
Prerequisite: BIOL 350 or BIOL 401. Intended for biology majors.

**BIOL 436 Immunology Laboratory (Units: 2)**  
Prerequisites: BIOL 402GW or equivalent; concurrent enrollment in BIOL 435.
Laboratory illustrating antibody-antigen interactions, the cellular basis of immune responses, and the applications of immune and serological reactions. Extra fee required.

**BIOL 440 Ethical Issues in Science and Technology (Units: 3)**  
Prerequisites: Upper division standing; ENG 214 or equivalent.
Ethical dimensions of science and technology. Conceptual and theoretical frameworks from the humanities and the life sciences. (This course is offered as BIOL 440 and ENGR 440. Students may not repeat the course under an alternate prefix.)

**BIOL 442 Microbial Physiology (Units: 3)**  
Prerequisites: BIOL 401, BIOL 402GW with a grade of C- or better, CHEM 349 or equivalent. Intended for Biology majors.
Function, biosynthesis, structure, and chemistry of cells and viruses; transport, chemotaxis, and energy metabolism; the regulation of growth rate and growth efficiency; mechanisms of viral and microbial differentiation.

**BIOL 443 Microbial Physiology Laboratory (Units: 2)**  
Prerequisite: BIOL 442 (may be taken concurrently). Intended for Biology majors.
Experiments in the physiology and metabolism of protists and bacteria: growth studies, cell fractionation procedures, enzyme preparations and assays, and analyses of cellular molecules; analytical instrumentation and statistical techniques. Extra fee required.

**BIOL 446 Microbial Genomics (Units: 4)**  
Prerequisites: BIOL 401, BIOL 402GW, BIOL 355, consent of instructor.
Techniques in comparative microbial genomics, analyzing and annotating a novel microbial genome as a class project. (Plus-minus letter grade only)

**BIOL 453 General Parasitology (Units: 3)**  
Prerequisites: BIOL 230, BIOL 240, BIOL 355. Intended for Biology majors.
Biology of animal parasites: impact of parasitic infection on human health, culture, and socio-economic welfare; control and prevention; parasite structure/function; cellular, immunological, biochemical, and molecular parasitology.

**BIOL 454 Parasitology Laboratory (Unit: 1)**  
Prerequisite: BIOL 453 (may be taken concurrently).
Methods and techniques in the examination, preparation, recognition, and identification of protozoan and metazoan parasites of animal hosts; human parasites with orientation toward clinical science. Extra fee required.

**BIOL 458 Biometry (Units: 4)**  
Prerequisite: One course in college biology. Intended for Biology majors.
Biological measurements, experimental design, data analysis, statistical methods as applied to biological problems, methods of data resolution and presentation. Classwork, 3 units; laboratory, 1 unit. Extra fee required.
Biol 460 General Entomology (Units: 4)
Prerequisites: BIOL 230, BIOL 240, or consent of instructor. Intended for Biology majors.

The insects and their close relatives; physiology; external and internal structures; life cycles; classification of insects to order; ecology in desert, field, forest, and aquatic habitats; economic and medical importance of orders. Classwork, 2 units; laboratory, 1 unit; fieldwork, 1 unit. Extra fee required.

Biol 461 Insect Taxonomy (Units: 4)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Classification of insects and their close relatives to family; taxonomic categories and procedures. Classwork, 2 units; laboratory, 1 unit; fieldwork, 1 unit. Extra fee required.

Biol 464 Medical Entomology (Units: 3)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Terrestrial arthropods and how they relate to human health. Arthropod-human interactions: entomophobia, allergy, venoms, parasitism, body infestations, disease vectors, epidemiology; major arthropod borne diseases and their impact on humans and society.

Biol 470 Natural History of Vertebrates (Units: 4)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Structure, behavior, and distribution of amphibians, reptiles, birds and mammals, especially those of Central California. One all-day field trip required. Classwork, 2 units; laboratory, 1 unit; fieldwork, 1 unit. Extra fee required.

Biol 475GW Herpetology - GWAR (Units: 3)
Prerequisites: ENG 214 or equivalent with a grade of CR or C- or better, BIOL 230, BIOL 240, or consent of instructor. Intended for Biology majors.

Evolution, classification, and distribution of amphibians and reptiles. The ecology and behavior of California species. Classwork, 2 units; laboratory and fieldwork, 1 unit. Extra fee required. (Plus/minus ABC/NC)

Course Attributes:

- Graduation Writing Assessment

Biol 478GW Ornithology - GWAR (Units: 4)
Prerequisites: ENG 214 with a grade of C- or better, BIOL 230, BIOL 240. Intended for Biology majors.

Anatomy, physiology, behavior, distribution, classification, and evolution of birds; visits to the San Francisco Zoo, private aviaries and museums. Classwork, 2 units; laboratory, 1 unit; fieldwork, 1 unit. One weekend field trip required. Extra fee required. (Plus/minus ABC/NC)

Course Attributes:

- Graduation Writing Assessment

Biol 482 Ecology (Units: 4)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Interrelationships between organisms and their environment, studied at the individual, population, community, and ecosystem levels. Field trips to various environments. Classwork, 3 units; laboratory and fieldwork, 1 unit. Extra fee required.

Biol 490 Ecology of Infectious Diseases (Units: 4)
Prerequisites: BIOL 230, BIOL 240, with grades of C- or better.

Examination of ecological and evolutionary processes that govern the transmission of pathogens in animal and plant systems including factors that lead to disease emergence, the impact of diseases on host populations, and theoretical foundations of disease ecology. Classwork, 3 units; activity, 1 unit.

Biol 492 Comparative Anatomy of Vertebrates (Units: 4)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Organ systems of selected vertebrate types. Classwork, 2 units; laboratory, 2 units. Extra fee required.

Biol 500 Evolution and Diversity of Plants (Units: 4)
Prerequisites: BIOL 230, BIOL 240.

Comparative biology and phylogeny of the major lineages of plants. Evolution and diversification of vegetative and reproductive structures, life histories, and ecological adaptations. Classwork, 2 units; laboratory, 2 units. Extra fee required.

Biol 502 Biology of the Algae (Units: 3)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Collection, preservation, identification, and culturing of marine and freshwater algae. Comparative studies of morphology, life history, and ecology. Field trips. Classwork, 2 units; laboratory, 1 unit. Extra fee required.

(BIOL 702/BIOL 502 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

Biol 504 Biology of the Fungi (Units: 4)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Groups of fungi including their classification, life cycles, morphology and development, and economic significance. Classwork, 2 units; laboratory, 1 unit; fieldwork, 1 unit. Extra fee required.

Biol 505 Comparative Anatomy of Vascular Plants (Units: 4)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Plant cells and tissues, their structure, development, and organization into vegetative and reproductive structures; evolutionary and ecological interpretation of tissues of vascular plants. Classwork, 2 units; laboratory, 2 units. Extra fee required.

Biol 508 Plants and Human Affairs (Units: 3)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Plants useful or harmful to humans; origins and history, botanical relationships, chemical constituents that make them economically important, and their roles in literate and preliterate cultures. Classwork, 2 units; laboratory, 1 unit.

Biol 514 Plant Taxonomy (Units: 5)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Principles of plant taxonomy including classification systems and phylogenetic relationships within the flowering plants; practice in identification and collecting. Classwork, 2 units; laboratory and fieldwork, 3 units.

(BIOL 814/BIOL 514 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Biology (BIOL)

**BIOL 525 Plant Physiology (Units: 3)**
Prerequisites: BIOL 230, BIOL 240, CHEM 130. Intended for Biology majors.

Plant physiology, photosynthesis, water and mineral uptake and distribution, translocation of organic materials; environmental and internal plant regulatory factors, and their effect on growth and metabolism.

**BIOL 526 Plant Molecular Physiology Laboratory (Units: 2)**
Prerequisites: Restricted to Biology majors; BIOL 230, BIOL 240, CHEM 130.

Molecular, physiological, and biochemical understanding of plant growth and development. Focus on plant development, plant-plant and plant-environment interactions, photosynthesis, water balance, mineral nutrition, gene expression, cell imaging, data analyses and presentations. Extra fee required.

**BIOL 529GW Plant Ecology - GWAR (Units: 4)**
Prerequisites: ENG 214 or equivalent with a grade of C- or better, BIOL 230, BIOL 240. Intended for Biology majors.

Principles of ecology through the study of plants and plant associations. Ecological concepts, biotic-environmental dynamics and relationships, and levels of ecological integration. Biotic provinces and plant associations in California. Classwork, 2 units; laboratory, 1 unit; fieldwork, 1 unit. Extra fee required. (Plus/minus ABC/NC)

**Course Attributes:**
- Graduation Writing Assessment

**BIOL 530 Conservation Biology (Units: 3)**
Prerequisites: BIOL 230, BIOL 240, or consent of instructor. Intended for Biology majors.

Principles of nature conservation, preservation, and management. Theory, laws, and practice of conservation science.

**BIOL 532 Restoration Ecology (Units: 3)**
Prerequisites: BIOL 230, BIOL 240.

Focuses on restoration of degraded habitats, with emphasis on the application of ecological theory to restoration practice. A variety of habitats will be covered, especially those common to the Bay Area.

**BIOL 534 Wetland Ecology (Units: 4)**
Prerequisites: BIOL 230, BIOL 240, or consent of instructor.

Ecology of a variety of wetland types; biotic and abiotic characteristics and processes; conservation, restoration and management. Field trips to wetland habitats and participation in field and/or greenhouse experiments. Classwork, 3 units; laboratory, 1 unit. Extra fee required.

**BIOL 550 Plant and Animal Interactions (Units: 4)**
Prerequisites: BIOL 230, BIOL 240, an upper division course in ecology. Intended for Biology majors.

Interactions between animals and plants, including such general topics as herbivory, seed dispersal and predation, mycorrhizae, mimicry, myrmecochory, and the co-evolutionary processes that lead to such interactions. Classwork, 3 units; laboratory, 1 unit. Extra fee required. (Plus-minus letter grade only)

**BIOL 555 Marine Invertebrate Zoology (Units: 4)**
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Comparative laboratory and field study of local marine invertebrate animals; evolution and functional morphology. Classwork, 2 units; laboratory and fieldwork, 2 units. Extra fee required.

**BIOL 556 Natural History of Marine Invertebrates (Units: 4)**
Prerequisites: BIOL 230, BIOL 240; BIOL 555 recommended.

Investigation of concept of biodiversity using California coastal communities in local intertidal and nearshore habitats as a field laboratory. Field trips required. Classwork, 2 units; laboratory, 2 units. Extra fee required.

**BIOL 570GW Biology of Fishes - GWAR (Units: 4)**
Prerequisites: ENG 214 or equivalent with a grade of CR or C- or better, BIOL 230, BIOL 240, or consent of instructor. Intended for Biology majors.

Morphology, physiology, behavior, ecology, distribution, classification, and evolution of marine and freshwater fishes; California species. Classwork, 2 units; laboratory and fieldwork, 2 units. Two weekend field trips. Extra fee required. (Plus/minus ABC/NC)

**Course Attributes:**
- Graduation Writing Assessment

**BIOL 572 Colloquium in Ecology, Evolution, and Conservation (Units: 2)**
Prerequisite for BIOL 872: Graduate standing.
Prerequisite for BIOL 572: Upper division standing or consent of instructor.

Presentation of student and faculty research, recent journal articles, and presentations by outside speakers. Student speakers receive graduate seminar credit. May be repeated for a total of 8 units. (BIOL 872/BIOL 572 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

**BIOL 575 Fisheries Biology (Units: 3)**
Prerequisite: BIOL 570GW or a course in ecology. Intended for Biology majors.

Principles and practices in fish ecology and population dynamics, fishing methods and economics, and fisheries management. Classwork, 2 units; laboratory and fieldwork, 1 unit. Extra fee required.

**BIOL 577 Ecological and Environmental Modeling (Units: 4)**
Prerequisites: BIOL 230, BIOL 240, or a course in ecology, MATH 199, or consent of instructor. Intended for Biology majors.

Theory and practice of mathematical and computer modeling of organisms, ecosystems, and their environment. Classwork, 3 units; laboratory, 1 unit. (Plus-minus letter grade only)

**BIOL 580 Limnology (Units: 3)**
Prerequisites: BIOL 230, BIOL 240, CHEM 215, CHEM 216. A course in ecology is recommended. Intended for Biology majors.

Physical, chemical, and biological characteristics of inland waters. Individual field projects. Field trips conducted during class time. Classwork, 2 units; laboratory and fieldwork, 1 unit. Extra fee required.
Biol 582 Biological Oceanography (Units: 4)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.
Physical characteristics of oceans; biology of plankton and benthos, emphasizing production and food webs; identification, sampling, and productivity measurements of marine organisms. Classwork, 3 units; laboratory and fieldwork, 1 unit. Extra fee required.

Biol 584 Marine Microbial Ecology Laboratory (Unit: 1)
Prerequisite: CHEM 115.
Laboratory section covers methods of measuring microbial rate processes (growth, nutrient uptake, etc.) and assessment of cell concentration in situ; isolation and culture of microbes. Extra fee required.

Biol 585 Marine Ecology (Units: 3)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.
Plant and animal relationships in near-shore marine communities; temperate zone communities of the central California coast.

Biol 586 Marine Ecology Laboratory (Units: 2)
Prerequisites: BIOL 585 (may be taken concurrently).
Laboratory and fieldwork in marine ecology introducing students to sampling methods, laboratory techniques, data collection, and analysis. Fieldwork in a variety of marine field environments. Includes use of primary literature and oral and written presentations. Extra fee required.

Biol 600 Animal Behavior (Units: 3)
Prerequisites: BIOL 230, BIOL 240.
General introduction to animal behavior. Mechanisms of behavior including development, hormones, neural processes, and cognition. Evolutionary approaches including foraging, habitat selection, communication, sexual selection, mating systems, parental care, and social behavior. Extra fee required. (Plus-minus letter grade only)

Biol 607 Conservation and Management of Marine Mammals (Units: 3)
Prerequisites: BIOL 230, BIOL 240, BIOL 355.
Biology and scientific principles involved in the conservation and management of marine mammals. Current regulations and methodologies are critically reviewed and evaluated. Controversies concerning conservation, ecological balance, and specific governmental constraints in the face of a changing environment will be discussed.

Biol 609 Physics in Medicine (Units: 3)
Prerequisites: PHYS 121, BIOL 230, or equivalents, or consent of instructor.
Mechanics, thermodynamics, and electricity applied to mechanical properties of tissues, metabolism, membrane transport, control and regulation of physical parameters. Sonography, electromagnetism and quantum physics applied to medical diagnostic technology and imaging.

Biol 612 Human Physiology (Units: 3)
Prerequisites: BIOL 230, BIOL 240, CHEM 130, PHYS 121. Intended for Biology majors.
Integrative mechanisms; control systems in cardiovascular and respiratory physiology. Circulation; distribution and regulation of body fluids; digestive systems; metabolism.

Biol 613GW Human Physiology Laboratory - GWAR (Units: 3)
Prerequisites: ENG 214 with a grade of C- or better, BIOL 612 or BIOL 630 (may be taken concurrently). Intended for Biology majors.
Experiments in preparation, recording, and analysis of the functioning of human and other vertebrate organ systems and tissues. Classwork, 1 unit; laboratory, 2 units. Extra fee required. (Plus/minus ABC/NC)
Course Attributes:
• Graduation Writing Assessment

Biol 614 Vertebrate Histology (Units: 4)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.
Microscopic anatomy of tissues and organ systems of vertebrates. Classwork, 2 units; laboratory, 2 units. Extra fee required.

Biol 615 Molecular Pathophysiology (Units: 3)
Prerequisites: BIOL 350, BIOL 355, BIOL 612. Intended for Biology majors.
Globally important diseases caused by genetic errors, environmental factors, or parasites. Each disease is studied at the molecular, cellular, and physiological levels.

Biol 616 Cardiorespiratory Physiology (Units: 3)
Prerequisites: BIOL 230, BIOL 240, BIOL 612 or BIOL 630, PHYS 121, or consent of instructor. Intended for Biology majors.
The physiology of the cardiovascular and respiratory systems, and their interrelationship. Organ function in health and disease. (Plus-minus letter grade only)

Biol 617 Environmental Physiology (Units: 3)
Prerequisite: BIOL 612 or BIOL 630. Intended for Biology majors.
The physiological and biochemical mechanisms underlying adaptation of animals to diverse environments. (Plus-minus letter grade only)

Biol 618 Biology of Aging (Units: 3)
Prerequisites: Biology majors and minors only; BIOL 350, BIOL 355, BIOL 212 or BIOL 612.
Biological processes underlying aging. Focus on the molecular mechanisms of aging, including specific animal models of aging, age-related changes in the major physiological systems in humans. (Plus-minus letter grade only)

Biol 619 Pathophysiology (Units: 3)
Prerequisites: Biology majors and minors only; BIOL 212 or BIOL 612.
The processes underlying disease in the major physiological systems. Focus on understanding the relationship between changes at the molecular, cellular and tissue levels and their physiological manifestations at the organ and system levels. (Plus-minus letter grade only)

Biol 620 Endocrinology (Units: 3)
Prerequisites: Restricted to Biology majors and Pre-health certificate students; BIOL 230, BIOL 240.
Biology (BIOL)

BIOL 621 Reproductive Physiology (Units: 3)
Prerequisites: BIOL 230, BIOL 240, BIOL 330, CHEM 130. BIOL 492 or another course in vertebrate anatomy is recommended. Intended for Biology majors.

Reproductive morphology and physiology of vertebrates.

BIOL 622 Hormones and Behavior (Units: 3)
Prerequisites: BIOL 230, BIOL 240, or consent of instructor, a course in physiology or endocrinology strongly recommended. Intended for Biology majors.

Effects that hormones exert on behavior. Hormonal activation and organization of behavior and the nervous system. Actions of hormones compared in humans and in non-human species.

BIOL 623 Pharmacology (Units: 3)
Prerequisites: BIOL 230, BIOL 240 with grades of C- or better, BIOL 612, CHEM 130.

Pharmacology principles, including pharmacokinetics of drug absorption and elimination. Mechanisms of drug action on the body. Commonly used pharmaceutical drugs.

(BIOL 723/BIOL 623 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BIOL 625 Hematology (Units: 3)
Prerequisite: One semester of college physiology. Intended for Biology majors.

BIOL 627 Biophysics (Units: 3)
Prerequisites: PHYS 121, CHEM 115, BIOL 230, or equivalents, or consent of instructor.

Physical description of free energies and driving forces, energetic and timescales of biological processes, interactions of biomolecules, diffusion transport and signaling, protein DNA and membrane structure, molecular motors, cooperative binding, membrane potentials and excitability, regulation of gene expression.

BIOL 630 Animal Physiology (Units: 3)
Prerequisites: BIOL 230, BIOL 240, CHEM 130. Intended for Biology majors.

The physiology of animals, including structure, function, and regulation of organ systems. Unifying principles and natural adjustments to stress.

BIOL 631GW Animal Physiology Laboratory - GWAR (Units: 4)
Prerequisite for BIOL 731: BIOL 630 or BIOL 612.
Prerequisites for BIOL 631GW: ENG 214 with a grade of C- or better, BIOL 612 or BIOL 630. Intended for Biology majors.

Approaches to scientific research on the environmental physiology of marine and estuarine organisms, with a focus on metabolic processes. Emphasis on scientific writing and communication. Classwork, 2 units; laboratory 2 units. Extra fee required. (Plus/minus ABC/NC)

(BIOL 731/BIOL 631GW is an undergraduate/graduate level paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

Course Attributes:

- Graduation Writing Assessment

BIOL 638 Bioinformatics & Genome Annotation (Units: 4)
Prerequisite for BIOL 738: BIOL 357 or consent of instructor.
Prerequisite for BIOL 638: BIOL 230 or consent of instructor.

Analyze and annotate a different chunk of genomic DNA. Results from this course will be incorporated into peer-reviewed publications, students listed as an author. (Plus-minus letter grade only)

(BIOL 738/BIOL 638 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BIOL 640 Cellular Neurosciences (Units: 3)
Prerequisites: BIOL 230, BIOL 240, CHEM 130. PHYS 121. BIOL 350 and BIOL 612 are recommended. Intended for Biology majors.

Cellular and molecular analysis of neurons. Cellular, synaptic, and retinal neurophysiology. Electrical and chemical mechanisms underlying intraneuronal and inter-neuronal signaling.

BIOL 642 Neural Systems Physiology (Units: 3)
Prerequisites: BIOL 328, BIOL 612, BIOL 620, BIOL 630. BIOL 640 is recommended. Intended for Biology majors.

Communication between neural centers controlling sensory and motor systems, homeostasis, learning, thought, and affect. Connectivity, neurophysiological regulation, and neuropathology. (Plus-minus letter grade only)

BIOL 652 Science Education Partners in Biology (Units: 4)
Prerequisites: BIOL 230, BIOL 240, or one upper division biology course and consent of instructor.

Introduction to biology teaching and learning; engage in K-12 classroom teaching; examine understanding of biology, discuss science education literature, and analyze biology lessons and student learning. Classwork, 2 units; fieldwork, 2 units. Extra fee required.

BIOL 694 Cooperative Internship in Biology (Units: 2-4)
Prerequisites: Sophomore standing and above and consent of Biology faculty adviser.

Written and oral report of work performed with an outside agency; requested written report from agency supervisor. Evaluation of work by biology adviser and/or faculty committee. Open to Biology majors. May be repeated for a total of 16 units.

BIOL 699 Independent Study in Biology (Units: 1-3)
Prerequisites: Senior standing in biology and consent of the department and instructor.

Special study in the laboratory, field, or library under the direction of a member of the department. The student must present a written detailed report of the work accomplished to the staff of the department. May be repeated for credit.

BIOL 702 Biology of the Algae (Units: 3)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.

Collection, preservation, identification, and culturing of marine and freshwater algae. Comparative studies of morphology, life history, and ecology. Field trips. Classwork, 2 units; laboratory, 1 unit. Extra fee required.

(BIOL 702/BIOL 502 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
BIOL 708 Scientific Methods for Professional Aquatic Scientists (Units: 3)
Prerequisite: Graduate standing or consent of instructor.
Introduction to research tools and approaches used by scientists including: software for data analysis and presentation, using scientific literature, experimental design, writing scientific papers and proposals, professional communication (oral, poster, letter), time and stress management. (Plus-minus letter grading only)

BIOL 710 Advanced Biometry (Units: 3)
Prerequisite: BIOL 458.
Use of computers for critical data evaluation and decision-making. Accessing and using available statistical packages, database management, construction of phylogenetic tree models, and advanced statistical analyses. No prior computer experience required. Classwork, 2 units; laboratory, 1 unit. Extra fee required.

BIOL 711 Immunoassays (Units: 3)
Prerequisites: CHEM 349, BIOL 435 or equivalent (may be taken concurrently).
Principles and applications of antigen-antibody interactions, immunoassay design, and detection systems. Enzyme, luminescent and fluorescent assays, and their successful application in laboratory medicine or biological research are emphasized.

BIOL 714 Biomedical Enzymology (Units: 3)
Prerequisite: CHEM 349 or equivalent.
Fundamental knowledge of enzymes, cofactors, and enzyme kinetics. Laboratory and computer exercises focus on action and kinetics of enzymes commonly used in medical diagnosis and/or biotechnology research. Classwork, 2 units; laboratory, 1 unit. Extra fee required.

BIOL 716 Skills for Scientific Proposal Writing (Units: 3)
Prerequisite: Graduate standing and consent of instructor.
Development of technical writing skills through the process of writing and editing research proposals based on students' own research projects.

BIOL 723 Pharmacology (Units: 3)
Prerequisites: BIOL 230, BIOL 240 with grades of C- or better, BIOL 612, CHEM 130.
Pharmacology principles, including pharmacokinetics of drug absorption and elimination. Mechanisms of drug action on the body. Commonly used pharmaceutical drugs. (BIOL 723/Biol 623 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BIOL 731 Animal Physiology Laboratory - GWAR (Units: 4)
Prerequisite for BIOL 731: BIOL 630 or BIOL 612.
Prerequisites for BIOL 631GW: ENG 214 with a grade of C- or better, BIOL 612 or BIOL 630. Intended for Biology majors.
Approaches to scientific research on the environmental physiology of marine and estuarine organisms, with a focus on metabolic processes. Emphasis on scientific writing and communication. Classwork, 2 units; laboratory 2 units. Extra fee required. (Plus/minus ABC/NC) (BIOL 731/Biol 631GW is an undergraduate/graduate level paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

Course Attributes:
- Graduation Writing Assessment

BIOL 732 Biology and Chemistry of Signaling Pathways (Units: 3)
Prerequisite: Classified graduate status or consent of instructor.
An interdisciplinary presentation of the mechanisms by which extracellular stimuli trigger intracellular biochemical reactions that lead to alterations in cellular function. (This course is offered as BIOL 732 and CHEM 846. Students may not repeat the course under an alternate prefix.)

BIOL 737 Plant Metabolism (Units: 3)
Prerequisite: BIOL 525 or CHEM 340 or CHEM 349. Intended for Biology and Chemistry majors.
Plant metabolism: photosynthesis, cell wall biosynthesis, nitrogen, and sulfur metabolism, secondary plant products. Common metabolic pathways with an emphasis on functioning and regulation of these pathways in plants.

BIOL 738 Bioinformatics & Genome Annotation (Units: 4)
Prerequisite for BIOL 738: BIOL 357 or consent of instructor. Prerequisite for BIOL 638: BIOL 230 or consent of instructor.
Analyze and annotate a different chunk of genomic DNA. Results from this course will be incorporated into peer-reviewed publications, students listed as an author. (Plus-minus letter grade only) (BIOL 738/Biol 638 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BIOL 741 Electron Microscopy (Units: 4)
Prerequisite: Graduate or senior standing, or consent of instructor.
Preparation of biological and inorganic materials for scanning and transmission electron microscopy, x-ray microanalysis, EBSD, CL, operation of the electron microscope(s), and data interpretation. Classwork, 1 unit; laboratory, 3 units. Extra fee required. (This course is offered as BIOL 741, CHEM 741, and ERTH 741. Students may not repeat the course under an alternate prefix.)

BIOL 743 Cell and Molecular Techniques (Units: 3)
Prerequisites: Graduate standing; BIOL 357 (may be taken concurrently), CHEM 340, CHEM 341.
Lecture and discussion of modern techniques and design of strategies used in cell and molecular biology research. Includes discussion of societal issues.

BIOL 750 Science Teaching for Scientists I (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Introduction to practical teaching strategies, science education theory and research, and scientific teaching to SF State graduate student scientists who are teaching science in a variety of contexts. May be repeated for a total of 4 units. (Plus-minus letter grade only) (This course is offered as SCI 750 and BIOL 750. Students may not repeat the course under an alternate prefix.)

BIOL 756 Principles of Human Genetics (Units: 3)
Prerequisite: Upper division genetics course and consent of instructor. Intended for graduate students in Biology and Genetic Counseling.
Inheritance, molecular genetics, cytogenetics, variation, mutation, family history, pedigree analysis, genetic risk calculation, quantitative traits, evolution and population genetics. (Plus-minus letter grade only)
Biology (BIOL)

BIOL 760 Cancer Biology (Units: 3)
Prerequisites: Classified graduate standing; CHEM 340 or CHEM 349, BIOL 350 or BIOL 401, BIOL 357, or consent of instructor.
Molecular and cellular basis of cancer. Emphasis on potential therapeutic targets, including cell cycle regulators, signal transduction mechanisms, cellular differentiation factors, oncogenes, tumor suppressors. (Plus-minus letter grade only)

BIOL 763 Molecular Biology of Cancer (Units: 2)
Prerequisites: Graduate standing, a course in biochemistry.
The biology, diagnosis, and treatment of cancer focuses on how recent advances have been achieved by application of molecular biology principles and techniques. Topics include metastasis, angiogenesis, carcinogenesis, genetics, therapeutics, and potential future advances. (Plus-minus letter grade only)

BIOL 765 Biomedical Immunology Advanced Topics (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Faculty direct and evaluate student presentations of seminars on selected advanced topics in clinical immunology.

BIOL 772 Molecular Methods in Medical Microbiology (Units: 4)
Prerequisites: Graduate standing; biochemistry and microbiology courses with laboratory, or consent of instructor.
Overview of clinically significant microorganisms, emphasizing functional roles of biological macromolecules in pathogenesis and genetic applications. Lab covers basic principles and current molecular techniques used in model microbes. Classwork, 2 units; laboratory, 2 units. Extra fee required.

BIOL 774 Nucleic Acid Probe Methods: Biotechnology Applications (Units: 3)
Prerequisite: Graduate standing in biology or consent of instructor.
Basic concepts and applications of modern nucleic acid technologies in diagnosis, therapeutics, and biotechnology. Classwork; 1 unit; laboratory, 2 units. (Plus-minus letter grade only)

BIOL 775 Biomedical Microbiology Advanced Topics (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Primary scientific articles on important human microbial diseases and a centenary perspective of scientific discovery in microbiology are emphasized. Students are required to participate in article presentations and discussion.

BIOL 781 Biomedical Virology Foundations (Units: 3)
Prerequisite: Graduate standing or consent of instructor.
Topic to be specified in Class Schedule. Core lectures with emphasis on virology. May be repeated as topics vary.

BIOL 782 Developmental Biology (Units: 3)
Prerequisites for BIOL 782: Graduate standing; BIOL 350, BIOL 355 or equivalents with grades of C- or better; or consent of instructor.
Prerequisites for BIOL 382: BIOL 350, BIOL 355 with grades of C- or better. Intended for Biology and Biochemistry majors.
Early embryonic development: exploration of the molecular genetic basis for tissue differentiation. Gene regulation, chromatin, sex determination, oncogenesis, aging, and pattern formation. Extra fee required. (BIOL 782/BIOL 382 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BIOL 784 Biomedical Virology Applications (Units: 3)
Prerequisite: Graduate standing or consent of instructor.
Topic to be specified in Class Schedule. May be repeated as topics vary.

BIOL 792 Molecular Virology (Units: 4)
Prerequisite: Graduate standing or consent of instructor.
Virology laboratory covering the growth and detection of viruses. Techniques include the propagation and titration of viruses in cell culture as well as the detection of viral infections by immunochemical and nucleic acid-based techniques. Classwork, 2 units; laboratory, 2 units.

BIOL 793 Advances in Biomedical Hematology (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Topic to be specified in Class Schedule. May be repeated as topics vary.

BIOL 800 Mushroom Taxonomy (Units: 3)
Prerequisites: Graduate or senior standing; BIOL 504 or equivalent; or consent of instructor.
Morphology, microscopic anatomy, taxonomy; biochemical and cytological aspects, ecology and artificial cultivation of the macroscopic fungi. Classwork, 2 units; laboratory and fieldwork, 1 unit. Extra fee required.

BIOL 801 Population Genetics (Units: 3)
Prerequisite: Graduate standing or consent of instructor.
Genetic basis of evolution. Effects of mating system, drift, migration, selection on genetic variation. Quantitative genetics, applications of molecular techniques in evolutionary biology. Classwork, 2 units; laboratory, 1 unit. Extra fee required. (Plus-minus letter grade only)

BIOL 802 Advanced Topics in Biotechnology (Units: 2)
Prerequisite: Graduate standing in Biology and consent of instructor.
Examination of the current topics in biotechnology, pharmaceutical, and clinical research industry. May be repeated as topics vary.

BIOL 803 Core Concepts of Biotechnology (Units: 3)
Prerequisite: CHEM 340 or BIOL 355 or BIOL 357, or equivalent background with consent of instructor.
Introductory course for students interested in careers in biotechnology. Core concepts of biotechnology to keep abreast of current trends, biomedical applications, and historical foundations. (Plus-minus letter grade only)

BIOL 804 Life Science Careers (Units: 2)
Prerequisites: Graduate standing in Biology and consent of instructor.
Introduction to career opportunities for biology life science students after graduation, choosing a career, and necessary tools to pursue a chosen field. (CR/NC grading only)

BIOL 805 Evolutionary Genetics (Units: 4)
Prerequisites: Graduate or senior standing; BIOL 355; or consent of instructor.
Principles of evolutionary genetics, including an emphasis on evolutionary quantitative genetics, molecular population genetics, molecular evolution and genomics. Classwork, 2 units; laboratory, 2 units. Extra fee required.
BIOL 814 Plant Taxonomy (Units: 5)
Prerequisites: BIOL 230, BIOL 240. Intended for Biology majors.
Principles of plant taxonomy including classification systems and phylogenetic relationships within the flowering plants; practice in identification and collecting. Classwork, 2 units; laboratory and fieldwork, 3 units. (BIOL 814/BIOL 514 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BIOL 815 Advanced Phylogenetic Analysis (Units: 4)
Prerequisite: Graduate standing or consent of instructor.
Methods and techniques of phylogenetic inference. Parsimony, maximum likelihood, quantitative phylogenetic analysis, and comparative methods. Molecular data in evolution. Classwork, 3 units; laboratory, 1 unit. Extra fee required. (Plus-minus letter grade only)

BIOL 818 Molecular Techniques in Evolution and Ecology (Units: 4)
Prerequisite: BIOL 355 or equivalent and consent of instructor.
Molecular techniques commonly used in the fields of evolutionary biology and ecology. PCR and direct DNA sequencing. Classwork, 2 units; laboratory, 2 units. Extra fee required.

BIOL 821 Fire Ecology (Units: 3)
Prerequisites: Graduate or senior standing; BIOL 529GW; or consent of instructor.
Role of fire as an environmental factor in the life histories and succession of plants and/or animals. Classwork, 2 units; laboratory, 1 unit. Extra fee required.

BIOL 830 Advanced Conservation Biology (Units: 3)
Prerequisites: Graduate standing; BIOL 530; or consent of instructor.
Theory and practice of nature conservation; traditional resource management; new theory of the conservation of small populations. Classwork, 2 units; laboratory, 1 unit. Extra fee required. (Plus-minus letter grade only)

BIOL 832 Health Disparities in Cancer (Units: 3)
Prerequisite for BIOL 832: Graduate standing or consent of instructor. Prerequisites for BIOL 332: BIOL 230, BIOL 240, BIOL 355.
Major determinants of health disparities in cancer including ethnic differences in biology and prevention and treatment of cancer. Strategies to overcome these disparities through research, health education, outreach, advocacy, and policy changes. (BIOL 832/BIOL 332 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Course Attributes:
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

BIOL 840 Community Ecology (Units: 3)
Prerequisites: Graduate or senior standing in Biology, a course in ecology.
Modern concepts and approaches to natural community structure, organization, and dynamics. Historical and current theoretical models, forces structuring communities, interactions among communities, role of exotic species. (Plus-minus letter grade only)

BIOL 843 Population Biology (Units: 3)
Prerequisites: Graduate or senior standing, a course in genetics, ecology, biometry.
Modern concepts of structure, organization, and evolution of plant and animal populations. Genetical, ecological, evolutionary, and theoretical approaches to the study of populations.

BIOL 844 Research Skills - GWAR (Units: 3)
Prerequisite for BIOL 844: Graduate standing or consent of instructor. Prerequisites for BIOL 344GW: ENG 214 or equivalent with a grade of credit or C- or better; BIOL 230, BIOL 240, and consent of instructor.
Practical skills for successfully conducting undergraduate research. Focus on experimental design, critical review of literature, effective oral and written scientific presentation, and development of research plan. (Plus/minus ABC/NC) (BIOL 844/BIOL 344GW is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Course Attributes:
- Graduation Writing Assessment

BIOL 848 Behavioral Ecology (Units: 3)
Prerequisite: Graduate standing or consent of instructor.
Evolution of behavior: optimal foraging, predation, sexual selection, social organization, habitat selection, and communication. (Plus-minus letter grade only)

BIOL 849 Bioethics (Units: 3)
Prerequisite for BIOL 849: Graduate standing or consent of instructor. Prerequisite for BIOL 349: Upper division standing.
Biomedical ethics: experiments on humans and laboratory animals, genetic engineering, in vitro fertilization, fetal research, abortion, the health care system, organ transplants, death and dying. (BIOL 849/BIOL 349 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Course Attributes:
- UD-B: Physical Life Science
- Social Justice

BIOL 860 Advances in Biology Education Research (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Students will read and present primary research articles, facilitate discussions, write article analyses, and develop a mini-grant proposal on a biology education research question. May be repeated for a total of 4 units.

BIOL 861 Advances in Cell and Molecular Biology (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Topic to be specified in Class Schedule. May be repeated as topics vary.

BIOL 862 Advances in Ecology and Systematic Biology (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Topic to be specified in Class Schedule. May be repeated as topics vary.

BIOL 863 Advances in Marine Biology (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Topic to be specified in Class Schedule. May be repeated as topics vary.
BIOL 864 Advances in Microbiology (Units: 2)
Prerequisites: Graduate standing and consent of instructor.
Topic to be specified in Class Schedule. May be repeated as topics vary.

BIOL 865 Advances in Physiology and Behavioral Biology (Units: 2)
Prerequisite: Restricted to graduate students in Biology or consent of instructor.
Topic to be specified in Class Schedule. May be repeated as topics vary.

BIOL 871 Colloquium in Microbiology, Cell and Molecular Biology (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Presentation of student and faculty research, recent journal articles, and presentations by outside speakers. Does not fulfill graduate seminar requirement. May be repeated for a total of 4 units. (Plus-minus letter grade only)

BIOL 872 Colloquium in Ecology, Evolution, and Conservation (Units: 2)
Prerequisite for BIOL 872: Graduate standing.
Prerequisite for BIOL 572: Upper division standing or consent of instructor.
Presentation of student and faculty research, recent journal articles, and presentations by outside speakers. Student speakers receive graduate seminar credit. May be repeated for a total of 8 units.
(BIOL 872/BIOL 572 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BIOL 881 Seminar: Cell and Molecular Biology (Unit: 1)
Prerequisites: Graduate standing and consent of instructor.
Topic to be specified in Class Schedule. May be repeated for a total of 4 units when topics vary.

BIOL 883 Seminar in Marine Biology (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Seminar on topics in marine biology. Topic to be specified in Class Schedule.

BIOL 890 Cooperative Internship (Units: 2-3)
Prerequisite: Graduate standing.
For students who are conducting cooperative internship and work-related research experience. May be repeated for a total of 6 units.

BIOL 891 Biomedical Research Design (Units: 2)
Prerequisite: Must have fulfilled the GET requirement and have a specific research topic approved by a mentor.
Exercises encompass the elements of biomedical laboratory science research proposals: needs assessment, literature review, clinical significance, feasibility, controls, materials and methods, budget, data presentation, human/animal aspects, record keeping, reference notation, and statistical significance. (Plus-minus letter grade only)

BIOL 895 Research Project (Units: 4)
Prerequisite: BIOL 896, consent of instructor, approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies.
Supervised independent and original laboratory or field investigation. Guidelines available at the biology department office. Advancement to Candidacy and Proposal for Culminating Experience Requirement forms must be approved by Graduate Studies before registration. (CR/NC grading only)

BIOL 896 Directed Reading (Unit: 1)
Prerequisites: Approval of department; permission is required for concurrent enrollment in BIOL 897 or BIOL 895.
Supervised preparation of the research proposal for a research project or thesis research, and completion of the preliminary oral examination. May not be repeated.

BIOL 897 Research (Units: 1-6)
Prerequisites: Completed undergraduate major in biology and classified status. Independent and original laboratory or field investigation under supervision of a faculty member. May be repeated.

BIOL 898 Master’s Thesis (Units: 4)
Prerequisites: Consent of instructor and approval of Advancement to Candidacy (ATC) for the Master of Arts in Biology and Culminating Experience (CE) forms by Graduate Studies.
Advancement to Candidacy and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.
Broadcast and Electronic Communication Arts (BECA)

BECA 200 Introduction to Electronic Communication (Units: 3)
Enrollment priority for BECA majors.
Evolution of the major electronic media institutions of radio, television, and cable as social, political, economic, and vocational forces in American society. Impact and development of new electronic communication technologies.

BECA 201 Life on TV: A Critical View (Units: 3)
Elements of basic kinds of television programs: drama, sports, comedy, documentary, and variety; critical criteria for evaluating programs.

Course Attributes:
- C2: Humanities
- Am. Ethnic & Racial Minorities

BECA 230 Audio Production I (Units: 3)
Prerequisites: Restricted to BECA major; consent of department; must be taken concurrently with BECA 231.

Theoretical aspects of sound, acoustics, and audio signal flow in radio, television, and recording operations. Aesthetic aspects of sound mixing in broadcasting applications. Extra fee required.

BECA 231 Audio Laboratory (Unit: 1)
Prerequisites: Restricted to BECA major, consent of department; must be taken concurrently with BECA 230.

Production procedures and student projects utilizing control consoles, turntables, microphones, tape recorders, and editing. Extra fee required.

BECA 235 Digital Media Basics (Units: 3)
Enrollment priority for BECA majors.
Fundamentals of digital communication technologies and their application in audio, radio, television, and interactive media.

Course Attributes:
- C1: Arts

BECA 240 Video Production (Units: 3)
Prerequisites: Restricted to BECA major; consent of department; must be taken concurrently with BECA 241.

Use of television equipment and facilities; camera operations, audio and video control, lighting, tape recorders, graphics, scenery, and portable audio and video production units. Extra fee required.

BECA 241 Video Laboratory (Unit: 1)
Prerequisites: Restricted to BECA major; consent of department; must be taken concurrently with BECA 240. Extra fee required.

BECA 300GW Broadcast and Electronic Communication Arts Research - GWAR (Units: 3)
Prerequisites: ENG 214 or equivalent with a grade of C- or better; enrollment priority for BECA majors.

Communication research. Acquiring and evaluating information and organizing the results into written form. Investigation of sources, methods, cataloging, philosophies of media research, and questions of reliability and validity. (ABC/NC grading only)

Course Attributes:
- Graduation Writing Assessment

BECA 301 Media Literacy in the Electronic Culture (Units: 3)
Prerequisite: Upper division standing.

Examination of electronic media content, effects, influence on individuals and groups. Development of analytical/critical skills necessary to become a discerning user of television, radio, music, Internet. Application of theoretical and media literacy frameworks to development of the Guerrilla Media Project. (Plus-minus letter grade only)

Course Attributes:
- UD-C: Arts and/or Humanities
- Social Justice

BECA 305 KSFS Radio I (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Production and performance for radio; development of skills used in the daily operation of a radio station: programming, scheduling, and planning.

BECA 310 Radio Production (Units: 3)
Prerequisites: BECA major, BECA 230, BECA 231; and consent of instructor.

Analysis and production of radio programs; experimental approaches designed to explore the potential of radio. Laboratory.

BECA 321 Critical Study of Popular Culture (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Public arts from the standpoint of structures and themes; relationship to social value systems; form, vision, and function in the public arts.

Course Attributes:
- UD-C: Arts and/or Humanities

BECA 324 Law and Regulation of the Electronic Media (Units: 3)
Prerequisites: Junior standing; BECA 200; and consent of instructor.

Enrollment priority for BECA majors.

Legal and regulatory aspects of electronic media: impact of F.C.C. licensing and regulation within the framework of the First Amendment.

BECA 327 Broadcast Industry Symposium (Unit: 1)
Prerequisite: Upper division standing or consent of instructor.

Student participation with American and foreign broadcasters, international concerns, new communication technologies, program exchange, production and script workshops. May be repeated for a total of 4 units. (CR/NC grading only)

BECA 330 Audio Production II (Units: 3)
Prerequisites: Restricted to BECA major; BECA 230, BECA 231, or equivalents; consent of department and instructor.

Radio and television production, in-studio recording on multi-channel recording consoles. Use of board equalization, reverberation systems, graphic equalizers, limiters, and the art of overdubbing. Laboratory.

BECA 335 Audio for Video (Units: 3)
Prerequisites: Restricted to BECA major; BECA 230, BECA 231; consent of department.

Production theory and practice as applied to audio recording for video. Pre-production planning and location/studio recording situations.
BECA 340 Media Aesthetics I (Units: 3)
Prerequisite: Sophomore standing or above or consent of instructor. Enrollment priority for BECA major.
Aesthetic analysis of video, film, and related electronic media based on an examination of fundamental image and sound elements.

BECA 348 Video Editing I (Units: 3)
Prerequisites: BECA 240, BECA 241; consent of department.
Introduction to major aesthetic and technical considerations in video editing, and practical application in electronic media production.

BECA 350 Media Performance I (Units: 3)
Prerequisites: Restricted to BECA major; BECA 240, BECA 241; consent of department.
Performance training for the electronic media; exercises for improving articulation, pronunciation, interpretation, vocal quality, and communicative abilities; the international phonetic alphabet. Laboratory.

BECA 370 Writing for the Electronic Media (Units: 3)
Prerequisites: BECA 300GW, consent of instructor. Enrollment priority for BECA majors.
Writing scripts for video productions, television and radio programs, public service announcements, commercials, and documentaries.

BECA 390 The Age of Information (Units: 3)
Prerequisite: Upper division standing.
Age of information explores the historical, social, political, and personal implications of modern communication technology. Understanding how it contributes to change in our society.

BECA 395 Close up on Electronic Media (Unit: 1)
Prerequisite: Upper division standing or consent of instructor.
A close up look at electronic media industries in major media cities including business environments, social and impact, and marketing electronic media content. Includes the creation of a professional persona through development of personal skills. Topic to be specified in Class Schedule. May be repeated for a total of 4 units as topics vary. Only 3 units of this course may count for credit in BECA major. (CR/NC grading only)

BECA 415 Advanced Television Production Workshop (Units: 3)
Prerequisites: BECA 240, BECA 241; consent of department and instructor.
Development and production of Television Center programming for cable or broadcast. May be repeated for a total of 6 units with consent of instructor. [CSL may be available]

BECA 422 Social Aspects of Electronic Media (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Functions, effects, and uses of public media; roles of media in affecting social, cultural, and political values; avenues of freedom and control in media; problems and opportunities presented by evolving media technology.

BECA 423 Economic Aspects of Broadcasting and Electronic Media
(Units: 3)
Prerequisites: Junior standing; BECA 200; consent of instructor. Enrollment priority for BECA majors.
Business practices and interrelationships of broadcast stations, networks, advertising agencies, and cable companies; buying and selling media, programming, promotion, and legal and ethical issues.

BECA 425 Television/Video Program Design (Units: 3)
Prerequisite for BECA 725: BECA 700 or consent of instructor.
Prerequisites for BECA 425: Junior standing; BECA 200; or consent of instructor.
Process of designing educational television series. Pre-production stages of series development.
(BECA 725/BECA 425 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BECA 428 Electronic Media Management (Units: 3)
Prerequisite: Restricted to upper division BECA majors.
Concepts, methods, and current practices in electronic media organization and management. Decision making, implementation approaches, and communication applications for the small electronic media operation. Resource allocation, facility design and operation, project management, operation scheduling, and quality control. (Plus-minus letter grade only)

BECA 430 Advanced Audio Production I (Units: 3)
Prerequisites: Restricted to BECA major; BECA 330; consent of department and instructor.
Audio techniques in the specialized fields of audio recording and sound reinforcement for television, film, and music recording. May be repeated for a total of 9 units. Extra fee required.

BECA 435 Aesthetics of Sound (Units: 3)
Prerequisites for BECA 735: BECA 230, BECA 231 or equivalent, BECA 700 or consent of instructor.
Prerequisites for BECA 435: BECA 230, BECA 231 or equivalent.
Aesthetics of sound and the basic principles involved in theoretical and critical analysis of audio in media, including radio, television, film, music, and other audio-visual communication.
(BECA 735/BECA 435 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BECA 440 Media Aesthetics II (Units: 3)
Prerequisites: Restricted to BECA major; BECA 240, BECA 241, BECA 340, or equivalents; consent of instructor.
Problems in applied aesthetics. Laboratory.

BECA 450 Media Performance II (Units: 3)
Prerequisites: BECA 350, consent of department or instructor.
Development and rehearsal of electronic media presentation and communication skills. Theories of the presentation of self via electronic media. Studio and laboratory practice. Strategies for management of performer, director, and crew relationships.
BECA 460 Introduction to News on Broadcast and Electronic Media (Units: 3)
Prerequisites: Upper division standing, BECA 200, or consent of instructor.

Values, theories, sources, and content of radio and television newscasts. Professional roles, management, and operations of broadcast and cable news at international, national, and local levels.

BECA 462 The Television Documentary in the United States (Units: 3)
Prerequisites: Restricted to BECA major; consent of department.

History and analysis of documentary programming on American broadcast television and cable: terminology, standards, and accepted practices associated with television documentary production in the U.S.

BECA 470 Dramatic Writing for Television and Electronic Media (Units: 3)
Prerequisites: BECA 370, consent of instructor.

Television as a unique medium for drama; limitations and potentialities of the medium in relation to form, style, timing, characterization, and story selection.

BECA 485 Women and Media (Units: 3)
Prerequisite: Upper division standing.

Analytic modes, including feminist, psychoanalytic, and economic criticism, to assess both how women are represented in mass media and the status of women employed in mass media. (This course is offered as BECA 485 and WGS 485. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

BECA 487 Children and Television (Units: 3)
Prerequisite: Upper division standing.

How children use and are affected by mass media, particularly television. Theory and research describing children and television. Role of television in children's development. (This course is offered as BECA 487 and ITEC 487. Students may not repeat the course under an alternate prefix.)

BECA 488 Asian Media (Units: 3)
Prerequisite: Upper division standing.

Critical, theoretical, and cultural analysis of China, India, and Japan. Aesthetics of aural and visual representations in Asian television and cinema productions.

BECA 490 Television and Social Change (Units: 3)
Prerequisite: Upper division standing.

Nature of social change: television's potential--lack of potential--to bring about social change, role of television in achieving that change, and critique of relevant programming intended to effect change. (Plus-minus letter grading only)

BECA 500 International Broadcasting (Units: 3)
Prerequisite: Consent of instructor.

Broadcast systems of the world: developed and developing nations. Programming of many cultures; the role of satellites in promoting exchange of programs. Relationship between governments, societies, and the media. Issues in international communication.

BECA 502 Environmental Communication on the Electronic Media (Units: 3)
Prerequisite: Upper division standing.

Representation of environmental issues in the electronic media, including radio, television, Internet, and CD ROMs. Strategies for using electronic media to communicate environmental topics.

Course Attributes:
- Social Justice

BECA 505 KSFS Radio II (Units: 3)
Prerequisites: BECA 305, consent of instructor.

Students become managers and staff responsible for the daily operation of KSFS Radio. May be repeated for a total of 9 units.

BECA 510 Music Performance Recording and Production (Units: 3)
Prerequisites: Restricted to BECA major; BECA 230, BECA 231; consent of department.

Student teams have responsibility for the production of weekly, on-air, stereo radio concert program featuring major campus concert performances. May be repeated for a total of 9 units.

BECA 515 Television Center Crew (Units: 3)
Prerequisites: BECA major; BECA 240, BECA 241; consent of department.

"Hands-on" experience: camera operator, lighting, technical director, audio technician, videotape recorder, floor director. Complex productions with multiple cameras, sets, and lighting set-up.

BECA 516 Television News Crew (Units: 3)
Prerequisites: Restricted to BECA major; BECA 240, BECA 241.

Production crew for Television Center newscasts; practical experience as director, technical director, floor director, camera operator, audio engineer, and in other production positions.

BECA 523 Electronic Media Distribution and Operations (Units: 3)
Prerequisites: Restricted to BECA major; BECA 200 or consent of instructor.

Factors in day-to-day electronic media operations, program scheduling, syndication, social media use, labor relations, political and legal considerations, station promotion, and advanced distribution systems. Applied practice in distribution and operation of BECA media channels. May be repeated for a total of 6 units.

BECA 530 Advanced Audio Production II (Units: 3)
Prerequisites: Restricted to BECA major; BECA 430; consent of department.

Major audio productions skills through active participation in challenging audio media productions. Audio for television, film, record production, and sound reinforcement. May be repeated for a total of 9 units. Extra fee required.

BECA 533 Advanced Music Recording Workshop (Units: 3)
Prerequisites: BECA 330, BECA 430 or equivalent.

Aesthetics of current commercial recording techniques. Studio and simulated remote live recording session. Complex mixes. Laboratories in editing and music inter-cutting.
BECA 535 Advanced Audio for Video (Units: 3)
Prerequisites: Restricted to BECA major; BECA 335; consent of department.

Sound theory and practice as applied to post-production audio for video. Time code synchronization of sound effects, music, and dialogue. Field recording and mixing for picture. Extra fee required.

BECA 536 Creativity and Problem Solving in Electronic Media (Units: 3)
Prerequisite: Consent of department and instructor. Enrollment priority for BECA majors.

Exploration of the creative process for media students. Use of multimedia, computers, and games as tools to enhance creativity and to develop problem-solving skills.

BECA 545 Television Directing I (Units: 3)
Prerequisites: Restricted to BECA major; BECA 240, BECA 241; consent of department and instructor.

Creating and directing a variety of television productions. Laboratory. Extra fee required.

BECA 546 Electronic Field Production I (Units: 3)
Prerequisites: Restricted to BECA major; BECA 240, BECA 241; consent of instructor.

Technical and aesthetic elements of video field production and editing. Program conceptualization, pre-production, production, and post-production. Extra fee required.

BECA 547 Video Editing II (Units: 3)
Prerequisites: Restricted to BECA major; BECA 348; consent of department.

Developmental study of the video editing process. Focus on editing stages, editing decision making, editing styles for different program genres. Media asset management and the role of the editor in the production process. Project based course.

BECA 550 The Broadcast Interview (Units: 3)
Prerequisites: BECA 240, BECA 241, consent of department.

Interview as an essential tool for broadcast information gathering and presentation. Interview styles, question research, production approaches for television and radio, and special interview formats such as talk shows and political debates.

BECA 559 Sports Reporting for Television (Units: 3)
Prerequisites: BECA 560, BECA 546.

Specialized skills and practices of television sports journalism: writing to visuals, sports field reporting, and interviewing athletes. Emphasis on the student's ability to research and select relevant topics and issues.

BECA 560 Radio and Television News Writing (Units: 3)
Prerequisites: BECA major, consent of department or instructor.

Reporting and writing for broadcast news, writing and editing the newscast, and field reporting techniques.

BECA 561 News Reporting for Television (Units: 3)
Prerequisites: BECA major; BECA 240, BECA 241, BECA 560; consent of department.

Techniques of broadcast and cable reporting; writing for visual production; production of field reports; use of research retention techniques; and experimental use of visuals in newscasts. Extra fee required.

BECA 562 Television/Video Documentary Production (Units: 3)
Prerequisites: BECA major; BECA 462, BECA 546; consent of instructor.

Methods for the production of documentaries for broadcast and cable television. Extra fee required.

BECA 570 Writing for Electronic Media Genres (Units: 3)
Prerequisites: BECA 370, BECA 470, or consent of instructor.

Exploration of “new media” content writing, focusing on the “webisode” or short-format online episodic program. Compare traditional television script and story structure with that of online series. Explore ways how new media needs to differ from TV. Topic to be specified in the Class Schedule. May be repeated when topics vary.

BECA 576 Internship in Broadcast and Electronic Communication Arts (Units: 3)
Prerequisites: Upper division standing; restricted to BECA major; consent of department and instructor.

Internship experience in professional broadcast and electronic media organization. May be repeated for a total of 6 units. (CR/NC grading only)

BECA 580 Media in Community Service (Units: 3)
Prerequisite: BECA 546 or consent of instructor.

Use of media for public agencies and institutions and by non-profit groups; creating and placing public service announcements; developing media programs for agencies, institutions, and community groups; budgeting; grant-seeking. Fieldwork. May be repeated for a total of 6 units with consent of instructor. (CSL may be available)

BECA 581 Electronic Media and Social Justice I (Units: 3)
Prerequisites: Restricted to BECA major; BECA 546 (may be taken concurrently); or consent of instructor.

Planning and production of electronic media content for social justice goals. Community integration via domestic non-profit organizations. Preparation for production in international contexts. (Plus-minus letter grade only)

BECA 582 Electronic Media and Social Justice II (Units: 3)
Prerequisites: Restricted to BECA major; BECA 546, BECA 581 or consent of instructor; consent of department,

Students travel to an international destination to produce a video for a Non-Governmental Organization (NGO), as service to the NGO. (Plus-minus letter grade only)

BECA 590 New Electronic Communication Technologies (Units: 3)
Prerequisites: BECA major; HTML or equivalent; consent of department and instructor.

Lecture/laboratory course focusing on innovation and change in acquisition, distribution, storage, and display systems of electronic communication. Emphasis on the interactive aesthetic of electronic media.

BECA 593 Interactive Electronic Media Workshop (Units: 3)
Prerequisites: Restricted to BECA major; consent of department.

Design and production of online interactive media, such as web pages, with emphasis on broadcast technologies and distribution principles.
BECA 594 Mobile Electronic Media (Units: 3)
Prerequisite: Senior BECA major.
Aspects of mobile media: business and legal environments; social and personal impact; writing for mobile, news on mobile, producing and marketing mobile content.

BECA 600 Senior Seminar (Units: 3)
Prerequisite: Senior standing.
Relationships between various academic disciplines and the broadcast media.

BECA 623 Ethics and Responsibility in the Electronic Media (Units: 3)
Prerequisite: Upper division standing.
Concept of professionalism and roles of individuals, law, and government in determining ethical standards in the electronic media.

BECA 626 Corporate and Institutional Media Production (Units: 3)
Prerequisites: BECA 546, consent of instructor.
Organization and production of television projects in corporate and institutional settings, including health care facilities and governmental agencies: employee information and training projects, teleconferencing, interactive media, and live multi-camera newscasting.

BECA 640 Television/Video Production Planning (Units: 3)
Prerequisites: BECA major; BECA 230 and BECA 231, or BECA 240 and BECA 241, or equivalents; consent of department or instructor.
Organization and production planning of live television programs; budgets, legal clearances, scripting, casting, distribution, marketing, and logistical problems; duties of the above-the-line team. Emphasis on live coverage and distribution of television entertainment events. Laboratory.

BECA 645 Television Directing II (Units: 3)
Prerequisites: Restricted to BECA majors and minors; BECA 545
Continuation of BECA 545 with emphasis on experimental approaches to the medium. May be repeated for a total of 6 units.

BECA 646 Electronic Field Production II (Units: 3)
Prerequisites for BECA 746: BECA 546, BECA 700, and consent of instructor.
Prerequisites for BECA 646: Restricted to BECA major; BECA 546; consent of department and instructor.
Electronic field production and editing: production and analysis of field-based television program material; relationship between production variables and aesthetic practices. Extra fee required.
(BECA 746/BECA 646 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

BECA 647 Advanced Video Production (Units: 3)
Prerequisites: BECA major; BECA 546; consent of department and instructor.
Professional-level production of announcements and messages created for a client and intended for broadcast. Production planning and effective acquisition and post production. [CSL may be available]

BECA 648 Digital Video Editing II (Units: 3)
Prerequisites: BECA major; BECA 547; consent of department and instructor. Theoretical and practical aspects of the principles of digitizing and editing videotape.

BECA 649 Prosumer Production: Producing Video with Micro Budgets (Units: 3)
Prerequisites: Upper division standing; BECA 240, BECA 241.
Examination of the tools and skills needed to engage in quality audiovisual production, with emphasis on limited budgets. Classwork, 2 units; activity, 1 unit. May be repeated for a total of 6 units.

BECA 650 TV Center Sports I (Units: 3)
Prerequisites: BECA 240, BECA 241, BECA 546, BECA 370.
Demanding advanced studio and field production, news writing, reporting, and performance. Shoot/edit sports highlights and features. Capstone course produces weekly TV program for SF media market. May be repeated for a total of 6 units.

BECA 651 Play-by-Play Sports Production (Units: 3)
Prerequisites: Restricted to BECA majors and minors; BECA 240, BECA 241, or equivalents; or consent of instructor.
Production of live sports event coverage for simulcast via the Internet, cable television, and broadcast outlets. Experience in large-scale report audio/video production activities. May be repeated for a total of 6 units.

BECA 660 Television Center News (Units: 4)
Prerequisites: Restricted to BECA major; BECA 560, BECA 561; consent of department and instructor.
Operation of a cablecast news service covering the city of San Francisco: research and production of stories for newscasts; coverage of San Francisco beats; researching, editing, and compiling of television news packages. May be repeated for a total of 8 units.

BECA 665 News Reporting and Producing for Radio (Units: 3)
Prerequisites: BECA 560, consent of department and instructor.
Basics of radio news: gathering, writing, editing, and producing news reports and features and anchoring newscasts for campus radio station KSFS. Activity.

BECA 670 Writing for Interactive Electronic Media (Units: 3)
Prerequisites: Restricted to BECA major; BECA 370; consent of instructor.
Script writer's role in the creation of interactive electronic media. Differences between conventional screen narrative and interactive story telling and information presentation.

BECA 685 Projects in the Teaching of Broadcast and Communication Arts (Units: 1-4)
Prerequisites: BECA major, consent of department and instructor.
Developing courses and lectures, leading discussions, and teaching and evaluating students of the broadcast and electronic communication arts. Teaching experiences as instructional aide in assigned BECA course. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.)

BECA 693 Interactive Electronic Media Workshop II (Units: 3)
Prerequisites: BECA major; BECA 593; consent of instructor.
Advanced workshop in design and production of on-line interactive media.

BECA 695 Practicum in Broadcast and Electronic Communication Arts (Units: 3)
Prerequisite: Consent of supervising staff and department chair.
Advanced projects in broadcast and communication arts under faculty supervision. Laboratory. May be repeated for a total of 6 units.
Beca 699 Independent Study (Units: 1-3)
Prerequisites: Upper division standing; written consent of supervising instructor, major adviser, and department chair.
Individual study, under the supervision of a faculty member selected by the student, of an aspect of broadcast and electronic communication arts not included in the curriculum.

Beca 700 Introduction to Graduate Study (Units: 4)
Prerequisite: Admission to the BECA M.A. program.
Introduction to graduate study in broadcast and electronic communication. History of mass communication and electronic media theory. Academic writing, graduate-level research, and survey of BECA faculty’s teaching, research, and production activity. (Plus-minus letter grade only)

Beca 701 Formula and Creativity in the Public Arts (Units: 3)
Prerequisite: BECA 700 or consent of instructor.
Relationship between formula and creativity; theory and practice of formulas and genres, particularly in relation to the public arts; systems of criticism.

Beca 702 Ethics and Responsibility in the Electronic Media (Units: 3)
Prerequisite: BECA 700 or consent of instructor.
Broadcast industry self-regulatory codes of ethics and responsibility, concepts of freedom and responsibility as they relate to broadcasters, the government, and the public. (Plus-minus letter grade only)

Beca 703 Seminar in Theory and Research (Units: 3)
Prerequisite: BECA 700.
Graduate seminar in broadcast theory and research methods. (AB/NC grading only)

Beca 706 Seminar in Media Aesthetics and Production Theory (Units: 3)
Prerequisite: BECA 700 or consent of instructor.
Investigation of perceptual conditions and aesthetic theories that guide the interpretation, analysis, and creation of visual and sound images in the electronic media; how these theories may be creatively applied in the production process.

Beca 707 Seminar in International Broadcasting (Units: 3)
Prerequisite: BECA 700 or consent of instructor.
International broadcasting: research methods and theory, comparative broadcast systems, new technology, short-wave, the influence of international politics and legislation, media ownership, and international broadcasting ethics.

Beca 725 Television/Video Program Design (Units: 3)
Prerequisite for BECA 725: BECA 700 or consent of instructor.
Prerequisites for BECA 425: Junior standing; BECA 200; or consent of instructor.
Process of designing educational television series. Pre-production stages of series development. (Beca 725/BECA 425 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

Beca 735 Aesthetics of Sound (Units: 3)
Prerequisites for BECA 735: BECA 230, BECA 231 or equivalent, BECA 700 or consent of instructor.
Prerequisites for BECA 435: BECA 230, BECA 231 or equivalent.
Aesthetics of sound and the basic principles involved in theoretical and critical analysis of audio in media, including radio, television, film, music, and other audio-visual communication. (Beca 735/BECA 435 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

Beca 746 Electronic Field Production II (Units: 3)
Prerequisites for BECA 746: BECA 546, BECA 700, and consent of instructor.
Prerequisites for BECA 646: Restricted to BECA major; BECA 546; consent of department and instructor.
Electronic field production and editing; production and analysis of field-based television program material; relationship between production variables and aesthetic practices. Extra fee required. (Beca 746/BECA 646 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

Beca 750 Seminar in Developing and Funding Productions for Electronic Media (Units: 3)
Prerequisite: BECA 700 or consent of instructor.
Development of a media project from idea to funding package, including brainstorming, research, outline, treatment, and package; preparation of applications for external and internal funding from local, regional, state, federal, private and public sources. (AB/NC grading only)

Beca 752 Seminar in Broadcast and Electronic Communication Arts Pedagogy (Units: 3)
Prerequisite: BECA 700 or consent of instructor.
Process of curricular and instructional preparation for students who wish to teach broadcast and electronic communication arts. (Plus-minus letter grade only)

Beca 770 Media Writing and Performance (Units: 3)
Prerequisite: BECA 700 or consent of instructor.
Writing and performance for the electronic media; writing scripts for features, persuasive messages, informational programs, and drama; script analysis and development of performance skills for camera and microphone.

Beca 790 Seminar in New Electronic Communication Technologies (Units: 3)
Prerequisites: Graduate standing; BECA 700; consent of instructor.
Evolving communication technologies: cable television, digital broadcasting, satellite transmission, video telephony, the Internet. Hardware, software, and social integration issues.

Beca 797 Seminar in Electronic Media Production (Units: 3)
Prerequisites: BECA 700 and consent of instructor.
This class is for active or prospective producers of nonfiction for television, radio, and net. This is a laboratory course where participants share rough drafts of their projects for critiques; discuss production challenges, scripting and design challenges, and logistical challenges. Topic to be specified in the Class Schedule. May be repeated for a total of 6 units as topics vary.
BECA 822 Seminar in Media and Society (Units: 3)
Prerequisite: BECA 700 or consent of instructor.
Social implications of broadcasting and electronic media; theoretical and methodological issues surrounding electronic media processes and effects; effects of electronic media on cultural and social institutions. May be repeated twice when the topic varies. (Plus-minus letter grade only)

BECA 852 Directed Experience in Broadcast and Electronic Communication Arts Education (Units: 3)
Prerequisites: BECA 700, consent of graduate program adviser, sponsoring faculty member, and department chair.
Directed experience in teaching the broadcast communication arts. Students assist in course preparation and instruction and receive supervision from the instructor in charge.

BECA 870 Seminar in Television Dramatic Writing (Units: 3)
Prerequisites: Graduate standing; BECA 700; or consent of instructor.
Writing the teleplay: premise, character, conflict, dialogue, and structure and how these elements are influenced by television as a unique dramatic medium. (Plus-minus letter grade only)

BECA 894 Creative Work Project (Units: 3)
Prerequisites: Consent of instructor and department chair; approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies; BECA 897.

ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

BECA 896 Readings for the Written Comprehensive Examination (Units: 3)
Prerequisites: Completion of the student's academic program and consent of graduate major adviser.
Readings and discussion concerning principles, issues, and theories in mass communication research, criticism, aesthetics, and production. Culminates in the written comprehensive examination.

BECA 896EXM Culminating Experience Examination (Units: 0-3)
Prerequisites: Consent of instructor, committee chair; approval of Advancement to Candidacy (ATC); and Culminating Experience (CE) forms by Graduate Studies.
ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. Enrollment in 896EXM required for students whose culminating experience consists of an examination only. Not for students enrolled in a culminating experience course numbered 892, 893, 894, 895, 898, or 998, (or in some cases, courses numbered 890 - see program's graduate advisor for further information). (CR/NC, RP)

BECA 897 Research for Thesis and Creative Project Proposals (Units: 3)
Prerequisites: Completion of student's academic program, consent of graduate coordinator.
Preparation of proposal for master's thesis or creative project under supervision of the instructor and thesis committee. (CR/NC grading only)

BECA 898 Master's Thesis (Units: 3)
Prerequisites: Consent of instructor and department chair; approval of Advancement to Candidacy (ATC) for the Master of Arts and Culminating Experience (CE) forms by Graduate Studies, BECA 897.

ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.

BECA 899 Independent Study (Units: 1-3)
Prerequisites: Consent of graduate major adviser, supervising instructor, and department chair.
Problems in broadcast communication arts for graduate students who have demonstrated the ability to do independent work. May be repeated for a total of 6 units.
Business (BUS)

BUS 300GW Business Communication for Professionals - GWAR (Units: 3)
Prerequisite: Restricted to upper division Business majors; ENG 214 or equivalent with a grade of C- or better.

Written and oral fundamentals of business communication; hands-on experience creating common formats of written and oral communication at the standard expected of business professionals; ethical and legal implications of business communication. (ABC/NC grading only)

Course Attributes:

• Graduation Writing Assessment

BUS 320 Legal Aspects of Business Transactions (Units: 3)
Prerequisites: Restricted to accounting majors; ENG 214 recommended.

Rights and obligations arising out of common business transactions such as contracts, agency, employment, business organizations, and negotiable instruments. Consideration of the law related to investors, including securities law and the professional and legal responsibilities of accountants.

BUS 360 Business Communication (Units: 3)
Prerequisites: Restricted to upper division Business majors; COMM 150, ENG 214, or equivalent with grades of C- or better.

Written and oral communication including theory, business writing, oral reports, problem-solving, data analysis, use of visual aids in communication, and ethical/legal issues.

BUS 440 Ethics at Work: Business Impacts (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Analysis of applied ethical theory, decision-making and practice to workplace issues in business and related organizations using interactive learning case studies, class exercises, and student presentations.

Course Attributes:

• UD-C: Arts and/or Humanities

BUS 450 Greening of Business (Units: 3)
Prerequisites: ENG 214, COMM 150.

Impact of business firms on the natural environment; forces driving businesses to become environmentally sustainable and types of approaches businesses are taking to respond to environmental issues.

BUS 499 Culminating Experience Continuous Enrollment (Unit: 0)

BUS 682 Seminar on Business and Society (Units: 3)
Prerequisites: Restricted to senior Business majors; BUS 300GW or BUS 360 or DS 660GW, MGMT 405, each with a grade of C- or better.

Dialogues and case study analyses of business and its interaction with the ethical, legal, public policy, social, technological, and environmental effects on individual stakeholders in managing the business enterprise in domestic and global societies. (Plus-minus letter grade only)

BUS 690 Seminar in Business Policy and Strategic Management (Units: 3)
Prerequisites: Upper division standing; BUS 360 or BUS 300GW or DS 660GW, FIN 350, DS 412, MGTG 431, MGMT 405, ISYS 363 or ACCT 307, all with grades of C- or better.

Capstone seminar in business policy and strategic management. Case studies provide background for organizational and functional problems. Emphasizes international environment. Solutions (oral and written) include implementation and methods of quantifiable evaluations. (Plus-minus letter grade only)

BUS 699 Independent Study (Units: 1-3)
Prerequisite: Consent of instructor, adviser, and department chair.

Intensive problem analysis under the direction of a business faculty member. Open only to upper division students who have demonstrated ability to do independent work. [CSL may be available]

BUS 714 Elements of Graduate Business Writing (Units: 3)
Prerequisite: Restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs. For students who do not meet minimum written English proficiency.

Integrated basic writing skills with principles of business writing and organizational communication. May not be used to meet master’s degree ATC requirements. (CR/NC grading only)

BUS 776 Data Analysis for Managers (Units: 3)
Prerequisite: Restricted to graduate business students, graduate students in other majors may enroll with the consent of the Faculty Director of Graduate Programs.

Spreadsheet-based statistical tools to support decision making in operations, finance, marketing; graphical and descriptive tools for data analysis, correlation, regression, estimation, probability distributions, hypothesis testing. (Plus-minus letter grade only)

BUS 780 Financial Accounting (Units: 3)
Prerequisite: Restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Survey of financial accounting including relevant standards and concepts. Preparation and use of financial statements; measurement and reporting of financial information to external parties. (Plus-minus letter grade only)

BUS 782 Information Systems for Management (Units: 3)
Prerequisite: Restricted to graduate business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Information systems and their use in business management. Information technology for managers, the role of different types of information systems in businesses, common information systems, problem-solving, and application development. (Plus-minus letter grade only)
BUS 783 Economics for Managers (Units: 3)
Prerequisite: Restricted to graduate Business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Macroeconomic and microeconomic environments within which businesses operate. Applications of intermediate level economic theory to business operations and management decisions on a local, national, and multinational basis. (Plus-minus letter grade only)

BUS 784 The Political, Social, and Legal Environment of Business (Units: 3)
Prerequisite: Restricted to graduate Business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Contemporary social, political, and legal issues that demonstrate the mutual impacts of economic and non-economic institutions both here and abroad. (Plus-minus letter grade only)

BUS 785 Financial Management (Units: 3)
Prerequisites: Restricted to graduate Business students; graduate students in other majors with the consent of the Faculty Director of Graduate Programs; BUS 780, BUS 776.

Using valuation as the theme, the course covers the conceptual, analytical, and institutional aspects of financial decision making. Specific topics include time value of money, valuation models, capital budgeting, risk and return, required rate of return, modern portfolio theory, and capital structure. (Plus-minus letter grade only)

BUS 786 Operations Analysis (Units: 3)
Prerequisites: Restricted to graduate Business student; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Production management and control with related computer applications: production and distribution planning, inventory control, and demand forecasting. Quantitative analysis. (Plus-minus letter grade only)

BUS 787 Marketing Management (Units: 3)
Prerequisite: Restricted to graduate Business student, graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Introduction to basic marketing concepts, principles, theories, and techniques. (Plus-minus letter grade only)

BUS 788 Management Principles and Organizational Behavior (Units: 3)
Prerequisite: Restricted to graduate Business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Management, organization theory, and behavioral analysis applied to conventional management problems in domestic and international environments. (Plus-minus letter grade only) [CSL may be available]

BUS 857 Business Management, Ecology, and Environmental Leadership (Units: 3)
Prerequisite: Restricted to graduate Business students, graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Impact of business organizations on the natural environment. Approaches to effectively respond to environmental issues. (Plus-minus letter grade only)

BUS 859 International Business Negotiating (Units: 3)
Prerequisites: 6 units in SF State graduate program. Restricted to graduate business students and students in the Ethics & Compliance Certificate program. Graduate students in other majors may enroll on a space-available basis with the consent of the Faculty Director of Graduate Programs.

Development of intercultural negotiating skills through cases involving protagonists, organizational contexts, and situations. (Plus-minus letter grade only)
(This course is offered as BUS 859 and IBUS 859. Students may not repeat the course under an alternate prefix.)

BUS 867 Graduate Internship in Business (Unit: 1)
Prerequisites: BUS 700 series, consent of instructor, and an internship in business.

Analysis of actual experience in a business field. Organization and operation evaluated with respect to management theories. Individual study and conferences with instructor. May be repeated once for a total of 2 units. (Plus-minus letter grade only)

BUS 881 Financial and Managerial Accounting (Units: 4)
Prerequisites: Restricted to EMBA student or consent of the Faculty Director of Graduate Programs.

Preparation and use of corporate financial and managerial accounting information. Measurement and reporting of financial statements. Use of managerial accounting information in planning, control, decision making, and cost management. (Plus-minus letter grade only)

BUS 882 Seminar in Advanced Computer Applications and Information Systems for Management (Units: 4)
Prerequisites: Restricted to EMBA students or consent of the Faculty Director of Graduate Programs.

Information systems architectures and internet/intranet sites in information technology (IT) strategy, N-tier IT solutions development tools, and project management methodology for IT solutions. In-depth treatment of IT solution specifications, IT architecture development, IT development tools, and IT infrastructure. (Plus-minus letter grade only)

BUS 883 Economics for Managers (Units: 4)
Prerequisite: Restricted to EMBA students or consent of the Faculty Director of Graduate Programs.

Micro- and macroeconomic analysis for business decisions. Numerical, geometric, and essay applications of intermediate-level economic theory to business operations and management decisions on a local, national, and global basis. (Plus-minus letter grade only)

BUS 884 Business Ethics, Society, and Sustainability (Units: 3)
Prerequisite: Restricted to graduate business student; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.

Role and impact of business in society. Contemporary social, political, legal, and ethical issues that demonstrate the mutual impact of economic and non-economic institutions both domestically and abroad. (Plus-minus letter grade only)
BUS 885 Corporate Financial Management (Units: 4)
Prerequisites: BUS 881, BUS 886. Restricted to EMBA students or consent of the Faculty Director of Graduate Programs.

Financial management. Corporate finance: financial statement analysis, valuation, capital budgeting, capital structures, dividend policy, and risk management. (Plus-minus letter grade only)

BUS 886 Seminar in Statistics and Operations Analysis (Units: 4)
Prerequisites: Restricted to EMBA students or consent of the Faculty Director of Graduate Programs.

Operations planning and control and related computer applications. Elements of probability and statistics, quality management, inventory control, project management, and demand forecasting. Quantitative analysis and computer applications. (Plus-minus letter grade only)

BUS 887 Strategic Marketing Management (Units: 4)
Prerequisites: Restricted to EMBA students or consent of the Faculty Director of Graduate Programs.

Strategic marketing management: the development, evaluation, and implementation of marketing plans for product-markets. Strategic decisions, decisions which have a long-term impact on the organization. (Plus-minus letter grade only)

BUS 888 Managing Organizational Change (Units: 4)
Prerequisite: Restricted to EMBA students or consent of the Faculty Director of Graduate Programs.

How organizations evolve, how they are structured and designed, and how they function. Provides a basis for the application of practical models to increase organizational effectiveness. Diagnosis of organizational problems, management of change, and influence on organizational structure. (Plus-minus letter grade only)

BUS 890 Culminating Experience in Strategic Management (Units: 3)
Prerequisite: Consent of instructor and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies.

Case study analysis as a culminating experience option in fulfillment of the requirements for the master's degree. Strategy formulation, implementation, techniques and decision-making in the context of the economic, social, political, and competitive global environment. (ABC/NC grading; RP allowed)

BUS 895 Research Project in Business (Units: 3)
Prerequisites: Minimum 12 units of 800 level business course, consent of instructor and Business graduate office; approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies.

Advancement to Candidacy (ATC) and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (ABC/NC grading; RP allowed)

BUS 898 Master's Thesis (Units: 3)
Prerequisites: Minimum 12 units at the 800 level, consent of instructor and Business graduate studies office; approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies.

Advancement to Candidacy (ATC) and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.
Chemistry (CHEM)

CHEM 100 Preparation for Chemistry (Units: 3)
Elementary concepts of chemistry. Development of skills in applying mathematics to solving problems in chemistry. Preparation for CHEM 115 or CHEM 180. (Plus-minus ABC/NC grading only)

CHEM 101 Survey of Chemistry (Units: 3)
Prerequisite: ELM with score of 50 or higher or exemption, or MATH 70 or ESM 70 with a grade of C or better, high school chemistry recommended. Principles of general and organic chemistry and biochemistry. Suitable for pre-nursing, exercise science and health science majors. Not preparation for CHEM 115.
Course Attributes:
  • B1: Physical Science

CHEM 102 Survey of Chemistry Laboratory (Unit: 1)
Laboratory to accompany or follow CHEM 101. Extra fee required. (Charges for missing or damaged laboratory locker items apply)
Course Attributes:
  • B3: Lab Science

CHEM 109 Fundamentals of Food Chemistry: Natural Constituents and Additives (Units: 3)
Chemical composition of foods including sugars, starches, fats, and oils; protein, vitamins, and minerals; additives used in food; government role in food processing and distribution.

CHEM 110 Fundamentals of Food Chemistry: Natural Constituents and Additives Laboratory (Unit: 1)
Prerequisite: Must be taken concurrently with CHEM 109. Laboratory to accompany CHEM 109.

Hands-on experience in assessing food constituents using modern chemical methods and techniques including chemical instrumentation. (Charges for missing or damaged laboratory locker items apply)

CHEM 115 General Chemistry I: Essential Concepts of Chemistry (Units: 5)
Prerequisites: CHEM 100 with a grade of C or better (letter grade only) or satisfactory score on chemistry placement exam. ELM with a score of 50 or better or approved exemption, or MATH 70 with a grade of C or better or ESM 70 with a grade of CR.

Essential concepts of atomic properties, atomic interactions, reaction chemistry, stoichiometry, thermodynamics, chemical kinetics, and equilibria. Classwork, 4 units; laboratory, 1 unit. Extra fee required. (Charges for missing or damaged laboratory locker items apply)

CHEM 130 General Organic Chemistry (Units: 3)
Prerequisite: CHEM 115 with a grade of C or better.

Common organic compounds and basic principles. For laboratory, see CHEM 234. Cannot be used for the chemistry or biochemistry degrees.

CHEM 180 Chemistry for the Energy and the Environment (Units: 3)
Prerequisites: MATH 70 with a grade of C or better, or ELM with a score of 50 or better or an exemption, high school chemistry.

Study of the fundamental chemical principles that underly chemical processes in the environment, and the chemical processes that are important to the generation of energy. Suitable for engineering and environmental studies majors. Extra fee required. (Charges for missing or damaged laboratory locker items apply)
Course Attributes:
  • B1: Physical Science
  • B3: Lab Science
  • Environmental Sustainability

CHEM 215 General Chemistry II: Quantitative Applications of Chemistry Concepts (Units: 3)
Prerequisite: CHEM 115 with a grade of C or better.

Quantitative aspects of chemistry with an emphasis on kinetics, equilibria (acid-base, solubility, and buffer), thermodynamics, and electrochemistry.

CHEM 216 General Chemistry II Laboratory: Quantitative Applications of Chemistry Concepts (Units: 2)
Prerequisite: CHEM 215 with a grade of C or better (may be taken concurrently). Determination of thermodynamic quantities; rate laws; acid dissociation constants; preparation and analysis of buffer solutions; synthesis and analysis of a molecular complex. Laboratory. Extra fee required. (Charges for missing or damaged laboratory locker items apply)

CHEM 233 Organic Chemistry I (Units: 3)
Prerequisites: CHEM 115, CHEM 215 with grades of C or better. Priority enrollment for Chemistry and Biochemistry majors. Other majors may enroll on a space available basis.

Principles of organic chemistry emphasizing the structure, properties and reactions of alkanes, cycloalkanes, alkyl, halides, alcohols, ethers and alkenes; stereochemistry; mechanisms of substitution and elimination reactions. Primarily for students majoring in chemistry and biochemistry.

CHEM 234 Organic Chemistry I Laboratory (Units: 2)
Prerequisite: CHEM 233 or CHEM 130 with a grade of C or better (may be taken concurrently).

Techniques and selected experiments in organic chemistry. Classwork, 1 unit; laboratory, 1 unit. Extra fee required. (Charges for missing or damaged laboratory locker items apply)

CHEM 251 Mathematics and Physics for Chemistry (Units: 3)
Prerequisites: CHEM 215, MATH 226, MATH 227, PHYS 220, PHYS 222, PHYS 230, PHYS 232, each with a grade of C or better, or consent of instructor. Concurrent enrollment in CHEM 351 is strongly recommended.

Integrated mathematics and physics for physical chemistry, fluids, wave motion, or thermodynamics, partial derivatives, multiple integrals, introductory vector calculus, introductory differential equations. (Plus-minus letter grade only)

CHEM 300 General Physical Chemistry I (Units: 3)
Prerequisites: CHEM 321, CHEM 335, MATH 227, PHYS 121 or PHYS 230 or PHYS 240, each with a grade of C or better. CHEM 340 or CHEM 349 recommended. For Chemistry, Biochemistry, and Biology majors.

Chemical thermodynamics; kinetic theory of gases; properties of solutions. Designed for students in biology, preprofessional curricula, biochemistry and chemistry majors.
CHEM 301 General Physical Chemistry II (Units: 3)
Prerequisites: CHEM 300 with a grade of C or better or consent of instructor; concurrent enrollment in CHEM 340 or CHEM 349.
Quantum mechanics, spectroscopy, biophysical spectroscopy, intermolecular forces, macromolecules, and statistical thermodynamics.

CHEM 321 Quantitative Chemical Analysis (Units: 3)
Prerequisites: CHEM 215, CHEM 216, with grades of C or better. For Chemistry, Biochemistry, and Biology majors.
Foundation course in analytical chemistry with a focus on quantitative analysis. Topics include uncertainties, statistics, equilibria, titrimetric methods, electrochemistry and potentiometry, molecular and atomic spectroscopy, mass spectroscopy, and chromatography. (Plus-minus letter grade only)

CHEM 322 Quantitative Chemical Analysis Laboratory (Units: 2)
Prerequisite: CHEM 321 with a grade of C or better (may be taken concurrently). For Chemistry, Biochemistry, and Biology majors.
Practical experience in performing accurate and precise measurements of chemical species in a variety of real world samples using gravimetric, titrimetric, potentiometric, spectroscopic, and chromatographic methods. Extra fee required. (Charges for missing or damaged laboratory locker items apply) Students who have taken CHEM 320 cannot take CHEM 321 or CHEM 322 for credit. (Plus-minus letter grade only)

CHEM 325 Inorganic Chemistry (Units: 3)
Prerequisites: CHEM 215, CHEM 335 with grades of C or better. For Chemistry, Biochemistry, and Biology majors.
Theories of chemical bonding and their application to inorganic systems with emphasis on transition metal complexes. Molecular symmetry; acid/base, redox and solid-state chemistry; introduction to organometallic and bioinorganic chemistry.

CHEM 327 Practical GC and HPLC (Units: 4)
Prerequisites: CHEM 234, CHEM 321, CHEM 322, all with grades of C or better.
Theory, hardware, and experience in GC and HPLC separations. Emphasis on practical skills and common applications in natural products, environmental, and pharmaceutical analyses. Extra fee required. (Charges for missing or damaged laboratory locker items apply) (Plus-minus letter grade only)

CHEM 335 Organic Chemistry II (Units: 3)
Prerequisite: CHEM 233 with grade of C or better.
Continuation of CHEM 233.

CHEM 336 Organic Chemistry II Laboratory (Units: 2)
Prerequisites: CHEM 234, CHEM 335 (may be taken concurrently), with grades of C or better.
Techniques and experiments in organic synthesis, isolation, purification and characterization. Intended for science majors. Activity: 1 unit; laboratory, 1 unit. Extra fee required. (Charges for missing or damaged laboratory locker items apply)

CHEM 338 Organic Chemistry II: Laboratory Honors (Units: 3)
Prerequisites: CHEM 233, CHEM 234, with grades of B or better; must be taken concurrently with CHEM 335. Substitute for CHEM 336.
Experiments in organic synthesis and analysis plus a research project directed by faculty. Classwork, 1 unit; laboratory, 2 units. Extra fee required. (Charges for missing or damaged laboratory locker items apply) (Plus-minus letter grade only)

CHEM 340 Biochemistry I (Units: 3)
Prerequisites: CHEM 215, CHEM 233, CHEM 335, with grades of C or better. For Chemistry, Biochemistry, and Biology majors.
Protein structure and function; carbohydrate metabolism; enzyme kinetics and thermodynamics; electron transport chain.

CHEM 341 Biochemistry II (Units: 3)
Prerequisite: CHEM 340 with a grade of C or better.
Biosynthesis and degradation of lipids, amino acids, and nucleotides; protein synthesis, folding and degradation; DNA and RNA structure; DNA replication and transcription.

CHEM 343 Biochemistry I Laboratory (Units: 3)
Prerequisites: CHEM 216, CHEM 234, CHEM 340 (may be taken concurrently) or CHEM 349 (may be taken concurrently), all with grades of C or better; CHEM 321 is recommended. Priority registration for Biochemistry and Chemistry majors.
Chemical and enzymatic experiments involving proteins, carbohydrates, and nucleic acids with emphasis on enzyme kinetics. Utilization of standard and modern biochemical techniques. Classwork, 1 unit; laboratory, 2 units. Extra fee required. (Charges for missing or damaged laboratory locker items apply) (Plus-minus letter grade only)

CHEM 349 General Biochemistry (Units: 3)
Prerequisites: CHEM 215 with a grade of C or better; CHEM 130 with a grade of C or better or CHEM 335 with a grade of C or better. Not for B.S. Biochemistry or Chemistry majors.
Survey of major areas in biochemistry including enzymology, bioenergetics, and carbohydrate, lipid and nucleic acid metabolism. Students who have completed CHEM 340 may not take CHEM 349 for credit.

CHEM 351 Physical Chemistry I: Thermodynamics and Kinetics (Units: 3)
Prerequisites: Upper division standing; CHEM 233, CHEM 251 (may be taken concurrently), CHEM 321, with grades of C or better, or consent of the instructor.
Thermodynamics and kinetic theory. Classwork, 2 units; activity, 1 unit.

CHEM 353 Physical Chemistry II: Quantum Chemistry and Spectroscopy (Units: 3)
Prerequisites: Upper division standing; CHEM 233, CHEM 251, CHEM 321, with grades of C or better, or consent of instructor.
Quantum chemistry, spectroscopy of atoms and molecules, statistical thermodynamics. Classwork, 2 units; activity, 1 unit.
CHEM 370 Computer Applications in Chemistry and Biochemistry (Units: 3)
Prerequisite: CHEM 321, CHEM 233, with grades of C or better.
Data acquisition, manipulation, and presentation with emphasis on software used in chemistry and biochemistry laboratories. Computational chemistry and molecular visualization software for small and large molecules. Development of interactive molecular visualization web pages. Classwork, 2 units; laboratory, 1 unit.

CHEM 380 Chemistry Behind Environmental Pollution (Units: 3)
Prerequisite: CHEM 115 or CHEM 180 with a grade of C- or better.
Traditional and contemporary topics in environmental chemistry. Understanding and appreciation of various chemical processes and principles underlying environmental problems facing society.
Course Attributes:
- UD-B: Physical Life Science
- Environmental Sustainability

CHEM 390GW Contemporary Chemistry and Biochemistry Research - GWAR (Units: 3)
Prerequisites: Upper division standing; Chemistry or Biochemistry major; ENG 214 or ENG 215, CHEM 216 or CHEM 234 with a grade of C or better.
Improve skills in written and oral communication with an emphasis on the communication skills expected of chemists and biochemists in their professional activities. Classwork, 2 units; laboratory, 1 units. (ABC/NC grading only)
Course Attributes:
- Graduation Writing Assessment

CHEM 399 Careers in Chemistry and Biochemistry (Unit: 1)
Prerequisite: Senior standing.
Discussion of the full spectrum of careers in chemistry and biochemistry: career counseling, resume and interview guidance and strategies, outside speakers from education and industry. (CR/NC grading only)

CHEM 420 Environmental Analysis (Units: 3)
Prerequisites: CHEM 321, CHEM 322, with grades of C or better.
Practical analysis of real world samples and environmental pollutants. Statistics, QA/QC, heavy metal analysis via atomic spectroscopy, and organic pollutant analysis via GC/MS. Classwork, 2 units; laboratory. 1 unit. Extra fee required. (Charges for missing or damaged laboratory locker items apply) (Plus-minus letter grade only)

CHEM 422 Instrumental Analysis (Units: 4)
Prerequisites: CHEM 321, CHEM 322, with grades of C or better.
Instrumental methods for chemical and biochemical analysis including basic electronics, molecular and atomic spectroscopy, IR and Raman spectroscopy, mass spectrometry, and chromatography. Classwork, 2 units; laboratory, 2 units. Extra fee required. (Charges for missing or damaged laboratory locker items apply) (Plus-minus letter grade only)

CHEM 426 Advanced Inorganic Chemistry Laboratory (Units: 2)
Prerequisites: CHEM 321, CHEM 322, CHEM 325, with grades of C or better, or consent of the instructor.
Modern techniques in inorganic chemistry with an emphasis on synthesis, characterization, and reactivity of metals in a variety of materials including biological and environmental samples. Extra fee required. (Charges for missing or damaged laboratory locker items apply)

CHEM 433 Advanced Organic Chemistry (Units: 3)
Prerequisites: CHEM 335 with a grade of C or better, CHEM 301 or CHEM 353 (may be taken concurrently).
Theoretical aspects of organic chemistry, molecular structure, and reaction mechanisms.

CHEM 443 Biophysical Chemistry Laboratory (Units: 4)
Prerequisites: CHEM 343 with a grade of C or better, CHEM 301 or CHEM 353 (may be taken concurrently).
Experiments using modern techniques in biochemistry, bioinformatics, molecular biology and biophysics for the study of biological macromolecules. Classwork, 2 units; laboratory, 2 units. Extra fee required. (Charges for missing or damaged laboratory locker items apply) (Plus-minus letter grade only)

CHEM 451 Experimental Physical Chemistry Laboratory (Units: 2)
Prerequisites: CHEM 321, CHEM 322, CHEM 351, CHEM 353 or CHEM 300 and CHEM 301, with grades of C or better, or consent of instructor.
Emphasis on molecular spectroscopy, thermodynamics, kinetics, electrochemistry, applications of computational chemistry, and error analysis. 2 laboratory periods per week. Extra fee required. (Charges for missing or damaged laboratory locker items apply) (Plus-minus letter grade only)

CHEM 470 Research (Units: 3)
Prerequisites: One year each of general and organic chemistry and consent of instructor and faculty research adviser.
Intended for motivated students interested in independent research. Requires 6-9 hours of research each week, lecture attendance, formal poster presentation, and written report. May be repeated for a total of 6 units.

CHEM 640 Advanced Topics in Biochemistry (Units: 3)
Prerequisites: CHEM 349 or CHEM 341 or CHEM 340, BIOL 350, with grades of C or better, or consent of the instructor.
Topic to be specified in Class Schedule. May be repeated as topics vary.

CHEM 645 Research Trends in Chemistry and Biochemistry (Units: 3)
Prerequisites: GPA of 3.0 or better, CHEM 340, one semester of physical chemistry.
Self-directed learning experience for undergraduates in modern research topics in chemistry and biochemistry.

CHEM 680 Chemical Oceanography (Units: 3)
Prerequisite: CHEM 215 or equivalent.
Investigation of the composition and dynamics of the ocean through chemistry. (Plus-minus letter grade only)

CHEM 685 Projects in the Teaching of Chemistry and Biochemistry (Unit: 1)
Prerequisites: Consent of instructor, a grade of B or better in the course in which student will be instructing.
Instructional methods and techniques for effective student teaching, leading class discussions and activities and carrying out class demonstrations. May be repeated for a total of 4 units.
CHEM 693 Cooperative Education Program (Units: 6-12)
Prerequisite: Consent of instructor.
Supervised chemistry laboratory employment. Enrollment by prior arrangement with the employer and department. Final written report is required. A maximum of 2 units (1 unit for each semester) may be used to meet elective requirements in chemistry major programs. May be repeated for up to 24 units. (CR/NC grading only)

CHEM 694 Cooperative Education in Chemistry (Unit: 1)
Prerequisite: Upper division standing or consent of instructor.
Supervised chemistry laboratory experience in industry. Enrollment by prior arrangement with supervising faculty member and industry sponsor. See department adviser for details. A final written report is required. May be repeated for a total of 3 units.

CHEM 699 Independent Study (Units: 1-6)
Prerequisite: Consent of the department and instructor.
Laboratory or library research work focused on chemistry and biochemistry problems directed by a department faculty. For advanced, superior students majoring or minoring in Chemistry or Biochemistry. Final written report required. May be repeated.

CHEM 741 Electron Microscopy (Units: 4)
Prerequisite: Graduate or senior standing, or consent of instructor.
Preparation of biological and inorganic materials for scanning and transmission electron microscopy, x-ray microanalysis, EBSD, CL, operation of the electron microscope(s), and data interpretation. Classwork, 1 unit; laboratory, 3 units. Extra fee required. (This course is offered as BIOL 741, CHEM 741, and ERTH 741. Students may not repeat the course under an alternate prefix.)

CHEM 800 Special Topics in Chemistry (Units: 3)
Prerequisite: Graduate standing in Chemistry or consent of instructor.
Topic to be specified in Class Schedule. May be repeated as topics vary.

CHEM 820 NMR Applications and Techniques (Units: 3)
Prerequisite: Classified graduate standing in Chemistry or consent of instructor.
FT NMR concepts and operating techniques; 10 and 2D experiments; relaxation and dynamics. Spectral interpretation. Classwork, 2 units; laboratory, 1 unit.

CHEM 821 Mass Spectrometry - Principles and Practice (Units: 3)
Prerequisite: Classified graduate standing in Chemistry or consent of instructor.
Fundamental principles and modern practice of mass spectrometry, instrumentation (mass analyzers, ionization modes, sample introduction systems) and applications (qualitative and quantitative analysis, environmental and biomedical applications). (Plus-minus letter grade only)

CHEM 832 Organic Synthesis (Units: 3)
Prerequisite: Classified graduate standing in Chemistry or consent of instructor.
Problems relating to current organic synthetic methods. Synthesis and reactions of the major classes of mono- and polyfunctional compounds.

CHEM 834 Organic Spectroscopic Methods (Units: 3)
Prerequisites: Classified graduate standing in Chemistry; CHEM 301 or CHEM 353; or consent of instructor.
Relations between molecular structure and spectroscopic behavior. Mass spectrometry, infrared, electronic and magnetic resonance spectroscopy.

CHEM 841 Enzymology (Units: 3)
Prerequisites: Classified graduate standing in Chemistry; CHEM 341, CHEM 301 or CHEM 353; or consent of instructor.
The relationships between enzyme structure and catalytic activity, including enzyme kinetics and mechanisms.

CHEM 842 Bioorganic and Medicinal Chemistry (Units: 3)
Prerequisite: Classified graduate status in Chemistry or consent of instructor.
Molecular recognition, enzymatic reaction mechanisms, catalytic antibodies/polymers, enzymes in organic synthesis, pharmacodynamics, and drug action, drug design for pharmacokinetic problems.

CHEM 846 Biology and Chemistry of Signaling Pathways (Units: 3)
Prerequisite: Classified graduate status or consent of instructor.
An interdisciplinary presentation of the mechanisms by which extracellular stimuli trigger intracellular biochemical reactions that lead to alterations in cellular function. (This course is offered as BIOL 732 and CHEM 846. Students may not repeat the course under an alternate prefix.)

CHEM 850 Valency and Spectroscopy (Units: 3)
Prerequisites: Classified graduate standing in Chemistry; passing score on the ACS diagnostic examination in quantum chemistry; or consent of instructor.
Quantum mechanics of atomic and molecular structure using computers and group theory. Elementary microwave, infrared, optical, and magnetic resonance spectroscopy.

CHEM 851 Biochemical Spectroscopy (Units: 3)
Prerequisites: Classified graduate standing in chemistry; passing ACS diagnostic examination in quantum chemistry; a biochemistry course; or consent of instructor.
Quantum chemistry elements. Principles, techniques, and biochemical applications of spectroscopy.

CHEM 852 Statistical Mechanics: Molecular Relaxation (Units: 3)
Prerequisites: CHEM 351, CHEM 353, or equivalents.

CHEM 870 Computational Methods in Chemistry (Units: 3)
Prerequisites: Upper division or graduate standing; one year of undergraduate physical chemistry.
Introduction to quantum chemical and classical mechanical methods for the computation of molecular structure, molecular spectroscopy, liquid state transport properties and molecular reactivity for small and large molecules, including solids and interactions at surfaces. Hands on use of four software packages: Gaussian 09, AMBER molecular dynamics, LAMMPS dynamics for mesoscopic systems, and BEST for molecular hydrodynamics. (Plus-minus letter grade only)
CHEM 880 Seminar (Units: 3)
Prerequisite: Classified graduate standing in chemistry or consent of instructor.

Exploration of current areas and methods of chemical research. Oral presentations and scientific writing. Should be taken during the first year of graduate work.

CHEM 885 Teaching College Chemistry (Units: 3)
Prerequisite: Graduate standing or consent of instructor.

Examination of the role of preparation, assessment, and feedback in teaching college-level chemistry laboratory and discussion sections; emphasis on effective classroom techniques and organizational strategies. (Plus-minus letter grade only)

CHEM 895 Research Project (Units: 3)
Prerequisites: Consent of instructor; approval of Advancement to Candidacy (ATC); and Culminating Experience (CE) forms by Graduate Studies.

Supervised independent and original laboratory investigation. Guidelines are available through the Department of Chemistry & Biochemistry. (CR/NC grading only)

CHEM 897 Research (Units: 1-9)
Prerequisites: Classified graduate standing in Chemistry, CHEM 880 (may be taken concurrently), or consent of instructor.

Independent and original laboratory, computational, or theoretical research under faculty supervision. May be repeated for a total of 9 units.

CHEM 898 Master's Thesis (Units: 3)
Prerequisites: Consent of instructor and approval of Advancement to Candidacy (ATC) for the Master of Science in Chemistry and Culminating Experience (CE) forms by Graduate Studies.

ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)
Child & Adolescent Development (CAD)

CAD 120 Child Development, Social Justice, and Academic Success (Units: 3)
Prerequisite: Restricted to freshmen.
Focus on educational and social justice for child and adolescent development. General education skills, writing, oral communication, critical thinking, and quantitative reasoning, are systematically reinforced. (Plus-minus letter grade only)
Course Attributes:
- E1: Lifelong Learning Develop
- C2: Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

CAD 210 Introduction to Applied Child and Adolescent Development (Units: 3)
Prerequisite: ENG 114 or equivalent or consent of instructor. Priority enrollment for freshmen and sophomores who are pre-CAD majors.
Growth and development of children from prenatal stage through adolescence and its relevant application in work with children and families; physical, cognitive, linguistic, social, moral and emotional aspects of development. May be repeated for a total of 6 units. (Plus-minus letter grade only)
Course Attributes:
- D1: Social Sciences

CAD 215 Foundations in Early Childhood (Units: 3)
Prerequisite: ENG 114 or equivalent or consent of instructor. Priority enrollment for freshmen and sophomores.
Observation of teachers and children under the age of five years in a quality licensed center or program. Foundations and best practices in early childhood education. (Plus-minus letter grade only)

CAD 260 Children, Families, and Community: An Ecological Perspective (Units: 3)
Prerequisite: ENG 114 or equivalent or consent of instructor. Priority enrollment for freshmen and sophomores who are pre-CAD majors.
Understanding children, families, and community from an ecological perspective. Emphasis on contribution of basic and applied research to development in relation to family and community.
Course Attributes:
- E1: Lifelong Learning Develop
- D1: Social Sciences
- Am. Ethnic & Racial Minorities
- Global Perspectives
- Social Justice

CAD 300 Professional Roles and Careers in Child and Adolescent Development (Units: 3)
Prerequisites: CFS 320, PSY 330, or equivalent or consent of instructor.
Overview of child and adolescent development and careers related to children, youth, and families.

CAD 325 Jumpstart: Mentoring Young Children (Units: 3)
Prerequisite: Enrollment in Jumpstart program.
Models of early childhood intervention are explored, with emphasis on Jumpstart For Young Children model. Topics include: developmentally appropriate child-centered activities to enhance learning, positive adult-child interactions, family involvement. [CSL may be available]

CAD 326 Jumpstart: Developing Literacy Skills in Young Children (Units: 3)
Prerequisite: Enrollment in Jumpstart program.
Training and experience for students working with young children in preschool settings in the development of literacy activities for young children and their families. [CSL may be available]

CAD 400 Community Youth Development (Units: 3)
Prerequisites: Upper division standing; restricted to Child and Adolescent Development majors; ENG 214, CAD 210, CAD 260, or equivalents.
Introduction to youth and community development, emphasizing community supports and opportunities for healthy youth development. Theories and research used to construct a framework for youth development; program models and legislation examined. As part of course work, students will work off-campus with a local youth/community program. (Plus-minus letter grade only) [CSL may be available]

CAD 410 Applied Child and Youth Development (Units: 3)
Prerequisites: Restricted to Child and Adolescent Development majors; ENG 214, CAD 210, CAD 260, or equivalents.
Understanding of child and adolescent development based upon research and particularly its application to practice. Current and emerging issues associated with the promotion of child and youth development will be reviewed. (Plus-minus letter grade only)

CAD 430 Experiential and Activity Based Learning Seminar (Units: 2)
Prerequisites: Restricted to Child and Adolescent Development majors. ENG 214, CAD 210, CAD 260, or equivalents; concurrent enrollment in CAD 431.
Development and implementation of an experiential learning activity for youth; incorporation of foundations of the youth development model. (Plus-minus letter grade only) [CSL may be available]

CAD 431 Experiential and Activity Based Learning Practice (Units: 2)
Prerequisites: Restricted to Child and Adolescent Development majors. ENG 214, CAD 210, CAD 260, or equivalents; concurrent enrollment in CAD 430.
125 hours of supervised youth work in the community to practice the development, implementation of experiential and activity based learning opportunities. (CR/NC grading only) [CSL may be available]

CAD 450 Understanding and working with Diverse Families (Units: 3)
Prerequisites: Restricted to Child and Adolescent Development majors; ENG 214, CAD 210, CAD 260, or equivalents.
Drawing on a variety of disciplines, examination of experiences of families, including family diversity, theories on families, and challenges families face; application in the areas of family engagement, involvement, and support. (Plus-minus letter grade only)
CAD 460 Globalization and Family Relations (Units: 3)
Prerequisites: Restricted to Child and Adolescent Development majors; ENG 214, CAD 210, CAD 260, or equivalents.

Examination of the concepts of globalization, migration, and transnationalism to understand families and family relations within the larger context of cultural and social influences. (Plus-minus letter grade only)

Course Attributes:

• Global Perspectives

CAD 500GW Action Research Methods in Child and Adolescent Development - GWAR (Units: 3)
Prerequisites: Restricted to Child and Adolescent Development majors; ENG 214 or equivalent with a grade of C- or better, CAD 210 and CAD 260 or equivalents with grades of C or better, and CAD 410 with a grade of C or better.

Introduction to action research, including design and methodology of research studies and principles of action research. Students will develop a systematic plan to address social problems that affect children, youth, and families. (ABC/NC grading only)

CourseAttributes:

• Graduation Writing Assessment

CAD 510 Adult Supervision and Leadership in Early Childhood Programs (Units: 3)
Prerequisites: Restricted to Child and Adolescent Development majors; ENG 214 or equivalent, CAD 210, CAD 215, CAD 260, or equivalents.

Exploration of adult supervision, administration and leadership in early childhood programs from theoretical and personal perspectives. (Plus-minus letter grade only)

CAD 525 Honors Seminar in Child and Adolescent Development (Units: 3)
Prerequisite: Restricted to upper division Child and Adolescent Development majors.

Examination of theory, research, and practice in child and adolescent development that can be applied to international, national, and local contexts. (Plus-minus letter grade only)

CAD 540 Ethics and Principles in Serving Youth (Units: 3)
Prerequisites: Restricted to Child and Adolescent Development majors; ENG 214, CAD 210, CAD 260, or equivalents.

Understanding of practice and service provision, key ethical issues, the values that underpin them, and how youth work can be professionally conducted; ethics within the framework of ecological model. (Plus-minus letter grade only)

CAD 600 Child and Adolescent Development Internship Seminar (Units: 2)
Prerequisites: Restricted to senior Child and Adolescent Development majors; completion of 36 units in major with grades of C or better; approval of internship application; must be taken concurrently with CAD 601.

Capstone course. Analysis of agencies that serve children and youth with regard to professional competencies, standards and ethics, leadership, organizational structure and functioning. (Plus-minus letter grade only)

CAD 601 Child and Adolescent Development Internship (Units: 2)
Prerequisites: Restricted to senior Child and Adolescent Development majors; completion of 36 units in major with grades of C or better; approval of internship application; must be taken concurrently with CAD 600.

Supervised experience in educational institutions, health and human service agencies, and organizations that serve children, youth, and families. (CR/NC grading only)

CAD 610 Early Childhood Internship Seminar (Unit: 1)
Prerequisites: Restricted to senior Child and Adolescent Development majors with a concentration in Early Childhood; completion of 150 supervised and documented hours working (paid or volunteer) in a licensed center; approval of internship application; CAD 215 or equivalent; concurrent enrollment in CAD 611.

Preparation for professional employment in organizations that serve young children and their families; discussion of issues with peers, reflection of initial classroom practices, identification of teaching strengths and weaknesses, and enhancement of own professional development. (Plus-minus letter grade only)

CAD 611 Early Childhood Internship (Units: 2)
Prerequisites: Restricted to senior Child and Adolescent Development majors with Early Childhood concentration; completion of 150 supervised and documented hours working (paid or volunteer) in a licensed center; approval of internship application; CAD 215 or equivalent; concurrently enrollment in CAD 610.

Preparation for professional employment in organizations that serve young children and their families; evaluation based on growth and development within standards, competencies and practices to best support development outcomes of children and management of classroom environments. (CR/NC only)

CAD 625 Children, Youth, and Public Policy (Units: 3)
Prerequisites: Restricted to Child and Adolescent Development majors; ENG 214, CAD 210, CAD 260, or equivalents.

Overview of how public policies for services for children and youth are developed, adopted, and implemented; policy process and historical and current policy issues in areas of education and child care. (Plus-minus letter grade only; CR/NC not allowed)

CAD 630 Youth Work and Out of School Time Internship Seminar (Unit: 1)
Prerequisites: Restricted to senior Child and Adolescent Development majors with a concentration in Youth Work; approval of internship application; concurrent enrollment with CAD 631.

Reflection on CAD 631 experience; sharing experiences; enhancing tools to promote professional development. (Plus-minus letter grade only)

CAD 631 Youth Work and Out of School Time Internship (Units: 3)
Prerequisites: Restricted to senior Child and Adolescent Development majors with a concentration in Youth Work; approval of internship application, concurrent enrollment with CAD 630.

175 hours of supervised youth work in the community. The experience will be guided by measurable goals that are relevant to the community site and students' aspiration. (Plus-minus letter grade only)
CAD 640 Policy, Advocacy, and Systems Capstone Experience (Units: 4)
Prerequisites: Restricted to senior Child and Adolescent Development majors with a concentration in Policy, Advocacy, and Systems.

Synthesize, integrate, and apply the knowledge students have gained during their previous coursework in the major. Learning experiences include a community service learning volunteer placement and completion of an online portfolio of academic work. (Plus-minus letter grade only)

CAD 650 Child Advocacy (Units: 3)
Prerequisites: Restricted to Child and Adolescent Development majors; ENG 214, CAD 210, CAD 260, or equivalents.

Effective advocacy for children in a variety of settings: organizations, communities, human services systems, regional government, and legislatures. Strategies learned in class will be applied to real-life issues in a community service learning component. [CSL may be available]

CAD 680 International Field Study in Child and Adolescent Development (Units: 3)
Prerequisite: Child and Adolescent Development majors with a minimum grade point average of 3.0 or consent of instructor.

Comparison of child development programs and settings in international venues with that of the U.S. Involves travel as a group for 2 to 3 weeks to selected countries outside the U.S. May be repeated for a total of 6 units.

CAD 685 Projects in the Teaching of CAD (Units: 1-4)
Prerequisites: Consent of instructor; grade of B+ or better in course assisting.

Instructional aides have opportunity to increase knowledge of course topic and understanding of teaching and learning. Provide assistance to students in class activities. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.)

CAD 699 Independent Study (Units: 1-4)
Prerequisites: Upper division standing; consent of instructor and major adviser.

An intensive study of a particular issue in child and adolescent development selected by the student. Enrollment by petition. May be repeated for a total of 6 units.
Chinese (CHIN)

CHIN 101 First Semester Chinese (Units: 5)
Understanding, speaking, reading, and writing modern Mandarin Chinese at the elementary level. Emphasis on the spoken language. Laboratory attendance required.
Course Attributes:
• C2: Humanities
• Global Perspectives
• Social Justice

CHIN 102 Second Semester Chinese (Units: 5)
Prerequisite: CHIN 101 or consent of instructor.
Further study of elementary Mandarin Chinese. Laboratory attendance required.
Course Attributes:
• C2: Humanities
• Global Perspectives
• Social Justice

CHIN 103 Third Semester Chinese (Units: 5)
Prerequisite: CHIN 102 or consent of instructor.
Understanding, speaking, reading, and writing modern Mandarin Chinese at the low-intermediate level. Laboratory attendance required.
Course Attributes:
• C2: Humanities
• Global Perspectives
• Social Justice

CHIN 111 Accelerated Elementary Chinese I (Units: 5)
Prerequisite: Consent of the instructor. Open to highly motivated students with no or limited (elementary level) proficiency in Chinese (any dialect).
Rapidly builds Mandarin proficiency of students admitted to or considering application to the Chinese Flagship Program. CHIN 111/CHIN 112 provides instruction equivalent to CHIN 101/CHIN 102/CHIN 103.
Course Attributes:
• C2: Humanities
• Global Perspectives
• Social Justice

CHIN 112 Accelerated Elementary Chinese II (Units: 5)
Prerequisite: CHIN 111 or consent of instructor.
Follows CHIN 111. Focus on listening, speaking, reading, and writing Mandarin. CHIN 111/CHIN 112 provides instruction equivalent to CHIN 101/CHIN 102/CHIN 103.
Course Attributes:
• Social Justice

CHIN 175 Flagship Preparation I (Unit: 1)
Prerequisite: Concurrent enrollment in CHIN 103 and consent of instructor.
Augments CHIN 103 for preparation for the Chinese Flagship Program.
Focus on writing; practice with traditional and simplified Chinese characters, composition, and use of electronic media for Chinese.

CHIN 228 Chinese Language and Society (Units: 3)
Introduction to theoretical concepts that have shaped production and reception of Chinese and Japanese literary and cultural texts in twentieth and twenty-first centuries; national and transnational perspective with comparative approach. Taught in English.
Course Attributes:
• C2: Humanities
• Global Perspectives

CHIN 271 The Classic Chinese Novel in Contemporary Pop Culture (Units: 3)
Exploration of legacy of China’s four great classic novels in contemporary Chinese popular culture. Analysis of original works and their adaptation in TV shows and cinema, fiction, computer games and theme parks. (This course is offered as CHIN 271 and HUM 271. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• C2: Humanities
• Global Perspectives
• Social Justice

CHIN 275 Flagship Preparation II (Units: 2)
Prerequisites: Concurrent enrollment in CHIN 303 and consent of instructor. Augments CHIN 303 for preparation for the Chinese Flagship Program.
Focus on writing; practice with traditional and simplified Chinese characters, composition, and use of electronic media for Chinese.

CHIN 280 Chinese Calligraphy (Units: 3)
An examination of Chinese character formation and evolution, as well as a survey of varieties of Chinese scripts and hands-on practice of Chinese calligraphy.

CHIN 303 Intermediate Chinese (Units: 5)
Prerequisite: CHIN 103 or consent of instructor.
Balanced focus on spoken and written Mandarin Chinese. Developing students’ oral fluency, expanding vocabulary, correcting pronunciation. Improving skills using basic texts written in Chinese characters and writing sentences in characters. Laboratory attendance required. [Formerly CHIN 250]

CHIN 311 Conversation and Reading (Units: 3)
Prerequisite: CHIN 303 or consent of instructor.
Developing proficiency in spoken Mandarin and written Chinese. Review of basic sentence patterns, vocabulary expansion, and acquisition of Chinese characters.
Course Attributes:
• Global Perspectives
CHIN 312 Speech and Writing (Units: 3)
Prerequisite: CHIN 311 or consent of instructor.

Developing proficiency in spoken Mandarin and written Chinese. Vocabulary expansion, acquisition, and retention of Chinese characters; speaking and writing skills in interactive context.

Course Attributes:

- Global Perspectives

CHIN 375 Introduction to Academic Prose (Units: 3)
Prerequisites: Intermediate Mandarin and acceptance to Flagship or permission of Director.

Training in the four skills (listening, speaking, reading, and writing) and three modes (interpersonal, interpretive, and presentational), using materials from the humanities, social sciences, and professional disciplines.

CHIN 401 Advanced Chinese (Units: 3)
Prerequisites: CHIN 311, CHIN 312, or consent of instructor.

Developing Chinese proficiency at advanced level: vocabulary expansion, acquisition, and retention of Chinese characters in both full and simplified forms; communicative competence in four skills (listening, speaking, reading, and writing).

Course Attributes:

- Global Perspectives

CHIN 410 Building Chinese Media Literacy (Units: 3)
Prerequisite: CHIN 401 or consent of instructor.

Vocabulary, structures, styles, and topics of contemporary Chinese media. Newspapers, radio and television broadcasts, websites, blogs, and social media of Greater China. Intensive focus on reading and listening, augmented by writing and presentation assignments. (This course is offered as CHIN 410 and JOUR 410, and is taught in Chinese. Students may not repeat the course under an alternate prefix.)

CHIN 411 Media Chinese (Units: 3)
Prerequisite: CHIN 401 or consent of instructor.

Mandarin as it is used in various genres on radio/television and in news reports and articles, editorials, interviews, and advertisements. (This course is offered as CHIN 411, J R 413, and JOUR 411. Students may not repeat the course under an alternate prefix.)

Course Attributes:

- Global Perspectives

CHIN 475 Flagship Chinese I (Units: 3)
Prerequisites: Intermediate level Mandarin Chinese skills and acceptance to Flagship Program or permission of its Director. Concurrent enrollment in a Flagship Content Area Course is required.

Intermediate to advanced training in all four skills and three modes of language.

CHIN 476 Flagship Chinese II (Units: 3)
Prerequisites: Intermediate level Mandarin Chinese skills and acceptance to Flagship Program or permission of its Director. Concurrent enrollment in a Flagship Content Area Course is required.

Continuation of focus on intermediate to advanced training in all four skills and three modes of language.

CHIN 501 Introduction to Classical Chinese (Units: 3)
Prerequisite: CHIN 312 (may be taken concurrently) or consent of instructor.

Stylistic and structural characteristics of classical Chinese; problems of interpretation; introduction to literary genres in cultural context.

Course Attributes:

- Global Perspectives

CHIN 502 Readings in Literary Chinese (Units: 3)
Prerequisite: CHIN 311 or CHIN 312.

Close readings of classical Chinese texts drawn from philosophical, historical, and literary sources, such as the Sishu (the Four Books), the Wujing (Five Confucian Classics), and classical Chinese poetry from the Han to the Tang. Classical Chinese grammar is studied using a hands-on approach; reading of text in original, analyze linguistic features, and socio-historical and literary context.

CHIN 507 Traditional Chinese Culture (Units: 3)
Prerequisite: CHIN 401 (may be taken concurrently) or consent of instructor.

Highlights of the development of Chinese culture from antiquity to the 19th century. Selected readings, films.

CHIN 521 Chinese Modern Fiction (Units: 3)
Prerequisite: CHIN 401 or consent of instructor.

Major authors from the May Fourth Movement and subsequent periods.

Course Attributes:

- Global Perspectives

CHIN 525 Chinese Applied Linguistics (Units: 3)
Prerequisite: CHIN 311 or consent of instructor.

Application of modern descriptive linguistics to the analysis of phonological, morphological, and syntactic structures of Mandarin.

CHIN 530 Oratory and Performance in Chinese (Units: 3)
Prerequisite: CHIN 312 or consent of instructor.

Intensive training or oral/aural skills in standard Mandarin (putonghua/guoyu) at the high intermediate to advanced levels, through preparation and participation in oratory and performance activities.

CHIN 537 The Chinese Language and Modern China (Units: 3)
Prerequisite: CHIN 312 or consent of instructor.

Introduction to the linguistic structure, historical development, and present state of Modern Standard Chinese; its relationship to the major Chinese dialect families; aspects of Chinese sociolinguistics and pragmatics.

CHIN 580 Topics in Modern Chinese Language and Literature (Units: 3)
Prerequisite: CHIN 312 or CHIN 401 or consent of instructor.

Topic to be specified in Class Schedule. May be repeated when topics vary.

CHIN 582 Topics in Classical Chinese Language and Literature (Units: 3)
Prerequisite: CHIN 501 or CHIN 502 or consent of instructor.

Advanced topics centered on works written in literary and/or classical Chinese language. Topic to be specified in Class Schedule. Topic descriptions may be found in the online Bulletin. May be repeated when topics vary.
CHIN 600 Topics in Chinese Language, Literature, and Culture in English (Units: 3)
Prerequisite: ENG 214 or consent of instructor.
Topic to be specified in Class Schedule. May be repeated when topics vary.

CHIN 601GW The Poetic Tradition - GWAR (Units: 3)
Prerequisite: ENG 214 with a grade of C- or better or consent of instructor.
Major Chinese poets from antiquity to late imperial times, discussed in cultural context. Taught in English. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment
• Global Perspectives

CHIN 602 The Narrative Tradition in English (Units: 3)
Prerequisite for CHIN 802: Admission to Chinese M.A. program or consent of instructor.
Prerequisite for CHIN 602: ENG 214 or equivalent or consent of instructor.
Chinese literary tradition, ranging from philosophical essays, historical writings, fiction and drama, from 500 B.C. to novels of late 19th Century. Taught in English.
(CHIN 802/CHIN 602 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CHIN 611GW The Revolutionary Tradition in Modern Chinese Literature - GWAR (Units: 3)
Prerequisites: Upper division standing; ENG 214 or equivalent with a grade of C- or better, or consent of instructor.
Introduction to 20th century Chinese literature and thought with particular focus on politically motivated writers; critical engagement with the most important intellectual trends and political movements from the last days of Imperial rule to the present. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment
• Global Perspectives

CHIN 612GW Negotiating Chineseness in the Late 20th and 21st Centuries - GWAR (Units: 3)
Prerequisites: Upper division standing: Chinese majors; ENG 214 or equivalent with a grade of C- or better, or consent of instructor
Exploration of multiple negotiation of Chineseness through a wide range of texts from the People's Republic, Taiwan, Hong Kong, and the Chinese Diaspora. Focus on literary, cinematic and critical works produced between 1970 and present. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment
• Global Perspectives

CHIN 699 Independent Study (Units: 1-3)
Prerequisite: Consent of department chair and instructor. Open only to undergraduate students who have demonstrated ability to do independent work.
Written projects requiring critical analysis and interpretation of literary, linguistic, or pedagogical problems.

CHIN 785 Projects in the Teaching of Chinese (Units: 1-3)
Prerequisites: Graduate standing; tutoring appointment in the Chinese Flagship Program.
Experience with proficiency-based methods for teaching Chinese. Supervising faculty member offers individual direction and group pedagogy sessions. Enrollment for 1-3 units (1 unit requires 2 hours tutoring and 1 hour preparation weekly). May be repeated for a total of 4 units maximum. (CR/NC grading only)

CHIN 799 Chinese Tutorial Practicum (Units: 3)
Prerequisite: Admission to the Chinese M.A. program.
Development of pedagogical skills for language teaching to individuals and small groups. Students engage in tutorial practicum, under supervision. Lectures/workshops on Teaching Chinese as a Second Language supplement practical experience. May be repeated for 3 units. (CR/NC grading only)

CHIN 802 The Narrative Tradition in English (Units: 3)
Prerequisite for CHIN 802: Admission to Chinese M.A. program or consent of instructor.
Prerequisite for CHIN 602: ENG 214 or equivalent or consent of instructor.
Chinese literary tradition, ranging from philosophical essays, historical writings, fiction and drama, from 500 B.C. to novels of late 19th Century. Taught in English.
(CHIN 802/CHIN 602 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CHIN 820 The Road To Modernity Part 1: Chinese Literary Trends of the Late Imperial and Republican Periods (Units: 3)
Prerequisite: Graduate standing or consent of instructor.
Examination of the most important literary trends and genres (fiction, poetry, drama, reportage) that have shaped the development of modern Chinese literature from the 1850s until 1945. Will constitute part 1- of a 2-part survey of modern Chinese literature.

CHIN 821 Modern Chinese Literature (Units: 3)
Prerequisite: Admission to Chinese program or consent of instructor.
Readings by major authors from the May Fourth Movement to the present, as well as selections from secondary scholarship.

CHIN 822 Classical Chinese Literature (Units: 3)
Prerequisite: Admission to Chinese program or consent of instructor.
Classical philosophical, historical, and bellettristic writings.

CHIN 824 Testing & Assessment in Teaching/Learning Chinese as a Second Language (Units: 3)
Prerequisite: Admission to Chinese M.A. program or consent of instructor.
Survey of research and methods in testing/assessment in Teaching Chinese as a Second/Foreign Language. Focus on standards for measuring language competence, professionalism, and program reviews.

CHIN 825 Applied Linguistics and Teaching Chinese (Units: 3)
Prerequisite: Admission to Chinese program or consent of instructor.
Investigation of practical issues pertinent to second language acquisition and pedagogy in Teaching Chinese as a Second Language.
CHIN 826 Semantics and Morphology (Units: 3)
Prerequisite: Admission to Chinese M.A. program, or CHIN 401 and consent of instructor.

Introduction to linguistic meaning and word formation in Chinese. Chinese semantics, pragmatics, morphology in light of recent findings in cognitive science.

CHIN 827 Language Change and Dialectic Variation (Units: 3)
Prerequisite: MLL 325 [formerly F L 325] or equivalent.

Introduction to mechanisms of language change and their application to Chinese historical linguistics and modern dialect classification. Topics include sound change, lexical change, grammaticalization, linguistic reconstruction, language typology, and Chinese philology.

CHIN 837 Materials Development for Teaching Chinese (Units: 3)
Prerequisite: Admission to Chinese M.A. program or consent of instructor.

CHIN 881 Translation (Units: 3)
Prerequisite: Admission to Chinese M.A. program, or consent of instructor.

Translation theory and its application to English and Chinese. Topics include meaning, levels of equivalence, fidelity and authorship, metaphor and idiomatic language, domesticating and foreignizing strategies, transliteration and romanization, translation of specific genres, Chinese translation theory, and translation research.

CHIN 882 Consecutive and Simultaneous Interpreting (Units: 3)
Prerequisite: Graduate standing or consent of instructor.

Seminar focusing on general English-Chinese and Chinese-English liaison, consecutive and simultaneous interpreting. Training in shadowing, note-taking, and effort management, leading to build-up of skills inconsecutive and simultaneous interpreting.

CHIN 883 Advanced Translation and Interpreting (Units: 3)
Prerequisites: Graduate standing; CHIN 881, CHIN 882; or consent of instructor.

Training in the translation of literary texts and in conference interpreting. Translation portion focuses on Chinese literary works and methods of transforming the aesthetic and the cultural; interpreting segment will provide training in consecutive and simultaneous interpreting.

CHIN 896EXM Culminating Experience Examination (Units: 0-3)
Prerequisites: Consent of instructor, committee chair, and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.

Enrollment in 896EXAM required for students whose culminating experience consists of an examination only. (CR/NC, RP)

CHIN 899 Independent Study (Units: 1-3)
Prerequisites: Consent of the graduate major adviser and the supervising faculty member. Enrollment by petition.

Study is planned, developed, and completed under the direction of a member of the departmental faculty. Open only to graduate students who have demonstrated ability to do independent work.
Cinema (CINE)

CINE 102 Introduction to Contemporary Cinema (Units: 3)
Studies in recent filmmaking. Dominant forms (Hollywood, Europe) and
alternative modes (documentary, experimental). How films reflect and
contribute to the values and culture of a society.
Course Attributes:
• C1: Arts
• Global Perspectives

CINE 200 Introduction to Cinema Studies (Units: 3)
Prerequisites: Restricted to sophomore standing or above; Cinema
majors and minors; or consent of instructor.
Expressive properties and codes of cinema. Mainstream and alternative
traditions of film: Hollywood, the art film, documentary, third cinema, the
avant-garde. Basic critical methods and perspectives. Must be completed
with a grade of C or better.

CINE 202 Introduction to Filmmaking (Units: 3)
Prerequisite: Restricted to sophomore standing or above; Cinema majors;
or consent of instructor; concurrent enrollment in CINE 204.
Introductory survey of film production. Operation, function, and creative
use of filmmaking tools common to development, pre-production,
production, post-production, and distribution. Exploration of technical
considerations, the language of filmmaking, and creating meaning in
cinema.

CINE 204 Introduction to Filmmaking Laboratory (Unit: 1)
Prerequisites: Sophomore standing or above or consent of instructor,
Cinema majors, concurrent enrollment in CINE 202.
Practice in the creative use of filmmaking tools common to pre-
production, production, and post-production. Development and execution
of short individual and group film projects designed to explore creative
problem-solving in motion picture production. (Plus-minus letter grade
only)

CINE 211 Film History I (Units: 3)
Prerequisites: Restricted to sophomore standing or above; Cinema major
or minor; or consent of instructor.
Narrative, documentary, and experimental films (1895-1945), including
directors such as Griffith, Murnau, Eisenstein, Pudovkin, Bunuel, Chaplin,
Richter, Dreyer, Pabst, Lorentz, Deren, Cocteau. Must be completed with a
grade of C or better.

CINE 212 Film History II (Units: 3)
Prerequisites: Restricted to sophomore standing or above; Cinema major
or minor; or consent of instructor.
Narrative, documentary and experimental films since 1945, including
directors such as de Sica, Rossellini, Clair, Bergman, Fellini, Brakhage,
Kurosawa, Ray, Truffaut, Antonioni, Rouch, and Godard. Must be
completed with a grade of C or better.

CINE 280 The Ancient World in Film (Units: 3)
Prerequisite: ENG 114 or equivalent.
Examination of how ancient Greek and Roman myth and history are
represented in film, often as a way of looking critically at modern society
and its values.
(This course is offered as CLAS 280 and CINE 280. Students may not
repeat the course under an alternate prefix.)
Course Attributes:
• C2: Humanities

CINE 301 Introduction to Film Studies and Production (Units: 3)
Prerequisite: Restricted to upper division Cinema major or minor; or
consent of instructor.
Introduction to the basic principles of film studies and production;
historical development of film, taking into consideration technical
developments and the evolution of film aesthetics.

CINE 303GW Writing About Cinema - GWAR (Units: 3)
Prerequisites: Upper division Cinema major; ENG 214 or equivalent with a
grade of C- or better; or consent of instructor.
Advanced analysis and persuasive writing. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment

CINE 304 Gender and Film (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Critical examination of issues related to the representation of gender
and sexuality in Cinema. Topic to be specified in Class Schedule. May be
repeated for a total of 9 units as topics vary.

CINE 305 Film and the Holocaust (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
The use of film to promote, document, and dramatize the Holocaust.
Filmmakers who have sought to give expression to its human scale.
Significant works which have helped define the issues.
(This course is offered as CINE 305 and JS 405. Students may not repeat
the course under an alternate prefix.)

CINE 306 Chinese Documentary Film (Units: 3)
Prerequisites: CINE 200, CINE 202.
Study of contemporary Chinese documentary since the 1980s;
exploration of the cultural, social, and aesthetical context of Chinese
documentary films and filmmaking.

CINE 308 Third Cinema (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Critical perspectives on the aesthetics, cultural underpinnings and
political/historical context of films produced within societies formerly
called "third world." Topics to be specified in the class schedule. May be
repeated for a total of 6 units as topics vary.

CINE 310 Workshop in Film Production (Units: 3)
Prerequisites: Restricted to upper division Cinema major; CINE 200,
CINE 202, CINE 204, CINE 211, CINE 212, or equivalents, with grades of C
or better; or consent of instructor; concurrent enrollment in CINE 316.
Film production workshop where students are required to design and
complete solutions to a set of exercises featuring camera, sound, editing,
and writing.
CINE 315 Cinema Production: Technical Crew (Unit: 1)
Prerequisites: CINE 310, CINE 316, or equivalents, and consent of instructor.
Experience in phases of technical crew work associated with cinema productions. May be repeated for a total of 6 units. (CR/NC grading only)

CINE 316 Film Production Laboratory (Unit: 1)
Prerequisites: Restricted to upper division Cinema major or minor; CINE 200, CINE 202, CINE 204, CINE 211, CINE 212, or equivalents, with grades of C or better, or consent of instructor; concurrent enrollment in CINE 310.
Experience in 16mm production, including use of camera, lighting, sound, and editing equipment.

CINE 325 Focus on Film Topics (Unit: 1)
Prerequisite: Upper division standing or consent of instructor.
Case studies and critical analyses of influential filmmakers, performers, or movements in Cinema. Topic to be specified in Class Schedule. May be repeated for a total of 4 units in any combination of CINE 325, CINE 326, and CINE 650 and as topics vary. (CR/NC grading only)

CINE 326 Film Festivals, Archives, and Movements in the San Francisco Bay Area (Unit: 1)
Prerequisites: Upper division standing; ENG 214 or equivalent.
Exploration of the rich and diverse film culture of the S.F. Bay Area, including film societies, archives, and established festivals. Presents the model of film festival as a business with complex organizational and marketing challenges. Introduces the intricacies of the selection process for films submitted to festivals. May be repeated for a total of 4 units in any combination of CINE 325, CINE 326, and CINE 650 as topics vary. (CR/NC grading only)

CINE 327 Anthropology and Film (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Social and cultural anthropology through films, ethnographies, and popular writings of anthropologists.
(This course is offered as ANTH 327 and CINE 327. Students may not repeat the course under an alternate prefix.)
Course Attributes:
- UD-D: Social Sciences
- Global Perspectives

CINE 331 Hollywood Representation of Race and Ethnicity (Units: 3)
Prerequisites: Upper division standing; ENG 214 or equivalent with a grade of C- or better.
Examination of the representation and narration of race and ethnicity in American Cinema. Employs critical and cultural theory as means to uncover the social significance of race as an ideological formation intertwined with the art and industry of American film.
Course Attributes:
- Am. Ethnic & Racial Minorities

CINE 332 Understanding the Representation and Narration of Sexuality in Cinema (Units: 3)
Prerequisites: Upper division standing; ENG 214 or equivalent; or consent of instructor.
Examination of the representation and narration of sexuality in cinema with an emphasis on Hollywood. Employs critical and cultural theory, including critical race, queer, and feminist theory, as means to uncover the social and political significance of sexuality in cinema. Explores ways in which cinema reflects and refracts ideologies associated with sexual identity and expression.
(This course is offered as CINE 332 and SXS 332. Students may not repeat the course under an alternate prefix.)

CINE 340 Critical Studies (Units: 3)
Prerequisites: Restricted to upper division Cinema major or minor; ENG 214 or equivalent, completion of core requirements (CINE 200, CINE 202, CINE 204, CINE 211, CINE 212) with grades of C or better; concurrent enrollment in CINE 341; or consent of instructor.
Critical approaches for analyzing cinema. (Plus-minus letter grade only)

CINE 341 Critical Studies Discussion Group (Unit: 1)
Prerequisites: Restricted to upper division Cinema major or minor; ENG 214 or equivalent, completion of core requirements (CINE 200, CINE 202, CINE 204, CINE 211, CINE 212) with grades of C or better; concurrent enrollment in CINE 340, or consent of instructor.
Applied critical studies, including writing, discussion, and research about cinema. (Plus-minus letter grade only)

CINE 342 Documentary Film (Units: 3)
Prerequisites: Cinema major or minor; ENG 214 or equivalent with a grade of C- or better, CINE 200, CINE 202, CINE 204, CINE 211, CINE 212, with grades of C or better; or consent of instructor.
Development and shifting roles of non-fiction, live action film; significant work of such figures as Flaherty, Vertov, Riefenstahl, Grierson, Leacock-Pennebaker, and Marker.

CINE 342GW Documentary Film - GWAR (Units: 3)
Prerequisites: Upper division cinema major; ENG 214 or equivalent with a grade of C- or better; or consent of instructor.
Development and shifting roles of non-fiction, live action film; significant work of such figures as Flaherty, Vertov, Riefenstahl, Grierson, Leacock-Pennebaker, and Marker. (ABC/NC grading only)
Course Attributes:
- Graduation Writing Assessment

CINE 344 Film Genre (Units: 3)
Prerequisites: Restricted to upper division Cinema major or minor; CINE 200, CINE 202, CINE 204, CINE 211, CINE 212, or equivalents, with grades of C or better; or consent of instructor.
Critical examination of a film genre focusing on key historical and theoretical issues. Topic to be specified in Class Schedule. May be repeated for a total of 9 units as topics vary.
CINE 346 The Art of Short Film (Units: 3)
Prerequisites: Upper division standing, ENG 214 or equivalent with grade of C- or better, Cinema major, or consent of instructor.

Examination of short film as a unique form of expression deserving serious study apart from the study of feature length films. Unique structural, aesthetic, and rhetorical dimensions of both fiction and nonfiction short films.

CINE 346GW The Art of Short Film - GWAR (Units: 3)
Prerequisites: Upper division Cinema major; ENG 214 or equivalent with a grade of C- or better; or consent of instructor.

Examination of short film as a unique form of expression deserving serious study apart from the study of feature length films. Unique structural, aesthetic, and rhetorical dimensions of both fiction and nonfiction short films. (ABC/NC grading only)

Course Attributes:
- Graduation Writing Assessment

CINE 356 Fundamentals of Screenwriting (Units: 3)
Prerequisites: Upper division cinema major or minor; CINE 200, CINE 202, CINE 204, CINE 211, CINE 212, or equivalents with grades of C or better, ENG 214 or equivalent with a grade of C- or better; or consent of instructor.

Introduction to the principles of screenwriting; historical context for the development of dramatic writing. [Formerly CINE 353]

CINE 360 Animation I (Units: 3)
Prerequisites: Upper division standing and consent of instructor.

Aesthetics, dynamics of movement, and techniques of animation. Projects in varied media and methods. Laboratory. Extra fee required.

CINE 361 Drawing for Animation (Units: 3)
Prerequisites: Upper division standing and consent of instructor.

Studies in drawing techniques for animation: gesture and movement, kinetic volume, and abstraction of motion. May be repeated for a total of 9 units.

CINE 362 Animation II (Units: 3)
Prerequisites: CINE 360, CINE 423 (may be taken concurrently), and consent of instructor.

Developing storyboard and sound animation techniques. Laboratory. May be repeated for a total of 6 units. Extra fee required.

CINE 364 Animation Pre-Production (Units: 3)
Prerequisites: Upper division standing and consent of instructor.

Visual planning and picture/sound relationship including scripting, storyboarding, and soundtrack design.

CINE 365 History of Animation (Units: 3)
Prerequisite: Upper division standing.

Animated filmmaking around the world, from origins in graphic and photographic arts to current and future trends in film and electronic media. Varied techniques produced by studios and individual artists.

CINE 372 Film Theory (Units: 3)
Prerequisites: CINE 340, CINE 341, or consent of instructor.

Seminar in aesthetics with an analysis of theoretical and critical writing on film.

CINE 373 Film and Society (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Major social issues through analysis of film texts: race, class, gender and sexual role, feminism, ideology, political movements, social and historical change.

CINE 375 U.S. Culture and Cinema of the 1950s (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Analysis of representative Hollywood films of the 1950s in light of contemporary political, ideological, social, and economic shifts in U.S. culture, with the goal of understanding the historical precursors of current conceptions of the relationship between individuals and society.

Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

CINE 376 Cinema Department Internship (Unit: 1)
Prerequisite: Upper division Cinema majors.

Development of research, writing, and technical skills; training in production practices and technical equipment. May be repeated for a total of 9 units. (CR/NC grading only)

CINE 380 Principles of Computer Animation (Units: 2)
Introduction to the Maya interface and fundamental concepts of computer animation. With assignments that mix modeling, animation, lighting and render, this hands-on class will focus on basic interface overview and prepare students to enter the more specific aspects that are at the core of the program.

CINE 382 Animation Story Workshop (Unit: 1)
Exploration of different visual narrative techniques that are specific to the animation medium. Focus on timing, character development, story, character arcs and conflicts, and how to use them to create a compelling short suitable for computer animation; development of collaborative skills and experiment with visual storytelling.

CINE 383 How to bring a Digital Character to Life (Unit: 1)
Exploration of different techniques that help bring a digital character to life. Focus on group exercises and games, developing observation skills and creativity, how different body postures and facial expressions can help communicate different ideas, and tools necessary to enhance the performance of digital animated characters on screen.

CINE 384 Breaking into the Industry (Unit: 1)
Realistic ways to break into the animation industry; creating a good presentation package and locating the type of work that interest to you; different ways to build the skills necessary to be a desirable artist in the field of computer animation; current job market for animation, types of jobs, freelance work, work ethics; copyrights, licensing music for their films, and other legal

CINE 386 Short Subject Animation (Unit: 1)
Prerequisite: CINE 380 or equivalent.

Students will expand their knowledge of their introductory course into digital animation; storyboard, model, shade, rig, animate, light, and edit their own movies.
CINE 401 National/Regional Cinemas (Units: 3)
Prerequisites: CINE 340, CINE 341, or consent of instructor.
Critical exploration of a given national or regional cinema, addressing the impact of cultural specificity on film production and consumption. Topic to be specified in Class Schedule. May be repeated for a total of 9 units as topics vary.

CINE 402 Arab Cinema (Units: 3)
Prerequisites: Upper division standing; Cinema major or minor; or Middle East and Islamic Studies minor; CINE 340, CINE 341, or consent of instructor.
Arab history, themes, motifs, aesthetics and cultural traditions. (This course is offered as CINE 402 and MEIS 402. Students may not repeat the course under an alternate prefix.)

CINE 402GW Arab Cinema - GWAR (Units: 3)
Prerequisites: Upper division Cinema major; ENG 214 or equivalent with a grade of C- or better; or consent of instructor.
Examination of historical and contemporary debates about Arab cinemas; history of national film industries and film cultures in the region; consideration of contemporary experimental filmmakers and media artists such as Mona Hatoum, Akram Zaatari, and Mounir Fatmi. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment

CINE 407 History and Film (Units: 3)
Prerequisites: CINE 340, CINE 341, or consent of instructor.
Examination of historical events as they are presented in film. Representative examples might include narrative, documentary, and experimental films. Topic to be specified in Class Schedule. May be repeated for a total of 6 units as topics vary.

CINE 408 Israeli Cinema (Units: 3)
Prerequisite: ENG 214 or equivalent.
Survey of Israeli cinema with critical readings. (This course is offered as JS 408 and CINE 408. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-C: Arts and/or Humanities
• Global Perspectives

CINE 409 Latina/o Cinema (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Examination of Latino history using Latino themed and produced film. The power of stereotypes, global dissemination of film and examples of the ways in which Latin American and U.S. Latina/o filmmakers respond to stereotypes by creating cinematic counter-discourses. (This course is offered as LTNS 409 and CINE 409. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-C: Arts and/or Humanities
• Am. Ethnic & Racial Minorities
• Global Perspectives
• Social Justice

CINE 410 Art and Film (Units: 3)
Prerequisites: CINE 340, CINE 341, or consent of instructor.
Consideration of art and the artist in historical context. How does film situate the artist within the fabric of a given culture? How do we situate an artist who makes films?

CINE 410GW Art and Film - GWAR (Units: 3)
Prerequisites: Upper division standing; Cinema major; ENG 214 or equivalent with a grade of C- or better; or consent of instructor.
Consideration of debates between film studies, art history, and visual studies. Focus on key film artists, such as Farocki, Weerasethakul, Marker, and Ackerman. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment

CINE 423 Introduction to Digital Filmmaking (Units: 3)
Prerequisites: CINE 310 or CINE 360, consent of instructor.
The aesthetics and production techniques of filmmaking using digital tools and processes.

CINE 425 Art of Cinematography (Units: 3)
Prerequisites: CINE 340, CINE 341, or consent of instructor.
Survey of outstanding cinematographers and films in the world film history; examination of art, aesthetics, photography elements and cinematic techniques in cinematography.

CINE 430 Documentary Filmmaking Workshop (Units: 3)
Prerequisites: Restricted to Cinema major or minor; CINE 310, CINE 316, or equivalents; or consent of instructor.
Survey documentary production in a variety of non-fiction filmmaking techniques and practice. Emphasis on new media distribution and storytelling strategies for the deployment and impact of socially conscious documentaries. (Plus-minus letter grade only)

CINE 432 Drawing for Digital Animation (Units: 2)
Use of drawings to plan animation scenes and to communicate ideas that are central to the art of animation, such as line of action, pose, movement, and acting. Emphasis on gesture and movement.

CINE 441 Signs of Aliens: Semiotics of Film and Popular Culture (Units: 3)
Prerequisites: Upper division standing; ENG 214 or equivalent.
The sign of the alien, an element of popular culture, encompasses troubling ideologies such as xenophobia and racism. Through semiotics and cultural studies, alienation is examined as an aesthetic expression and value system reflected in immigration, race, sexuality, and more.
Course Attributes:
• Social Justice

CINE 442 Producing and Financing Films I (Units: 3)
Prerequisites: Restricted to upper division Cinema majors and minors; CINE 310.
Economics of production, budgeting, breakdowns, financing and contracts, distribution and exhibition, censorship, copyright, libel and slander, law of privacy, releases. Hands-on producing of senior thesis film project. First part of two-semester sequence with CINE 542. Culminating experience for producing-oriented students. (Plus-minus letter grade only)
CINE 454 Writing Short Films (Units: 3)
Prerequisites: Restricted to Cinema major or minor; CINE 200, CINE 202, CINE 204, CINE 211, CINE 212, or equivalents, with grades of C or better; ENG 214 or equivalent with grade of C- or better; or consent of instructor.
Exploration of visual and verbal screenwriting strategies for developing short films in both standard and experimental formats. [Formerly CINE 354]

CINE 456 Feature Screenwriting I (Units: 3)
Prerequisites: Cinema major or minor; CINE 356; or consent of instructor.
Practice in film writing, emphasizing story and plot dynamics, characterization, narration, dialogue, script forms, and alternatives. Analysis of current motion picture scripts. [Formerly CINE 355]

CINE 466 Animation III (Units: 3)
Prerequisites: CINE 362 and consent of instructor.
Workshop emphasizing completion of soundtracks, editing, and laboratory operations for projects. May be repeated for a total of 9 units. Extra fee may be required.

CINE 468 Advanced Animation Workshop (Units: 3)
Prerequisites: CINE 362 and consent of instructor.
Study, design, and execute a variety of visual effects. Aesthetic integration of effects into existing film projects and experimental animation. Laboratory. May be repeated for a total of 9 units.

CINE 500 Stop-Motion Animation (Units: 3)
Prerequisites: Upper division standing or CINE 310; restricted to Cinema majors and Animation minors.
Aesthetics and production of stop-motion and mixed-media animation. Practice using traditional and digital animation techniques for creative, cinematic storytelling. (Plus-minus letter grade only)

CINE 502 Experiments in Cinematic Form (Units: 3)
Prerequisites: CINE 340, CINE 341; or consent of instructor.
Focus on experimental cinematic forms, from radical experimental films emphasizing social aesthetic modes, periods, and artists, to contemporary explorations of forms outside the conventional cinematic infrastructure. Topic to be specified in Class Schedule. May be repeated for a total of 9 units when topics vary.

CINE 506 Cinematheque Management (Units: 3)
Prerequisites: CINE 340, CINE 341; or consent of instructor.
Practical experience in presenting film and video offerings to the public. Program planning; promotion and publicity, house management and public relations. May be repeated for a total of 6 units.

CINE 508 Film Authorship (Units: 3)
Prerequisites: CINE 340, CINE 341; or consent of instructor.
A case study on directors, stars, studios, writers, producers or others who may be the creative force behind a given film. Topic to be specified in Class Schedule. May be repeated for a total of 9 units as topics vary.

CINE 510 Directing Visual Style (Units: 3)
Prerequisites: Upper division Cinema major; CINE 310 or equivalent; and consent of instructor.
Creative role of the director, manipulation of space and time, problems of continuity, script planning and blocking, visual style and authorship. Laboratory.

CINE 512 Sound Production for Cinema (Units: 3)
Prerequisites: Restricted to upper division Cinema major; CINE 310 or equivalent; consent of instructor.
Laboratory in aesthetics of field and studio recording. Practice in production recording, sound effects, narration, and foley production. Preparation of tracks and post-production manipulation of sound across film genres.

CINE 514 Performing for the Screen (Unit: 1)
Prerequisites: Upper division standing and consent of instructor.
Exploration and practice of issues related to performing for the camera. Instruction and critique for preparing scene work, engaging in rehearsals, and acting on-set. Laboratory. May be repeated for a total of 3 units.

CINE 515 Directing Actors (Units: 3)
Prerequisites: Restricted to upper division cinema major; CINE 310, CINE 316; and consent of instructor.
Creative role of director; focus on directing actors for character-driven work.

CINE 519 Soundstage Workshop (Unit: 1)
Prerequisites: CINE 310 or CINE 710 or equivalent and consent of instructor. Laboratory in lighting for film. Aesthetic and atmospheric effects of film lighting. Extra fee required. (CR/NC grading only)

CINE 520 Sound Post-Production for Cinema (Units: 3)
Prerequisites: Restricted to upper division Cinema major; CINE 310 or equivalent; consent of instructor.
Preparation and editing of multiple sound tracks. Recording and mixing of sound tracks for picture using file-based technologies.

CINE 521 Media Archaeology in Cinema (Units: 3)
Prerequisites: Restricted to Cinema major or minor; CINE 310 or CINE 710; or consent of instructor.
Exploration of the meaning, histories, and strategies of the creative re-use of media in cinema. May be repeated for a total of 6 units. (Plus-minus letter grade only)

CINE 522 Projects in Film Editing (Units: 3)
Prerequisites: CINE 310 or CINE 710, consent of instructor.
Techniques and aesthetics of film editing. Extra fee required. May be repeated for a total of 6 units.

CINE 523 Exploration in Interactive Cinema (Units: 3)
Prerequisites: CINE 310 or CINE 360, consent of instructor.
Conceptualization, programming, production, and presentation of cinema using interactive digital tools and processes. May be repeated for a total of 6 units.

CINE 524 Exploring Sound Design for Cinema (Units: 3)
Prerequisites: Restricted to upper division Cinema major; CINE 310 or equivalent; consent of instructor.
Examination of sound design for cinema focusing on computer-based technologies. Evaluation of sound/picture relationships.

CINE 525 Cinematography and Lighting (Units: 3)
Prerequisites: CINE 310 or CINE 710 or equivalent, consent of instructor.
Skills and aesthetics of cinematography and lighting. Extra fee required.
CINE 526 Optical Printing (Units: 3)
Prerequisites: CINE 310 or CINE 710 or equivalent, consent of instructor.

Optical printing for motion pictures.

CINE 527 Documentary for Health and Social Justice I (Units: 6)
Prerequisites: ENG 214 or equivalent; consent of instructor.

Hands-on collaborative production of social justice and health documentary films. Preproduction research includes identifying issues and community participants. Screening, critiquing, and editing. May be repeated for a total of 12 units.
(This course is offered as CINE 527 and H ED 527. Students may not repeat the course under an alternate prefix.)

CINE 528 Documentary for Health and Social Justice II (Units: 6)
Prerequisites: ENG 214 or equivalent, CINE 527 or H ED 527; consent of instructor.

Production of documentary films with a focus on issues related to social justice and health. Includes research to identify salient issues and community participants. Develops proficiency in various stages of documentary filmmaking (pre-production, production, post-production). Culminates in public screening of film projects. Lecture, 3 units; activity, 3 units.
(This course is offered as CINE 528 and H ED 528. Students may not repeat the course under an alternate prefix.)

CINE 529 Experimental Filmmaking (Units: 3)
Prerequisites: CINE 310 or CINE 710 or equivalent, consent of instructor.

Exploration of experimental film aesthetics, techniques, and practices. Projects in varied media and methods.

CINE 530 Digital Cinematography (Units: 3)
Prerequisites: Restricted to upper division Cinema major; consent of instructor.

Skills, techniques, and aesthetics in digital cinematography. Practice in fields and studio digital cinematography and lighting. Post-production digital workflow and imaging manipulation. May be repeated for a total of 6 units.

CINE 531 Modeling/Rigging I (Units: 2)
Introduction to the fundamental concepts of modeling and rigging for a computer generated production, with a strong focus on modeling.

CINE 532 International Documentary Workshop (Units: 6)
Prerequisites: Upper division standing, prior approval of project proposal.

A cross-cultural student program with the collaboration of comparable film or relevant cultural or academic programs or established community organizations in other countries. Students will broaden their cultural vision and develop their cinematic techniques in a global context. May be repeated for a total of 12 units.

CINE 533 Modeling/Rigging II (Units: 2)
Prerequisite: CINE 380.

Advanced concepts of modeling and rigging for a CC production, such as character rig, facial rig, blend shapes, expressions and driven keys. Techniques to build and rig characters.

CINE 534 Digital Animation Level III: Character Animation (Units: 3)
Prerequisites: CINE 380, CINE 530, CINE 532.

Focus on character animation, including pantomime, face expressions and dialogue for digital characters. Assignments introduce students to a more detailed investigation of character animation. More advanced concepts such as rhythm, contrast, phrasing, meaning, and energy will be carefully studied through lectures, assignments and class critique of student work.

CINE 535 Lighting/Texturing I (Units: 2)
Prerequisite: CINE 380.

Introduction to the fundamental concepts and practices of lighting and texturing for a computer generated production; concepts such as 3 point studio lighting and use of color and contrast; lighting as a way to enhance story points and an excellent aid to good storytelling in Animation.

CINE 536 Studio Class (Units: 3)
Prerequisites: CINE 430, CINE 530, CINE 531, CINE 532, CINE 533, CINE 534, CINE 535, and CINE 537.

Using knowledge from previous classes, work toward the completion of a short animated sequence. Work with advanced acting for two characters, model and/or rig props and other models needed for the sequence. Create the visual look for the storytelling by placing lights textures and materials.

CINE 537 Lighting/Texturing II (Units: 2)
Prerequisites: CINE 380, CINE 535.

Advance knowledge of lighting, rendering and texturing, working with animated scenes and moving objects, and using lighting as a way to convey and emphasize scene emotional tone, character’s mood and story points. The advanced use of color, shadows, shape, motion blur and contrast.

CINE 538 Digital Animation Level I: Mechanics of Movement (Units: 3)
Prerequisite: CINE 380.

Focus on mechanics of movement and principles of animation. Developing a critical eye for movement and animation, and progressively getting comfortable with the interface and practices of Maya. [Formerly CINE 530-CEL only]

CINE 539 Digital Animation Level II: Body Mechanics (Units: 3)
Prerequisites: CINE 380 and CINE 532 (formerly CINE 530-CEL only).

Advanced study of principles of animation. Introduction to acting; short films and scenes of feature-animated and live-action feature films will illustrate the many concepts studied. [Formerly CINE 532-CEL only]

CINE 540 Issues in Film Theory (Units: 3)
Prerequisites: CINE 340, CINE 341, or consent of instructor.

Advanced study of selected methods or issue in film theory. Topics to be specified in Class Schedule. May be repeated for a total of 6 units as topics vary. (Plus-minus letter grade only)

CINE 541 Race, Sex, and Identity Online (Units: 3)
Prerequisites: Upper division standing, ENG 214 or equivalent.

Analysis of the relationship between race, sex, and social identity online. Examination of race, gender, sexuality, capitalism, and the politics of social resistance as manifested in online media.
CINE 542 Producing and Financing Films II (Units: 3)
Prerequisites: Restricted to upper division Cinema major or minor; CINE 442, or consent of instructor.

Examines the economics of post-production, marketing, distribution and exhibition of independent films. Explores the role of the producer during post-production stage of independent filmmaking. Hands-on experience with senior thesis film. Part two of two-semester sequence (following CINE 442). (Plus-minus letter grade)

CINE 551 2D Digital Animation (Units: 3)
Prerequisites: Upper division standing and consent of instructor. Priority enrollment for Cinema majors.

Exploring the aesthetics, structures and techniques of experimental, documentary and narrative 2D digital animation.

CINE 554 Writing for Documentary and Nonfiction (Units: 3)
Prerequisites: Upper division Cinema major or minor; CINE 456; or consent of instructor.

Teaches the writing of a script for a documentary film project. Examines research process for documentary concept. Develops techniques for writing treatments and creating visual plans. Explores methods of incorporating interviews and other nonfiction devices.

CINE 556 Feature Screenwriting II (Units: 3)
Prerequisites: Cinema major or minor; CINE 456.

Advanced practice in conceptualizing and writing scripts. [Formerly CINE 455]

CINE 568 Creating Story Worlds (Units: 3)
Prerequisites: Restricted to Cinema majors; CINE 356; or consent of instructor.

Focus on the development of creative intellectual properties for screenwriting and other media to produce deep, coherent and flexible story worlds that can generate successful narratives across platforms.

CINE 595 Visual Anthropology I (Units: 6)
Prerequisites: Restricted to Anthropology or Cinema major; ANTH 120, ANTH 300; or consent of instructor.

Introduction to ethnographic digital video production, including methods of ethnographic fieldwork, creation of field notes and research design; basics of digital video planning, production and editing. Classwork 3 units; laboratory and fieldwork 3 units. [CSL may be available] (This course is offered as ANTH 595 and CINE 595. Students may not repeat the course under an alternate prefix.)

CINE 596 Visual Anthropology II (Units: 4)
Prerequisites: Restricted to Anthropology or Cinema major; ANTH 595 or CINE 595; or consent of instructor.

Advanced filmmaking-based applied anthropological fieldwork, collaboration, and digital post-production techniques. Students complete a video for which they conducted research during the previous semester. Classwork, 2 units; laboratory and fieldwork, 2 units. [CSL may be available] (This course is offered as ANTH 596 and CINE 596. Students may not repeat the course under an alternate prefix.)

CINE 610 Senior Critical Studies Seminar (Units: 3)
Prerequisites: CINE 211, CINE 212, CINE 372, with grades of C or better.

Original research, seminar reports, close analysis, Refining critical skills, developing project outline for work to be produced within an independent studies format. (Plus-minus letter grade only)

CINE 620 Advanced Fiction Filmmaking I (Units: 3)
Prerequisites: Restricted to upper division Cinema majors; CINE 310 or equivalent; consent of instructor. Concurrent enrollment in CINE 624; portfolio required. CINE 510 and/or CINE 515, CINE 346 and/or CINE 454 are recommended.

Development and production of senior thesis fiction film; culminating experience for Fiction Emphasis. Extra fee required. (Plus-minus letter grade only)

CINE 622 Advanced Fiction Filmmaking II (Units: 3)
Prerequisites: Restricted to upper division Cinema majors; CINE 620; consent of instructor. Concurrent enrollment in CINE 624; portfolio required.

Post-production phase (editing, sound design, grading, mixing) of senior thesis fiction film. Extra fee required. (Plus-minus letter grade only)

CINE 623 Exploration in Cinema as an On-Line Medium (Units: 3)
Prerequisites: CINE 310 or CINE 360, consent of instructor.

Conceptualization, programming, production, and presentation of cinema on the Internet, using digital tools and processes. May be repeated for a total of 6 units.

CINE 624 Advanced Production Crafts (Unit: 1)
Prerequisites: Restricted to upper division Cinema major; concurrent enrollment in CINE 620 or CINE 622.

Use of film-making equipment and materials. Development of advanced production skills and techniques. Laboratory. May be repeated for a total of 2 units. (Plus-minus letter grade)

CINE 625 Post Production Workshop (Units: 1-3)
Prerequisites: CINE 310 or CINE 710, consent of instructor.

Post production workshop for both advanced undergraduate and graduate students who need to complete works-in-progress. Students work individually editing, building soundtracks, preparing their projects for mixing and conforming, and following the required steps in post producing independent films. May be repeated for a total of 6 units. (CR/NC grading only)

CINE 630 Workshop in Experimental Documentary (Units: 3)
Prerequisites: Restricted to upper division Cinema major; CINE 310 or CINE 710; consent of instructor.

Exploration of experimental film practices in nonfiction.

CINE 640 Advanced Documentary Production Workshop (Units: 3)
Prerequisites: Upper division Cinema major or minor; CINE 430, CINE 527; or consent of instructor.

Development, pre-production, production, and post-production of senior non-fiction filmmaking project.
CINE 650 Filmmaking Master Class (Unit: 1)
Prerequisites: Restricted to upper division Cinema major; CINE 310, CINE 316 or equivalent; consent of instructor.
Exploring and conceptualizes a select dimension of the craft of filmmaking (pre-production, production, or post-production) as a professional endeavor. Introduction of the role of collaboration in filmmaking; strategies for incorporating critique and feedback into different stages of filmmaking. May be repeated for a total of 4 units in any combination of CINE 325, CINE 326, and CINE 650 as topics vary. (CR/NC grading only) [Formerly CINE 324]

CINE 651 Experimental Animation (Units: 3)
Prerequisites: Upper division standing, consent of instructor. Priority enrollment for Cinema students.
Studies in the aesthetics, structures, and production techniques of experimental and auteur animated films.

CINE 652 Documentary Animation (Units: 3)
Prerequisites: Upper division Cinema major or minor; CINE 310, CINE 316; or consent of instructor.
Exploration of contemporary practices of animation in documentary cinema.

CINE 654 Writing and Performing in Film and Theatre (Units: 3)
Prerequisites: Upper division Cinema majors and minors; TH A 230 or CINE 454 or CINE 456 or equivalent; or consent of instructor.
Workshop brings each student through practical hands-on exercises in writing, directing and working with actors. [Formerly CINE 555] (This course is offered as CINE 654 and TH A 558. Students may not repeat the course under an alternate prefix.)

CINE 656 Screenwriting Workshop (Units: 3)
Prerequisites: Cinema major or minor; CINE 556.
Advanced projects in film writing. Writing of 60 minutes or longer screenplay, analysis, and evaluation of works in progress. May be repeated for a total of 6 units. [Formerly CINE 655]

CINE 660 3D Computer Animation (Units: 3)
Prerequisites: Upper division standing, consent of instructor.
Developing technical and conceptual skills related to modeling, motion choreography, and rendering. May be repeated for a total of 9 units.

CINE 661 Intermediate 3D Computer Animation (Units: 3)
Prerequisites: CINE 360, CINE 660; or consent of instructor.
Developing intermediate technical and conceptual skills in 3D computer animation. May be repeated for a total of 9 units.

CINE 685 Projects in Teaching in Cinema (Units: 1-3)
Prerequisites: Cinema major, consent of instructor.
Teaching experiences in cinema in production, animation, studies and/or history, through assigned instructional projects as classroom aides. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.)

CINE 690 Production Practice (Units: 3)
Prerequisites: Upper division Cinema major, consent of instructor.
Advanced production practice in which students propose and carry out individual projects. Students act as screenwriters, directors, editors, and/or producers. Semester-based goals are approved and supervised by course instructor. May be repeated for a total of 9 units.

CINE 692 Internship (Units: 3)
Prerequisites: Upper division standing, consent of instructor.
Experience in a special field. 100+ hours of field experience in cinema-related activities under the supervision of professionals. May be repeated for a total of 6 units. (CR/NC grading only)

CINE 695 Independent Critical Studies (Units: 3)
Prerequisites: CINE 340, CINE 341, or consent of instructor.
Independent studies for qualified students who wish to pursue research and scholarly work under faculty supervision. May be repeated for a total of 9 units.

CINE 699 Independent Study (Units: 1-3)
Prerequisites: Upper division Cinema major or minor; CINE 200, CINE 202, CINE 204, CINE 211, CINE 212, with grades of C or better; or consent of instructor.
Selected projects in cinema studies or production. May be repeated for a total of 3 units.

CINE 700 Introduction to Graduate Studies (Units: 3)
Prerequisite: Restricted to graduate students in M.A. in Cinema Studies.
Orientation to graduate study; introduction to the professional standards and practices of cinema discipline; survey of cinematic and media culture theory. Development of a tentative master's thesis forms the primary basis for written work. (Plus-minus letter grade only)

CINE 701 Creative Process I (Units: 3)
Prerequisites: Restricted to graduate students in M.F.A. in Cinema; concurrent enrollment in CINE 710, CINE 711, CINE 721.
Basic elements of film writing and design: conceptualization, idea development, scripting, storyboarding, composing/staging for the camera, and image gathering.

CINE 702 Creative Process II (Units: 3)
Prerequisites: Restricted to graduate students in Cinema; CINE 701; concurrent enrollment in CINE 712, CINE 722.
Continuation of CINE 701. Emphasizing writing and design for a specific film project and basic principles of writing a research proposal.

CINE 710 Production Practice I (Units: 3)
Prerequisites: Admission to M.F.A. in Cinema; concurrent enrollment in CINE 701, CINE 711, CINE 721.
Beginning graduate course in cinematography and lighting. Use of film stocks, cameras, lenses, filters, light meters, and lights as well as screen direction, camera composition, and movement.

CINE 711 Production Practice II (Units: 3)
Prerequisites: Restricted to graduate students in Cinema; concurrent enrollment in CINE 701, CINE 710, CINE 721.
Beginning graduate course in editing and sound for film. Processes and procedures of picture and sound editing. Field, studio, and post-production sound for motion pictures. Problems in design and the production of meaning.

CINE 712 Production Practice III (Units: 3)
Prerequisites: CINE 701, CINE 710, CINE 711, CINE 721; concurrent enrollment in CINE 722.
Continuation of CINE 710 and CINE 711. Refinement of basic filmmaking skills and processes. Production of required first-year M.F.A. project.
CINE 713 Animation Workshop (Units: 3)
Prerequisites: CINE 360, CINE 362, consent of instructor.
Aesthetics of animation and production of a short animated film using film or computer techniques. May be repeated for a total of 9 units.

CINE 715 Cinematography Workshop (Units: 3)
Prerequisites: Restricted to graduate students in Cinema; CINE 710, CINE 530, or CINE 525.
Exploration and achievement of the next level of esthetics and techniques in cinematography and lighting through a series of masterpiece examinations, hands-on production workshops, cinematography master classes and industry practices. Projects in up-to-date digital technology. (Plus-minus letter grading only)

CINE 720 Critical Paradigms and the Cinematic (Units: 3)
Prerequisite: Restricted to graduate students in Cinema.
Approaches to the cinematic form through critical paradigms such as theories of the postmodern, post-colonial theory, structuralism/post-structuralism, systems theory, posthumanist theories. (Plus-minus letter grading only)

CINE 721 Cinematic Documentary (Units: 3)
Prerequisite: Admission to the M.A. Cinema Studies or M.F.A. Cinema.
Issues and concepts related to non-fiction cinematic forms such as documentary, or ethnographic film. May be repeated for a total of 6 units. (Plus-minus letter grade only)

CINE 722 Independent Cinema (Units: 3)
Prerequisite: Restricted to graduate students in M.A. Cinema Studies or M.F.A. Cinema.
The tradition of independent narrative filmmaking: narrative structure, European art cinema, Third cinema, and/or American independent cinema. May be repeated for a total of 6 units. (Plus-minus letter grade only)

CINE 723 Cinema Forms and Aesthetics (Units: 3)
Prerequisite: Restricted to graduate students in M.A. Cinema Studies or M.F.A. Cinema.
Theoretical and critical perspectives on dominant traditions and major modes of cinema and/or media: classical, film narrative, documentary; avant-garde cinema and media. May be repeated for a total of 6 units.

CINE 726 Cinema Theory II (Units: 3)
Prerequisites: Restricted to second-year M.F.A. students; CINE 761, CINE 762; concurrent enrollment in CINE 763, CINE 770.
Combines the practical aspects of portfolio and teaching preparation with the theoretical concerns generated from thesis projects and questions of pedagogy.

CINE 727 Cinematic Styles, Forms, and Movements (Units: 3)
Prerequisite: Admission to M.A. Cinema Studies, M.F.A. Cinema, or Women and Gender Studies.
Examination of established cinematic styles, forms, and movements such as how does style affect content? How do movements emerge? How do forms change over time? What relationship does a particular movement bear to narrative storytelling, documentary expression, or avant-garde practice? May be repeated for a total of 6 units. (Plus-minus letter grade only)

CINE 728 Cinema Histories (Units: 3)
Prerequisite: Restricted to students in M.A. or M.F.A. Cinema program.
Examination of cinematic traditions through historical methods with an emphasis on historiographic research, modes of argumentation, principles of causality, narrative, and rhetoric. May be repeated for a total of 6 units. (Plus-minus letter grading only)

CINE 730 Experimental Cinema Workshop (Units: 3)
Prerequisite: Restricted to students in M.A. Cinema Studies or M.F.A. Cinema program, or consent of instructor.
Aesthetics of avant-garde cinema and production of a short film using experimental techniques. May be repeated for a total of 6 units. (Plus-minus letter grade only)

CINE 740 Workshop in Documentary Production (Units: 3)
Prerequisite: Restricted to students in M.F.A. in Cinema program.
Hands-on skills and guidance in documentary production. Each student directs and produces their own film, and crews on others. Technical production skills, critical analysis of non-fiction films, and documentary voice for creative expression. (Plus-minus letter grade only)

CINE 741 Cinema and the City (Units: 3)
Prerequisite: Restricted to students in M.A. Cinema Studies or M.F.A. Cinema program.
Issues of the representation of the city in cinema, urban space has proven crucial to genre films, as well as documentaries and the avant-garde. Utopic and dystopic elements of urban life receive close scrutiny. (Plus-minus letter grade only)

CINE 743 Sexuality in the Cinema (Units: 3)
Prerequisite: Restricted to students in M.A. or M.F.A. in Cinema program.
Theories and representations of sexualities in cinema from various contexts, traditions, and histories such as queer and LGBTQ subjectivities, practices such as asexuality, BDSM and polyamory, and the study of cinema as an apparatus for the production of intimacy. May be repeated for a total of 6 units. (Plus-minus letter grade only)

CINE 747 Post-colonial Cinema (Units: 3)
Prerequisite: Restricted to students in M.A. Cinema Studies or M.F.A. Cinema program.
Examination of post-colonial theories, including notions of modernity, nationalism, post-nationalism, hybridity, subalternity, and the politics of differences, and how they can be applied to critical thinking in cinema and media. Focus on Hollywood cinema and third world cinema. May be repeated for a total of 6 units. (Plus-minus letter grade only)

CINE 748 Cinema and Cultural Studies (Units: 3)
Prerequisite: Restricted to students in M.A. or M.F.A. in Cinema program.
Examination of the field of Cultural Studies and its influence on cinema and media studies. Students will read both founding theoretical texts and contemporaneous scholarship. Emphasis on intersecting structures of power, including class, nation, gender, race, and sexuality. May be repeated for a total of 6 units. (Plus-minus letter grading only)
CINE 749 Critical Practices (Units: 3)
Prerequisite: Restricted to students in M.A. Cinema Studies or M.F.A. Cinema program.
Exploration of the relationship between critical theory/practice and digital media practices; familiarization with the emerging possibilities for critical work made possible by digital media. May be repeated for a total of 6 units. (Plus-minus letter grade only)

CINE 755 Feature Screenwriting (Units: 3)
Prerequisites: Restricted to student in M.A. Cinema Studies or M.F.A. Cinema program; introductory screenwriting; consent of instructor.
Advanced screenwriting leading to the completion of a feature-length original script. The development of ideas, premise pitching, and disciplined writing practice. May be repeated for a total of 6 units. (Plus-minus letter grade only)

CINE 761 Directing for Cinema (Units: 3)
Prerequisites: Completion of first-year M.F.A. requirements.
Advanced production course that emphasizes students' individual ideas, how to put them into moving images/sound/text, and how/why these inform their evolving creative work.

CINE 762 Advanced Cinematography and Lighting (Units: 3)
Prerequisites: Restricted to second-year M.F.A. students; CINE 701, CINE 710, CINE 711, CINE 712, CINE 721, CINE 722.
Working cinematographers, Steadicam operators, gaffers, and other crew people give master classes in cameras, production and lighting techniques, and industry practices. Directors, digital imaging technicians, and lighting company reps visit the classroom. Students complete projects in video and 16mm film.

CINE 763 Projects in Advanced Editing (Units: 3)
Prerequisites: Restricted to second-year M.F.A. students; CINE 701, CINE 710, CINE 711, CINE 712, CINE 721, CINE 722.
Aesthetic and technical aspects of editing and post-production in diverse cinema genres. Current technical strategies for editing picture and sound applied to original film or video designed by students. (Plus-minus letter grade only)

CINE 765 Internship (Units: 3)
Prerequisite: Restricted to students in M.A. or M.F.A. in Cinema program.
Field experience with production entities and organizations within the cinema industry. May be repeated once with consent of instructor. (CR/NC grading only)

CINE 770 Film Production Research (Units: 3)
Prerequisites: Restricted to second-year M.F.A. students; CINE 724, CINE 761, CINE 762; concurrent enrollment in CINE 726, CINE 763.
Focuses on the development of the students' individual vision and aesthetics and its realization through research, script development, and production planning for the thesis film.

CINE 813 Production Practice in Animation (Units: 3)
Prerequisites: Approved MFA Cinema students, consent of instructor.
Developing skills in one or more modes of animation. Individual and/or group projects. May be repeated for a total of 9 units.

CINE 820 Seminar in Critical Theory (Units: 3)
Prerequisite: Restricted to students in M.A. or M.F.A. in Cinema program.
Advanced study of critical theory specific to the cinematic form usually featuring a single theorist such as Bazin, Deleuze, Metz, Mulvey, and Zizek, or a single theme such as Reception, Modernity, Performance and Realism. May be repeated for a total of 6 units. (Plus-minus letter grading only)

CINE 823 Curation and Cinema (Units: 3)
Prerequisite: Restricted to students in M.A. or M.F.A. Cinema program or Museum Studies M.A. program.
Examination of curatorial practice and the role of curators in contemporary culture; the relation between moving images and contemporary art practices; projection, display and exhibition of time-based media in and beyond film events and art institutions. (Plus-minus letter grading only)
(This course is offered as CINE 823 and M S 823. Students may not repeat the course under an alternate prefix.)

CINE 840 Professional Development and Training (Units: 3)
Prerequisite: Restricted to students in M.A. or M.F.A. in Cinema program.
Practicum designed to prepare M.A. and M.F.A. students for doctoral and professional careers.

CINE 852 Directed Experience in Film Education (Units: 3)
Prerequisites: Admission to the M.A. or M.F.A. in Cinema, consent of instructor.
Directed experience in the teaching of film courses. Students assist in course preparation and instruction and receive supervision from the instructor in charge. May be repeated for a total of 6 units.

CINE 894 Creative Work Project (Units: 3)
Prerequisites: CINE 770, approval of thesis project proposal, consent of instructor, approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies.
Advancement to Candidacy and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.

CINE 897 Research Projects in Cinema Studies (Units: 3)
Prerequisite: Restricted to students in M.A. Cinema program; CINE 700; consent of instructor.
Methods of research for individual graduate projects in cinema studies. Development of a problem of interest to the student.

CINE 898 Master's Thesis (Units: 3)
Prerequisites: Consent of instructor and department chair or graduate coordinator, approval of Advancement to Candidacy (ATC) for Master of Arts in Cinema and Culminating Experience (CE) forms by Graduate Studies.
Advancement to Candidacy and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

CINE 899 Independent Study (Units: 3)
Prerequisites: Consent of supervising instructor and department chair or graduate coordinator.
Supervised individual projects in various aspects of the motion picture field. May be repeated for a total of 6 units.
Classical Archaeology (CLAR)

CLAR 250 Archaeology of the Ancient World (Units: 3)
Prerequisite: ENG 114 or equivalent.
Archaeology of the ancient world. Artistic and cultural achievements of Egypt, the Ancient Near East, Greece and Rome, and interaction of the art with society.
Course Attributes:
- C1: Arts
- Global Perspectives

CLAR 270 Introduction to Greek and Roman Coins (Units: 3)
Introduction to the study of Greek and Roman coins with an emphasis on iconography, economic role, and historical context.

CLAR 324 Greek and Roman Coins in Historical Context (Units: 3)
Prerequisite: Upper division standing or consent of instructor
Exploration of the production, social function, and iconography of Greek and Roman coins and how they can help write the history of the ancient world. Study of actual ancient coins in the Lindgren Coin Collection, which includes almost 3000 silver and bronze coins. (This course is offered as CLAR 324 and HIST 324. Students may not repeat the course under an alternate prefix.)

CLAR 420 Greek Art and Archaeology (Units: 3)
Prerequisite: ENG 214 or equivalent.
Survey of Greek material culture (art, architecture, city planning, etc.) from the Bronze Age to second century CE. (This course is offered as CLAR 420 and ART 401. Students may not repeat the course under an alternate prefix.)

CLAR 425 Roman Art and Archaeology (Units: 3)
Prerequisite: ENG 214 or equivalent.
Survey of Roman material culture (art, architecture, city planning, etc.) from the foundation of Rome to the reign of Justinian. (This course is offered as CLAR 425 and ART 402. Students may not repeat the course under an alternate prefix.)

CLAR 500 Ancient Egyptian Civilization (Units: 3)
Prerequisite: ENG 214 or equivalent.
Ancient Egyptian civilization from Pre-dynastic through Ptolemaic times: art, archaeology, literature, and religion with research use of Sutro Egyptian Collection.
Course Attributes:
- UD-C: Arts and/or Humanities

CLAR 502 Ancient Egyptian Language and Literature (Units: 3)
Prerequisite: Upper division standing or consent of instructor. Previous foreign language study strongly recommended.
Introduction to signs, vocabulary, grammar and syntax of Middle Egyptian language; learn to read texts from funerary stelae, coffins, and short stories.

CLAR 530 Introduction to Greek Vase Painting (Units: 3)
Prerequisite: CLAR 250 or CLAR 420 or CLAR 425 or consent of instructor.
Introduction to ancient Greek vase painting.

CLAR 531 Greek Sculpture (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Development of Greek sculpture from the late 8th century through the 2nd century BCE. Emphasis on stylistic analysis, formal development, and interpretation both of free-standing figures and programmatic architectural sculpture as social and political documents.

CLAR 532 Greek and Roman Wall Painting (Units: 3)
Prerequisite for CLAR 832: Graduate standing in Classics or consent of instructor.
Prerequisite for CLAR 532: CLAR 250 or CLAR 420 or CLAR 425 or consent of instructor.
Examination of the chronological development of Greek and Roman wall painting, focus on its architectural context and sociocultural significance. (CLAR 832/CLAR 332 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CLAR 535 Ancient Sicily and Southern Italy (Units: 3)
Prerequisite for CLAR 835: Graduate standing or consent of instructor.
Prerequisite for CLAR 535: ENG 214 or equivalent.
Archaeological, historical, cultural study of Sicily and southern Italy from Bronze Age to Roman Empire, including material from Greek city-states. Roman period and indigenous peoples. (CLAR 835/CLAR 535 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CLAR 540 Greece and the Near East (Units: 3)
Prerequisite for CLAR 840: Graduate standing or consent of instructor.
Prerequisite for CLAR 540: ENG 214 or equivalent.
Study of the intersection of the historiographical traditions and material records of ancient Greece and the Near East. (CLAR 840/CLAR 540 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CLAR 545 Pompeii & Herculaneum: Cities in the Shadow of Vesuvius (Units: 3)
Prerequisite for CLAR 845: Graduate standing or consent of instructor.
Prerequisite for CLAR 545: CLAR 250 or consent of instructor.
Core aspects of archaeology, daily life, art and history in the ancient cities of Pompeii and Herculaneum. (CLAR 845/CLAR 545 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CLAR 555 Etruscan Art and Archaeology (Units: 3)
Prerequisite for CLAR 855: Graduate standing in classics or consent of instructor.
Prerequisite for CLAR 555: CLAR 250 or CLAR 420 or CLAR 425 or consent of instructor.
Examination of the material culture of the Etruscans in its historical context from the Late Bronze Age until the early 1st c. CE. (CLAR 855/CLAR 555 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
CLAR 565 Monuments of the Eternal City: Ancient Rome (Units: 3)
Prerequisite for CLAR 865: Graduate standing or consent of instructor.
Prerequisite for CLAR 565: ENG 214 or equivalent.

Study of important monuments of Rome as evidence of its historical-
political and artistic development from the 8th Century B.C.E. to the Fall
of the Empire in the 5th Century C.E.
(CLAR 865/CLAR 565 is a paired course offering. Students who complete
the course at one level may not repeat the course at the other level.)

CLAR 570 Archaic Greece (Units: 3)
Prerequisite for CLAR 870: Graduate standing or consent of instructor.
Prerequisite for CLAR 570: CLAR 250 or equivalent or consent of
instructor.

Investigation of material culture of Archaic Greece. Topics may include
colonization, coinage, agriculture, development of sanctuaries, origin
of new styles of sculpture & painting, burial practices, rise of the polis.
(CLAR 870/CLAR 570 is a paired course offering. Students who complete
the course at one level may not repeat the course at the other level.)

CLAR 699 Independent Study (Units: 1-3)
Prerequisite: Consent of instructor.

Supervised study of a special archaeological problem to be selected by
the student. May be repeated for a total of 6 units.

CLAR 800 Theory and Methods of Classical Archaeology (Units: 3)
Prerequisite: Graduate standing in the Classics M.A. program or consent
of instructor.

Survey of important theories and methods in the practice of classical
archaeology; discussion of specific case studies; some hands-on
practice.

CLAR 830 Greek Vase Painting (Units: 3)
Prerequisite: CLAR 250 or CLAR 420 or CLAR 425 or consent of instructor.

Advanced study in ancient Greek vase painting.

CLAR 832 Greek and Roman Wall Painting (Units: 3)
Prerequisite for CLAR 832: Graduate standing in Classics or consent of
instructor.
Prerequisite for CLAR 532: CLAR 250 or CLAR 420 or CLAR 425 or
consent of instructor.

Examination of the chronological development of Greek and Roman wall
painting, focus on its architectural context and sociocultural significance.
(CLAR 832/CLAR 332 is a paired course offering. Students who complete
the course at one level may not repeat the course at the other level.)

CLAR 835 Ancient Sicily and Southern Italy (Units: 3)
Prerequisite for CLAR 835: Graduate standing or consent of instructor.
Prerequisite for CLAR 535: ENG 214 or equivalent.

Archaeological, historical, cultural study of Sicily and southern Italy from
Bronze Age to Roman Empire, including material from Greek city-states.
Roman period and indigenous peoples.
(CLAR 835/CLAR 535 is a paired course offering. Students who complete
the course at one level may not repeat the course at the other level.)

CLAR 840 Greece and the Near East (Units: 3)
Prerequisite for CLAR 840: Graduate standing or consent of instructor.
Prerequisite for CLAR 540: ENG 214 or equivalent.

Study of the intersection of the historiographical traditions and material
records of ancient Greece and the Near East.
(CLAR 840/CLAR 540 is a paired course offering. Students who complete
the course at one level may not repeat the course at the other level.)

CLAR 845 Pompeii & Herculaneum: Cities in the Shadow of Vesuvius
(Units: 3)
Prerequisite for CLAR 845: Graduate standing or consent of instructor.
Prerequisite for CLAR 545: CLAR 250 or consent of instructor.

Core aspects of archaeology, daily life, art and history in the ancient cities
of Pompeii and Herculaneum.
(CLAR 845/CLAR 545 is a paired course offering. Students who complete
the course at one level may not repeat the course at the other level.)

CLAR 855 Etruscan Art and Archaeology (Units: 3)
Prerequisite for CLAR 855: Graduate standing in classics or consent of
instructor.
Prerequisite for CLAR 555: CLAR 250 or CLAR 420 or CLAR 425 or
consent of instructor.

Examination of the material culture of the Etruscans in its historical
context from the Late Bronze Age until the early 1st c. C.E.
(CLAR 855/CLAR 555 is a paired course offering. Students who complete
the course at one level may not repeat the course at the other level.)

CLAR 865 Monuments of the Eternal City: Ancient Rome (Units: 3)
Prerequisite for CLAR 865: Graduate standing or consent of instructor.
Prerequisite for CLAR 565: ENG 214 or equivalent.

Study of important monuments of Rome as evidence of its historical-
political and artistic development from the 8th Century B.C.E. to the Fall
of the Empire in the 5th Century C.E.
(CLAR 865/CLAR 565 is a paired course offering. Students who complete
the course at one level may not repeat the course at the other level.)

CLAR 870 Archaic Greece (Units: 3)
Prerequisite for CLAR 870: Graduate standing or consent of instructor.
Prerequisite for CLAR 570: CLAR 250 or equivalent or consent of
instructor.

Investigation of material culture of Archaic Greece. Topics may include
colonization, coinage, agriculture, development of sanctuaries, origin
of new styles of sculpture & painting, burial practices, rise of the polis.
(CLAR 870/CLAR 570 is a paired course offering. Students who complete
the course at one level may not repeat the course at the other level.)

CLAR 899 Independent Study (Units: 1-3)
Prerequisite: Consent of graduate major adviser and supervising faculty
member.

Study is planned, developed, and completed under the direction of a
member of the department. Open to graduate students of demonstrated
ability to do independent work. Enrollment by petition (form available in
the department office). May be repeated for a total of 6 units.
Classics (CLAS)

Also see

- Classic Archeology (p. 1450)
- Greek (p. 1578)
- Latin (p. 1651)

CLAS 210 Introduction to Greek and Roman Literature (Units: 3)
Introduction to the main genres of Greek and Roman literature (epic, lyric, historiography, drama, philosophy, letters, pastoral, etc.) through close readings of select examples of each. Emphasis on the social and cultural context of these works of literature.

Course Attributes:

- C3: Humanities: Literature

CLAS 230 Ancient Epic Tales (Units: 3)
Prerequisite: ENG 214 or equivalent.

Epic literature of ancient Mediterranean world. Mythic and heroic themes, narrative techniques, historic and social background, and cross-cultural influences. [Formerly CLAS 330]

Course Attributes:

- C3: Humanities: Literature

CLAS 240 Greek and Roman Drama (Units: 3)
Introduction to some masterpieces of Greek and Roman tragedy and comedy, with an emphasis on close reading and appreciation of historical and performative context.

Course Attributes:

- C3: Humanities: Literature
- Social Justice

CLAS 260 Greek and Roman Mythology (Units: 3)
Prerequisite: ENG 214 or equivalent.

Classical myths that furnish background material for Western literary and cultural traditions; nature, function, and interpretation of myth.

Course Attributes:

- C2: Humanities
- Global Perspectives

CLAS 280 The Ancient World in Film (Units: 3)
Prerequisite: ENG 114 or equivalent.

Examination of how ancient Greek and Roman myth and history are represented in film, often as a way of looking critically at modern society and its values. (This course is offered as CLAS 280 and CINE 280. Students may not repeat the course under an alternate prefix.)

Course Attributes:

- C2: Humanities

CLAS 400GW Approaches to the Classics - GWAR (Units: 3)
Prerequisites: ENG 214 with a grade of C- or better, at least one CLAR or CLAS course.

Introduction to disciplinary methodologies and writing in the Classics.

Course Attributes:

- Graduation Writing Assessment

CLAS 410 Ancient Greek Literature (Units: 3)
Prerequisite: ENG 214 or equivalent.

Introduction to ancient Greek literature in its social and historical context. (This course is offered as CLAS 410 and HUM 401. Students may not repeat the course under an alternate prefix.)

Course Attributes:

- UD-C: Arts and/or Humanities

CLAS 415 Ancient Roman Literature (Units: 3)
Prerequisite: ENG 214 or equivalent.

Introduction to ancient Roman literature in its social and historical context. (This course is offered as CLAS 415 and HUM 402. Students may not repeat the course under an alternate prefix.)

Course Attributes:

- UD-C: Arts and/or Humanities

CLAS 420 Classics and the Environment (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examination of the duality of humanity and the natural environment through Classical texts and reception. Development of the ability to analyze the origin and history of human discourses about nature in literary, social, cultural, political, economic contexts; understanding mutual dependency of human perspective and natural environment. (Not for students who have completed CLAS 421.)

Course Attributes:

- Environmental Sustainability
- Global Perspectives

CLAS 421 Classics and the Environment at the SFSU Sierra Nevada Field Campus (Unit: 1)
Prerequisite: Upper division standing or consent of instructor.

Examining humanity and natural environment through Classical texts and their reception; analyzing origin and history of human discourses about nature in literary, social, cultural, political, and economic contexts; understanding mutual dependency of human perspective and natural environment. Taught summers at the Sierra Nevada Field Campus. (Not for students who have completed CLAS 420.)

CLAS 490 History of Ideas in the Ancient Classical World (Units: 3)
Prerequisite: ENG 214 or equivalent.

Intellectual and cultural history of the ancient classical world of Greece and Rome from its beginnings to the death of Saint Augustine; evolution of ideas, their origins, interconnections, impact, and influence.

Course Attributes:

- UD-C: Arts and/or Humanities
CLAS 510 The Byzantine Empire (Units: 3)
Prerequisite: ENG 214 or equivalent.
Political, social, economic, cultural history of Byzantine Empire from 7th to 15th centuries A.D.; relations of Byzantium with Germanic, Slavic, Arabic, and Turkic-speaking neighbors. (This course is offered as MGS 510, CLAS 510, HIST 326. Students may not repeat the course under an alternate prefix.)

CLAS 530 Gender and Sexuality in Ancient Greece and Rome (Units: 3)
Prerequisite: ENG 214 or equivalent.
Role of gender and sexuality in the ancient world. Areas of inquiry: women's bodies and social roles; homosexuality; and the socialization of adolescents into adult gender/sex roles. (This course is offered as CLAS 530 and SXS 530. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-C: Arts and/or Humanities

CLAS 582 Tales from Ancient India: Hinduism and Buddhism (Units: 3)
Prerequisite: ENG 214.
Study of ancient Indian (Hindu and Buddhist) culture, religion, and literature. Examination of epics, plays, devotional and love poetry from Sanskrit and other Indian languages. Examination of family, gender, and patriarchy; kingship and power; heroism, love, war; ethics and devotion. (This course is offered as HIST 582, HUM 582 and CLAS 582. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-C: Arts and/or Humanities
• Global Perspectives

CLAS 690 Editing and Publishing the Classics Journal (Units: 1-3)
Prerequisite: Major/minor in classics or department consent.
Supervised experience in editing and production of journal of student work. Credit not applicable to major/minor fields in classics. May be repeated for a total of 6 units. (CR/NC grading only.)

CLAS 697 Honor's Thesis (Units: 3)
Prerequisites: Major in classics and consent of department.
Tutorial leading to an honor's project or thesis on special research topic to be determined jointly by student and faculty member. (CR/NC grading only)

CLAS 699 Independent Study (Units: 1-3)
Prerequisite: Consent of major adviser and supervising faculty member.
Study is planned, developed, and completed under the direction of a member of the department. Open only to students who have demonstrated ability to do independent work in Classics. May be repeated for a total of 6 units.

CLAS 700 Proseminar in Classical Studies: Texts and Contexts (Units: 3)
Prerequisite: Graduate standing or consent of instructor.
Classical studies: paleography, epigraphy, numismatics, archaeology, literary criticism and their related research tools (e.g., inscriptions, coins, papyrus manuscripts, material remains).

CLAS 720 Seminar in Classical Languages and Literature (Units: 3)
Prerequisite: Graduate standing in Classics or consent of instructor.
In-depth exploration of one or more authors of or themes within ancient Greek and/or Roman literature. Topic to be specified in Class Schedule. May be repeated when topics vary.

CLAS 890 Editing and Publishing the Classics Journal (Units: 1-3)
Prerequisite: Major in classics or department consent.
Supervised experience in editing and production of journal of student work. Credit not applicable to major/minor fields in classics. May be repeated for a total of 6 units. (CR/NC grading only.)

CLAS 896 Directed Reading in Classics (Units: 3)
Prerequisite: Approved Advancement to Candidacy (ATC) and Culminating Experience (CE) forms must be on file in the graduate studies office.
Supervised study of primary texts and topics in classics, based on departmental reading list and student's special areas of emphasis, in preparation for the comprehensive oral examination. Not open to M.A. candidates selecting the thesis option. (CR/NC grading only)

CLAS 896EXM Culminating Experience Examination (Units: 0-3)
Prerequisites: Consent of instructor, committee chair, and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.
Enrollment in 896EXAM required for students whose culminating experience consists of an examination only. Not for students enrolled in a culminating experience course numbered 892, 893, 894, 895, 898, or 998, (or in some cases, courses numbered 890 - see program's graduate advisor for further information). (CR/NC, RP)

CLAS 898 Master's Thesis (Units: 3)
Prerequisites: Consent of instructor and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. Advancement to Candidacy (ATC) and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

CLAS 899 Independent Study (Units: 1-3)
Prerequisites: Consent of graduate major adviser and supervising faculty member.
Study is planned, developed, and completed under the direction of a member of the department. Open to graduate students who have demonstrated ability to do independent work. Enrollment by petition. May be repeated for a total of 6 units.
Clinical Laboratory Science (CLS)

CLS 701 Clinical Chemistry and Urinalysis (Units: 4)
Prerequisites: Restricted to students in the CLS certificate program and possession of California State trainee license.

Overview of clinical biochemistry and renal function. Proper specimen collection, instrumentation, quality assurance, physical and chemical analysis of samples. Case histories and laboratory practice emphasize correlation of laboratory findings and clinical conditions. Classwork, 3 units; laboratory, 1 unit. (Plus-minus letter grade only)

CLS 702 Clinical Laboratory Science Internship I (Units: 4)
Prerequisites: Restricted to students in the CLS certificate program and possession of California State trainee license.

Clinical training in a clinical laboratory for licensure in California and ASCP. May be repeated for a total of 8 units. (CR/NC grading only)

CLS 705 Clinical Laboratory Science Internship II (Units: 3)
Prerequisites: Restricted to students in the CLS certificate program and possession of California State trainee license.

Clinical training in a clinical laboratory for licensure in California and ASCP. May be repeated for a total of 6 units. (CR/NC grading only)

CLS 706 Contemporary Clinical Science Issues (Units: 2)
Prerequisites: Restricted to students in the CLS certificate program and possession of California State trainee license.

Includes modules on: 1) Quality control and statistics in the laboratory; 2) Laboratory administration, management, and legislation; 3) Laboratory instrumentation for manual, automated, and computerized techniques; 4) Research methods; 5) Molecular diagnostics theory and clinical practice.

CLS 707 CLS Bridge to Clinical Practice (Units: 3)
Prerequisites: Restricted to students in the CLS certificate program and possession of California State trainee license.

Clinical training in a clinical laboratory for licensure in California and ASCP. (CR/NC grading only)

CLS 709 Clinical Laboratory Science Internship III (Units: 3)
Prerequisites: Restricted to students in the CLS certificate program and possession of California State trainee license.

Clinical training in a clinical laboratory for licensure in California and ASCP. (CR/NC grading only)

CLS 731 Clinical Hematology and Laboratory Application (Units: 4)
Prerequisites: Restricted to students in the CLS certificate program and possession of California State trainee license.

Identification of blood cells, pathophysiology, hemostasis mechanisms, and disease states of hematological and hemostasis conditions. Theory and application of hematology procedures with emphasis on detection of abnormalities. Interpretation of clinical cases. (Plus-minus letter grade only)

CLS 753 Clinical Microbiology for the CLS Intern (Units: 4)
Prerequisites: Restricted to students in the CLS certificate program and possession of California State trainee license.

Principles of diagnostic microbiology that apply to bacteria, fungi, parasites and viruses, including phenotypic and genotypic detection, identification and susceptibility testing using slide and culture evaluation. Case histories and laboratory practice emphasizing correlation of laboratory findings and clinical conditions. Introduction of molecular diagnostic theory and practice. Classwork, 3 units; laboratory, 1 unit.

CLS 790 Clinical Serology and Immunohematology (Units: 4)
Prerequisites: Restricted to students in the CLS certificate program and possession of California State trainee license.

Theory and practice of serology and blood banking, including immune system, autoimmune diseases, red blood cell antigens, transfusion reactions, compatibility testing, current serological methodologies such as ELISA and immunofluorescence. Correlation of laboratory findings with pathophysiology. Interpretation of case studies. Classwork, 3 units; laboratory, 1 unit.
Communication Studies (COMM)

COMM 120 Language, Culture, and Power (Units: 3)
Introduction to the study of language use in various cultural and political contexts including peer groups, classrooms, families, and communities. Language varieties, groups’ identities, representations, and personal narratives shaped by history, power, and privilege. GE skills—writing, oral communication, critical thinking, and quantitative reasoning—will be systematically reinforced. (Plus-minus ABC/NC grading only)
Course Attributes:
- E1: Lifelong Learning Develop
- C2: Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

COMM 150 Fundamentals of Oral Communication (Units: 3)
Introduction to communication in interpersonal relationships, group interactions, and formal speaking. Skill development in listening, speech preparation, and oral presentation.
(Note: For this course to satisfy General Education, students must earn a C- or CR or higher grade if taken fall 2014 or later)
Course Attributes:
- A1: Oral Communication

COMM 220 Introduction to the Performance of Literature (Units: 3)
Prerequisites: COMM 150, ENG 214, or equivalents; priority registration for Communication Studies majors and minors, Liberal Studies majors, and English Education majors.
Oral interpretation of literature: excerpts from prose, poetry, and public speeches. Analysis of literature, script development, and performance skills. [Formerly COMM 362]

COMM 230 Introduction to Argumentation and Debate (Units: 3)
Methods of analysis and verbal formulation of the strongest possible case for and against a position or a point of view; the support of that position through evidence and inference; practical application in debate and public speaking. [Formerly COMM 365, 4 units]

COMM 240 Introduction to Nonverbal Communication (Units: 3)
Research on nonverbal communication. Interpersonal space, facial displays, body posturing, paralanguage, and costume. Individual awareness of nonverbal messages and individual range of nonverbal expression. [Formerly COMM 512, 4 units]
Course Attributes:
- D1: Social Sciences

COMM 250 Introduction to Group Discussion and Teamwork (Units: 3)
Principles of group discussion; influence of structure, norms, roles, leadership, and climate on the processes of communication and collaborative decision-making. Evaluation of members and leaders. [Formerly COMM 521, 4 units]
Course Attributes:
- C2: Humanities

COMM 304GW Writing About Communication and Masculinities - GWAR (Units: 4)
Prerequisites: Restricted to upper division Communication Studies major or minor; COMM 150, ENG 214 with a grade of C- or better. Open only to students who have not satisfied the GWAR requirement.
Rhetorical and critical media theories are applied to careful, constructive analysis of popular media in this writing intensive course. (Plus-minus AB/C+/C/NC grading only) [Formerly COMM 504GW]
Course Attributes:
- Graduation Writing Assessment

COMM 312GW Writing about Interpersonal Communication - GWAR (Units: 4)
Prerequisites: COMM 150, ENG 214 with a grade of C- or better, or equivalents, enrollment priority for Communication Studies majors.
Theory, conceptual frameworks, and scholarship related to verbal and nonverbal communication processes in varied relationships. Emphasis on written summary and synthesis of interpersonal communication research. (ABC/NC grading only) [Formerly COMM 502GW]
Course Attributes:
- Graduation Writing Assessment

COMM 321 Communication Theory (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents, enrollment priority for upper division Communication Studies majors and minors.
Communication theories and research. Communication models, verbal and nonverbal symbols, systems theory, symbolic interactionism, persuasion/compliance-gaining, and communication in various contexts. This course has a GWAR approved format (noted by a GW suffix that follows the course number) and a non-GWAR format (no suffix). Students who complete the course in one format may not repeat the course under the other format. Students who complete the non-GWAR formatted course will not receive GWAR credit.

COMM 321GW Writing About Communication Theory - GWAR (Units: 4)
Prerequisites: COMM 150, ENG 214 with a grade of C- or better, or equivalents, enrollment priority to upper division Communication Studies major or minor.
Communication theories and research. Communication models, verbal and nonverbal symbols, systems theory, symbolic interactionism, persuasion/compliance-gaining, and communication in various contexts. (ABC/NC grading only; C-/CR not allowed)
This course has a GWAR approved format (noted by a GW suffix that follows the course number) and a non-GWAR format (no suffix). Students who complete the course in one format may not repeat the course under the other format. Students who complete the non-GWAR formatted course will not receive GWAR credit.
Course Attributes:
- Graduation Writing Assessment
COMM 322GW Writing About Organizational Communication - GWAR (Units: 4)
Prerequisites: Restricted to upper division Communication Studies majors, COMM 150, ENG 214 or equivalent with a C- or better.

Develop writing competencies (proposing, drafting, editing) for use in professional, industrial, community and social organization; description and analysis of organizational communication processes, practices, and policies. (ABC/NC grading only) [Formerly COMM 522GW]

Course Attributes:
- Graduation Writing Assessment

COMM 334GW Writing About Mediation - GWAR (Units: 4)
Prerequisites: COMM 150, ENG 214 or equivalents with a grade of C or better, upper division Communication Studies majors, enrollment priority only to students who have not met the GWAR.

Skill development in communication for dispute resolution in mediation. Upper level writing competencies developed. (ABC/NC grading only) [Formerly COMM 534GW]

Course Attributes:
- Graduation Writing Assessment

COMM 344GW Writing About Popular Media - GWAR (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents with a grade of C- or better, upper division Communication Studies majors and minors.

Rhetorical and critical media theories are applied to careful, constructive analysis of popular media in this writing intensive course. (ABC/NC grading only) [Formerly COMM 444GW]

Course Attributes:
- Graduation Writing Assessment

COMM 348GW Writing About Environmental Rhetoric - GWAR (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents with a grade of C- or better, upper division Communication Studies majors.

Critical reading and summarizing of communication scholarship and analysis of contemporary rhetoric related to environmentalism and environmental justice. Emphasis on developing writing competencies. (ABC/NC grading only) [Formerly COMM 448GW]

Course Attributes:
- Graduation Writing Assessment
- Environmental Sustainability

COMM 361GW Writing About Social Semiotics - GWAR (Units: 4)
Prerequisites: COMM 150, ENG 214 or equivalent with a grade of C or better, upper division Communication Studies majors. Enrollment priority to students who have not yet met the GWAR.

Social functions of language and symbolism in everyday life. Analyses of how meaning is constituted and communicated through the use of symbols in social and cultural practices. (ABC/NC grading only.) [Formerly 561GW]

Course Attributes:
- Graduation Writing Assessment

COMM 362GW Writing About Discourse in Interaction - GWAR (Units: 4)
Prerequisites: COMM 150 or equivalent, ENG 214 or equivalent with a grade of C or better, enrollment priority to upper division Communication Studies majors.

Theoretical foundations for analyzing discourse in interaction; frequently studied, recurrent structures in discourse in a variety of settings. (ABC/NC grading only) [Formerly COMM 562GW]

Course Attributes:
- Graduation Writing Assessment

COMM 368 Forensics (Units: 2)
Prerequisites: COMM 150, ENG 214, or equivalents.

On-campus and intercollegiate forensics activities including debate, oratory, extemporaneous speaking, and discussion. May be repeated for a total of 4 units.

COMM 502 Interpersonal Communication (Units: 4)
Prerequisite: COMM GWAR or equivalent (may be taken concurrently); enrollment priority for Communication Studies majors and Conflict Resolution Certificate program students.

Processes and theories of gender and communication, including the role of power and language; verbal and non-verbal interaction; the impact of historical, social, and psychological factors on gendered communication in different settings.

COMM 504 Communication and Masculinities (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently); restricted to upper division Communication Studies majors and minors.

Analysis of communication in the production, maintenance, and contestation of various expressions/performances of masculinity, from identity/interpersonal relationships to mediated texts/cultural discourses, in national/international contexts.

COMM 508 Children's Communication (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents, enrollment priority for upper division Communication Studies, Child and Adolescent Development, and Liberal Studies majors.

Children's ability to use language appropriately in interpersonal and group situations is examined as a set of "communication acts," informing, persuading, feeling, ritualizing, and imagining.

COMM 515 Family Communication (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently); restricted to upper division Communication Studies majors and minors and upper division students in the Conflict Resolution Certificate program.

Family communication patterns: relational communication, family themes and rules, roles, power, decision-making, conflict, and responses to change and stress.
COMM 522 Organizational Communication (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently); enrollment priority to upper division Communication Studies majors.

Use theory and research to analyze and critique communication processes, practices, and policies within and between organizations; consider multiple groups of stakeholders for public, private, and not-for-profit sector organizations; investigate communication within particular organizations and industries.

COMM 525 Sexual Identity and Communication (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority registration restricted to upper division Communication Studies majors and minors, Criminal Justice majors, and students in the Conflict Resolution Certificate program.

Emergence of sexual identity and orientation in social interaction. Explores how interpersonal and group communication shapes the sexual self through private discourse—labeling, defining, self-disclosing—and public dialogue—community organizing and advocacy.

COMM 527 Health Communication (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents, enrollment priority to upper division Communication Studies majors.

Course Attributes:
- E1: Lifelong Learning Develop
- UD-D: Social Sciences

COMM 530 Communication in Organizational Training (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents, enrollment priority to upper division Communication Studies majors.

Communication techniques necessary for successful training in organizations. Skills in assessing training needs, designing programs, and evaluating results.

COMM 531 Conflict Resolution (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents.

Communication and conflict in two-person, small group, and organization settings. Conflict resolution and leadership skills development.

Course Attributes:
- E1: Lifelong Learning Develop
- UD-D: Social Sciences

COMM 532 Interviewing Methods in Organizational Settings (Units: 4)
Prerequisites: COMM 150 and ENG 214 or equivalents; enrollment priority to upper division COMM majors.

The interview as a complex communication process focusing on the development of patterns of questions and appropriate response strategies. Rhetorical analysis of interviews in professional contexts.

COMM 533 Communication and Empowerment in Organizations (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), enrollment priority to upper division Communication Studies majors.

The process of empowerment as it relates to human communication; various conceptualizations of “empowerment,” existing treatment(s), and communicative strategies for individual, group or team, and organizational empowerment.

COMM 534 Mediation Theory and Practice (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority given to upper division Communication Studies, Liberal Studies, and Conflict Resolution students.

Theories of mediation/alternative for dispute resolution, mediation skills training, exposure to community mediation organizations, practices. In depth case analysis, role plays, community service opportunities.

COMM 537 Leadership Communication (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority given to upper division Communication Studies majors and minors.

Theories of leadership communication as they are manifested in organizational and public settings to attain goals.

COMM 538 Discourse in Interaction (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.

Theoretical foundations for analyzing discourse in interaction; frequently studied, recurrent structures in discourse in a variety of settings. [Formerly COMM 562]

COMM 541 Critical Approaches to Culture and Communication (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents.

Study of communication and culture from a critical perspective in a variety of contexts ranging from local to global. Focus on how non-dominant or marginalized groups’ identities, representations, and personal narratives are shaped by history, power, and privilege.

Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Social Justice

COMM 543 Dialogues Across Differences (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors/minors, Criminal Justice majors, and Conflict Resolution Certificate program.

Communication theory and practice as a means to make connections and to improve the quality of dialogues amongst people with different social discourses and cultural experiences.

COMM 544 Communication and Aging (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.

Cultural constructions of aging, impact of aging on communication, communication in contexts involving and impacting older adults.

Course Attributes:
- E1: Lifelong Learning Develop
COMM 550 Classical Rhetoric (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents, priority to upper division Communication Studies majors.
Rhetorical theory, concepts, and practices of Pericles, Demosthenes, Isocrates, Plato, Aristotle, Cicero, and Quintilian.

COMM 551 Persuasion (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies and Liberal Studies majors.
Factors involved in influencing audience attitudes through public speeches. Awareness of oral persuasion as used in our society and to clarify ethical standards of responsibility of the persuader. [Formerly COMM 366]

COMM 552 Women and Words (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors and minors, Liberal Studies majors, and English Education majors.
Explores women's communicative cultures, while enhancing students' performance skills through a variety of speech activities, such as performance of literature, public speaking, and small group communication. Combines communication and linguistic theories with practical applications within a feminist framework. [Formerly COMM 352]

COMM 553 Oral Interpretation of the First Person Voice (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently); priority registration restricted to upper division Communication Studies majors/minors, Liberal Studies majors, and English Education majors.
Theory and principles of reading literature aloud which is written in the first person voice to illuminate the special properties when translated from the printed page to the spoken word. [Formerly COMM 363]

COMM 554 Oral Interpretation of Children's Literature (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently); enrollment priority to upper division Communication Studies, Child and Adolescent Development, Liberal Studies, and English Education majors.
Focus on adults reading stories, poetry, and nonfiction to children ages 5 to 12 years old. Skills for translating the printed page into an oral performance. [Formerly COMM 364]

COMM 555 Ensemble Performance Workshop (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.
Focus on presentation of original and adapted texts for performance, including textual and audience analysis, direction, and use of physical spaces. Additional meetings outside class required for rehearsals and performances. May be repeated for a total of 8 units. [Formerly COMM 696]

COMM 556 Performance Art: Aesthetic Communication Criticism (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.
Understand performance art as critical communication and engagement with the social world. Explore history of performance art, develop critical tools for using performance as a method, and create performances/installations using different theoretical/aesthetic texts and methods. [Formerly COMM 496]

COMM 557 Performance and Pedagogy of the Oppressed for Educators (Units: 3)
Prerequisite: CWL 214 or ENG 214 or equivalent.
Examination of theories of Augusto Boal and Paulo Freire and their application for educators and community activists. (This course is offered as LS 403 and COMM 557. Students may not repeat the course under an alternate prefix.)

COMM 559 Theory and Practice in Advanced Public Speaking (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies and Liberal Studies majors.
Principles of effective extemporaneous speaking; practice in preparation and delivery of speeches for different occasions. Class criticism of student speeches. [Formerly COMM 351]

COMM 560 Political Communication (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors and minors.
American political communication in terms of rhetorical structure, substance, strategy, and style. Analysis of contemporary political campaign rhetoric and communication. [Formerly COMM 440]

COMM 561 Social Semiotics (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.
Social functions of language and symbolism in everyday life. Analyses of how meaning is constituted and communicated through the use of symbols in social and cultural practices.

COMM 563 Conversational Analysis (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents, priority to upper division Communication Studies majors.
Examination of research findings on conversations, including the study of such topics as: pragmatic rules, power, manipulation, topic management, politeness, emotional discourse, rituals, and storytelling. Methods for collecting, transcribing, and analyzing naturally occurring conversations.

COMM 564 Issues in Free Speech (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors and minors, Criminal Justice Studies, and Conflict Resolution Certificate students.
Issues and cases involving freedom of expression. Historical and current controversies involving national survival, public morality, law and order, academic freedom, privacy. Symbolic and non-verbal free speech issues. [Formerly COMM 461]

COMM 565 Rhetorical Theory (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.
Theoretical principles of rhetoric: attitude formation and change, audience and audience analysis, ethics, appeals, invention, disposition, style, argument structures, strategies, topoi, criticism, humor, and metaphor. [Formerly COMM 341]
COMM 566 Communication and Social Process (Units: 4)
Prerequisite: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors and minors.

Process of institutional and societal decision making. Communication patterns of status quo to maintain itself in the milieu of conflict and change. Conflict resolution, persuasion and propaganda, political leadership and institutional authority. [Formerly COMM 302]

Course Attributes:

• Social Justice

COMM 570 Human Communication and New Technologies (Units: 4)
Prerequisites: COMM 150 and ENG 214 or equivalents; enrollment priority to upper division COMM majors.

How technologies such as teleconferencing, telecommunicating, computer conferencing, videotext, electronic mail, etc., will affect human communication. Issues of trust, synchrony, privacy, and electronic style.

COMM 571 The Rhetoric of Terrorism (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors and minors and upper division Criminal Justice majors.

Rhetorical implications of terrorism sponsored by individuals, dissent groups, criminal enterprises and/or states; examines how symbolic messages are rhetorically communicated and disseminated for and interpreted by audiences. [Formerly COMM 445]

COMM 572 Rhetoric of the Environment (Units: 4)
Prerequisites: Upper division Communication Studies majors, COMM GWAR or equivalent (may be taken concurrently).

Critical reading and synthesis of communication scholarship related to environmentalism and environmental justice. Critical analysis of relevant examples of contemporary rhetoric. [Formerly COMM 448]

COMM 573 The Rhetoric of Criminality and Punishment (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies and Criminal Justice Studies majors.

Contemporary rhetoric of violence and hate, including social discourses of crime and punishment, war and peace, and hatred related to race, sex, gender, sexuality, and class. [Formerly COMM 449]

COMM 574 Rhetoric of the Media (Units: 4)
Prerequisites: Upper division standing, COMM GWAR or equivalent (may be taken concurrently), Communication Studies majors and minors.

Rhetorical dimensions of major communication technologies through history—from oral culture to social media, and its impact on human consciousness and behavior. [Formerly COMM 444]

COMM 575 Emerging and Social Media (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently); enrollment priority to upper division Communication Studies majors and minors.

Investigation of the emergence of new communication practices, as well as their social, political, cultural, and economic impact in personal, communal, cultural, social, institutional, and international life.

COMM 590 Advanced Performance Study (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.

Seminar in performance studies, including the performance of literary and ethnographic texts. Emphasis on presenting and critiquing performances inside and outside the classroom. [Formerly COMM 697]

COMM 625 The Dark Side of Interpersonal Communication (Unit: 1)
Prerequisite: Restricted to upper division Communication Studies majors and minors, COMM GWAR or equivalent (may be taken concurrently).

Critical reading and evaluation of primary communication scholarship related to potentially harmful and/or hurtful communication in interpersonal relationships. Application of knowledge regarding "the dark side" of interpersonal communication to enhance ethical communication in interpersonal contexts.

COMM 661 Quantitative Methods in Communication (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies and Child and Adolescent Development majors.

Basic empirical research skills; design of studies, analysis of data, and preparation of research reports. Practical applications of research.

COMM 662 Critical and Rhetorical Methods in Communication (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.

Methods of rhetorical criticism and examination of the forms of rhetorical acts. Purpose and process of criticism: traditional approach, dramatic approach, fantasy theme approach, narrative approach, cultural approach, and content analysis.

COMM 663 Performative Methods in Communication (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.

Human communication through the performance of materials gathered from everyday life. Techniques for collecting naturally occurring conversations and conducting oral history interviews which are adapted for individual and group performances.

COMM 664 LSI Methods in Communication (Units: 4)
Prerequisites: COMM GWAR or equivalent (may be taken concurrently), priority to upper division Communication Studies majors.

Methods for exploring verbal and nonverbal communication behaviors in language and social interaction. Transcription and analysis of everyday face-to-face talk. Data analysis methods include conversation analysis, ethnmethodology, speech acts, and gesture analysis.

COMM 670 Seminar in Communication Studies (Units: 2)
Prerequisite: COMM GWAR or equivalent (may be taken concurrently), restricted to senior Communication Studies major and minors, or consent of instructor.

Integration and application of theories, contexts and methods in Communication Studies into a final project consisting of portfolio, research presentation or performance, to be determined in the capstone course.
COMM 685 Projects in the Teaching of Communication (Units: 1-4)
Prerequisites: Grade of B or better in the course (or equivalent) in which the student will be aide, and consent of instructor.

Students learn more about a previously studied topic in communication and about pedagogical strategies for sharing that knowledge. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.)

COMM 695 Internship/Service Learning in Communication Studies (Units: 4)
Prerequisites: COMM 150, ENG 214, or equivalents, priority to upper division Communication Studies majors.

Placement in a profit/non-profit agency for professional development and integration of pedagogy with field experience. Journal/reflection paper and conferences with the coordinator required. May be repeated for a total of 8 units; however, only 4 units may be counted in the major.

COMM 699 Independent Study (Units: 1-4)
Prerequisites: Upper division standing, consent of major adviser and supervising faculty member, and GPA of 3.0.

Supervised study in communication planned and completed under the direction of a member of the department. Repeatable for credit to total 8 units. Enrollment by petition.

COMM 700 Introduction to Graduate Study (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Research and research methodologies. Language and tools for controlled and systematic investigation of speech communication phenomena.

COMM 721 Seminar in Rhetorical and Communication Theory (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Issues in rhetorical and communication theory and practice from the classical period to the present.

COMM 725 Seminar in Sexual Identity and Communication (Units: 4)
Prerequisite: Graduate student in Communication Studies or Sexuality Studies or consent of instructor.

How sexual identities are created, shaped, produced, reproduced, maintained, changed, contested, and challenged through communication practices. Social, cultural, and historical contexts. Interpersonal and mass media contexts.
(This course is offered as COMM 725 and SXS 810. Students may not repeat the course under an alternate prefix.)

COMM 731 Seminar in Communication and Social Criticism (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Contemporary persuasion, propaganda, social control, political leadership, and the rhetorical dimensions of social events.

COMM 740 Seminar in Interpersonal Communication (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Intra- and interpersonal variables necessary to the understanding of human interaction including both verbal and non-verbal phenomena.

COMM 742 Seminar in Group Communication Theory and Practice (Units: 4)
Prerequisite: Graduate standing or consent of instructor. Analysis of group communication theories and research, identification and evaluation of group networks, leadership styles, conflict management, and observation methodologies.

COMM 745 Seminar in Gender and Communication (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Theory and research regarding the role of gender in communication. Examination of such factors as manifestations of power, politeness, intimacy, and play in the communication styles of females and males. (Plus-minus letter grade only)

COMM 750 Seminar in Communication and Culture (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Theories and methodologies appropriate to the study of communicative styles within, between, and among cultural groups and across gender lines and their effect on intergroup contact.

COMM 751 Intercultural Communication Training (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Assessing organizational needs to improve relationships among cultural groups; designing, delivering, and evaluating training programs to provide skills to improve intercultural relations.

COMM 755 Conflict and Communication (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Analysis of theories and research in conflict and communication, application of interdisciplinary principles to the study of conflict and communication, practical applications toward working with conflict, communication and scholarship.

COMM 760 Seminar in Organizational Communication (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Theories, research methods, and practices or organizational communication and development from the perspective of the process consultant. A case study report based on personal experience in an organization setting is required.

COMM 761 Seminar: Corporate Communication (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Explores the public level of organizational communication. Focus on symbolic implications and speech perspective of corporate communication methods including image molding, identity shaping, recognition building, reputation enhancement, and advocacy strategies.

COMM 773 Seminar in Language and Social Interaction (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

Examination of historical and theoretical basis for language and social interaction research. Focus on select interactional settings or topics in communication studies from a language and social interaction perspective.

COMM 780 Studies in Contemporary Theory (Units: 4)
Prerequisite: Graduate standing, COMM 700 (may be taken concurrently), or consent of instructor.

Focus is on the in depth study of one or more contemporary theories relevant to the communication studies discipline. Topic to be specified in Class Schedule. May be repeated when topics vary.
COMM 797 Performance Theory and Practice in Communication (Units: 4)
Prerequisite: Graduate standing or consent of instructor.

COMM 850 Teaching Communication (Units: 4)
Prerequisite: Graduate standing or consent of instructor.
Assessing student learning needs, designing instructional units and objectives, evaluating performances, and reviewing theories of interpersonal, group and public communication.

COMM 851 Internship in Teaching Communication (Units: 2)
Prerequisite: Graduate standing or consent of instructor.
Concepts of effective oral communication, techniques for evaluating/diagnosing proficiency, materials/teaching methods for basic courses in the classroom setting under the direction of an experienced instructor. (CR/NC grading only)

COMM 852 Supervision of Teaching Communication (Unit: 1)
Prerequisite: Graduate standing or consent of instructor.
Supplements teaching experience with appropriate supervision and training in curriculum, teaching techniques, grading procedures, etc. Repeatable once for credit. (CR/NC grading only)

COMM 855 Coaching Forensics (Units: 4)
Prerequisite: Graduate standing or consent of instructor.
Coaching/teaching undergraduate forensics for speech and debate competition. Value debate theory, with research to assess this theory in forensic practice. May include field research off campus for 2 or 3 weekends.

COMM 870 Multiple Methods in Communication Research (Units: 4)
Prerequisite: Graduate standing in Communication Studies; COMM 700 or equivalent.
Exploration of different ways of knowing about communication, identify paradigm assumptions, critique communication scholarship from multiple paradigms, and propose individual research project in paradigm of choice.

COMM 871 Communication Research Strategies (Units: 4)
Prerequisite: Graduate standing or consent of instructor.
Basic empirical research skills in communication; design of studies, computer analysis of data, and preparation of research reports.

COMM 872 Field Research Strategies (Units: 4)
Prerequisite: Graduate standing or consent of instructor.
Ethnographic approach to communication through the use of a variety of qualitative methods including participant/observation, interviewing, conversation analysis, and unobtrusive measures.

COMM 873 Research Strategies in Language and Social Interaction (Units: 4)
Prerequisite: Graduate standing or consent of instructor.
Methods for collecting recordings of interaction; foundations for analyzing such recordings for graduate level research projects.

COMM 885 Graduate Projects in the Teaching of Communication (Units: 4)
Prerequisites: Grade of B or better in the course or its equivalent in which the student will be an aide; consent of instructor.
An application of previously acquired knowledge through assisting instruction and learning pedagogical strategies. May be repeated for a total of 8 units.

COMM 890 Research Practicum in Communication Studies (Units: 2)
Prerequisite: Graduate standing in Communication Studies; COMM 700 or consent of instructor.
Completion of a communication research project from selection of dissemination venue and paper write up to submission and presentation of findings. May be repeated for a total of 4 units.

COMM 894 Creative Work Project (Units: 3)
Prerequisite: Consent of instructor and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies; 3.5 GPA, and recommendation of major adviser. Advancement to Candidacy and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

COMM 896 Directed Readings in Communication Studies (Units: 3)
Prerequisites: Advancement To Candidacy (ATC) and Proposal for Culminating Experience Requirement forms approved by adviser/department chair prior to registration. Texts and topics in speech communication, based on departmental reading list and student's areas of emphasis, in preparation for Comprehensive Written Examination. Not open to M.A. candidates selecting thesis option or creative project option. (CR/NC grading only)

COMM 896EXM Culminating Experience Examination (Units: 0-3)
Prerequisites: Consent of instructor, committee chair, and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.
Enrollment in 896EXM required for students whose culminating experience consists of an examination only. Not for students enrolled in a culminating experience course numbered COMM 894 and COMM 898 (or in some cases, courses numbered COMM 890 - see program's graduate advisor for further information). (CR/NC, RP)

COMM 898 Master's Thesis (Units: 3)
Prerequisites: Consent of instructor and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies; 3.5 GPA, and recommendation of major adviser.
Intensive, systematic study of significant topic in communication studies. (CR/NC grading only)

COMM 899 Independent Study for Investigation in Communication Studies (Units: 1-4)
Prerequisites: Consent of graduate major adviser and supervising faculty member; 3.25 GPA. Open only to graduate students of demonstrated ability to do independent work. Enrollment by petition.
Study is planned, developed, and completed under the direction of a member of the faculty.
Communicative Disorders (C D)

C D 300 Human Communicative Disorders (Units: 3)
Prerequisite: Upper division standing.

Communicative development and disorders; processes and models; language universals; basis of language; speech, language, and hearing impairments; family and cultural influences; bilingualism and dialectal variations; evaluation of communicative effectiveness. Communicative Disorders majors must earn a C- or better to advance in the major.

Course Attributes:
• UD-D: Social Sciences
• Social Justice

C D 651 Anatomy and Physiology of the Speech Mechanism (Units: 3)
Prerequisites: Restricted to upper division Communicative Disorders major; a course in area B1: Physical Science (Physics or Chemistry is strongly recommended), a course in Statistics (including MATH 124 or PSY 171 or ISED 160), a course in biological science in one of the following areas: human or animal biology, human anatomy and physiology, neuroanatomy and neurophysiology, human genetics, or veterinary science, and a course in social/behavioral sciences in one of the following areas: psychology, sociology, anthropology, or public health. Concurrent enrollment in C D 652 and C D 655.

Normal structures and functioning of respiration, phonation, resonation, and articulation. Communicative Disorders majors must earn a C- or better in this course in order to advance in the major. (Plus-minus letter grade only)

C D 652 Audiology (Units: 3)
Prerequisites: Restricted to Communicative Disorders major; a course in area B1: Physical Science (Physics or Chemistry is strongly recommended), a course in Statistics (at SF State, courses include MATH 124 or PSY 171 or ISED 160), a course in biological science in one of the following areas: human or animal biology, human anatomy and physiology, neuroanatomy and neurophysiology, human genetics, or veterinary science, a course in social/behavioral sciences in one of the following areas: psychology, sociology, anthropology, or public health. Concurrent enrollment in C D 651 and C D 655.

Structure and function of the ear; sound related to hearing mechanism; causes, implications, and techniques of determination of hearing impairment. Communicative Disorders majors must earn a C- or better in this course in order to advance in the major. (Plus-minus letter grade only)

C D 654 Audiometry (Units: 3)
Prerequisites: Restricted to Communicative Disorders major; C D 300, C D 651, C D 652, C D 655, with grades of C- or better, or by advisement; concurrent enrollment in C D 658, C D 661, C D 680.

Pure tone and bone conduction hearing testing. Masking, immittance testing, electrophysiological testing, pediatric audiometry, speech audiometry and public school hearing/conversation programs. (Plus-minus letter grade only)

C D 655 Dynamics of Communication Development (Units: 3)
Prerequisite: Upper division standing.

Exploration of the acquisition patterns of normal speech, language, and pragmatic behaviors. Theories of language development, phonology, morphology, syntax, and semantics. Language analysis with typically development children. (ABC/NC grading only)

Course Attributes:
• UD-D: Social Sciences

C D 656GW Diagnosis of Communicative Disorders - GWAR (Units: 3)
Prerequisites: Restricted to upper division Communicative Disorders major; ENG 214 with a grade of C- or better, C D 654, C D 658, C D 661, C D 680, or by advisement; concurrent enrollment in C D 657, C D 664.

Diagnosis of communicative disorders. Observation, language sample analysis, and distinctive feature analysis. (ABC/NC grading only)

Course Attributes:
• Graduation Writing Assessment

C D 657 Aural Rehabilitation (Units: 3)
Prerequisites: Restricted to upper division Communicative Disorders major; C D 654, C D 658, C D 661, C D 680, with grades of C- or better; or by advisement; concurrent enrollment in C D 656GW, C D 664.

Psychological, educational, and sociological implications of hearing loss. Aural rehabilitation: speech reading, auditory training, amplification, and speech conservation and/or improvement. (Plus-minus letter grade only)

Formerly C D 705

C D 658 Communication Development and Disorders (Units: 3)
Prerequisites: Restricted to upper division Communicative Disorders major; C D 300, C D 651, C D 652, C D 655; concurrent enrollment in C D 654, C D 661, C D 680.

Language acquisition, disorders and their causes in school age children. Application of diagnostic and intervention techniques. (Plus-minus letter grade only)

C D 659 Articulatory and Phonological Disorders (Units: 3)
Prerequisites: Restricted to upper division Communicative Disorders major; C D 656GW, C D 657, C D 664, with grades of C- or higher; or by advisement; concurrent enrollment in C D 663, C D 668.

Disordered articulation; accent/dialectal differences; normal phonological processes; phonological disorders and distinctive features. Practicum for diagnosis and therapy for articulation, phonological, and accent problems. (Plus-minus letter grade only)

C D 660 Communicative Disorders (Units: 3)
Prerequisite: Restricted to upper division Communicative Disorders major.

Voice disorders, adult neurogenic disorders, stuttering, cerebral palsy, and craniofacial anomalies. Etiology, pathology, diagnosis, and intervention techniques. (Plus-minus letter grade only)

C D 661 Neurolinguistics (Units: 3)
Prerequisites: Restricted to upper division Communicative Disorders major; C D 300, C D 651, C D 652, C D 655, with grades of C- or better; concurrent enrollment in C D 652, C D 658, C D 680.

Cortical and subcortical components of language processing; current research on the central nervous system and its application to speech, language, and hearing. (Plus-minus letter grade only)
C D 663 Introduction to Augmentative/Alternative Communication (Units: 3)
Prerequisites: Restricted to upper division Communication Disorders major; C D 656GW, C D 657, C D 664; or by advisement; concurrent enrollment in C D 659, C D 668.

Introduction and applied experiences with augmentative and alternative communication, including low- and hi-tech systems. Assessment, team collaboration, funding and use of AAC such as designing systems that meet functional communication needs. (Plus-minus letter grade only) [CSL may be available]

C D 664 Clinical Phonetics (Units: 3)
Prerequisites: Restricted to upper division Communication Disorders major: C D 654, C D 658, C D 661, C D 680; concurrent enrollment in C D 657, C D 656GW.

Speech sounds of American English and the development of phonology. IPA transcription experience applied with regard to human diversity. Not open to students who have taken COMM 410. (Plus-minus letter grade only)

C D 668 Typical and Atypical Social Communication Development (Units: 3)
Prerequisites: Restricted to upper division Communication Disorders major; completion of C D 656GW and C D 664, C D 753; or by advisement; concurrent enrollment in C D 659 and C D 663 required.

Exploration of typical and atypical development of language use in social contexts, including expressing communicative intent, engaging in conversation and extended discourse, and cultural participation. Pragmatic and discourse analysis of talk in everyday interactions involving children. Diagnostic and intervention strategies. (Plus-minus letter grade only)

C D 680 Practicum in Communication Therapy (Unit: 1)
Prerequisites: Restricted to Communication Disorders major; concurrent enrollment in CD 654 for undergraduate students.

Supervised clinical experiences in communication rehabilitation for communicative disorders. May be repeated for a total of 10 units. Type of experience and number of units determined by advisement. (Plus-minus letter grade, RP)

C D 699 Independent Study in CD (Units: 1-3)
Prerequisite: Upper division standing or consent of instructor.

Study of a particular problem under the direction of a member of the department. Enrollment by petition approved by the instructor, adviser, and department chair. Open to regularly enrolled students only.

C D 701 Language Differences and Disorders in Children (Units: 3)
Prerequisite: Admission to Communicative Disorders program or consent of instructor.

Language disorders and differences in children. Verbal, written, signed, and other symbolic disorders; oral communication. Etiology, diagnosis, and assessment of differences and disorders; intervention strategies. (Plus-minus letter grade only) [CSL may be available]

C D 706 Counseling in Communicative Disorders (Units: 3)
Prerequisites: C D 701, C D 708, C D 709, C D 768.

Counseling of communicatively disordered individuals and their families. Theories and methods as they apply to the unique disorder. Experimental opportunities for analyzing individual counseling processes. (Plus-minus letter grade only)

C D 707 Advanced Seminar in Language Disorders in Children (Units: 3)
Prerequisites: Admission to Communication Disorders program; C D 701 or consent of instructor.

Assessment, intervention, and organizational procedures for use with classes that include children of various ages with language disorders. (Plus-minus letter grade only)

C D 708 Neurogenic Disorders of Language (Units: 3)
Prerequisite: Admission to Communication Disorders program or consent of instructor.

Theories and methods of assessment and rehabilitation of adults with aphasia; focus on the nature, diagnosis, and treatment of aphasia, bilingual aphasia, and primary progressive aphasia. (Plus-minus letter grade only)

C D 709 Seminar in Motor Speech Disorder (Units: 3)
Prerequisites: Admission to Communication Disorders program; C D 651, C D 661, C D 753.

Differential diagnosis and management of motor speech disorders in children and adults, including the dysarthrias and apraxia of speech. (Plus-minus letter grade only)

C D 710 Seminar in Dysphagia (Units: 3)
Prerequisites: Admission to Communicative Disorders graduate program; C D 651, C D 661.

Nature, etiology, and physiology of normal and abnormal patterns of swallowing across the life span, with emphasis on adult population. Clinical swallowing assessment, modified barium swallow study and therapeutic intervention for dysphagia. Treatment and clinical decision-making emphasized. (Plus-minus letter grade only)

C D 711 Seminar in Therapy for Functional Communication Disorders (Unit: 1)
Prerequisites: Admission to Communication Disorders graduate program; concurrent enrollment in C D 880.

Communication therapy, functional speech and language disorders: articulation, delayed speech, and stuttering. Repeated with variable clinic experiences. Units co-vary with frequency of client-staff conference and time delivering more complex therapeutic treatment. May be repeated for a total of 4 units. (Plus-minus letter grade only)

C D 712 Medical Internship Seminar: Communicative Disabilities (Unit: 1)
Prerequisites: Admission to Communication Disorders program; concurrent enrollment in C D 882, C D 884.

Seminar and peer discussion during hospital or medical intern placement. Review of clinical practices related to speech-language pathology in the evaluation, intervention, and interaction and personal qualities in the treatment of clients/patients. (Plus-minus letter grade only)

C D 713 Seminar in Therapy for Organic Communicative Disorders (Unit: 1)
Prerequisites: Admission to graduate program; C D 663 or equivalent; concurrent enrollment in C D 880.

Communication therapy with speech and language disorders resulting from central nervous system or organic dysfunction. Repeated with variable clinic experiences. Units co-vary with frequency of client-staff conferencing and more complex therapeutic treatment. May be repeated for 3-9 units. (Plus-minus letter grade only)
C D 715 Advanced School Internship (Units: 6)
Prerequisites: Graduate standing in Communicative Disorders; concurrent enrollment in C D 725.

Participate in all professional roles of speech-language pathologist in community and school settings. Open only to graduate students in Communicative Disorders who have completed all prerequisite coursework, determined by advisor. (CR/NC grading only)

C D 725 School Intern Seminar: Communication Disabilities (Unit: 1)
Prerequisite: Student intern application approved by adviser and on file at least one semester prior to student intern placement.

C D 750 English Language Learning and Exceptionality (Units: 3)
Prerequisite: Graduate standing.

Examination and analysis of the processes of bilingual language acquisition; theories and techniques of assessment and intervention, situated within the contexts of home, classroom, family and community; home- and classroom-based strategies for the speech-language pathologist and classroom teacher. (Plus-minus letter grade only)

C D 753 Fluency and Voice Disorders (Units: 3)
Prerequisites: Admission to the Communicative Disorders graduate program; C D 768.

Causes of stuttering, current theories and therapies relative to stuttering in children and adults. Habilitation and rehabilitation of children and adults with organic and non-organic voice disorders. (Plus-minus letter grade only) [Formerly C D 653]

C D 756 Right Hemisphere Syndrome, TBI, Dementia in Communicative Disabilities (Units: 3)
Prerequisite: C D 708 or consent of adviser.

Discussion of right hemisphere, brain dysfunction, acquired and traumatic brain injuries, and dementia; an understanding of assessment tools, interpretation of results, report writing, and treatment; and different service models. (Plus-minus letter grade only)

C D 768 Advanced Clinical Skills (Units: 3)
Prerequisites: Admission to Communicative Disorders program; C D 668; or consent of instructor.

Analysis of fundamental, transitional, and complex skills that have been shown to positively affect treatment outcomes in the practice of speech-language therapy. (Plus-minus letter grade only)

C D 880 Advanced Communication Therapy (Units: 2)
Prerequisite: C D 668 or equivalent.

Supervised clinical methods and practice in communication rehabilitation. May be repeated for a total of 10 units.

C D 881 Internship in Communicative Disorders I (Units: 3)
Prerequisite: Consent of major adviser.

Pre-internship in practicum settings: hospitals, private and public service agencies providing audiology and speech pathology therapies.

C D 882 Advanced Medical Internship (Units: 6)
Prerequisite: Graduate standing in Communicative Disorders; concurrent enrollment in C D 712.

Participate in all professional roles of speech-language pathologist in community and medical settings. Open only to graduate students who have completed all prerequisite coursework, determined by advisor. (Plus-minus letter grade only)

C D 884 Advanced Diagnosis in Communicative Disorders (Units: 3)
Prerequisites: 4 units of C D 889, C D 756, and consent of clinic supervisor.

Supervised clinical diagnosis of communicative disorders.

C D 896EXM Culminating Experience Examination (Units: 0-3)
Prerequisites: Consent of instructor, committee chair, and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.

Enrollment in 896EXM required for students whose culminating experience consists of an examination only. Not for students enrolled in a culminating experience course numbered C D 898. (CR/NC, RP)

C D 898 Master’s Thesis in Communicative Disorders (Units: 3)
Prerequisites: Consent of instructor and graduate major adviser; approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

C D 899 Independent Study (Units: 1-3)
An intensive study of a particular problem in communicative disorders under direction of a member of the department. Enrollment by petition. Open to regularly enrolled students only.
Comparative World Literature (CWL)

CWL 214 Second Year Written Composition: Comparative and World Literature (Units: 3)
Prerequisite: ENG 114 or equivalent with a grade of CR or C- or better.
Flexible reading and writing skills for academic inquiry and engaging with social issues through comparative and interdisciplinary approaches; world literature readings integrated with a variety of sources; varied composing and revising skills; critical analysis and self-reflection, with special attention to rhetorical variation; fine-tuning research. (Plus/minus ABC/NC, CR/NC allowed)
Course Attributes:
• A4: Written English Comm II

CWL 220 Reading Beyond Boundaries: An Introduction to Comparing Literatures (Units: 3)
Reading literature from diverse times and places to discover the relevance of literary representation for contemporary life. Covers basics of literary analysis, examination of genres, and comparative methodology to uncover the significances and effects of literary representation.
[Formerly CWL 210]
Course Attributes:
• C3: Humanities: Literature
• Global Perspectives

CWL 230 World Literature (Units: 3)
Literary classics of the world, their cultural backgrounds, and their place in the history of ideas, from a variety of genres and national literatures.
Course Attributes:
• C3: Humanities: Literature
• Global Perspectives

CWL 250 Fables and Tales (Units: 3)
Development from folklore and parable of the fable and the tale. Narrative forms such as the animal fable, fairy tale, and remarkable voyage; central themes and techniques in the tradition of didactic and fantastic fiction.
Course Attributes:
• C3: Humanities: Literature
• Global Perspectives

CWL 260 Myths of the World (Units: 3)
Different mythologies, their interpretation, and significance to world literature.
Course Attributes:
• C3: Humanities: Literature
• Global Perspectives

CWL 270 Fantasy and Fiction: Exploring Parallel Worlds (Units: 3)
Prerequisite: ENG 114 or equivalent.
Exploration of dreams, parallel worlds, and alternate realities in fiction and media from a variety of traditions and cultures; development of critical reading skills to examine the intersection of fantasy and reality in literary representation.
Course Attributes:
• C3: Humanities: Literature

CWL 400GW Approaches to Comparative and World Literature - GWAR (Units: 3)
Prerequisite: ENG 214 or equivalent with a grade of C- or better.
Gateway to undergraduate study in comparative literature. Active comparison of texts from multiple literary traditions and genres using a variety of methods. Introduction to the discipline and critical theory. Writing intensive. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment

CWL 420 Studies in Comparative Literature (Units: 3)
Prerequisite: ENG 214 or equivalent.
Comparison of literary texts from multiple linguistic traditions through thematic, theoretical, chronological, and/or formal connections. Topic to be specified in Class Schedule. May be repeated when topics vary.

CWL 421 Celtic Literature (Units: 3)
Prerequisite: ENG 214 or equivalent.
Literary traditions of culturally diverse Celtic world from earliest legends of gods, heroes, warriors, and saints to modern literature; texts may include traditions such as Irish, Welsh, Scottish, Breton, and Manx.
Course Attributes:
• UD-C: Arts and/or Humanities

CWL 422 Imagining the Constructed Body: From Statues to Cyborgs (Units: 3)
Prerequisite: ENG 214 or equivalent.
How diverse cultures, through literature, have imagined "constructing bodies"—conceptualizing, creating, or enhancing the body: sex, gender, sexuality, self-referential literary representations plus relevant literary theories. [Formerly CWL 420 - Variable Topic]
Course Attributes:
• UD-C: Arts and/or Humanities
• Global Perspectives

CWL 423 Going Medieval: Comparative Medieval European Literature (Units: 3)
Prerequisite: CWL 214 or ENG 214 or equivalent.
A survey of the major genres of Medieval European vernacular writing in translation, including epic, romance, tale collections, and lyric poetry. (This course is offered as CWL 423 and HUM 423. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-C: Arts and/or Humanities

CWL 424 Multicultural Middle Ages (Units: 3)
Prerequisite: CWL 214 or ENG 214 or equivalent.
A survey of medieval European representations of the Islamic world, as reflected in the major genres of epic, romance, tale collections, travel writing, and lyric poetry. (This course is offered as CWL 424 and HUM 424. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-C: Arts and/or Humanities
CWL 430 Heroic Tales of the Mediterranean (Units: 3)
Prerequisite: ENG 214 or equivalent.

Heroic narratives, in poetry and prose, provide the means for examining aspects of the ancient, medieval, and modern cultures of the eastern Mediterranean and Near East.

Course Attributes:
- Global Perspectives

CWL 432 From Ghost Stories to Short Stories: Japanese Fiction in Comparative Contexts (Units: 3)
Prerequisite: ENG 214 or equivalent.

Examination of formal transformations in Japanese prose fiction through comparison with other literary traditions; focus on questions of tradition, influence, genre, and translations. (This course is offered as CWL 432 and HUM 532. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- UD-C: Arts and/or Humanities
- Global Perspectives

CWL 437 Holocaust and Literature (Units: 3)
Prerequisite: ENG 214.

Fiction and non-fiction Holocaust literature by Saul Bellow, T. Borowski, Etty Hillesum, I.B. Singer, and Elie Wiesel. (This course is offered as JS 437, ENG 533, and CWL 437. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- UD-C: Arts and/or Humanities
- Global Perspectives
- Social Justice

CWL 440 "Typical American": Narratives of Multiculturalism in the Americas from 1492 to the Present (Units: 3)
Prerequisites: ENG 214 or CWL 214 or equivalent; CWL 400GW or other GWAR course is recommended.

Understanding the Americas through historical and hemispheric comparison of multicultural literary texts; interaction of race, ethnicity, class, and gender with other constructions of group identity in narratives; interplay between community and individual identity from 1492 to the present.

Course Attributes:
- UD-C: Arts and/or Humanities
- Global Perspectives

CWL 450 Literary Crossings (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examination of the theme and forms of literary crossings in comparative literature, among them transnationalism, migration, and second-language writing; literature crossing lines of race, gender, sexuality, class, or the boundary between human and non-human; generically hybrid literatures.

Course Attributes:
- UD-C: Arts and/or Humanities
- Global Perspectives

CWL 451 Jewish Literature of the Americas (Units: 3)
Prerequisite: ENG 214 or equivalent.

Explores literature of the Americas through the lens of Jewish identity and tradition. Texts in translation from Latin America, Canada, and the US reveal how Jewish writers have rethought modernity’s intersection with Jewish traditions. (This course is offered as JS 451, CWL 451, and ENG 451. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- UD-C: Arts and/or Humanities
- Am. Ethnic & Racial Minorities
- Global Perspectives

CWL 452 Forster, Durrell, and Cavafy (Units: 3)
Prerequisite: ENG 214 or equivalent.

Examination of English novelists and travel writers E. M. Forster and Lawrence Durrell and of their connection to Alexandrian poet C. P. Cavafy. Discussion includes their collective interest in Alexandria as an alternative literary and ideological topos. (This course is offered as MGS 452, CWL 452, and ENG 452. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- UD-C: Arts and/or Humanities
- Global Perspectives

CWL 465 Modern Greek Poetry in Comparative Perspective (Units: 3)
Prerequisite: ENG 214 or equivalent.

Survey of Greece’s prominent modern poets in comparison with major Anglo-American and European poets. Poets to be studied include Cavafy, Seferis, Elytis, Mastoraki, Yeats, Eliot, Pound, and Rich. (This course is offered as MGS 465, CWL 465, and C W 465. Students may not repeat the course under an alternate prefix.)

CWL 480 European Jewish Writers (Units: 3)
Prerequisite: ENG 214 or CWL 214 or equivalent.

Survey of the works of modern Jewish writers throughout Europe between the nineteenth- and twentieth-centuries; influence of the Jewish Enlightenment on modern Jewish literature. (This course is offered as JS 480 and CWL 480. Students may not repeat the course under an alternate prefix.)

Course Attributes:
- UD-C: Arts and/or Humanities
- Global Perspectives
- Social Justice

CWL 515 The Uncanny in World Literature (Units: 3)
Prerequisites: ENG 214 or equivalent, CWL 400GW recommended.

Examination of the uncanny— the aesthetic quality of literary texts that provokes eerie, unsettling reactions— in works from a variety of places and times. Focus on the living dead, doppelgangers, déjà vu, repetition, and automatism.
CWL 520 Modern Prose of the Americas (Units: 3)
Prerequisites: ENG 214 or CWL 214 or equivalent, CWL 400GW or other
GWAR course recommended.
Exploration of the creation and representation of modern "American"
identities through comparison of prose fiction from Latin America (in
translation) and the United States; focus on two periods: 1920s-1940s
and 1960s-1980s.
Course Attributes:
- Global Perspectives

CWL 525 The Partial Magic of Metafiction (Units: 3)
Prerequisite: ENG 214 or consent of instructor.
Exploration of literary self-reflection in contemporary world metafiction.
Why do some novels dispel their illusions of realism? What happens
when characters realize they are mere fictions? How do we make our way
through these literary labyrinths?

CWL 540 Faulkner, García Márquez, and Morrison (Units: 3)
Prerequisites: ENG 214 or CWL 214 or equivalent, CWL 400GW or other
GWAR course is recommended.

Comparative reading of three major 20th century novelists: William
Faulkner, Gabriel García Márquez, and Toni Morrison. These authors
provide a vantage point for exploring representation in the Americas,
the modern novel, and literary value.

CWL 690 Editing and Publishing the Comparative Literature Journal
(Units: 1-3)
Prerequisite: Major or minor in comparative literature or department
consent.
Supervised experience in editing and production of a journal of student
work. Credit not applicable to major or minor fields in comparative
literature. CWL 690 and CWL 890 may be repeated for a combined total of
6 units. (CR/NC grading only)

CWL 697 Honor's Thesis (Units: 3)
Prerequisites: Comparative Literature major and consent of department.

Tutorial leading to an honor's project or thesis on special research topic
to be determined jointly by student and faculty member. (CR/NC grading
only)

CWL 699 Independent Study (Units: 1-3)
Prerequisite: Consent of the department chair and instructor.

Projects requiring critical study and analysis of advanced material
adapted to individual needs and interests. May be repeated for a total of
6 units.

CWL 746 Seminar: Opera and Literature (Units: 3)
Prerequisite: ENG 741 (may be taken concurrently) or consent of
instructor.

Literary aspects of the creation, composition, production, and
interpretation of opera. Literary texts that inspire operas will be
interpreted critically along with the operas they inspired. Opera libretti
will be examined as literature interactively with opera's musical, dramatic,
and performative elements.
(This course is offered as ENG 746 and CWL 746. Students may not
repeat the course under an alternate prefix.)

CWL 800 Introduction to Graduate Study in Comparative Literature
(Units: 3)
Prerequisite: Graduate standing or consent of instructor.

Methodology and definitions of comparative literature; critical theory of
literature as it relates to comparative studies.

CWL 815 Seminar: Topics in Critical Theory (Units: 3)
Prerequisite: Graduate standing or consent of instructor.

Research seminar examines a major subject area in critical and literary
theory. Topic to be specified in Class Schedule. May be repeated for a
total of 9 units when topics vary.

CWL 820 Topics in Comparative Literature (Units: 3)
Prerequisite: Graduate standing or consent of instructor.

Research seminar compares literary texts from multiple traditions
through thematic, theoretical, chronological, and/or formal connections.
Topic to be specified in Class Schedule. May be repeated for a total of 9
units when topics vary.

CWL 825 Advanced Study in Comparative Literature (Units: 3)
Prerequisite: CWL 800 or consent of instructor.

Synthesizing prior knowledge about theory and practice of comparative
literature; developing scholarly and professional skills for culminating
experience and beyond; exploring post-M.A. paths.

CWL 890 Editing and Publishing the Comparative Literature Journal
(Units: 1-3)
Prerequisite: Comparative Literature major or minor or department
consent.
Supervised experience in editing and production of journal of student
work. Credit not applicable to major/minor fields in comparative
literature. CWL 690 and CWL 890 may be repeated for a combined total of
6 units. (CR/NC grading only)

CWL 896 Directed Reading in Comparative Literature (Units: 3)
Prerequisites: Approved ATC and culminating experience proposal.

Supervised study based on departmental reading list and student's
specialty area in preparation for the Comprehensive Oral Examination.
Not open to M.A. candidates selecting the thesis option. (CR/NC grading
only)

CWL 896EXM Culminating Experience Examination (Units: 0-3)
Prerequisites: Consent of instructor, committee chair, and approval of
Advancement to Candidacy (ATC) and Culminating Experience (CE) forms
by Graduate Studies. ATC and Proposal for Culminating Experience
Requirement forms must be approved by the Graduate Division before
registration.

Enrollment in 896EXAM required for students whose culminating
experience consists of an examination only. Not for students enrolled in
a culminating experience course numbered CWL 898 (or in some cases,
courses numbered CWL 890 - see program's graduate advisor for further
information). (CR/NC, RP)

CWL 898 Master's Thesis (Units: 3)
Prerequisites: Consent of instructor; recommendation of major adviser;
and approval of Advancement to Candidacy (ATC) for the Master of
Arts and Culminating Experience (CE) forms by Graduate Studies. ATC
and Proposal for Culminating Experience Requirement forms must be
approved by the Graduate Division before registration. (CR/NC grading
only)
CWL 899 Independent Study (Units: 1-3)
Prerequisite: Consent of graduate major adviser and supervising faculty member.

Study is planned, developed, and completed under the direction of a member of the department. Open only to graduate students of demonstrated ability to do independent work. Enrollment by petition (form available in the department office). May be repeated for a total of 6 units.
Computer Science (CSC)

CSC 101 Computers for Everyone (Units: 3)
Comprehensive and basic overview of computers and their use for everyday tasks such as information retrieval, Internet, writing, presentations, communication, Web publishing, e-commerce, entertainment, computation. No prior knowledge required.

CSC 203 JAVA Programming (Units: 3)
Prerequisite: CSC 210 or consent of instructor.
JAVA language and object oriented programming. Use of inheritance, polymorphism, exception handling and libraries; JAVA applets and GUI development using Swing.

CSC 206 Python Programming (Units: 3)
Prerequisite: CSC 210 or consent of instructor.
Python language programming, with basic principles of interpretative languages. The use of basic Python constructs and standard libraries (e.g. networking, regular expressions, GUI). Simple apps such as WWW, games.

CSC 208 C++ for Java Programmers (Unit: 1)
Prerequisites: Java programming courses or consent of instructor.
Hands-on exercises in C++ programming. Emphasize features common to C++ and Java and features unique to C++. (CR/NC grading only)

CSC 210 Introduction to Computer Programming (Units: 3)

CSC 211 Introduction to Software Lab (Unit: 1)
Hands-on exercises in programming, and use of basic SW development tools. Covers procedural, object oriented, C++, and JAVA programming. Strongly recommended for CSC 210 students, and others needing hands-on experience; concurrent enrollment in CSC 210 recommended. Students are encouraged to bring their own laptops. May be repeated for a total of 3 units. (CR/NC grading only)

CSC 220 Data Structures (Units: 3)
Prerequisites: CSC 210, MATH 226, with grades of C or better.
Linear and non-linear data structures in Java, including lists, stacks, queues, trees, tables, and graphs. Recursion, iteration over collections, sorting, searching, Big O notation and hash table.

CSC 230 Discrete Mathematical Structures for Computer Science (Units: 3)
Prerequisites: CSC 210, MATH 227 (may be taken concurrently), with grades of C or better.
Review of set algebra, relations and functions; permutations; propositional logic; proof techniques; introduction to graph theory; infinite sets; applications to computer science.

CSC 256 Machine Structures (Units: 3)
Prerequisite: CSC 230 with a grade of C or better.
Digital logic circuits; data representation; assembly language programming; subroutine linkage; machine language encoding; interrupt/exception handling; memory system concepts; CPU organization and performance.

CSC 300GW Ethics, Communication and Tools for Software Development - GWAR (Units: 3)
Prerequisites: Restricted to upper division Computer Science majors and minors; CSC 210, ENG 214 or equivalent with a grade of C or better.
Privacy, security, legal and ethical issues in Software development. Communication relevant to SW development (reports, contracts, requirements, documentation, collaboration, e-mail, presentations). Study and use of basic tools for SW development and collaboration. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment

CSC 306 An Interdisciplinary Approach to Computer Programming (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Basics of programming for interdisciplinary problem-solving. Topics include basic building blocks of programming (variable, control statement, iterative statement, array, function, and abstraction) and problem-solving approaches. Use App Inventor and Java.

CSC 307 An Interdisciplinary Approach to Web Programming (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Basics of WWW engineering relevant to studies in interdisciplinary problem-solving. Topics include basics of developing web and database applications, HTML, PHP, Python, SQL, MySQL database.

CSC 309 Computer Programming for Scientists and Engineers (Units: 3)
Prerequisite: MATH 226 or consent of instructor.
Procedural programming for scientific applications. Good programming practices and basic numerical and non-numerical algorithms for scientists and engineers.

CSC 317 Introduction to Web Software Development (Units: 3)
Prerequisite: CSC 220 or consent of instructor.
Introduction to UNIX and creating web pages, reading and processing user input submitted through web pages; client side and server side programming; connecting a web page to a database; building e-commerce site or Internet Application.

CSC 338 Information Technology in a Global Society (Units: 3)
Prerequisite: ENG 214 or equivalent.
Study of increasingly interconnected technology and sharing of information in the 21st century. The important role technology plays in the U.S. and the world. Exploration of the information age in several social contexts. (This course is offered as ISYS 338 and CSC 338. Students may not repeat the course under an alternate prefix.)

CSC 340 Programming Methodology (Units: 3)
Prerequisites: CSC 220, CSC 230, MATH 227, with grades of C or better; concurrent enrollment in CSC 412 recommended.
Advanced data structures and algorithms for manipulation in C++; emphasis on design and implementation; practical applications; algorithms for sorting, searching, and graphs.
CSC 645 Computer Networks (Units: 3)
Prerequisite: CSC 415 with a grade of C or better.

Computer network design, evaluation, and testing. Computer network standards and implementation. Hardware/software design and compatibility issues. Extra fee required. (CSC 745/CSC 645 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 648 Software Engineering (Units: 3)
Prerequisite: CSC 413 with a grade of C or better or consent of instructor.

Practical methods and tools for SW engineering, including organizational teamwork. (CSC 848/CSC 648 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 650 Secure Networked Systems (Units: 3)
Prerequisites: CSC 415 with a grade of C or better or consent of instructor.

Analysis, planning, construction, and operation of secure networked computing systems: security for environments within Internet, encryption, assets, risk, authentication, trust, controls, defense, routers, firewalls, law, ethics. Extra fee required.

CSC 651 System Administration (Units: 3)
Prerequisites: CSC 413, CSC 415, with grades of C or better.

User administration. Operating system installation, tuning, and control. Network administration. Security management. Performance tuning and management. Extra fee required. (ABC/NC grading only)

CSC 656 Computer Organization (Units: 3)
Prerequisite: CSC 415 (may be taken concurrently) or consent of instructor.

CSC 658 Programming Cafe (Units: 3)
Prerequisites: CSC 413 with a grade C or better or consent of instructor.

Extensive programming practice to advance programming skills and processes; pair programming exercises; code review techniques and practice.

CSC 664 Multimedia Systems (Units: 3)
Prerequisite: CSC 413 with a grade of C or better.

Comprehensive topics in multimedia such as basics of image and video processing, compression, multimedia databases, standard, synchronization, formats in perspective of systems and algorithms. Extra fee required. (Plus-minus letter grade only)

CSC 665 Artificial Intelligence (Units: 3)
Prerequisite: CSC 413 with a grade of C or better.

CSC 667 Internet Application Design and Development (Units: 3)
Prerequisite: CSC 413 with a grade of C or better or consent of instructor.

Fundamental technologies on which WWW is based. Extra fee required. (CSC 867/CSC 667 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 668 Advanced Object Oriented Software Design and Development (Units: 3)
Prerequisites: Senior or graduate standing; CSC 413 with a grade of C or better; or consent of instructor.

Object oriented analysis and design utilizing UML, design patterns, frameworks and toolkits; Agile software design processes. Development of a mid-size programming project working in teams. (Plus-minus letter grade only)

CSC 671 Neural Networks (Units: 3)
Prerequisite: CSC 510 with a grade of C or better.

Artificial neural networks: associative memories, learning, search, databases, fuzzy set techniques, pattern recognition, and adaptive processing. (CSC 871/CSC 671 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 675 Introduction to Database Systems (Units: 3)
Prerequisite: CSC 413 with a grade of C or better.

Relational query languages. Semantic data models. Logical and physical database design. Privacy issues. Implementation techniques (catalogs, query optimization, concurrency control, security and integrity enforcement). Extra fee required. (CSC 775/CSC 675 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 690 Interactive Multimedia Application Development (Units: 3)
Prerequisite: CSC 340 with a grade of C or better or consent of instructor.

Basics of multimedia data formats and algorithms to build applications using non-standard interfaces such as game controllers and multi-touch surfaces. (Plus-minus letter grade only)

CSC 693 Cooperative Education Program (Units: 6-12)
Prerequisite: Upper division standing or consent of instructor.

Units do not count toward the major. May be repeated for a total of 24 units. Contact the Cooperative Education office for information. (CR/NC grading only)

CSC 694 Cooperative Education: Computer Science (Units: 1-3)
Prerequisite: Consent of instructor.

Projects undertaken in a business, government, or industrial position of at least one semester's duration.

CSC 695 Computing in the Community (Units: 2)
Prerequisites: Junior or senior standing; computer experience; consent of instructor.

Extensive fieldwork training Bay Area non-profit agencies in the use of computer tools such as conferencing and database systems. Development of user documentation. (CR/NC grading only)
CSC 697 Senior Project in Computer Science (Units: 3)
Prerequisites: CSC 415 and CSC 510, or CSC 648, or consent of instructor.
Culminating experience in individual design, implementation, and professional documentation of a software product under close supervision of a faculty member.

CSC 698 Topics in Computing (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Current topics in computer hardware/software technologies. Topic to be specified in the Class Schedule. May be repeated when titles vary.

CSC 699 Independent Study (Units: 1-3)
Prerequisites: Consent of department and instructor. An approved study proposal must be on file by the time of registration.
Library and laboratory research projects. Final report must be approved by the instructor and filed with the department.

CSC 720 Advanced Operating Systems (Units: 3)
Prerequisites: Satisfaction of Written English Proficiency Level I or concurrent enrollment in SCI 614, CSC 415 with a grade of B or better, or consent of instructor.
Analysis of scheduling and memory management algorithms, use of concurrent languages for systems development and distributed systems. Design and implementation of major components of an operating system. Extra fee required.

CSC 730 Advanced Database Systems (Units: 3)
Prerequisites: CSC 413, CSC 675, with grades of C or better.
Standard SQL, query optimization, concurrency control, crash recovery, authorization and integrity enforcement; object-oriented, extensible, deductive, and/or distributed database systems. Extra fee required.

CSC 743 Computer Networks (Units: 3)
Prerequisite: CSC 415 with a grade of C or better.
Computer network design, evaluation, and testing. Computer network standards and implementation. Hardware/software design and compatibility issues. Extra fee required.
(CSC 743/CSC 645 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 746 High-Performance Computing (Units: 3)
Prerequisite: CSC 656 with a grade of B or better or consent of instructor.

CSC 775 Introduction to Database Systems (Units: 3)
Prerequisite: CSC 413 with a grade of C or better.
(CSC 775/CSC 675 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 780 Application Development for Mobile Devices (Units: 3)
Prerequisite: Restricted to senior or graduate students in Computer Science; CSC 415 with a grade of B or better; or consent of instructor.
Introduction to and comparison of different popular mobile application frameworks; conceptual and hands-on experience in writing mobile applications using native and cross-platform tools. (Plus-minus letter grade only)

CSC 810 Analysis of Algorithms II (Units: 3)
Prerequisites: Passing score on GET or concurrent enrollment in SCI 614, CSC 510 with a grade of B or better.

CSC 820 Natural Language Technologies (Units: 3)
Prerequisite: CSC 413 with a grade of C or better or consent of instructor.
Natural language parsing technology and grammars. Elements of computational semantics, discourse structure, and generation. Survey of related topics such as information retrieval, question-answering, machine translation, speech processing. Extra fee required. (Plus-minus letter grade only)
(CSC 820/CSC 620 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 821 Biomedical Imaging & Analysis (Units: 3)
Prerequisites for CSC 821: Graduate standing; CSC 510, MATH 325, with grades of C or better or consent of instructor.
Prerequisites for CSC 621: CSC 510, MATH 325, with grades of C or better.
Introduction to medical and biological imaging, imaging physics, 3D, image formats, visualization. Basic digital image processing and analysis, filtering, registration, segmentation, quantification, performance evaluation. (Plus-minus letter grade only)
(CSC 821/CSC 621 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 825 Advanced Automata Theory (Units: 3)
Prerequisite: CSC 520 or equivalent.
Advanced topics in theoretical computer science and their application to a broad range of areas including bioinformatics, compilers, data and image compression, natural language processing, networking and Web applications. Extra fee required. (Plus-minus letter grade only)

CSC 830 Advanced Computer Graphics (Units: 3)
Prerequisite: CSC 630 or consent of instructor.
Roster graphics principles and scanning algorithms, pixel fill algorithms, anti-aliasing, clipping, hidden line, and surface display, rendering of surfaces and fractal techniques. Extra fee required.

CSC 831 Multiplayer Game Develop (Units: 3)
Prerequisite: CSC 413 or consent of instructor.
Computer graphics and network characteristics of multiplayer games. Design and development of a game as a team project.
(CSC 831/CSC 631 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 835 Distributed Systems (Units: 3)
Prerequisite: CSC 415 with a grade of B or better or consent of instructor.
Introduction to the concepts and design of distributed systems. Includes term project in using current middleware technologies. Extra fee required.
CSC 837 Advanced Sound Synthesis (Units: 3)
Prerequisite: CSC 637 with a grade of B or better or consent of instructor.
Current algorithms and practices in sound synthesis and timbral control for music, sound effects, and interactive environments. Design of real-time software synthesis systems. Extra fee required.

CSC 840 Software Metrics and Quality Assurance (Units: 3)
Prerequisite: CSC 648 or consent of instructor.

CSC 841 Computer Performance Evaluation (Units: 3)
Prerequisite: CSC 415 or consent of instructor.
Computer performance analysis problems related to system design, selection, and tuning. Modeling using stochastic and operational queuing models. Workload characterization, design, and performance measurement methods. Design of simulation models for computer systems. Extra fee required. (Plus-minus letter grade only)
(CSC 841/CSC 641 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 842 Advanced Human-Computer Interaction (Units: 3)
Prerequisite: Classified standing in graduate program.
Design, implementation, evaluation of human/computer interfaces. Topics include those covered in CSC 642; however, emphasis is placed on HCI with respect to culminating experience work. Extra fee required. (Plus-minus letter grade only)

CSC 845 Advanced Computer Networks (Units: 3)
Prerequisites: CSC 645, CSC 720, or consent of instructor.
Current design and implementation techniques for development and analysis of high-performance network protocols. Strategies appropriate for Internet use (i.e., TCP/IP based). Extra fee required.

CSC 846 Systems Architecture (Units: 3)
Prerequisite: CSC 656 with a grade of B or better or consent of instructor.
Principles of computer systems architecture with an emphasis on hardware/software interactions for large applications and design for performance. Extra fee required. (Plus-minus letter grade only)

CSC 848 Software Engineering (Units: 3)
Prerequisite: CSC 413 with a grade of C or better or consent of instructor.
Practical methods and tools for SW engineering, including organizational teamwork.
(CSC 848/CSC 648 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 849 Search Engines (Units: 3)
Prerequisite: CSC 413 or consent of instructor.
Introduction to the internals of modern search engines. Methods and tools for representation, storage, organization of, and access to textual data. (Plus-minus letter grade only) Extra fee required.

CSC 850 Compiler Design (Units: 3)
Prerequisites: CSC 413 with a grade of B or better and consent of instructor.
Design and implementation of compilers including lexical scanners, top down and bottom up parsers, precedence grammars, symbol table manipulation, LR (k) grammars, semantics routines, and code generators. Extra fee required.

CSC 856 Advanced Computer Architecture (Units: 3)
Prerequisites: Satisfaction of Written English Proficiency Level I or concurrent enrollment in SCI 614, CSC 656 with a grade of B or better, or consent of instructor.

CSC 857 Bioinformatics Computing (Units: 3)
Prerequisites: Graduate standing in science program; CSC 858; or consent of instructor.
Broad range of topics in computational biology as practiced in the life science industry and leading research organizations. Provides computational background required to participate in R&D. Extra fee required.

CSC 858 Foundations of Biotechnology and Life Sciences (Units: 3)
Prerequisite: Graduate standing in science program in the College of Science and Engineering.
Covers foundations in biotechnology and life sciences. Prepare for further study and careers in biotechnology and computational life sciences R&D and industry. Students do not need background in life sciences or biology.

CSC 864 Multimedia Systems (Units: 3)
Prerequisite: CSC 413 with a grade of C or better.
Comprehensive topics in multimedia such as basics of image and video processing, compression, multimedia databases, standard, synchronization, formats in perspective of systems and algorithms. Extra fee required. (Plus-minus letter grade only)
(CSC 864/CSC 664 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 867 Internet Application Design and Development (Units: 3)
Prerequisite: CSC 413 with a grade of C or better or consent of instructor.
Fundamental technologies on which WWW is based. Extra fee required.
(CSC 867/CSC 667 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 868 Advanced Object Oriented Software Design and Development (Units: 3)
Prerequisites: Senior or graduate standing; CSC 413 with a grade of C or better; or consent of instructor.
Object oriented analysis and design utilizing UML, design patterns, frameworks and toolkits; Agile software design processes. Development of a mid-size programming project working in teams. (Plus-minus letter grade only)
(CSC 868/CSC 668 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

1473
CSC 869 Data Mining (Units: 3)
Prerequisites: CSC 510, CSC 675, with grades of C or better, or consent of instructor.
Knowledge discovery process; basic data mining concepts; key mining algorithms, data mining in practical domains such as bioinformatics. (Plus-minus letter grade only)

CSC 870 Computational Discrete Geometry (Units: 3)
Prerequisites: CSC 210, CSC 230, MATH 325, or consent of instructor.
Comprehensive overview of basic topics in computational discrete geometry: generating functions, complexity theory, convex hull, nearest-neighbor problems, efficient algorithms, etc. (This course is offered as MATH 870 and CSC 870. Students may not repeat the course under an alternate prefix.)

CSC 871 Neural Networks (Units: 3)
Prerequisite: CSC 510 with a grade of C or better.
Artificial neural networks: associative memories, learning, search, databases, fuzzy set techniques, pattern recognition, and adaptive processing. (CSC 871/CSC 671 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CSC 872 Pattern Analysis and Machine Intelligence (Units: 3)
Prerequisites: CSC 510, CSC 520, with grades of C or better, or consent of instructor.

CSC 875 Advanced Topics in Database Systems (Units: 3)
Prerequisite: CSC 675 with a grade of C or better.
Advanced aspects of selected topics in database systems. Topics depend on availability of staff and facilities. May be repeated for a total of 6 units when topics vary.

CSC 890 Graduate Seminar (Units: 3)
Prerequisite: Consent of graduate adviser/instructor.
Topic to be specified in Class Schedule. May be repeated when topics vary. The 1 unit version is offered each semester as a graduate research seminar that students must complete prior to CSC 895/CSC 898. (Plus-minus letter grade only)

CSC 893 Supervised Industrial Research (Unit: 1)
Prerequisite: Consent of instructor.
Supervised computer science employment in software research and development area. Objectives are career development and occupational experience. May be repeated for a total of 3 units. Subsequently, may be repeated on CR/NC basis. Must be approved by graduate adviser.

CSC 895 Applied Research Project (Units: 3)
Prerequisite: Consent of instructor and approval of Advancement to Candidacy (ATC) for the MS in CS and Culminating Experience (CE) forms by Graduate Studies. Advancement to candidacy and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

CSC 897 Research (Units: 3-6)
Prerequisite: Consent of Computer Science Department.
Independent and original investigation under supervision of a faculty member. May be repeated for a total of 6 units.

CSC 898 Master’s Thesis (Units: 3)
Prerequisites: Consent of instructor and graduate adviser and approval of Advancement to Candidacy (ATC) for the Master of Science in Computer Science and Culminating Experience (CE) forms by Graduate Studies. Advancement to Candidacy (ATC) and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

CSC 899 Independent Study (Units: 1-3)
Prerequisites: Approval of department and instructor.
Special study of a particular problem under the direction of a faculty member. The student must present a written, detailed report of the work accomplished to the staff of the department. May be repeated for a total of 6 units. (AB/NC only)
Consumer and Family Studies (CFS)

CFS 312GW Families, Individuals, and Environments - GWAR (Units: 3)
Prerequisites: Family and Consumer Sciences major; ENG 214 or equivalent with a grade of C- or better.

Family Consumer Sciences through understanding common knowledge base from the study of apparel design/merchandising, child/family development over the life span, foodservice management/nutrition, interior design/housing, and resource management. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment

CFS 320 Children and Families (Units: 3)
Prerequisite: Upper division standing.

Growth, development, and enculturation of the child within the family setting through adolescence; intra-family relationships; parent-child relations. Environmental influences affecting children's cognitive, emotional, social, and physical development. Participation in action project involving children.
Course Attributes:
• UD-D: Social Sciences

CFS 321 Adolescents and Families (Units: 3)
Prerequisite: Upper division standing.

Growth and development of children from middle childhood through adolescence; patterns of maturation and individual differences. Parent-child interactions; transition from family-centered toward peer-centered environment. Problems confronting adolescents in contemporary society.

CFS 322 Early Childhood Education Curriculum (Birth to Five) (Units: 3)
Prerequisite: CFS 320 or equivalent.

Activities and learning materials that facilitate cognitive, emotional, social, physical, language, and creative development of children from birth to five: art, music, language arts, science, and dramatic play. Observing and recording children's behavior.

CFS 323 Infants/Toddlers and Families (Units: 3)
Prerequisite: Restricted to upper division Family and Consumer Sciences or Child and Adolescent Development major.

CFS 324 Administration of Infant/Toddler Programs (Units: 3)
Prerequisites: ENG 114 or equivalent, CFS 323.

Administration and supervision of group programs to provide quality care for infants and toddlers. Caregiving to support the development of attachment, perception, motor skills, cognition, language, social skills, feelings, and a sense of self in a safe and healthy environment.

CFS 325 Transitions in the Family Life Cycle (Units: 3)
Prerequisite: Restricted to upper division Family and Consumer Sciences major.

Transitions in relations throughout the family life cycle; dynamics of family interactions within family systems. Divorce, remarriage, step families and related issues. Implications of recent research for personal and family decisions. Role of marriage and family professionals.

CFS 351 Asian Food, Culture, and Hospitality (Units: 3)
Prerequisite: ENG 214.

Asian cultures and food preferences as they relate to eating habits; the influences of social, economic, and religious factors; Asian foods as herbs and medicinal uses; etiquette and cultural aspects of dining preferences for pleasurable eating. (This course is offered as HTM 351 and CFS 351. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-C: Arts and/or Humanities
• Am. Ethnic & Racial Minorities

CFS 352 Principles of Food Preparation (Units: 3)
Prerequisites: Upper division standing, ENG 214 or equivalent.

Standards and techniques in food preparation with an emphasis on factors affecting the quality of food. Practical experience in food production in accordance with food standards, sanitation, and safety. Classwork, 2 units; laboratory, 1 unit. Extra fee required.
Course Attributes:
• UD-B: Physical Life Science

CFS 355 Nutrition for Wellness (Units: 3)
Prerequisites: Upper division standing and consent of instructor.

Reliable and unreliable health information sources, present research and current controversies on common health problems and dietary interrelationships.
Course Attributes:
• UD-B: Physical Life Science

CFS 356 Foods and World Culture (Units: 3)
Prerequisite: Upper division standing.

Art and science of foods and their consumption in relation to historical, national, geographical, racial, and religious customs. Distinctive cuisine of various cultures. Evaluation of dietary habits in relation to nutritional needs of individuals.

CFS 420 Assessment and Observation with Children (Units: 3)
Prerequisite: CFS 320 or equivalent.

Interpretation, evaluation, and practice of measurement and assessment tools used with children, including observation techniques and standardized tests.

CFS 423 Administration of Programs for Young Children (Units: 3)
Prerequisites: CFS 320, CFS 323 or equivalent.

Organization, administration, development, and evaluation of programs serving young children in group settings: philosophy, program design, staffing, licensing, housing, equipment, funding, and parent involvement.
CFS 424 Supervised Experiences with Young Children (Units: 3)
Prerequisites: Restricted to Family and Consumer Sciences major; CFS 320, CFS 322, CFS 323.
Observation and participation in guiding learning experiences in early childhood settings. Developing, using, and evaluating educational activities for young children.

CFS 426 Family Crises: Drug Dependency and Eating Disorders (Units: 3)
Prerequisite: Upper division standing.
Crisis and crisis intervention theories; common disruptions in family experience; alcohol/drug dependency and eating disorders; codependency; new directions in solutions that re-establish family functioning.

CFS 428 Children and Families with Violence, Abuse, and Neglect (Units: 3)
Prerequisite for CFS 728: Graduate standing or consent of instructor. Prerequisite for CFS 428: Restricted to upper division students in Family and Consumer Sciences or Child and Adolescent Development program.
Child and family violence, abuse, and neglect throughout the life cycle with a cross-cultural focus; family patterns of victimization; profiles of victims and perpetrators; family and child relationship perspectives; intergenerational patterns of victimization. Intervention issues and services. (CFS 728/CFS 428 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CFS 430 Management Dynamics: Life Goals and Decisions (Units: 3)
Prerequisite: Restricted to upper division Family and Consumer Sciences major.
Needs, values, goals, standards, policies, and decision-making processes central to the dynamics of managing resources in the performance of family and professional roles.

CFS 453 Nutrition in the Life Cycle (Units: 3)
Prerequisites: Restricted to graduating senior in Family and Consumer Sciences or Dietetics programs or Second Bacc Dietetics; DFM 253 or CFS 355 with a grade of C- or better.
Modification of nutritional needs with changes in the life cycle. Significance of nutrition for growth and development from conception through adolescence. Influence of nutrition on the aging process.

CFS 481 Consumer and Family Studies/Dietetics Field Experience (Units: 3)
Prerequisites: Upper division standing and consent of instructor.
Field experiences may be taken concurrently with approval. Field experience in area of emphasis. Advance course application is required. Forms can be obtained from the department office. May be repeated for a total of 6 units.

CFS 543 Sustainability in the Textile, Housing, and Food Industries (Units: 3)
Prerequisite for CFS 743: Graduate standing or consent of instructor. Prerequisite for CFS 543: Upper division standing or consent of instructor.
Sustainable principles and practices, energy and water efficiency, resource conservations, economic, health and environmental issues, rating systems applied to projects; evaluation of sustainable products and processes. (CFS 743/CFS 543 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)
Course Attributes:
  • UD-D: Social Sciences
  • Environmental Sustainability

CFS 600 Professional Development (Units: 3)
Prerequisites: Restricted to Apparel Design and Merchandising, Family and Consumer Sciences, or Interior Design graduating senior; GWAR course.
Professional roles and career opportunities. Portfolio development. Trends and issues in the fields of apparel, interior design, and family and consumer sciences using an integration of subject matter.

CFS 657 New York Fashion Study Tour (Units: 3)
Prerequisite: 6 units of course work in clothing and textiles or consent of instructor.
The New York fashion center. Guided tours of Seventh Avenue designer salons, the garment district, museums, famous retailers, and other areas influencing today's fashion.

CFS 685 Projects in Teaching of Consumer and Family Studies/Dietetics (Units: 3)
Prerequisites: Upper division standing in Consumer and Family Studies/ Dietetics; approval of supervising instructor; grade of B or better in course in which student will be teaching assistant.
Teaching experiences in CFS/D through assigned instructional projects in a classroom and under the guidance of a member of the faculty. Training in pedagogical principles including supervised classroom teaching activities. (Plus-minus letter grade only)

CFS 699 Independent Study (Units: 1-3)
Prerequisite: Upper division standing or consent of instructor.
Intensive study of a particular problem under direction of a member of the department. Enrollment by formal petition requiring signed approval of instructor. Advance course reservation in the department. May be repeated for a total of 6 units.

CFS 700 Seminar: Trends and Issues (Units: 3)
Prerequisite: Graduate standing in Consumer and Family Studies or Design and Industry.
Trends and issues in discipline-specific fields affecting individuals, families, and communities. Review of research; and application of findings to problems. (This course is offered as CFS 700 and DES 701. Students may not repeat the course under an alternate prefix.)
CFS 710 Family and Consumer Sciences Research Applications (Units: 3)
Prerequisites: Restricted to graduate standing in Family and Consumer Sciences; CFS 700; first level writing proficiency.
Critical analysis of existing research and the development of the culminating experience proposal.

CFS 728 Children and Families with Violence, Abuse, and Neglect (Units: 3)
Prerequisite for CFS 728: Graduate standing or consent of instructor.
Prerequisite for CFS 428: Restricted to upper division students in Family and Consumer Sciences or Child and Adolescent Development program.
Child and family violence, abuse, and neglect throughout the life cycle with a cross-cultural focus; family patterns of victimization; profiles of victims and perpetrators; family and child relationship perspectives; intergenerational patterns of victimization. Intervention issues and services. (CFS 728/CFS 428 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CFS 743 Sustainability in the Textile, Housing, and Food Industries (Units: 3)
Prerequisite for CFS 743: Graduate standing or consent of instructor.
Prerequisite for CFS 543: Upper division standing or consent of instructor.
Sustainable principles and practices, energy and water efficiency, resource conservations, economic, health and environmental issues, rating systems applied to projects; evaluation of sustainable products and processes. (CFS 743/CFS 543 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

Course Attributes:
- UD-D: Social Sciences
- Environmental Sustainability

CFS 761 Advanced Apparel Design Problems (Units: 3)
Prerequisites for CFS 761: Restricted to Family and Consumer Sciences graduate student; ADM 361, ADM 362.
Prerequisites for ADM 661: Restricted to Apparel Design & Merchandising graduating senior; ADM 361, ADM 362; concurrent enrollment in ADM 560, CFS 600.
Clothing design problems related to specific populations. Development of design prototypes based on market analyses of fashion trends. Classwork, 2 units; laboratory, 1 unit. Extra fee required. (CFS 761/ADM 661 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CFS 769 Visual Merchandising and Promotion (Units: 3)
Prerequisites for CFS 769: Restricted to Family and Consumer Sciences graduate student; ID 240, a college level drawing class.
Prerequisites for ADM 569: Restricted to Apparel Design & Merchandising graduating senior; ID 240, a college level drawing class; concurrent enrollment in ADM 560, CFS 600.
Application of principles of visual presentation in window displays, point-of-purchase, and other retail venues. Practice with equipment, materials, and techniques used in the presentation of merchandise. Principles and methods of promotion for manufacturers and retailers. (CSL may be available) (CFS 769/ADM 569 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

CFS 863 Seminar in Social Entrepreneurship (Units: 3)
Prerequisite for CFS 863: Graduate standing.
Prerequisite for MGMT 863: Restricted to graduate business student; graduate students in other majors with the consent of the Faculty Director of Graduate Programs.
Exploration of how entrepreneurial individuals and companies find innovative methods to leverage scarce resources in the pursuit of social values. Special focus on socially responsible business practices used in the apparel industry. (AB/NC grading only) [CSL may be available] (This course is offered as CFS 863 and MGMT 863. Students may not repeat the course under an alternate prefix.)

CFS 881 Internship (Units: 3-7)
Prerequisite: Graduate standing or consent of instructor.
Field experience offered in cooperation with a private/public profit or nonprofit organization that enables students to acquire competencies and experience required for fulfilling professional responsibilities. Written critique of experience required. May be repeated for a total of 6 units

CFS 891 Directed Readings in Family and Consumer Sciences/Dietetics (Units: 3)
Prerequisite: M.A. candidacy in Family and Consumer Sciences.
Directed reading under supervision of a faculty member in the department.

CFS 895 Field Study (Units: 3)
Prerequisite: Consent of instructor and approval of Advancement to Candidacy (ATC) for the Master of Arts and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NCR, RP grading option)

CFS 897 Research in Family and Consumer Sciences/Dietetics (Units: 3)
Prerequisite: Approval of department.
Research topics germane to family and consumer sciences and/or dietetics. May not be used to satisfy the 30-unit minimum for ATC. May be repeated with departmental approval. (CR/NC grading only)

CFS 898 Master's Thesis (Units: 3)
Prerequisites: Consent of instructor and major adviser; approval of Advancement to Candidacy (ATC) for the Master of Arts and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

CFS 899 Independent Study (Units: 2-4)
An intensive study of a particular problem under the direction of a member of the department. Enrollment by formal petition requiring signed approval of instructor, adviser, and department chair. Available only to students who have done previous work in the department. Must be scheduled with instructor one semester in advance. May be repeated for a total of 6 units.
Counseling (COUN)

COUN 100 Relationship Studies in College and University (Units: 3)
Examination of contemporary interpersonal relationship formation for
college and university students, from youth to adulthood. Analysis of
the impact of social networks, role models, multicultural influences,
and current family structures. Application of counseling principles to
managing life transitions.

COUN 110 Critically Thinking about Career Choice: Self, Community,
Society, and World (Units: 3)
Principles and practice of critical thinking focus on career choice and
development. Examination of personal, cultural, family and community
perspectives on work life choices. Critique of labor market information
and popular media and examination of role of work locally, societally, and
globally attending to social justice and environmental issues. (Plus-minus
letter grade only)
(Note: In order for this course to satisfy General Education, students must
earn a C- or CR or higher grade if taken fall 2014 or later.)
Course Attributes:

• E1: Lifelong Learning Develop
• A3: Critical Thinking

COUN 280 Empowering Poor Families to Graduate Out of Poverty (Units:
3)
College success course (self-directed). Consciousness and critical
thinking skills. Participation in fieldwork addressing social justice related
to wealth/poverty-health-human relation constructs/leadership in areas
of education and community health. May be repeated for a total of 6
units. [CSL may be available]
(This course is offered as H ED 280 and COUN 280. Students may not
repeat the course under an alternate prefix.)

COUN 325 Selected Problems in Counseling (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
Topic to be specified in Class Schedule. May be repeated for a total of 6
units when topics vary. [CSL may be available]

COUN 425 Advanced Peer Advising (Units: 2)
Prerequisite: COUN 325 Peer Counselor Training.
Advanced leadership, communication and peer advising skills. Students
take a meaningful role in the undergraduate orientation and/or peer
advising program. May be repeated for a total of 8 units.

COUN 450 AIDS and People of Color in the U.S. (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
The political, psychological, social, and economic impact of AIDS/HIV
infection on diverse cultural backgrounds. Prevention and educational
strategies.
(This course is offered as COUN 450, RRS 460, and SXS 460. Students
may not repeat the course under an alternate prefix.)
Course Attributes:

• UD-D: Social Sciences
• Am. Ethnic & Racial Minorities
• Social Justice

COUN 501 Behavior is Language: Strategies for Managing Disruptive
Behavior (Units: 3)
[Online Course] This course provides a developmental framework for
understanding what students are trying to tell you through the "language"
of their behavior in schools. The course teaches behavioral techniques
and intervention strategies that remediate disruptive behaviors, reduce
power struggles while increasing classroom control and reduce your
workloads and burnout. This program helps you, as well as students,
find creative, effective solutions to behavioral problems. After studying
behavioral theory and intervention strategies, you will be presented
with various classroom scenarios in which you will be able to practice
and hone your skills for interpreting behavior, determining appropriate
interventions and effectively debriefing your students.
(This course is offered as EDUC 501 and COUN 501. Students may not
repeat the course under an alternate prefix.)

COUN 502 Advanced Classroom Management in Schools (Units: 2)
Intended for school educators, counselors, psychologists serving children
with behavior problems in class.
Cognitive and cognitive-behavioral concept/strategies interventions.
Emphasis on students managing/changing their own behavior.
(This course is offered as EDUC 502 and COUN 502. Students may not
repeat the course under an alternate prefix.)

COUN 605 Peer Counseling Skills Seminar (Units: 3)
Prerequisite: Concurrent enrollment in COUN 606.
Peer counseling training: counseling methods and techniques, practice,
and supervised field placements. (ABC/NC grading; CR/NC allowed) [CSL
may be available]

COUN 606 Introduction to Peer Counseling Skills (Units: 3)
Prerequisite: Concurrent enrollment in COUN 605.
Clinical processes to help individual students learn listening, responding,
interpretation, decision-making, program development, implementation,
and evaluation skills. May be repeated for a total of 6 units. [CSL may be
available]

COUN 607 Advanced Peer Counseling Seminar (Units: 3)
Prerequisites: COUN 605, COUN 606.
Peer counselor training: methods, techniques, practice, and supervised
field placement. May be repeated for a total of 6 units. [CSL may be
available]

COUN 608 Advanced Peer Education Internship (Units: 3)
Prerequisites: COUN 605, COUN 606, or consent of instructor.
Students develop, plan and provide workshops and other forms
of outreach and prevention education on topics of sexual assault,
substance abuse, sexuality, and HIV/AIDS. May be repeated for a total of
6 units. [CSL may be available]

COUN 630 Legal Center Training I (Units: 3)
Prerequisites: Upper division standing, consent of instructor.
Interviewing and legal information to function appropriately in the Legal
Center 3-4 hours per week.

COUN 631 Legal Center Training II (Units: 3)
Prerequisites: Upper division standing; COUN 630; consent of instructor.
Practice in interviewing skills and additional legal information for staffing
the Legal Center 4 hours per week.
COUN 632 Student Leadership Development (Units: 3)
Prerequisite: Must hold current student organization or government leadership position.
Leadership and leadership styles: analysis and observations of others’ leadership.

COUN 690 Field of Counseling I (Units: 3)
Prerequisite: PSY 200 or graduate status or consent of instructor.
Professional identity for career, college, marriage and family, rehabilitation, school, gerontological counseling. Career decision-making, mid-life, career change, pre-retirement guidance, and mental illness. Computer technology and counseling. History, ethics, and self-awareness. (Plus-minus letter grade only)

COUN 691 Multicultural Human Relations (Units: 3)
Prerequisite: Upper division standing.
Psychosocial perspectives on attitudes, knowledge, and insights essential to effective multicultural relationships and the examination of culture as it relates to ethnicity, gender, physical and learning abilities, race, sexual orientation, and class. (Plus-minus letter grade only)

COUN 699 Independent Study (Units: 1-3)
Prerequisite: Upper division standing or consent of instructor.
Intensive study of a particular problem under direction of a department member. Enrollment by petition approved by the instructor, advisor, and department chair. Open to enrolled students only. May be repeated for a total of 6 units. [CUL may be available]

COUN 700 Theories of Counseling and Psychotherapy (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; approved undergraduate course in personality theories.
Theories of counseling and personality. Counseling process and practice relating to major approaches; therapeutic practices with illustration of relevant techniques and cases. (Plus-minus letter grade only)

COUN 702 Developmental Foundations for Counselors (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, Clinical Mental Health Counseling and Rehabilitation Counseling; approved undergraduate course in lifespan human development.
Theories of human development and learning; adaptive behavior to normal development and congenital and traumatic disability; dynamics of family, home, and societal influences and implications for counseling. (Plus-minus letter grade only)

COUN 703 Psychological Foundations for Counselors (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; undergraduate course in psychopathology or abnormal behavior.
Theories of mental health and mental illness, classification of behavior disorders, diagnosis and prognosis, psychological impairment, psychological issues related to physical disability, implications for counseling and therapeutic interventions. (Plus-minus letter grade only)

COUN 704 Psychosocial Aspects of Disability and Chronic Illness (Units: 3)
Prerequisites: Restricted to classified graduate students in Clinical Mental Health Counseling.
Exploration of psychological and social aspects of disability and chronic illness. Definitions and models of disability and chronic illness, societal response, environmental factors, and individual response to disability and chronic illness. Impact of disability and chronic illness on the family. Adjustment to disability and cultural issues. (Plus-minus letter grade only)

COUN 705 Counseling Practicum (Units: 3)
Prerequisite: Contracted with an approved field training site. Students must be matriculated as graduate students in the counseling department at SF State. COUN 702 (may be concurrently enrolled). Must be taken concurrently with COUN 706.
Initial practicum experience. Clinical interviewing skills. Development of clinically and culturally competent interviewing, assessment and intervention skills that reflect an integration of a counselor’s understanding of oneself and others as well as the integration of counseling theories that inform interventions. (CR/NC grading only) [CUL may be available]

COUN 706 Counseling Skills and Process (Units: 3)
Prerequisites: Students must be matriculated as graduate students in counseling department at SF State; COUN 702 (may be taken concurrently); must be taken concurrently with COUN 705. Must earn a grade of B or better. Contracted with an approved field training site.
Development of self-awareness, knowledge, and skills as the relate to clinical interviewing. Development of basic clinical skills in relationship to the design of client intervention, including interviewing, rapport building, assessment, case conceptualization, crisis management. Development of basic sense of self in clinical interviewing; individual growth in clinical process. (Plus-minus letter grade only) [CUL may be available]

COUN 714 Writing for Counselors (Units: 3)
Prerequisite: Graduate standing in counseling or consent of instructor.
Designed to develop graduate writing skills for counseling students, strengthen writing organization and report writing, learn to integrate bibliographic sources and use APA style. May not be used to meet ATC requirement. (CR/NC only)

COUN 715 Assessment in Counseling (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.
Clinical process of testing; individual counselor’s ability to clinically analyze and interpret assessment instruments, including diagnostic tests for various counseling specializations. (Plus-minus letter grade only)

COUN 716 Professional Seminar I - Structural Elements in School Counseling (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.
Institutional structure and culture of schools, relevant laws and ethics, trends in guidance and counseling and design of comprehensive counseling programs. (Plus-minus letter grade only)
COUN 717 Professional Seminar II - Functional Elements in School Counseling (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; COUN 716.
Normative roles of school counselors in a changing world, provides skills to address issues and develop a school counseling philosophy. (Plus-minus letter grade only)

COUN 718 Professional Seminar III - Professional Issues in School Counseling (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; COUN 716, COUN 717.
Professional issues, aspects of professional identity, and development of understanding of a systems theoretical approach to working in schools. (Plus-minus letter grade only)

COUN 719 Behavior Management (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling and Psychology or School Psychology Credential Program.
Behavioral, cognitive-behavioral, and ecobehavioral theory and intervention applied to human behavior change. Primary focus on classroom behavior management. (Plus-minus letter grade only)
(This course is offered as COUN 719 and PSY 857. Students may not repeat the course under an alternate prefix.)

COUN 720 Career Counseling (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.
Dynamics of vocational choice and occupational adjustments: social learning and developmental tasks, educational and vocational information; counseling process in occupational planning. (Plus-minus letter grade only)

COUN 721 Applied Career Counseling (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; COUN 720 (may be taken concurrently).
Application of career counseling theories and techniques in individual and group career counseling. Use of career assessment in career counseling. Application of counseling to issues of well-being related career. (Plus-minus letter grade only)

COUN 727 Advanced Career Counseling (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; COUN 720.
Techniques in conducting personal career research and informational interviews; skills and knowledge necessary to establish a viable career placement center. (Plus-minus letter grade only)

COUN 735 Advanced Practicum and Internship (Units: 3)
Prerequisites: COUN 705, COUN 706, and consent of instructor. Must be taken concurrently with COUN 736.
Supervised internship for 12 hours minimum a week in appropriate clinical facilities. (CR/NC grading only) [CSL may be available]

COUN 736 Advanced Counseling Process (Units: 3)
Prerequisites: COUN 700 (may be taken concurrently), COUN 705, COUN 706. Must be contracted with an approved field training site. Enrolled counseling graduate student.
Clinical counseling case analysis; individual counselor growth assessment, management, and disposition of clients. Second semester of field placement. Rehabilitation Counseling students must take section with a CRC. Career and College Counseling students may take COUN 736 prior to completing COUN 703. Must earn grade of B or better. (Plus-minus letter grade only) [CSL may be available]

COUN 737 Psychopharmacology in Counseling (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.
Introduction to the psychopharmacology of mental disorders and to psychiatric medications; major classes of psychiatric medications and their side effects. (CR/NC grading only)

COUN 738 Addictions (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.
Dynamics, behaviors, biochemical processes, and treatment interventions related to addictions, including chemical, behavioral, and psychological. Recovery models emphasized. Legal and cultural factors incorporated.
(Plus-minus letter grade only)

COUN 741 Crisis Counseling for Counselors (Units: 3)
Prerequisites: Graduate standing; preference to SF State counseling graduate students.
Current theories and practice related to trauma and crisis intervention. Focused on impact of crises and other traumatic events and basic intervention counseling strategies for helping survivors make meaning of their experiences to envision new possibilities. (Plus-minus AB/NC grading only)

COUN 792 Seminar for Counselors in Student Personnel Services (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.
Organization, management, and delivery of college student services: organizational theory, management strategies and styles, program development, management, implementation, evaluation. (Plus-minus letter grade only)

COUN 793 Organization and Administration of Student Services in Higher Education (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.
Seminar in organization and management of college student services: organizational theory; development, structures; management strategies and styles, decision making, management by objectives, administrative models; staff development; evaluation; accountability, budget planning, management; program development, evaluation; legal issues. (Plus-minus letter grade only)
COUN 794 Seminar in Research (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.

Identification and analysis of research problems related to health and human services; research methodology and techniques, including designs appropriate to clinical research problems including critique and interpretation of research reports. (Plus-minus letter grade only)

COUN 811 Group Counseling Process (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; COUN 706.

Instruction in group counseling dynamics: clinical analysis of group counseling sessions conducted by students. Focus on professional growth as a group counselor. (Plus-minus letter grade only)

COUN 820 Counseling the Older Adult (Units: 3)
Prerequisite: Graduate standing or consent of instructor.

Individual and group counseling; couples and family counseling with the older adult; sexuality, lifestyle, and economics of older adults. (Plus-minus letter grade only)

COUN 827 The Consultation Process (Units: 1-3)
Prerequisite: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, Clinical Mental Health Counseling, and psychology.

Dynamics of the consultation process; implications for various specialists in developing effective working relationships with teachers and parents.

COUN 833 Social and Cultural Foundations in Counseling (Units: 3)
Prerequisite: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.

Self-examination, knowledge expansion and skill building regarding multiple dimensions of culture - race, ethnicity, gender, sexual orientation, socioeconomic status, physical and learning abilities. Exploration of systems of privilege, oppression, the cultural assumptions of counseling, the role of the counselor as change agent. (Plus-minus letter grade only)

COUN 840 Wellness, Recovery and Psychosocial Rehabilitation in Social Work and Mental Health (Units: 3)
Prerequisites: Restricted to graduate students in Social Work program; S W 810 or mental health experience; and consent of instructor.

Examination of concepts and practices of wellness, recovery, psychosocial rehabilitation and system transformation in community mental health. Critical review of diagnostic and treatment issues, disability, healing, and services throughout the lifespan. (Plus-minus letter grade only)
(This course is offered as S W 840 and COUN 840. Students may not repeat the course under an alternate prefix.)

COUN 850 Second Specialization Internship (Units: 1-3)
Prerequisite: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; and consent of Field Placement Coordinator.

Internship for individuals who are not in a practicum and need university monitoring to accrue hours. May be repeated for a total of 9 units. (CR/NC grading only) [CPL may be available]

Prerequisite: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.

Legal and ethical responsibilities of counselors: confidentiality, privilege, reporting; legal obligations regarding professional practice and liability; professional codes of ethics; laws relating to minors, marriage, and the family; child abuse assessment and intervention; partner violence assessment and intervention. (Plus-minus letter grade only)

COUN 858 Couple and Family Counseling I (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; COUN 700, COUN 706.

Major theoretical approaches: analytic, behavioral, systems, intergenerational, and existential. Reading, demonstrations, activities emphasize working with couples. (Plus-minus letter grade only)

COUN 859 Counseling Aspects of Sexuality (Units: 2)
Prerequisite: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling.

Major sexual problems encountered in counseling; causes; counseling approaches; techniques and treatments; clinical implications including feminine orientations. Satisfies MFCC requirements for child sexual abuse and human sexuality. (Plus-minus letter grade only)

COUN 860 Couple and Family Counseling II (Units: 3)
Prerequisites: COUN 858, consent of instructor.

Applied psychotherapeutic techniques in working with families and relationships. Emphasis on direct experience working with families through simulations, demonstrations, case material. (Plus-minus letter grade only)

COUN 861 Seminar on Child Treatment (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling, Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; COUN 736.

Concepts, processes, techniques of child and adolescent treatment, crisis intervention, supportive counseling, and psychotherapeutic treatment. (Plus-minus letter grade only)
COUN 870 Case Management and Special Topics in Rehabilitation Counseling (Units: 3)
Prerequisites: Graduate standing; COUN 764, COUN 762, COUN 766; priority enrollment for Counseling graduate student.
Roles and functions of case management, case load management, and contemporary rehabilitation services beyond public vocational rehabilitation including psychiatric rehabilitation, school-to-work transition, disability management, forensic rehabilitation, insurance programs, aging and life care planning, and community-based services. (Plus-minus letter grade only)

COUN 890 Integrative Counseling and Internship (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; COUN 735, COUN 736.
Contracted with an approved field training site. Integrate and apply counseling constructs: assessment, diagnosis, treatment, planning, clinical interventions, law and ethics, and therapeutic relationships. Emphasis on professional identity as counselors. Proficiency in recovery models. Oversight of fieldwork. Must earn a grade of B or better. (Plus-minus letter grade only)

COUN 891 Case Studies and Internship Seminar (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; must be taken concurrently with COUN 892; contracted with an approved field training site.
Advanced counseling and case study analysis for counselor trainees. Multicultural counseling competence and integration of empirically based interventions. Internship supervision and coaching. Must earn a grade of B or better. (Plus-minus letter grade only) [CSL may be available]

COUN 892 Culminating Experience for Counselors (Units: 3)
Prerequisites: Restricted to classified graduate students in Counseling. Counseling: Concentration in Marriage, Family, and Child Counseling, and Clinical Mental Health Counseling; COUN 890, must be taken currently with COUN 891; contracted with an approved field training site; consent of instructor and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies.
Culminating experience paper demonstrating competent ability to apply knowledge of counseling theory to the field. Paper synthesizes knowledge, skills, and abilities learned during the course of the counseling program. Emphasizes writing a scholarly, professional paper integrating field placement experience and academic knowledge. (CR/NC/RP grading only) [CSL may be available]

COUN 899 Independent Study (Units: 1-3)
Special study under the direction of a department member. Open only to graduate students of demonstrated ability to do independent work. May be repeated for a total of 6 units.
Creative Writing (C W)

C W 101 Introduction to Creative Writing (Units: 3)
The creative writing process. Exercises in writing poetry, fiction, and
dramatic scripts. Selected readings of exemplary stories, poems, and
plays. Open to all students.
Course Attributes:
   • E1: Lifelong Learning Develop
   • C1: Arts

C W 301 Fundamentals of Creative Writing (Units: 3)
Prerequisite: ENG 114 or equivalent. Enrollment limited to creative writing
majors; non-majors admitted with consent of instructor.
Practice in writing poetry, fiction, and plays. Required for majors.

C W 302 Fundamentals of Creative Reading (Units: 3)
Prerequisite: ENG 114 or equivalent. Enrollment limited to creative writing
majors; non-majors admitted with consent of instructor.
Students learn to read like writers through lecture-discussion and reading
assignments. Submerges the student in literature and asserts the
importance of reading.

C W 465 Modern Greek Poetry in Comparative Perspective (Units: 3)
Prerequisite: ENG 214 or equivalent.
Survey of Greece's prominent modern poets in comparison with major
Anglo-American and European poets. Poets to be studied can include
(This course is offered as MGS 465, CWL 465, and C W 465. Students may
not repeat the course under an alternate prefix.)

C W 497 Modern Greek Literature (Units: 3)
Prerequisite: ENG 214 or equivalent.
Introduction to Greece’s major modernist and postmodernist writers.
Exploration of experimental writing techniques using 20th Century
literature.
(This course is offered as MGS 497 and C W 497. Students may not
repeat the course under an alternate prefix.)

C W 506 The Business of Creative Writing (Units: 3)
Prerequisite for C W 806: Restricted to graduate student in creative
writing or consent of instructor.
Prerequisites for C W 506: Restricted to CW majors; C W 101 or C W 301
with a grade of C or better; non-majors admitted with consent of
instructor.

Covers agents, corporate and small publishing houses, E-publishing,
markets, publicity, etc. Students write letters to agents/editors, press
releases for book tours, and several short papers.
(C W 806/C W 506 is a paired course offering. Students who complete the
course at one level may not repeat the course at the other level.)

C W 507 Writing on the Body (Units: 3)
Prerequisites: Upper division standing; C W 101 or C W 301.
Concerns themes of human sexuality and gender in their psychological,
social, political, moral, and aesthetic dimensions, combined with personal
experience and personal expression. Sexual values are examined through
artistic expression and analysis of expressive works.

C W 508 Introduction to Environmental Literature (Units: 3)

studies with a concentration in humanities and the environment; second
year composition with a grade of C- or better.
Exploration of the history of contemporary environmental literature;
examination of questions of environmental stability and change,
environmental justice, human connections to the non-human world and
biological studies to discover connections between nature and writing.
Course Attributes:
   • UD-C: Arts and/or Humanities
   • Environmental Sustainability

C W 510 The Creative Process (Units: 3)
Prerequisite: C W 101 or C W 301 with grade of C or better. Enrollment
limited to creative writing majors; non-majors admitted with consent of
instructor.
Examination of creative process, emphasizing techniques, style, and
structure. Topic to be specified in Class Schedule. May be repeated when
topics vary.

C W 511GW Craft of Poetry - GWAR (Units: 3)
Prerequisites: Restricted to Creative Writing major; ENG 214 or equivalent
with a grade of C- or better; CW 301 or equivalent.
Focus on basic craft elements of poetry: diction, imagery, rhythm, voice
(ABC/NC only)
Course Attributes:
   • Graduation Writing Assessment

C W 512GW Craft of Fiction - GWAR (Units: 3)
Prerequisites: Restricted to Creative Writing major; ENG 214 or equivalent
with a grade of C- or better, C W 301 or equivalent.
Focus on basic craft elements of fiction: plot, dialogue, character, point of
view and place. Discussion of student and professional writing. (ABC/NC
only)
Course Attributes:
   • Graduation Writing Assessment

C W 513GW Craft of Playwriting - GWAR (Units: 3)
Prerequisites: Restricted to Creative writing major; ENG 214 or equivalent
with a grade of C- or better; C W 301 or equivalent.
Focus on basic craft elements of playwriting: scene, story, dialogue,
character, and conflict. Discussion of student and professional writing.
(ABC/NC grading only)
Course Attributes:
   • Graduation Writing Assessment

C W 514 Contemporary World Poetry (Units: 3)
Prerequisites: Enrollment limited to creative writing majors; C W 301 or
C W 101 with a grade of C or better; non-majors admitted with consent of
instructor.
Study of techniques and craft in a wide selection of contemporary poetry
from various cultures and nations.
(C W 814/C W 514 is a paired course offering. Students who complete the
course at one level may not repeat the course at the other level.)
C W 520 Writers on Writing (Units: 3)  
Prerequisite for C W 820: Graduate standing or consent of instructor.  
Prerequisite for C W 520: ENG 214 or equivalent; open to all students.

Faculty and visiting writers representing a range of styles and subjects read from their works and discuss their creative process with students.  
(C W 820/C W 520 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

C W 550 Poetry Center Workshop (Units: 3)  
Prerequisite for C W 850: Graduate standing in any discipline or consent of instructor.  
Prerequisite for C W 550: ENG 114 or consent of instructor; open to all students.

A poetry writing and study course aligned with The Poetry Center Reading Series, featuring guest performances throughout the semester by outstanding local, national, and international poets, writers, musicians and related artists.  
(C W 850/C W 550 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

C W 600 Special Topics in Writing (Units: 3)  
Prerequisites: C W 301 or C W 101 with a grade of C or better. Enrollment limited to creative writing majors; non-majors admitted with consent of instructor.

Intensive study of a particular area in poetry, fiction, or play writing.  
Writing projects in area of study. Topic to be specified in Class Schedule. May be repeated when topics vary. (Plus-minus letter grade only)

C W 601 Work in Progress (Units: 3)  
Prerequisite: Restricted to senior creative writing major.

Capstone course for seniors in which undergraduate final project is completed.

C W 602 Playwriting (Units: 3)  
Prerequisites: Restricted to C W major; C W 301 and C W 511GW or C W 512GW or C W 513GW; or consent of instructor

Writing and analysis of plays. Discussion of problems such as craft, aspects of voice, form, characterization, and dialogue. May be repeated for a total of 6 units. (Plus-minus letter grade only)

C W 603 Short Story Writing (Units: 3)  
Prerequisites: C W 301 and C W 511GW or C W 512GW or C W 513GW.  
Enrollment limited to creative writing majors; non-majors admitted with consent of instructor.

Writing and analysis of short fiction in a workshop setting. Lectures on craft, reading for development, and story development. May be repeated for a total of 6 units.

C W 604 Poetry Writing (Units: 3)  
Prerequisites: Restricted to creative writing majors; C W 301 and C W 511GW or C W 512GW or C W 513GW.

Writing and analysis of poetry in a workshop setting. Emphasis on poetic form, style, voice, the line, as well as rhyme, rhythm, meter, imagery and metaphor. May be repeated for a total of 6 units.

C W 605 Writing and Performing Monologues (Units: 3)  
Prerequisites: Restricted to Creative Writing, English Education, and Drama majors; TH A 130. For C W majors: C W 301, C W 511GW or C W 512GW or C W 513GW.

Workshop in creation of contemporary performance monologues. Development of original pieces through writing, performance, and critique; study of artists in the field.  
(This course is offered as TH A 605 and C W 605. Students may not repeat the course under an alternate prefix.)

C W 609 Directed Writing for B.A. Students (Units: 3)  
Prerequisite: Consent of instructor.

Apply to instructor during semester prior to desired enrollment. Preference given to majors. Individual conferences to direct the student's project in one of the creative writing forms. May be repeated for a total of 9 units.

C W 640 Transfer Literary Magazine (Units: 3)  
Prerequisite: C W 301 or consent of instructor.

Selection of original work for an undergraduate literary magazine. Book reviews, interviews, design, production, and distribution. May be used to fulfill 3 units of the creative process requirement.

C W 675 Community Projects in Literature (Units: 3)  
Prerequisite for C W 875: Restricted to graduate student in creative writing program or consent of instructor.

Prerequisites for C W 675: Restricted to creative writing major; C W 301 or C W 101 with a grade of C or better; or consent of instructor.

Students use their writing skills by doing internships with community literary organizations. May be repeated for a total of 6 units under one level. (Plus-minus letter grade only) [CWL may be available]  
(C W 875/C W 675 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

C W 685 Projects in the Teaching of Creative Writing (Units: 3)  
Prerequisites: Advanced undergraduate standing in creative writing and approval of chair; a grade of C or better in course in which student will be aide.

Students are placed with a creative writing faculty member in a supervised practicum/internship experience where they explore the theoretical and practical aspects of teaching creative writing. (Students may earn a maximum of 4 units toward the baccalaureate degree for any course(s) numbered 685 regardless of discipline.)

C W 699 Independent Study (Units: 1-3)  
Prerequisite: Consent of instructor.

Under exceptional circumstances upper division students may enroll for special work under the supervision of a member of the Creative Writing faculty. May be repeated for a total of 9 units.

C W 785 Graduate Projects in the Teaching of Creative Writing (Units: 3)  
Prerequisites: Classified graduate standing in creative writing; a grade of B or better in the course or its equivalent in which the student will be an aide; consent of instructor.

Supervised practicum/internship experience with a creative writing faculty member; exploration of theoretical and practical aspects of teaching creative writing; practice in leading group discussions and tutoring. MFA students may apply a total of 9 units toward degree; MA students may apply no more than 3 units toward degree.
C W 803 Advanced Short Story Writing (Units: 3)
Prerequisite: Restricted to graduate student in creative writing or consent of instructor.

Writing short stories, emphasizing the development of the student's creative and critical abilities. May be repeated for a total of 9 units.

C W 804 Advanced Poetry Writing (Units: 3)
Prerequisite: Restricted to graduate student in creative writing or consent of instructor.

Writing poetry with emphasis on analysis of student work and growth of critical abilities. May be repeated for a total of 9 units.

C W 806 The Business of Creative Writing (Units: 3)
Prerequisite for C W 806: Restricted to graduate student in creative writing or consent of instructor.
Prerequisites for C W 506: Restricted to CW majors; C W 101 or C W 301 with a grade of C or better; non-majors admitted with consent of instructor.

Covers agents, corporate and small publishing houses, E-publishing, markets, publicity, etc. Students write letters to agents/editors, press releases for book tours, and several short papers.
(C W 806/C W 506 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

C W 807 Developing the Novel (Units: 3)
Prerequisite: Restricted to graduate student in creative writing or consent of instructor.

Writing workshop for students in the early phases of writing a novel.

C W 808 Novel Writing (Units: 3)
Prerequisites: Restricted to graduate student in creative writing; C W 807; or consent of instructor.

Writing and analysis of longer forms of fiction. Personal consultations. May be repeated for a total of 9 units.

C W 809 Directed Writing for Graduate Students (Units: 3)
Prerequisites: Restricted to graduate student in creative writing and consent of instructor.

Apply to instructor during the semester prior to desired enrollment. Through individual conferences the student is directed in a project in one of the forms of creative writing. May be repeated for a total of 9 units. Students may register for different genres concurrently.

C W 810 Seminar in the Creative Process (Units: 3)
Prerequisite: Restricted to graduate student in creative writing or consent of instructor.

Examination of creative process, emphasizing techniques, style, and structure. Topic to be specified in Class Schedule. May be repeated for credit when topics vary.

C W 814 Contemporary World Poetry (Units: 3)
Prerequisites: Enrollment limited to creative writing majors; C W 301 or C W 101 with a grade of C or better; non-majors admitted with consent of instructor.

Study of techniques and craft in a wide selection of contemporary poetry from various cultures and nations.
(C W 814/C W 514 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

C W 820 Writers on Writing (Units: 3)
Prerequisite for C W 820: Graduate standing or consent of instructor.
Prerequisite for C W 520: ENG 214 or equivalent; open to all students.

Faculty and visiting writers representing a range of styles and subjects read from their works and discuss their creative process with students.
(C W 820/C W 520 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

C W 825 Playwright's Theatre Workshop (Units: 3)
Prerequisite: Restricted to graduate students in creative writing or consent of instructor.

Projects designed to give playwrights opportunities to refine their craft through workshops, rehearsals, readings, and dramaturgical assignments. May be repeated for a total of 9 units.

C W 840 Fourteen Hills Literary Magazine (Units: 3)
Prerequisite: Restricted to graduate student in creative writing; or consent of instructor.

Editing and publishing Fourteen Hills, the graduate literary magazine of the Creative Writing Department. Selection of material, design, production, and distribution. May be repeated for a total of 6 units.

C W 850 Poetry Center Workshop (Units: 3)
Prerequisite for C W 850: Graduate standing in any discipline or consent of instructor.
Prerequisite for C W 550: ENG 114 or consent of instructor; open to all students.

A poetry writing and study course aligned with The Poetry Center Reading Series, featuring guest performances throughout the semester by outstanding local, national, and international poets, writers, musicians and related artists.
(C W 850/C W 550 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

C W 852 MFA Workshop in Creative Nonfiction (Units: 3)
Prerequisites: Restricted to graduate student in MFA creative writing; priority enrollment given to MFA creative nonfiction students; open to other MFA genre and MA creative nonfiction students only on a space available basis, to be determined at the first class meeting.

Creation and revision of original creative nonfiction to a finished, publishable state. May be repeated for a maximum of 18 units.

C W 853 M.F.A. Workshop in Fiction (Units: 3)
Prerequisite: Restricted to graduate student in the M.F.A. in Creative Writing or consent of instructor.

Students are expected to concentrate on revision of fiction, on bringing work to a finished, publishable state. Emphasizes the short story. May be repeated for a total of 18 units.

C W 854 M.F.A. Workshop in Poetry (Units: 3)
Prerequisite: Restricted to graduate student in the M.F.A. in Creative Writing or consent of instructor.

Students are expected to concentrate on revision of poetry, on bringing work to a finished, publishable state. May be repeated for a total of 18 units.
C W 855 M.F.A. Workshop in Playwriting (Units: 3)
Prerequisite: Restricted to graduate student in the M.F.A. in Creative Writing or consent of instructor.

Students are expected to concentrate on revision of a play, on bringing work to a finished state, ready for production. May be repeated for a total of 18 units.

C W 856 M.F.A. Workshop in Short Plays (Units: 3)
Prerequisite: Restricted to graduate student in the M.F.A. in Creative Writing or consent of instructor.

Students write a series of five-minute plays, ten-minute plays, and a one-act play that may be presented in conjunction with TH A 661. May be repeated for a total of 9 units.

C W 859 Practicum in Teaching (Units: 3)
Prerequisite: Restricted to graduate student in creative writing; or consent of instructor.

Pedagogical grounding for pragmatic classroom teaching work and structure in which to work with undergraduates, under the supervision of experienced faculty and in collaboration with other graduate students.

C W 860 Teaching Creative Writing (Units: 3)
Prerequisite: Restricted to graduate student in the M.F.A. in Creative Writing or consent of instructor.

Theoretical and practical aspects of teaching creative writing. (Plus-minus letter grade only.)

C W 866 Craft of Translation (Units: 3)
Prerequisite: Restricted to graduate student in creative writing or consent of instructor.

Literary translation: the art and craft of translation. Students familiarize themselves with the best models and develop skills in their own translation.

C W 867 Theory of Translation (Units: 3)
Prerequisites: Restricted to graduate student in M.A. English: Creative Writing or M.F.A. Creative Writing; working knowledge of a language other than English.

Examination of the art of translation from a wide range of theoretical perspectives. Focus on linguistic, literary, political, and philosophical aspects of transfer of meaning between languages in an era of globalization. Evaluation of contending theories and application to the practice of translation.

C W 875 Community Projects in Literature (Units: 3)
Prerequisite for C W 875: Restricted to graduate student in creative writing program or consent of instructor.
Prerequisites for C W 675: Restricted to creative writing major; C W 301 or C W 101 with a grade of C or better; or consent of instructor.

Students use their writing skills by doing internships with community literary organizations. May be repeated for a total of 6 units under one level. (Plus-minus letter grade only) [CSL may be available] (C W 875/C W 675 is a paired course offering. Students who complete the course at one level may not repeat the course at the other level.)

C W 880 M.F.A. Craft and Process Tutorial in Fiction (Units: 3)
Prerequisite: Restricted to graduate student in the M.F.A. in Creative Writing or consent of instructor.

Examination of creative process, emphasizing techniques, style, and structure. Topic to be specified in Class Schedule. May be repeated for a total of 18 units when topics vary.

C W 881 M.F.A. Craft and Process Tutorial in Poetry (Units: 3)
Prerequisite: Restricted to graduate student in MFA in creative writing or consent of instructor.

Examination of creative process, emphasizing techniques, style, and structure. Topic to be specified in Class Schedule. May be repeated for a total of 18 units when topics vary.

C W 882 M.F.A. Craft and Process Tutorial in Playwriting (Units: 3)
Prerequisite: Restricted to graduate student in the M.F.A. in Creative Writing or consent of instructor.

Examination of creative process, emphasizing techniques, style, and structure. Topic to be specified in Class Schedule. May be repeated for a total of 18 units when topics vary.

C W 893MA Written M.A. Creative Project (Units: 3)
Prerequisites: Consent of instructor and major adviser; approval of Advancement to Candidacy (ATC) for the Master of Arts in English: Creative Writing and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

C W 893MFA Written M.F.A. Creative Work (Units: 6)
Prerequisites: Consent of instructor and major adviser; approval of Advancement to Candidacy (ATC) for the Master of Fine Arts and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration. (CR/NC grading only)

C W 899 Independent Study (Units: 1-3)
Prerequisite: Consent of instructor.

A special study is planned, developed, and completed under direction of a faculty member. Open only to graduate students of demonstrated ability to do independent work. Enrollment by petition (form available in department office).
Credit by Evaluation for Experiential Learning (CEEL)

CEEL 300 Learning From Prior Experiences (Units: 1-6)
Prerequisite: Upper division standing or consent of instructor.

Supervision in the preparation of a portfolio documenting prior learning experiences. Development and analysis of learning skills needed in the assessment of prior learning. Consideration of potential application of these learning techniques to current and future learning settings. May be repeated for a total of 6 units. For additional information, contact Advising Center. (CR/NC grading only)
Criminal Justice Studies (C J)

C J 300 Criminal Justice: A Cross-Disciplinary Perspective (Units: 4)
Prerequisites: Upper division standing; ENG 214 with a grade of C- or better; completion of any segment I Critical Thinking course with a grade of C- or better.

Analysis and critique of the contemporary criminal justice system. Includes field observation and guest lecturers. Classwork; 3 units; fieldwork; 1 unit.
Course Attributes:
• UD-D: Social Sciences
• Social Justice

C J 323GW Ethics in Criminal Justice - GWAR (Units: 3)
Prerequisites: Restricted to upper division Criminal Justice majors; C J 300 (may be taken concurrently), ENG 214 or equivalent with a grade of C- or better.

Explores ethical issues related to the institution of the criminal justice system, the professions of criminal justice, and politics intended to address crime, law, and justice. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment

C J 330GW Research Methods in Criminal Justice-GWAR (Units: 4)
Prerequisites: Restricted to upper division Criminal Justice majors; ENG 214 or equivalent with a grade of C- or better; C J 300 (may be taken concurrently).

“'Heuristics’ refers to data gathering. How, by what basic procedures, is data gathered in criminal justice? Data gathering strategies and techniques, the nature of data gathered by official, governmental agencies, and alternatives to the present arrangement. (ABC/NC grading only)
Course Attributes:
• Graduation Writing Assessment

C J 335 Legal Writing and Research (Units: 4)
Prerequisites: Upper division standing; C J 300 (may be taken concurrently), GWAR course; or consent of instructor.

The legal brief as the focus of strong inference writing in criminal justice. Classwork, 3 units; fieldwork, 1 unit.

C J 340 Comparative Criminal Justice (Units: 4)
Prerequisite: Upper division standing or consent of instructor.

Ways in which institutions of criminal justice in one society compare with those in other societies. Attention is given to U.S., British, European, Asian, and African systems. Classwork, 3 units; fieldwork, 1 unit.
(This course is offered as C J 340 and I R 341. Students may not repeat the course under an alternate prefix.)

C J 400 Police and Public Policy (Units: 3)
Prerequisites: Upper division standing; C J 300; or consent of instructor.

Scope of police activities, police administration, discretion, accountability, affirmative action, public relations, new technologies, and changing criminal procedure. Issues that the police can and should accomplish, by what rules, and under whose control.

C J 401 Criminal Profiling (Units: 3)
Prerequisites: Upper division standing; C J 300; or consent of instructor.

Analysis of the application of personality studies in homicide, arson, rape, and terrorist cases.

C J 405 Organized Crime (Units: 3)
Prerequisites: Upper division standing; C J 300; or consent of instructor.

Organized criminal enterprise recognizes no geographic, legal, or moral boundaries. Salient characteristics and impact of criminal organizations in various settings; crime control strategies.

C J 435 Race, Crime, and Justice (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Ethnic studies methods and cross-cultural perspectives examine the rise of institutions of law enforcement, juvenile and criminal justice, case studies, life histories, community service learning internships. [CSL may be available]
(This course is offered as LTNS 430 and C J 435. Students may not repeat the course under an alternate prefix.)
Course Attributes:
• UD-D: Social Sciences
• Social Justice

C J 450 Jails and Prisons (Units: 3)
Prerequisites: Upper division standing; C J 300; or consent of instructor.

Political economy of the prison industry in the U.S.; the jail as well as the prison. Field study at San Quentin and the San Francisco jails.

C J 451 The Architecture of Incarceration (Units: 3)
Prerequisites: Upper division standing; C J 300; or consent of instructor.

The connections between architectural design and management of U.S. jails and prisons.

C J 452 Criminological Theory (Units: 4)
Prerequisites: Upper division standing; completion of GE Areas A and B4 requirements [formerly GE Segment I].

Social, economic, and political context in which criminological theories (past and present) emerged and how they are reflected in legal practices. (This course is offered as SOC 451 and C J 452. Students may not repeat the course under an alternate prefix.)

C J 460 Community Corrections and Sentencing (Units: 3)
Prerequisites: Upper division standing; C J 300; or consent of instructor.

Deinstitutionalization movement within the prison industry in the U.S. Development of the scale and reach of the prison industry, incarceration rates relative to violent and non-violent offenses, incarceration rates for drug offenses, development of decentralized, community-related sentencing.

C J 461 Terrorism and Covert Political Warfare (Units: 4)
Prerequisites: Upper division standing; ENG 214 or equivalent; or consent of instructor.

Terrorism and covert political warfare as international instruments especially since World War II. The use of terror and covert political warfare and the responses to their use. (This course is offered as C J 461 and I R 361. Students may not repeat the course under an alternate prefix.)
C J 470 Juvenile Justice (Units: 4)
Prerequisites: Upper division standing; completion of GE Areas A and B4 requirements [formerly GE Segment I].

Analysis of "delinquency", emergence and administration of juvenile law, and analysis of social organizations for youthful offenders. Classwork, 3 units; fieldwork, 1 unit. [CSL may be available]
(This course is offered as SOC 462 and C J 470. Students may not repeat the course under an alternate prefix.)

C J 471 Contemporary Issues in Juvenile Justice (Units: 3)
Prerequisite: Upper division standing or consent of instructor.

Examination of the punitive turn in juvenile justice and the impact on youth. Consideration of how changing concepts of childhood, criminal behavior, and moral development impacted the juvenile court system. Analysis of how courts have responded to the punitive turn with a focus on reform and decarceration.

C J 475 Intervention Policies in Juvenile Justice (Units: 3)
Prerequisites: Upper division standing; C J 300; or consent on instructor.

Critical examination of juvenile justice treatment and intervention policies over the past 200 years. Special emphasis on contemporary systems of care and revolutionizing practices.

C J 480 California Corrections System (Units: 3)
Prerequisites: Upper division standing; C J 300; or consent of instructor.

Development of California's correctional system, among the ten largest in the world. Critical junctures, including the introduction of the convict labor system, good time, progressive penology, and the prison building boom.

C J 485 Latina/o Youth, Crime, and Justice (Units: 3)
Prerequisite: Upper division standing or consent of instructor.
